2022 SRI Application Questions

Please note: While this document lists the application questions, the actual application form is linked here. Once you have reviewed the below questions and secured a mentor, please fill out the application. The deadline for submission is March 11 at 5PM Eastern. Questions can be sent to sri@barnard.edu.

- Basic demographic information (name, email address, major, class year)
- Years in which you may have participated in SRI previously (if applicable)
- Which Barnard department will you be affiliated with? (Please note: all SRI participants will have an affiliated Barnard department, independent of whether their research advisor is a Barnard faculty member.)
- Who will your mentor be in Summer 2022?
- Will you be working in a lab supervised by a Barnard College faculty member, OR a faculty member who does not have a faculty appointment at Barnard (e.g. they are appointed at Columbia University Irving Medical Center, CUNY, the American Museum of Natural History, etc.)? [PLEASE NOTE: A list of Barnard Faculty can be found here. For the purposes of the SRI application, all Columbia University faculty members are considered external mentors.] If you are uncertain about the answer to this question, please ask your mentor or contact sri@barnard.edu.
  - Only if you are working with a faculty member who is not affiliated with Barnard, you will be asked (1) to describe your project, and (2) whether your mentor is able to provide funding for your project.
  - Descriptions of a project in an external lab should indicate what the project is, what your role will be in the lab, and who you will report to. The length of response expected is ~250 words. Please discuss your answer with your external mentor before you draft your response.
  - We encourage all students working with an external mentor to ask about the possibility of partial or full funding. And again, all students will be required to indicate whether funding is available. Please note: regardless of whether funding is available from the external lab, if you are selected for participation in SRI, you will receive the full stipend amount.
- If you are selected for participation in SRI 2022, will you intend to request subsidized housing? PLEASE NOTE: your selection for SRI will in no way be affected by the question of whether you intend to request subsidized housing.
- Are in the (SP)^2 or E(SP)^2 Program?
- Optional Final question: please feel free to provide additional comments or information.
