CHOOSE A MASTER’S PROGRAMME AT ONE OF OUR SEVEN SCHOOLS
Dear Students and Parents,

Sciences Po is an inclusive institution founded on the belief that the humanities and social sciences are crucial tools for understanding and transforming the world. Our mission is to use these tools to prepare our students for impactful careers in the most diverse fields.

Our graduate programme offerings are divided between Sciences Po’s seven Schools, the most recent of which, the School of Management and Innovation, opened in September 2017. Each graduate school is defined by a specific object of study and therefore a sector: public affairs, international affairs, law, urban affairs, journalism, business and research.

We offer our graduate students a wide range of customisable programmes. They can choose to complete a Master’s degree with an apprenticeship component, take a gap year or study for a dual degree with a partner institution in France or abroad. There are 27 two-year programmes that lead to a Sciences Po Master’s degree, plus the several one-year Master’s programmes designed for young professionals who want to accelerate their career development or change career paths.

Thanks to the quality of the education we deliver, our graduates display excellent analytical skills, remarkable adaptability and ample creativity, all of which are highly appreciated by recruiters. 40% of Master’s students find their first job before they graduate. A very large majority (71%) go into the private sector in every possible area. In the public sector, our graduates hold positions of responsibility in the French or foreign civil services and in international institutions.

To give our educational vision meaning, we need you, in all your diversity. Diversity is central to Sciences Po’s identity: geographical diversity, with international students from 150 different countries constituting nearly 50% of our student body, and a network of 470 partner universities; social diversity, with nearly 30% of our students receiving a scholarship and over a third paying no tuition fees; and intellectual diversity, with Master’s students coming from all disciplines and types of higher education institution – universities, engineering schools, preparatory classes, etc.

The following pages will have you convinced: there is a programme to suit you at Sciences Po, where a unique, life-changing experience awaits you. So see you soon!

Frédéric Mion
President of Sciences Po
Deepen your thinking, gain practical experience, prepare to act

Our seven graduate schools – the School of Public Affairs, the Paris School of International Affairs (PSIA), the Law School, the School of Journalism, the School of Management and Innovation, the Urban School and the Doctoral School - prepare students for professional life. The social, geographical and cultural diversity of the students at each school gives them the chance to compare perspectives and gain a finer understanding of the complexity of the contemporary world.

Each school has its own identity and a range of programmes defined by its professional focus, but they are all underpinned by the same main principles: fundamental knowledge, applied knowledge and practical experience, active learning, and internationalisation. The goal is to train young professionals whose analytical skills, capacity to adapt and creativity equip them for positions of responsibility in an increasingly complex world.

Throughout their graduate studies, students benefit from the latest advances in research through core courses taught by Sciences Po’s permanent faculty. These are supplemented by specialisation courses taught by recognised practitioners, who play a fundamental role in preparing students for professional life. They pass on their skills to the students, share their experiences with them and help them with their choice of internship, which they may also supervise.

Pedagogical innovation is central to the schools’ approach. Case studies, workshops, team projects and study trips are used extensively to ensure active learning. These exercises allow students to compare and expand their individual thinking through collaborative practices, and to gain project management experience.

Our programmes are international: Sciences Po offers dual Master’s degrees with 17 partner universities. Some programmes are taught entirely in English, such as those at PSIA. Language training is also essential. 21 languages are taught and a C1 level in English is required to graduate.

A wealth of possible study paths

Master’s programmes
Standard Master’s programmes accept students with an undergraduate degree and take at least two years to complete. 27 two-year Master’s degree programmes are offered, each with a wide choice of concentration. Some programmes may include an apprenticeship component in second year. Students who so wish can opt for a gap year between their first and second years. The first year is devoted to core courses, concentration courses and foreign language courses. The second year includes what we call a semester “off-campus”, which can take the form of an internship, a study period abroad or the writing of a research dissertation.

Dual degree programmes
Sciences Po has partnered with internationally renowned universities (the London School of Economics, Columbia University, Fudan University, etc.) and French grandes écoles to offer about thirty dual master’s degrees. Students are chiefly motivated to undertake a dual degree programme because of their complementary nature. The first year takes place at Sciences Po, the second year at the partner university.

One-year Master’s programmes
Our one-year Master’s programmes are intensive courses designed for young professionals and recent graduates who want to quickly acquire the expertise needed to accelerate their careers. The programmes are taught entirely in English on the Sciences Po campus in Paris.

PhD
Students wishing to pursue a PhD can join one of Sciences Po’s five doctoral programmes in law, economics, history, political science and sociology, which follow on from the research-based Master’s programmes proposed by the Doctoral School.

Preparation for competitive recruitment exams
Sciences Po offers preparatory courses for students wanting to enter the French or European civil service, to become a judge or state prosecutor, to become a senior police officer (commissaire), or to earn the agrégation in history.
Sciences Po uses a proven methodology to help students prepare for the written and oral exams. The very high success rates in the various competitive exams each year bear witness to this.

**Applications**

**The French procedure**
This is open to candidates with a French undergraduate degree or who have completed a higher education course bearing 180 ECTS credits. In 2017, the steps of the admissions procedure changed.

The eligibility phase now consists solely of an evaluation of the written application. The admissions phase consists of an interview.

**International procedure**
This is open to applicants with an undergraduate degree from a foreign institution. Admission is based on an academic evaluation of the written application.

**Dual degree procedure**
Students are admitted only after the written application has been accepted by both partner universities.

---

*Sciences Po ranks first for social sciences among French universities and fourth worldwide for political science and international relations.*

“In two or three years, the Law School educates high-calibre legal professionals with the skills to adapt and flourish in a constantly changing professional environment. The School’s strength depends on an interactive teaching method that develops critical thinking, a vibrant academic community and an exceptional international network. No prior legal training is required.”

Christophe Jamin - Dean of the Law School

Our Programmes

Master’s programmes
- Judicial and Legal Professions
- Economic Law

Intensive first year dedicated to learning and mastering the fundamentals of law.
Second year focused on acquiring expertise and soft skills, and honing the knowledge acquired in first year.
Six specialisations are offered in second year:
Economic Litigation and Arbitration; Public Law & Economics / Companies, Markets, Regulations / Global Business Law and Governance (GBLG) / Global Governance Studies (GGS) / Innovation Law.

Programmes offered in partnership:
- Law and Finance (three-year programme with the Sciences Po School of Management and Innovation)

One-year Master’s programme
- LLM in Transnational Arbitration & Dispute Settlement - Directed by Professor Diego P. Fernández Arroyo, this LLM (Master of Laws) is designed for young professionals wishing to specialise in the field of transnational arbitration and dispute settlement.

Two preparatory classes for competitive recruitment examinations in law (ENM, EOGN, ENSP)
A network of partner universities
Columbia - Francfort - Harvard - Keio - McGill - Northwestern - NYU - Cornell - University of Texas - Sao Paulo - Stanford - Sydney - Tsinghua - Tel-Aviv - Buenos Aires...

School of Journalism

“At the School of Journalism we immediately immerse our students in their chosen profession through a study programme conducted under newsroom conditions. From their first year here, students live the life of a journalist while being encouraged to reflect on the raison d’être of their profession, its development through history and its daily impact.”

Bruno Patino - Dean of the School of Journalism

According to the 2016 Sciences Po graduate employability survey, which reports on the destinations of the class of 2015, 76% decided to launch their careers and 24% decided to continue their studies or prepare for a competitive recruitment exam. Students are given career guidance and support throughout their time at Sciences Po to facilitate their transition into working life.

For graduates who decide to launch their careers, the time it takes to find employment has been decreasing since 2012. In 2016, 88% of graduates found their first job in less than six months and 40% before leaving Sciences Po.

**A variety of jobs corresponding to the Master’s concentrations**
