Hello faculty,

Another semester is officially in the books, and campus grows quiet for the winter interim! Now that the frenzy of finals season has winded down, we highlight funding opportunities perfectly timed for developing new projects over the winter break and prepping spring grant proposals.
In the final installation of our "AI in Higher Education" *Sage Advice Series*, we highlight Maria Newhouse's thoughtful insights on integrating generative writing tools into academic workflows. Our Featured Funder column spotlights funding opportunities for AI-related research and activities of varying disciplines. Please note that the History of American Philanthropy column is on hold through January, and we are excited to celebrate Liane's return to the column in the new year ahead!

We have news stories and brief thumbnails of opportunities coming due in February. And in the back, we have six months' worth of deadlines. (As always, check the website! Some of the later deadlines have not yet been released.) The next internal grant deadline for the 2023-2024 academic year is January 23rd, 2024 for Faculty Research Grants managed by the Provost office.

Lastly, IFSR is developing a survey to gauge faculty needs and ways we can continue to support your research and curricular endeavors. If you are interested in sharing any thoughts that could be helpful as we identify key survey priorities, we would love to hear from you at our upcoming office hours. **Drop by Friday, January 12th, any time from 10-11** to share thoughts for our survey, pitch a project, get advice on funding, or just say hi. Featured Funder: Funding Opportunities for AI-Related Research and Activities

With this month's grants newsletter featuring our last dedicated Sage Advice column to "AI in Higher Education," we sought out opportunities that could support AI-related research. Funding ranges from individual project support, to programmatic and curricular support for collaborative projects like developing AI centers.

⇒ AI for Accessibility Grants: "Microsoft supports projects that use AI to empower people living with disabilities. They are looking for individuals or teams who are not only passionate about making the world more inclusive, but also firmly rooted in the communities they intend to benefit." For this RFP, the grant program will focus on three themes: Accessibility for All, Communication and Language, and Independence and Empowerment. "Selected proposals will receive funding, Azure credits, and access to Microsoft's Accessibility Innovation resources." **Funding:** Varies for 12 month period; ***Deadline:*** *January 12, 2024*

⇒ NSF's Research on Innovative Technologies for Enhanced Learning (RITEL): This National Science Foundation opportunity supports "early-stage research in emerging technologies for teaching and learning that respond to pressing needs in authentic (real-world) educational environments. RITEL supports future-oriented exploratory and synergistic research in emerging technologies (including, but not limited to, artificial intelligence (AI), robotics, and immersive or augmenting technologies) for teaching and learning. The program accepts proposals that focus on learning, teaching, or a combination of both." **Funding:** Each project will be funded for a duration of 3 years and up to $900,000. ***Deadline:*** *January 24, 2024.*

⇒ The Humanities Research Centers on Artificial Intelligence: This program from the National Endowment for the Humanities supports "a more holistic understanding of artificial intelligence (AI) in the modern world through the creation of new humanities research centers on artificial intelligence at eligible institutions. This program is for establishing new Centers; existing Centers and Institutes are not eligible in this competition." Centers must be led by scholars in the humanities and humanistic social sciences, and focus their "scholarly activities on exploring the ethical, legal, or societal implications of AI." **Funding:** Up to $750,000 ($500,000 in outright funds plus $250,000 in Federal Matching Funds) in up to 3 year period; ***Deadline:*** *February 14, 2024*

⇒ Amazon Research Awards: While calls for the ARAs have closed for the fall, new grants are made each season that center AI research and development. "Awards are structured as unrestricted gifts to the principal investigator's academic institution or organization and as such, Amazon retains no intellectual property rights to the resulting work. Recipients are encouraged to publish outcomes and commit related code to open-source repositories." Previous grantmaking opportunities include AI for Information Security, AWS AI, AWS AI: Generative AI, and Alexa: Fairness in AI. **New calls are anticipated for early spring 2024.**

⇒ Google's Research Scholar Program: The Research Scholar Program aims to "support early-career professors who are pursuing research in fields relevant to Google, including social science research that looks at technology's implications and impacts on individuals and society." Previous funding has centered research on algorithms and optimization, machine learning and data mining, security and more. **Funding:** up to $60,000. ***Anticipated Deadline:*** *anticipated for December of 2024*

Sage Advice: Maria Newhouse's Insights on Thoughtfully Incorporating Generative AI into Writing Workflows

As grant writers, IFSR has the opportunity to be a part of a professional organization called SCAFRO (Some Corporate and Foundation Relations Officers). In November, our SCAFRO colleague Maria Newhouse, Director of Corporate and Foundation Relations at Kalamazoo College, generously offered to host a workshop and presentation titled "AI Assistants for Fundraising: Bridging Technology and Philanthropy." Maria has been a pioneer in finding ways to share developing best practices with the philanthropic community. Maria's presentation highlights a spectrum of ways we can use AI as an assistant to, rather than a stand-in for, our own creativity and production. We thought many of her insights are relevant to writing in general, but we also hope you feel empowered in the ways you could thoughtfully involve AI in your proposal writing. In our last *Sage Advice Series column for "AI in Higher Education,"* we share key takeaways from Maria's presentation:

⇒ **Identify Ways You Already Use AI:** Though generative AI is substantially more evolved than older AI models, Maria reminded us that AI is infused into many of our daily tasks. Whether it's using inbox sorting and smart replies to organize our emails, relying on music platforms to suggest songs we might enjoy based on our listening history, or social media sharing memories from past years, we engage with AI in many facets of our lives. If the unfamiliarity of generative AI intimidates you from using it in your writing process, reflecting on how AI already assists many workflows can make incorporating the technology feel more accessible.

⇒ **Identify the Ways You *Could* Use AI:** Maria prompted us to reflect on the question, "what would you do if you could simplify, expedite, or replace parts of your job that don't require a human touch?" She gave examples of how AI has assisted her in the writing process, like brainstorming ideas, generating or reframing content, A/B testing, researching trends, helping write elevator pitches, and summarizing large texts for different audiences. For example, Maria even used AI to help brainstorm title ideas for this presentation!

⇒ **Understanding the System:** Maria highlighted that understanding how systems work can guide our decisions in how to (or not to) incorporate them into workflows. Large language models (LLMs) like ChatGPT and Claude "incorporate neural networks trained on huge amounts of text to generate human-like responses." Key terms from AI communities are also useful to know. For example, while "I don't know" is a perfectly human response, Maria explained that LLMs can "hallucinate", or generate incorrect, overconfident responses out of an LLM's nature to try to please.

⇒ **Using AI for Grant Writing:** As we consider incorporating AI into our workflows, Maria encouraged trying it out in low-stakes ways first. People often have negative experiences with systems like ChatGPT or Claude because they attempt to learn while under pressure. Giving yourself room to curiously explore these systems without consequences can stimulate learning, and make the process more enjoyable! This low-stakes approach helped Maria develop a workflow that includes using LLMs to brainstorm and generate content, customize and refine responses, review information for bias and accuracy, and finalize and polish final products.

⇒ **Privacy and Data Concerns:** While LLMs like Claude don't have access to or store user data, Maria encouraged users to be thoughtful about how they are engaging Intellectual Property and unpublished work with AI. In Maria's most recent article on LinkedIn, she shared "AI shouldn't be an exception to the mindfulness you apply elsewhere. Just as you wouldn't send your social security number through email due to security reasons, extend that level of caution to AI. Consider the type of data that is input into a public chatbot, read and understand the privacy and data use policies of each system and check privacy settings regularly."

We've appreciated all of the engagement we've had during our "AI in Higher Education" series! While this is the last dedicated issue to the series, conversations don't have to stop here. If you're interested in learning more from Maria herself, check out her recent podcast feature on Connected Philanthropy. Barnard has also launched an Artificial Intelligence and Technology task force as a part of President Rosenbury's Shaping Barnard's Future Together initiative. The task force works to understand the role and opportunities of ChatGPT, generative AI, machine learning, and other technologies in the classroom and in our college operations. We also encourage you to revisit resources from Barnard's Center for Engaged Pedagogy, which we featured in September.

You Are Invited To Participate in a Pilot of Data Management and Sharing Plan Templates
By Mike Lauer, Posted **November 30, 2023**

Since March, we have engaged with The Federal Demonstration Partnership (FDP) to pilot test two Data Management and Sharing (DMS) Policy plan templates. These templates were developed in close collaboration with staff and leadership from offices across NIH, and we seek your input on them.
The feedback obtained in this phase will inform possible revisions to the current NIH DMS Plan format page. Our aim is to encourage greater consistency in DMS Plan requirements across NIH Institutes and Centers and mitigate the administrative burden associated with DMS Plan development and implementation for researchers. While the pilot was initially planned to last at least two years, we anticipate that it may continue beyond that, as we continue to learn more as the community and NIH gain more experience with the DMS policy. The policy requires a DMS Plan for all NIH-funded research. <<more>>

Allowable Costs to Improve Human Subjects Participation and Inclusion
By NIH Staff, Posted **December 4, 2023**

Did you know that you can pay for childcare for your research participants while they are doing study activities? Find similar ideas to enhance your inclusion, recruitment, or retention of research participants in NIH's new one-page tool: Allowable Costs Related to Participant Inclusion Activities on NIH Grants. The tool provides categorized examples of inclusion activities that typical NIH recipients could

charge to their grants as allowable costs.

Consult with your recipient institution to confirm whether your planned inclusion activities will be feasible in your context and fit your institution's policies, the notice of award, and the NIH Grants Policy Statement. <<more>>

Webinar Recording Available: Implementation of Simplified Review Framework for Research Project Grants
By NIH Staff, Posted **December 5, 2023**

In case you hadn't heard, NIH is implementing a simplified review framework for the majority of research project grants with receipt dates of January 25, 2025 and beyond.

The simplified review framework is designed to better focus reviewers on answering key questions necessary to assess the scientific and technical merit of proposed research, help mitigate the effect of reputational bias on peer review, and reduce reviewer burden.

Over the course of the next year, we will be sharing plenty of resources with the extramural community to help guide them through this change.

For now, take some time to review the **recording of the public webinar** held on November 3rd and read more about the simplified review framework on our website. <<more>>

Case Study in Research Integrity: This Application Feels Familiar
By Mike Lauer, Posted **November 21, 2023**

News/Grants and Fellowship Opportunities

Imagine you are reviewing an application for an NIH study section meeting, and you come across an application that seems just a bit too familiar. The scientific question falls within your wheelhouse. The methods and strategies seem spot on. And isn't that how you format your text? In this case study, we will discuss how plagiarism in the grant application process is handled at NIH and remind the research community about the importance of maintaining confidentiality of the peer review process. The scenario presented is based on real-world events, with all names and identifiers removed or changed. <<more>>

Notice to research community: Use of generative artificial intelligence technology in the NSF merit review process
By NSF Staff, Posted **December 14, 2023**

Generative artificial intelligence1 (GAI) systems have great potential to support the U.S. National Science Foundation's mission to promote the progress of science. They could facilitate creativity and aid in the development of new scientific insights and streamline agency processes by enhancing productivity through the automation of routine tasks. While NSF will continue to support advances in this new technology, the agency must also consider the potential risks posed by it. The agency cannot protect non-public information disclosed to third-party GAI from being recorded and shared. To safeguard the integrity of the development and evaluation of proposals in the merit review process, this memo establishes guidelines for its use by reviewers and proposers. <<more>>

OSTP Explores Cost of Open Access Publishing
By Lindsay McKenzie, FYI: Science Policy News, Posted **November 27, 2023**

The White House Office of Science and Technology Policy published a report on Nov. 22 that explores the impact of different mechanisms for covering the cost of openly publishing federally-funded research. The report outlines multiple challenges in calculating total article processing fees (APCs) borne by federal grantees and intramural researchers, but estimates that in 2021 the cost was roughly $378 million. <<more>>

Proposed changes to rules for policing fraud in U.S.-funded biomedical research draw a mixed response
By Jeffrey Mervis, Science Insider, Posted **November 28, 2023**

The first proposed update in nearly 20 years to U.S. rules governing research misconduct by biomedical scientists is drawing mixed reviews. The revamped rules would give universities less time to decide whether to pursue an allegation against a faculty member, require more record-keeping, and bar institutions from quickly closing a case they believe reflects "honest error." At the same time, academic administrators are pleased that the update would preserve the current definition of misconduct and streamline the process for those appealing a guilty finding. <<more>>

How this astrophysics center achieved gender parity
By Rodrigo Pérez Ortega, Science Insider, Posted **November 22, 2023**

Astronomy research is notoriously dominated by men. But in just 5 years, an Australian astrophysics center achieved gender parity, researchers report in a Nature Astronomy paper published last week. The results highlight the potential to make significant progress with thoughtful, multifaceted initiatives. <<more>>

Worries of Harm Lead to Scientific Censorship
By Johanna Alonso, Inside HigherEd, Posted **November 29, 2023**

A new paper points to an unexpected source for scientific censorship: scientists themselves.

According to the paper, published in the journal Proceedings of the National Academy of Sciences as a "perspective" piece, scientists commonly censor scientific findings for "prosocial" reasons, such as the fear that those findings could have harmful impacts, especially on marginalized groups. <<more>>

Choosing the Right Preservation Grant for Your Project: PAG and SCHC Grant Programs

New Florida law blocks Chinese students from academic labs
By Jeffrey Mervis, Science Insider, Posted **December 12, 2023**

A new state law is thwarting faculty at Florida's public universities who want to hire Chinese graduate students and postdocs to work in their labs.

In effect since July, the law prohibits institutions from taking money from or partnering with entities in China and six other "countries

News/Grants and Fellowship Opportunities

of concern." The list of banned interactions includes offering anyone living in one of those countries a contract to do research. Students could be hired only if they are granted a waiver from the state's top higher education body. But how that process would work is not clear, and the 12 public colleges and universities covered by the law are still writing rules to implement the statute. <<more>>

University of Connecticut
Humanities Institute Residential Fellowships
Deadline: February 1
"UConn Humanities Fellowships are opportunities for individuals to pursue advanced work in the humanities. Visiting Humanities Scholars, UConn Humanities Scholars, and UConn Graduate Humanities Fellowships are year-long and allow for time and space to research, write, and collaborate on work that extends and celebrates humanities scholarship. Take advantage of the time and space UCHI fellows are afforded as well as UConn's research facilities, archives, special collections, and museums with ideal proximity to Hartford, New Haven, Boston, and New York City." <<link>>

Harvard University
Woodberry Poetry Room Creative Fellowship
Deadline: February 1
"The fellowship includes: a stipend of $5,000, access to the Woodberry Poetry Room (and several other Harvard special collections), and research support from the Poetry Room curatorial staff. Thanks to the generosity of the T. S. Eliot Foundation, the fellowship recipient will also receive a one-week residency to work on their project at the T. S. Eliot House in Gloucester, Massachusetts. The Eliot House residency may be scheduled between May-October of the fellowship year, but does not have to coincide with the fellow's research visit to Harvard." <<link>>

Children's Literature Association
Faculty Research Grants
Deadline: February 1
"ChLA Faculty Research Grants have a combined maximum fund of up to $5,000 per year, and individual awards may range from $500 to $1,500, based on the number and needs of the winning applicants. The grants are awarded for proposals dealing with criticism or original scholarship with the expectation that the undertaking will lead to publication and make a significant contribution to the field of children's literature in the area of scholarship or criticism." <<link>>

Association for the Sociology of Religion
Joseph H. Fichter Research Grant Competition
Deadline: February 1
"Fichter Research Grants are awarded annually by ASR to members of the Association involved in promising sociological research on women in religion or on the intersection between religion and gender or religion and sexualities. A total of $12,000 is available to be awarded annually, and this amount is usually distributed among several of the leading applications in the year's competition. Dissertation research qualifies for funding, as does postdoctoral research by junior and senior scholars. Although these grants are open to scholars who are pursuing or currently have a Ph.D. in a range of disciplines, the proposed research must be sociological in nature." <<link>>

National Endowment for the Arts
Grants for Arts Projects
Deadline: February 9
"Grants for Arts Projects (GAP) provides expansive funding opportunities to strengthen the nation's arts and cultural ecosystem. Individuals to participate in high-quality professional development like summer institutes, conferences, seminars, travel abroad programs, or action research." <<link>>

SOCIAL SCIENCES

American Economics Association
Summer Economics Fellowships
Deadline: February 1
"Fellowships are available to senior graduate students and junior faculty who have not been fellows in the past. During their residency, fellows participate as members of the research community while engaged in a research project of their own choosing. Fellows will be mentored by experienced economists both on scientific issues, and career issues such as negotiating publications, the job market, and advancement strategies. Fellows are encouraged to present a research seminar at the sponsoring agency during their fellowship. Fellows are typically either junior faculty, postdocs or graduate students at the dissertation stage. Fellows are to be chosen by the program with the agreement of the sponsoring institution in line with the goal of advancing the participation of women and underrepresented minorities in the economics profession, the fit of a candidate with the activities of

the research group at the sponsoring institution, and the value of the proposed research to advancing the sponsoring institution's own goals." <<link>>

National Science Foundation
Perception, Action & Cognition
Deadline: February 1
"Supports theoretically motivated research aimed at increasing understanding of human perception, action and cognition and their interactions." <<link>>

National Science Foundation
Science of Organizations
Deadline: February 2
"Supports research to advance theory on the design and management of organizations; the behavior and well-being of individuals within organizations; and the relationships between people, organizations and systems." <<link>>

National Institutes of Health
Ethical, Legal, and Social Implications of Genomic Research Small Research Grant Program
Deadline: February 17
"The 2020 NHGRI Strategic Vision notes that genomics has become increasingly woven into the fabric of biomedical research, medical practice, and society and points to the continued importance of focusing on ethical, legal, and social implications (ELSI) research. As biomedical investigators are applying genomic knowledge and tools to study an expanding range of diseases and traits in a wide array of settings, novel ELSI questions continue to emerge." <<link>>

LANGUAGE AND AREA STUDIES

Center for Middle Eastern Studies
Harvard University Visiting Researcher Program
Deadline: February 1
"In the interest of promoting scholarly research in Middle East studies, the Center for Middle Eastern Studies appoints a small number of Visiting Researchers each academic year. There are three ap-

pointment types. The title Visiting Scholar may be granted to tenured and tenure-track faculty members on paid leave from other institutions. Visiting Fellows are typically specialists in the region who work outside of academia. Advanced doctoral students with funding from their home institution who wish to conduct research at Harvard University with one or more CMES faculty members may also apply for the position of Visiting Fellow. All categories of Visiting Researcher positions are unpaid." <<link>>

American Center of Oriental Research (ACOR)
Research Fellowships
Deadline: February 1
"One award of six months for use between late 2024 and December 2025, for a scholar who has a PhD or has completed their professional training. Fields of research include but are not limited to: modern and classical languages, linguistics, literature, history, jurisprudence, philosophy, archaeology, heritage studies, comparative religion, ethics, and the history, criticism, and theory of the arts. Social and political scientists are encouraged to apply." <<link>>

Harvard Center for European Studies
Visiting Scholars and Fellows Program
Deadline: February 4
"For more than five decades, the Minda de Gunzburg Center for European Studies (CES) has welcomed Visiting Scholars from Europe, the United States, and around the globe. They are chosen from a diverse and competitive pool of applications from post-doctoral social scientists and historians who are working on modern Europe. At CES, Visiting Scholars continue their research on the Harvard campus by participating in study groups, seminars, and conferences and engaging with CES faculty, graduate, and undergraduate students." <<link>>

American Institute for Yemeni Studies
Fellowships for Study and Research in Yemen
Deadline: February 8
"The American Institute for Yemeni Studies (AIYS) holds two annual competitions for fellowships supporting research on Yemen, one for U.S. citizens,

STEM

National Academies of Science, Engineering, Medicine
National Research Council Research Associateship Programs
Deadline: February 1
"The NRC Research Associateship Programs (RAP) are prestigious postdoctoral and senior research awards designed to provide promising scientists and engineers with high-quality research opportunities at federal laboratories and affiliated institutions. These programs offer a comprehensive experience, including mentorship, access to state-of-the-art facilities, and opportunities to influence government policy, all geared toward enhancing the research career development of the Research Associates." <<link>>

American Philosophical Society/NASA
Lewis and Clark Fund for Field Research in Astrobiology Grants
Deadline: February 1
"Astrobiology is the study of the origin, evolution, distribution, and future of life on Earth and in the universe. It encompasses research in, among others, the fields of astronomy, chemistry, evolutionary biology, field and population biology, geology, microbiology, molecular biology, oceanography, paleontology, and planetary science." <<link>>

Dreyfus Foundation
Camille Dreyfus Teacher-Scholar Awards
Deadline: February 1
"The Camille Dreyfus Teacher-Scholar Awards Program supports the research and teaching careers of talented early career faculty in the chemical sciences. The Award, which requires an institutional nomination, is based on an independent body of scholarship attained in the early years of their appointment (see below), and a demonstrated commitment to education, signaling the promise of continuing outstanding contributions to both research and teaching. The Camille Dreyfus Teacher-Scholar Award provides an unrestricted research grant of $100,000." <<link>>

Society for the Teaching of Psychology
Instructional Resource Award
Deadline: February 1
"The purpose of the Instructional Resource Grants is twofold: (1) to stimulate the development of teaching resource materials, and (2) to encourage instructional research relevant to the teaching of psychology at the university, college, community college, or high school level, either of which can be subsequently posted as a Teaching Resource on the STP website for interested teachers of psychology, or published in Teaching of Psychology or a similar SoTL journal." <<link>>

National Science Foundation
Cognitive Neuroscience
Deadline: February 1

Deadline: February 5
"The Research Project (R01) grant is an award

Grants and Fellowship Opportunities

made to support a discrete, specified, circumscribed project to be performed by the named investigator(s) in an area representing the investigator's specific interest and competencies, based on the mission of the NIH." <<link>>

National Science Foundation
Frontier Research in Earth Sciences (FRES)
Deadline: February 7
"Supports research on Earth systems, from the core to the critical zone, with a focus on surface, continental lithospheric and deeper Earth systems over the entire range of temporal and spatial scales." <<link>>

Society for the Advancement of Behavioral Analysis International Development Grant
Deadline: February 8
"To increase opportunities for individuals and organizations that do not have the necessary resources to communicate important behavior analytic information and knowledge on a worldwide scale." <<link>>

National Science Foundation
A Science of Science Policy Approach to Analyzing and Innovating the Biomedical Research Enterprise (SCISIPBIO)
Deadline: February 9
"Supports the development of theories, models, analytical tools, data and metrics that can inform the science of science, science policy, public outcomes and the advancement of the scientific enterprise, with a focus on the biomedical sciences." <<link>>

Burroughs Wellcome Fund
Innovation in Regulatory Science
Deadline: February 12
"BWF's Innovation in Regulatory Science Awards provides up to $500,000 over five years to academic investigators developing new methodolo-

gies or innovative approaches in regulatory science that will ultimately inform the regulatory decisions the Food and Drug Administration (FDA) and others make." <<link>>

National Science Foundation
Ocean Technology and Interdisciplinary Coordination
Deadline: February 15
"Supports development of instrumentation with broad applicability to ocean science research that enhances the observational, experimental or analytical capabilities of the ocean science research community." <<link>>

Klingenstein-Simons
Fellowship Awards in the Neurosciences
Deadline: February 15
"The Klingenstein-Simons Neuroscience Fellowship supports innovative research by early career investigators. The research should have relevance for understanding the mechanisms underlying any of a wide range of neurological and behavioral disorders, that may lead to improvements in the diagnosis and treatment of these disorders. We recognize, however, that some of the most important contributions towards disease cures can come from basic research, without an immediate understanding of their relationship to disease, and will continue our support of basic research."

Grants and Fellowship Opportunities

Institutes for Advanced Study
Women and Mathematics
Deadline: February 16
"Sponsored by the National Science Foundation, Lisa Simonyi, Institute for Advanced Study (IAS), and Princeton University Department of Mathematics, Women and Mathematics (WAM) is an annual program that aims to recruit and retain more women in mathematics. WAM aims to counter the initial imbalance in the numbers of men and women entering mathematics training as well as the higher attrition rate of female mathematicians compared to their male counterparts at every critical transition stage in mathematical careers." <<link>>

American Psychological Foundation
Dr. Christine Blasey-Ford Grant
Deadline: February 21
"The Dr. Christine Blasey Ford Grant will provide up to $1,900 to support graduate students and early career researchers conducting innovative work focusing on the understanding, prevention and/or treatment of the consequences of exposure to traumatic events such as sexual assault, sexual harassment and/or rape.

American Psychological Foundation
Trauma Psychology Grant
Deadline: February 21
"The APF Trauma Psychology Grant offers funding to support innovative work to alleviate trauma."
<<link>>

National Institutes of Health
R15
Deadline: February 25
Academic Research Enhancement Award (AREA)
<<link>>

Engineering Information Foundation
Women in Engineering Grant
Deadline: February 28
"Our grant activity supports developmental pro-jects, instructional projects, and training programs in engineering education and research that fit our fields of interest. These currently include 1) enhancing communication and use of information skills of engineering students, and 2) recruiting and retaining women in engineering. You may want to review our recent grants to give you a better idea of the kinds of projects that interest us. Click here to see how proposals will be selected. We may infrequently sponsor proposals that do not fit strictly within our guidelines." <<link>>

Simons Foundation
Fellowships in Marine Microbial Ecology
Deadline: February 29 (Must have submitted an LOI already)
"The purpose of these awards is to help launch the careers of outstanding investigators in the fields of microbial ecology, microbial biogeochemistry and/or microbial evolution in marine or natural freshwater systems, who will advance our understanding through field work, experiments, modeling or theory. Investigators must currently be active in basic research addressing fundamental questions in these fields and must focus a large fraction of their lab's effort in this area. Applicants whose research focuses on the microbiomes of animals or plants, symbioses of microbes with animals, paleoceanography, geobiology or aquatic pollution will not be considered." <<link>>

Library Science

Society of American Archivists
Fellows
Deadline: February 28
"Established in 1957, the distinction of Fellow—the highest honor bestowed on individuals by SAA—is awarded for outstanding contributions to the organization and to the archives profession. Fellows must demonstrate and represent the highest qualities of the Society as articulated in the Core Values Statement and Code of Ethics."
