

Beyond Barnard
Annual Report
2021-2022

Dear Colleagues —

The creation of Beyond Barnard in January 2018 brought together staff from five different offices at Barnard College. We had a hypothesis: we could improve resources for Barnard students and graduates if we combined support in the areas of career exploration, campus roles, internship funding, competitive fellowships, and applications to graduate and professional school. We were trying to do something new in service to the Barnard community. Our capacity to deliver on a promise to reimagine career support depended not only on the hard work of an exceptional team but also on the decision of the community to collaborate with us in figuring out what the work would look like.

In this respect, I want to offer my deep thanks at the outset of this year's annual report — both to our incredible staff and to the students, faculty, staff, graduates, employers, families, and so many others who have contributed to the flourishing of Beyond Barnard.

In the pages that follow, you will find rich data and stories that reflect an attempt to describe the impact of Beyond Barnard on the lives of the students and graduates of the College we reach every year. Behind the scenes this year, our team also worked together with our stakeholders to chart a path forward for the next five years. Our 2022-2027 strategic plan charts an ambitious course for growth while remaining true to our mission: to support students and graduates as they define, pursue, and achieve success in their careers and communities. We know there is room to continue to grow and explore, and we are excited to continue this work into its next chapter.

The past several years have been challenging in ways that we could not have possibly foreseen in January 2018. But I hope that the work of Beyond Barnard instills confidence in the College's institutional commitment to the support of its students and graduates.

With deep gratitude for your continued support of these efforts,
