Grant Opportunities & News You Can Use

Hello faculty,

Our recent heat wave has finally subsided, but fortunately another issue of our monthly grants newsletter is still on the rise. This month, we bring to you a Featured Funder column that highlights opportunities to support bringing your student researchers along for conference and research travel. For our Sage Advice column, we highlight Crappy Funding Practices, an emerging LinkedIn group challenging funding practices that many nonprofit professionals have long found as barriers to positive partnerships. Liane continues to guide us through the life and philanthropy of John D. Rockefeller with our History of Philanthropy Column.

We have news stories and brief thumbnails of opportunities coming due in August. And in the back, we have six months’ worth of deadlines. (As always, check the website! Some of the later deadlines have not yet been released.) While there are no remaining dates for Faculty Research Grants managed by the Provost’s Office for the 2023-2024, anticipated internal grant deadlines for the 2024-2025 academic year will be posted in the coming months.

As always, we will be hosting office hours where you can drop by on Friday, July 12th, any time from 10am-11am to pitch a project, get advice on funding, or just say hi. You can find us here:

Featured Funder: Student Support for Research and Conference Travel

With summer here, it’s common to be thinking about summer travel plans. The institutional funding and sponsored research team has noticed that travel and how to bring students along for that travel, particularly for research and conferences, has been top of mind for many faculty members. We always encourage faculty to be creative about the ways student travel can be factored into grant proposal budgets. We would be remiss to not mention that Beyond Barnard is always the best place to start for seeking student travel support. Beyond Barnard also maintains a thorough fellowship database that features grant and scholarship opportunities for students, including travel funding opportunities. There are also other avenues of support for students and grants available to assist with students to participate in faculty and student-led research and conference participation. Below are both internal and external opportunities that are helpful to share with your students when questions about travel arise:

Internal Funding Opportunities

⇒ Beyond Barnard/ Tow Special Professional Opportunities Fund: “Beyond Barnard supports students who are selected to attend or present at professional conferences, with particular emphasis on conferences related to major concentrations and/or chosen paths. Attendance at a range of conferences that align with student professional and intellectual interests has become an increasingly important element of the undergraduate experience. Beyond Barnard is committed to reducing the cost burden of attendance... All Barnard College students, except students who are currently or were previously recipients of Tow Special Professional Opportunities Funds, are eligible to apply for these grants... Funds are on a first-come, first-served application consideration basis.” | Funding: $250-$500; Deadline: 30 days prior to the conference start date

⇒ Lucyle Hook Travel Grants: This grant provides “funding for travel related to research for the Barnard senior thesis (endowed by a late, emerita Barnard faculty member)... Interested students should speak with Dean Siegel by early October of the senior year and obtain the Committee guidelines for application from her at that time.” | Funding: $100-$500; Deadline: Anticipated November 1, 2024

⇒ The Peter Juviler and Dennis Dalton Human Rights Fellowship Fund: “Supports summer research and internship opportunities for students studying human rights, social justice, and peace studies... Open to all students for domestic or international travel... Interested students should see Dean Siegel and/or Professor J.C. Sayler, Human Rights Program Director.” | Funding: $2,500; Deadline: Anticipated March 2025

External Funding Opportunities

⇒ Computer Science Research Conference Scholarships: “ACM-W provides support for women undergraduate and graduate students in computer science and related programs to attend computer science research conferences... This exposure to computing research can inspire a student to continue onto the next level of their academic or industry career.” | Funding: $600 for intra-continent conference travel and $1,200 for intercontinental conference travel; Deadline: August 15 2024

⇒ The Obama-Chesky Scholarship for Public Service: “The program identifies students in their third year of undergraduate studies who have a passion for public service. Over the course of two years, programming will facilitate opportunities for students to refine their values-based leadership approach, build bridges across communities, and nurture their sense of curiosity as they deepen their commitment to pursuing public service careers... including $10,000 stipend and free Airbnb housing to pursue a summer work-travel experience between their junior and senior year of college...” | Funding: Travel specific benefits of the fellowship totals up to $30,000; Deadline: Anticipated March 2025

⇒ Council on Undergraduate Research’s Social Sciences Undergraduate Conference Awards: “… for undergraduate students presenting the results of research that they have conducted at a regional or national, discipline-specific meeting (in person or virtually)... In addition, two awards will be set aside for students attending an international conference. If they are not used, they will be given to students on the waiting list.” | Funding: $200; Deadline: Anticipated February 2025
Sage Advice: Crappy Funding Practices

Last month we featured the emerging Longevity Science Foundation in our Featured Funder column. One of our favorite facts we learned in the process of profiling the Longevity Science Foundation, is their commitment to applying feedback gained from nonprofit partners to their grantmaking process. Unfortunately, not all philanthropic organizations carry this same ethos of refinement and responsiveness when it comes to the grantmaking process.

At the height of the COVID-19 pandemic, Vu Le witnessed a foundation still requiring grant applications to be printed and hand-delivered. What began as a hashtag to remind grantseekers they weren’t alone in their frustrations with concerning funding practices grew into a comprehensive list of “crappy funding practices” that founder of Crappy Funding Practices, Vu Le, deemed necessary. The list features practices such as: excessive requirements for small amounts of funding, having ridiculous character limits, making application or report due dates December 31st or January 1st, requiring grantees to pay an application fee, having nonprofits to farm for votes in popularity-based contests and 19 other practices that made the list.

Thanks to Crappy Funding Practices, when someone encounters a foundation that engages with one or more of the practices on the list, individuals are now able to anonymously report negative experiences with funders, which are then publicly shared on the LinkedIn page (after verification). This sort of “call-out” practice has garnered much praise from the nonprofit community; Crappy Funding Practices experiences increasingly growing engagement on LinkedIn with over 19,000 followers to the date of this issue. Crappy Funding Practices leans into naming foundations on their platform that have been verified to engage in poor funding practices, but the group also prioritizes celebrating organizations that are responsive for feedback and proactive about change, like their post celebrating Fairfield Community Foundation. While many have sighed a breath of relief at the gap in accountability Crappy Funding Practices has seemed to fill, the group isn’t short of critique. Crappy Funding Practices published a post citing “Why don’t you just have an adult conversation” as the far most common critique since starting their group. Directly from the stories submitted to them, some of the rationale of why Crappy Funding Practices has rendered a necessary route to transparency and accountability is that funders are often not available for a conversation, many funders aren’t listening, when they do listen their listening doesn’t go anywhere, and they are “so unaware of the power dynamics between funder and grantee that they honestly believe a lack of complaints means they’re doing a good job.”

Still, staff writer at Inside Philanthropy, Dawn Wolfe, recently profiled Crappy Funding Practices and received an overflow of engagement with people eager to share their experiences reporting and the value of Crappy Funding Practices. The article notes that while cathartic, the group may also be enacting change. In short, it’s not just about venting. Supporters of Crappy Funding Practices have praised the visibility of the inequity and power imbalance within the grantmaking process, including the hesitancy for nonprofits to decline invitations to apply to burdensome and unreasonable applications. Many have highlighted the importance of the “net grant,” or the true cost of applying for a grant—the time and resources spent on applications which can significantly reduce the value of the actual grant amount.

The Crappy Funding Practices movement may not be a silver bullet, but it’s a sign of growing frustration within the non-profit sector. Whether their public shaming tactics will ultimately be effective remains to be seen. However, by shining a light on these issues, Crappy Funding Practices is starting a conversation that could lead to a more equitable and efficient grantmaking system...with great memes along the way.
History of Philanthropy: John D. Rockefeller Part IV

Last issue, we discussed the role of Frederick Taylor Gates in the Rockefeller Foundation. Gates was arguably the man most responsible for getting John D. Rockefeller to move away from his old habit of giving out funds to whoever caught his eye to investing his charitable funds through organizations that he controlled and managed—the most famous of which, of course, was the Rockefeller Foundation.

It had been John D. Rockefeller’s intention from the start to have a charter for the foundation provided by the U.S. Congress. We have covered at various points in this column why it was so important for charitable organizations to be incorporated under U.S. law (most notably in our column on Trustees of Philadelphia Baptist Association vs. Hart’s Executors). By being incorporated, the principal at the core of the foundation was legally distinct from Rockefeller the man, meaning the organization could continue on after his death or in the event of personal misfortune or bankruptcy. A charter would allow Rockefeller to put guardrails on the use of his fortune, outlining what causes it could go to. But as for why Rockefeller wanted a charter from Congress, the only explanation I have seen is that he imagined by doing so he could turn Congress into a supervisory body, with ultimate power to check any misuse of funds. Whatever he hoped for, it didn’t come to pass. He spent four years lobbying Congress to no avail.

The problem was Rockefeller’s reputation. Rockefeller had been widely criticized for years for his business practices and labor relations, but during the early 1900s he caught the attention of one of the pioneers of investigative journalism, Ida Tarbell. Tarbell had grown up in Pennsylvania during an oil rush and knew first-hand the dangers of the business. In 1861, an oil well near her hometown exploded when a spark hit a natural gas deposit. According to witnesses, the explosion decimated an acre of land and the unlucky men working that day were enveloped in a sheet of flame, killing 18. Later that night, a burnt ruin of a man stumbled into the Tarbell house. Ida Tarbell’s mother nursed him for weeks. In later years, Tarbell recalled the stains from the burned man’s wounds that would not come out of the sheets and the smell of linseed oil to treat his injuries. Despite these experiences, her father kept working in oil, until he was driven out of business by the South Improvement Company, a company that attempted to undercut independent oil refineries by charging them above the market rate for use of railroads to ship their barrels, giving an advantage to the much larger Standard Oil.

Tarbell wrote a series of articles about Rockefeller in McClure’s Magazine, which later became the basis for her bestselling book, The History of the Standard Oil Company. Tarbell’s books sparked outrage against Rockefeller’s business practices, but it also brought a more personal scandal. In the course of her investigation, she uncovered the history of Rockefeller’s father, including the accusations of rape, grift, and bigamy against him (mentioned in our first article on Rockefeller). Up until then, Rockefeller had kept his father’s past hidden, but once Tarbell published her piece, journalists swarmed. Joseph Pulitzer offered $8,000 for anyone who could produce Rockefeller’s father, who had disappeared from sight and was living under an alias. He died safely incognito, but the period marked a low point for Rockefeller.

Not long after that, in 1911, the U.S. government bought a lawsuit against Standard Oil under the Sherman Antitrust Act, allegedly partly inspired by Tarbell’s book. This was the period when biting political cartoons of Rockefeller proliferated—Rockefeller as a giant octopus, with tentacles wrapped around the Capitol building and reaching towards the white house, Rockefeller as a king, riding a barrel of oil like a bull, Rockefeller as a choir master, leading capitalists in a song about the glory of grifting. Standard Oil was ultimately found guilty of “undue restraint of trade,” meaning that its monopolistic behavior led to higher prices, lower output, and/or lower quality. As a result, the business was broken up into 34 smaller companies, including Exxon and Mobil.

All these scandals and lawsuits were very much present when Rockefeller campaigned for a Congressional charter for his foundation, leading Congressmen to speculate that the whole foundation was a scheme for shielding his assets from the government. In 1913, he gave up and quietly got a charter for his foundation from New York State instead.

Republicans back DOD funding ban that Democrats say goes too far.”

Grant Opportunities

GENERAL INTERESTS AND CROSS-DISCIPLINARY

NSF
Perception, Action & Cognition (PAC)
Deadline: August 1
Grants and Fellowship Opportunities

“Supports theoretically motivated research aimed at increasing understanding of human perception, action and cognition and their interactions.” <<link>>

NSF
Law and Science
Deadline: August 1
“Supports social scientific studies of the connections between law and law-like systems of rules, law and human behavior, as well as studies of how science and technology are applied in legal contexts.” <<link>>

NSF
Science and Technology Studies (STS)
Deadline: August 5
“Supports historical, philosophical and social scientific studies of the intellectual, material and social aspects of STEM — including ethics, equity, governance and policy issues relating to scientific theory and practice.” <<link>>

ARTS AND HUMANITIES

The National Endowment for the Humanities
Media Projects
Deadline: August 14
“The Media Projects program supports the development, production, and distribution of radio programs, podcasts, documentary films, and documentary film series that engage general audiences with humanities ideas in creative and appealing ways. Projects must be grounded in humanities scholarship and demonstrate an approach that is thoughtful, balanced, and analytical. Media Projects offers two levels of funding: Development and Production.” <<link>>

National Endowment for the Arts
Our Town
Deadline: August 15
“Our Town is the NEA’s creative placemaking grants program. Through project-based funding, the program supports activities that integrate arts, culture, and design into local efforts that strengthen communities over the long term. Our Town projects engage a wide range of local stakeholders in efforts to advance local economic, physical, and/or social outcomes in communities. Competitive projects are responsive to unique local conditions, develop meaningful and substantive engagement in communities, center equity, advance artful lives, and lay the groundwork for long-term systems change.” <<link>>

American Musicological Society
Subventions for Publications
Deadline: August 15
“Through funding provided by the National Endowment for the Humanities, the Andrew W. Mellon Foundation, the Gladys Krieble Delmas Foundation, and the generous contributions of many individual donors, the Publications Committee of the American Musicological Society makes available funds to help with expenses involved in the publication of works of musical scholarship, including books, essay collections, articles, chapters in essay collections, special issues of journals, and works in non-print media.” <<link>>

H. Allen Brooks
Travelling Fellowship
Deadline: August 31
“The Society of Architectural Historians’ pres-
Grants and Fellowship Opportunities

Tigious H. Allen Brooks Travelling Fellowship will be offered for 2025 and will allow a recent graduate or emerging scholar to study by travel for a continuous period of three, six or twelve months. In response to the uncertainty of travel and to broaden the accessibility to applicants who may not be able to take a full year of travel, for whatever reason, the Society is amending the proposal requirements to include partial-year itineraries.”

EDUCATION

Brady Education Foundation Grants
Deadline: August 1
“The Foundation is currently accepting Research Project (RP) proposals and Existing Program Evaluation (EPE) proposals that have the potential to provide data that will inform how to address disparities in educational opportunities associated with race, ethnicity, and family income.”

NSF
Science of Learning and Augmented Intelligence
Deadline: August 7
“Supports research to develop fundamental knowledge about principles, processes and mechanisms of learning and about augmented intelligence — how human cognitive function can be augmented through interactions with others and technology.”

SOCIAL SCIENCES

The Harry Frank Guggenheim Foundation Research Grants
Deadline: August 1
“The Foundation welcomes proposals from any of the natural and social sciences and aligned disciplines that promise to increase understanding of the causes, manifestations, and control of violence and aggression. Highest priority is given to research that addresses urgent, present-day problems of violence — what produces it, how it operates, and what prevents or reduces it.”

American Foundation for Suicide Prevention Research Focus Grants
Deadline: August 1
“AFSP has set a goal to reduce our nation’s suicide rate 20%. We believe that by targeting areas known to contribute to suicide burden we can reach this goal. This Focus Grant RFA seeks applications that address potential biological, psychological, social and/or environmental pathways and interventions that can significantly reduce the national suicide rate if ultimately implemented on a large scale.”

National Science Foundation Cultural Anthropology Senior Research Awards
Deadline: August 15
“Supports research aimed at understanding patterns, causes and consequences of human social and cultural variation, including research that has implications for confronting anthropogenic problems.”

National Science Foundation Accountable Institutions and Behavior (AIB)
Deadline: August 15
“Supports theoretically motivated research on governance-related attitudes, behavior and institutions in democratic and non-democratic
settings, in areas such as preference formation and expression, voting and elections, and decision making and public policy.” <<link>>

Sociological Initiatives Foundation
Deadline: August 15
“The Sociological Initiatives Foundation supports social change by linking research to social action. It funds research projects that investigate laws, policies, institutions, regulations, and normative practices that may limit equality in the U.S. It gives priority to projects that seek to address racism, xenophobia, classism, gender bias, exploitation, or the violation of human rights and freedoms. It also supports research that furthers language learning and behavior and its intersection with social and policy questions.” <<link>>

National Science Foundation
Economics
Deadline: August 19
“The Economics program supports research designed to improve the understanding of the processes and institutions of the U.S. economy and of the world system of which it is a part. This program also strengthens both empirical and theoretical economic analysis as well as the methods for rigorous research on economic behavior. It supports research in almost every area of economics, including econometrics, economic history, environmental economics, finance, industrial organization, international economics, labor economics, macroeconomics, mathematical economics, and public finance.” <<link>>

National Science Foundation
Decision, Risk and Management Sciences (DRMS)
Deadline: August 19
“Supports research that increases understanding of how individuals, organizations and societies make decisions. Areas include judgment, decision analysis and aids, risk analysis and communication, public policy decision making and management science.” <<link>>

STEM
International Union of Biochemistry and Molecular Biology
Mid-Career Research Fellowships
Deadline: August 1
“This Fellowship program was established in response to an increased demand for further training of early-career biochemists in the Developing World. These are short-term fellowships (1 to 2 months) to enable early-career (tenure-track Assistant Professor) researchers to work in an established laboratory to learn state-of-the-art techniques that are not readily available in their own countries.” <<link>>

National Science Foundation
Research Training Groups in the Mathematical Sciences
Deadline: August 13
“Supports efforts to improve graduate student research training and professional development in mathematical sciences through structured groups pursuing collaborative research at institutions of higher education.” <<link>>

National Science Foundation
Cognitive Neuroscience
Grants and Fellowship Opportunities/ Deadline Reminders

**Deadline: August 15**
“Supports research aimed at increasing understanding of the neural mechanisms of human cognition, including attention, learning, memory, decision making, language, social cognition and emotions.” <<link>>

**Engineering Information Foundation Women in Engineering Grant Program**
**Deadline: August 31**
“Our grant activity supports developmental projects, instructional projects, and training programs in engineering education and research that fit our fields of interest. These currently include 1) enhancing communication and use of information skills of engineering students, and 2) recruiting and retaining women in engineering. You may want to review our recent grants to give you a better idea of the kinds of projects that interest us. Click here to see how proposals will be selected. We may infrequently sponsor proposals that do not fit strictly within our guidelines.” <<link>>

**American Psychological Foundation Division 39 Grant**
**Deadline: August 31**
“The Marsha D. McCary Division 39 Fund for Psychoanalysis, named for the Fund’s founder, was established to increase public awareness of the benefits of psychoanalytic principles and treatments, and the applicability of psychoanalytic thought to clinical, organizational, and social problems.” <<link>>

**Deadline Reminders**
Below are grants that are, or are expected to be, due in the next six months. For a list of grant deadlines for the whole year, please see our Grants Calendar on the Barnard website.

**GENERAL INTEREST AND CROSS-DISCIPLINARY**
Spring - Columbia University World Impact Grants (Deadline “anticipated spring 2023”)

Deadline Reminders

---

**Graphs in Chinese Buddhism**
Rolling deadline—Columbia University European Institute Faculty Research Grants

Rolling deadline—Columbia University Institute of Latin American Studies FT Faculty Research Grants

Rolling deadline—Japan Foundation Grant for Japanese Studies

Rolling deadline—Japan Foundation Grant for Art and Culture

Rolling—Baylor University Libraries Texas Collection Wardlaw Fellowship

Various—Harriman Center at Columbia University Faculty Research Support

---

**STEM**

**General Interest and Cross Disciplinary**

August 31—Engineering Information Foundation Women in Engineering Grant Program

Rolling—National Science Foundation Opportunities for Promoting Understanding through Synthesis (OPUS)

Rolling—The Franklin Institute Benjamin Franklin Medal

Rolling—National Speleological Society Research Grants

Rolling—Columbia Center for Science and Society Course Development in Science and Society

Rolling—National Science Foundation Secure and Trustworthy Cyberspace (SaTC)

Rolling—National Science Foundation Mathematical Biology

**Biology and Earth Science**

August 1—International Union of Biochemistry and Molecular Biology Mid-Career Research Fellowships

August 1—National Science Foundation Opportunities for Promoting Understanding through Synthesis (OPUS)

May 31, November 30—National Speleological Society Int’l Exploration Grants

Rolling—National Speleological Society Research Grants

Rolling—National Science Foundation Environmental Biology

**Chemistry**

Active funding opportunities for Chemistry from the National Science Foundation can be found here.

June 15—American Chemical Society WCC Rising Star Award

Rolling deadline—American Chemical Society Community Recognition Grants

Rolling deadline—Chemical Heritage Foundation Travel Grants

**Engineering**

July 26—National Science Foundation Career Awards -- Engineering

August 31—Engineering Information Foundation Women in Engineering Grant Program

**Health and Medicine**

August 31—Elsa U. Pardee Foundation Grants

Rolling deadline—Robert Wood Johnson Evidence for Action (E4A): Investigator-Initiated Research to Build a Culture of Health

**Mathematics and Physics**

Rolling deadline—National Science Foundation Conferences and Workshops in the Mathematical Sciences

Rolling deadline—Simons Foundation Targeted Grants in Mathematics and Physical Sciences

Rolling—National Science Foundation Computational and Data-Enabled Science and Engineering in Mathematical and Statistical Sciences (CDS&E-MSS)

Various—American Physics Society Fellows

**Psychology and Neuroscience**

August 13—National Science Foundation Cognitive Neuroscience

August 31—American Psychological Foundation Division 39 Grant
