This catalogue is intended for the guidance of persons applying for or considering application for admission to Barnard and for the guidance of Barnard students and faculty for the 2008-09 academic year. The catalogue sets forth in general the manner in which the College intends to proceed with respect to the matters set forth herein, but the College reserves the right to depart without notice from the terms of this catalogue. This catalogue is not intended to be and should not be regarded as a contract between Barnard College and any student or other person.

We welcome your comments and suggestions, which can be sent to catalog@barnard.edu
MESSAGE FROM THE PRESIDENT

Welcome to Barnard. In the pages that follow, you will find a stunning array of choices — courses in literature and the arts, in anthropology and politics, in biochemistry, neuroscience, and physics. You will find lectures taught by world-renowned scholars and intimate seminars where faculty share their latest research and ideas. You will find classes on topics you have been wanting to study for years, and classes on topics that may never have crossed your mind.

The task before you is to choose — to pick, like the proverbial kid in a candy store, from the hundreds of options that lie waiting before you. It can be hard to know where to start, and how best to plot a course that will satisfy your own intellectual cravings. So I urge you to go slowly. Savor the possibilities that are in this catalogue and all of the offerings you will find bursting from the halls of Barnard. Choose some courses that promise to lead you where you want to go and some that lead nowhere in particular. Take at least one class in something you have always disliked, just to see if it changes your mind or at least opens a horizon you had not imagined before. Search for your passion in these pages, but don't be surprised if it sneaks up from elsewhere and finds you.

At Barnard, you will be able to immerse yourself in the joys and rigors of a classical liberal arts education, an education that will prompt you to explore the world from a variety of different perspectives and through the lenses of multiple disciplines. Your job is to decide how to fashion these perspectives into a world that makes sense to you and then, over time, how to shape your own role within it. Education is a journey that lasts a lifetime. I hope that your time at Barnard gives you the tools that you need to launch this adventure and the sheer joy that comes from undertaking it.

So choose well, revel in the options before you, and most importantly — enjoy.

Debora L. Spar
President

Barnard Catalogue 2008-2009
COLLEGE

Barnard has been a distinguished leader in higher education for women for over 100 years and is today the most sought after private liberal arts college for women in the nation. Founded in 1889, the College was the first in New York City, and one of the few in the nation at the time, where women could receive the same rigorous liberal arts education available to men. Its partnership with a great research university, combined with its setting in an international city and its unwavering dedication to the advancement of women, makes Barnard unique among liberal arts colleges today.

Barnard is both an independently incorporated educational institution and an official college of Columbia University—a position that simultaneously affords it self-determination and a rich, value-enhancing partnership. Barnard students may take classes at Columbia and benefit from the University’s academic resources, as Columbia students may do at Barnard.

New York City and its vast cultural and social resources are also an extension of the Barnard campus, literally used by every department to enhance curriculum and learning. The City is an inescapable presence, inviting students with both its challenges and infinite opportunities (from dancing with the American Ballet to working with social-change organizations to interning on Wall Street).

The College draws motivated, talented, curious young women who create a stimulating atmosphere and diverse community. Barnard alumnæ include pioneers like anthropologist Margaret Mead and Judith Kaye, the first female Chief Judge of the State of New York, along with prominent cultural figures such as choreographer Twyla Tharp, writers Zora Neale Hurston and Mary Gordon, and Pulitzer Prize-winning journalists Anna Quindlen and Natalie Angier.

Mission Statement

Click here to read the Mission Statement of Barnard College.

Barnard’s History

Barnard College was among the pioneers in the late 19th-century crusade to make higher education available to young women.

The College grew out of the idea, first proposed by Columbia University’s tenth president, Frederick A.P. Barnard, that women have an opportunity for higher education at Columbia. Initially ignored, the idea led to the creation of a “Collegiate Course for Women.” Although highly-qualified women were authorized to follow a prescribed course of study leading ultimately to Columbia University degrees, no provision was made for where and how they were to pursue their studies. It was six years before Columbia’s trustees agreed to the establishment of a college for women. A provisional charter was secured, and Barnard College was named in honor of its most persistent advocate.

In October 1889, the first Barnard class met in a rented brownstone at 343 Madison Avenue. Fourteen students enrolled in the School of Arts and twenty-two “specials,” lacking the entrance requirements in Greek, enrolled in science. There was a faculty of six.

Nine years later Barnard moved to its present site in Morningside Heights. In 1900, Barnard was included in the educational system of Columbia University with provisions unique among women’s colleges: it was governed by its own Trustees, Faculty, and Dean, and was responsible for its own endowment and facilities, while sharing instruction, the library, and the degree of the University.

Barnard Today

From the original 14 students, enrollment has grown to 2,350, with over 33,000 Barnard students awarded degrees since 1893. The integration of teaching and scholarship occurs at an incomparable level at Barnard. Barnard’s faculty of 292 women and men are teacher-scholars whose paramount concern is the education of undergraduate students and whose professional achievements bring added vitality to the classroom. This commitment to personal attention and high achievement provide the ultimate learning environment.

Barnard’s liberal arts education is broad in scope and demanding. The curriculum includes a series of general education requirements—a program of courses the faculty believes provides a stimulating and thorough
education, while remaining flexible and varied enough to suit a student's own interests, strengths, and talents. Classes vary in size. Those in which student participation is important are small. There are opportunities for independent study and students are often invited to work on research projects with faculty members.

In 1998, Barnard College and Columbia University amended and extended the longstanding agreement for cooperation between the institutions, an agreement which remains unique in higher education. Barnard stands as an independent college for women with its own curriculum, faculty, admissions standards, graduation requirements, trustees, endowment, and physical plant. At the same time, Barnard and Columbia share resources, thereby giving students open access to the courses, facilities, and libraries of both schools. Barnard and Columbia students also share in a wide variety of social and extracurricular activities. Barnard boasts 80 undergraduate clubs, and students have access to an additional 140 at Columbia.

From its inception, Barnard has been committed to advancing the academic, personal, and professional success of women. Students benefit from an atmosphere in which over half of the full-time faculty are women, and women are well represented in the administration. The College is led by Debora L. Spar, former Spangler Family Professor of Business Administration and Senior Associate Dean for Faculty Research and Development at Harvard Business School. At Barnard, women are given the opportunities and the freedom to lead both in and out of the classroom, and to develop the skills that will equip them to lead throughout their lives.

Barnard's unique ties to several of Columbia's graduate schools and to premier New York City institutions, including the Juilliard School, the Manhattan School of Music, the Jewish Theological Seminary of America, and Teachers College, give students an unusual range of educational options, including a number of joint degree programs. Academic organizations within and beyond the University also offer vital opportunities for research, studio experience, internships, and community service.

Barnard has a high student retention rate, an indication of student satisfaction with the college experience. Barnard students also enjoy leaves for study, travel, and internships. About two-thirds of students graduate having undertaken an internship at sites ranging from investment banks like Goldman Sachs to cultural institutions like the Metropolitan Museum of Art, network news programs including 60 Minutes, medical facilities including New York Presbyterian Medical Center, and a wide range of other venues. Every year Barnard admits about 80 transfer students who come to take advantage of the educational opportunities available to Barnard women.

Every year the Office of Career Development collects and summarizes information about post-baccalaureate study and employment. In the first year after graduation, almost one-third of Barnard graduates enter full-time graduate or professional schools, with the largest proportions opting to study medicine, law, or business. The rest obtain employment in business and industry, the arts, communications, teaching, social services, and many other fields.

Accreditation

Barnard College is accredited by the Commission on Higher Education of the Middle States Association of Colleges and Schools, 3624 Market Street, Philadelphia, PA 19104, 215-662-5606. The Commission on Higher Education is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Commission on Recognition of Postsecondary Accreditation. The Barnard College Education Program is accredited by The New York State Education Department in Albany, NY, 12234, for provisional teaching certification for childhood and adolescent education.

The Campus

The Barnard campus occupies four acres of urban property along the west side of Broadway between 116th and 120th Streets. At the southern end of the campus, four residence buildings, Brooks Hall (1907), Hewitt Hall (1925), Helen Reid Hall (1961), and the College's newest building, Iphigene Ochs Sulzberger Hall, formerly Centennial Hall (1988), form an enclosed quadrangle. In 2003, the College's four oldest buildings were added to the National Register of Historic Places.

Barnard Hall, formerly Students Hall, 1917, renamed in 1926, is just north of the "Quad" and contains seminar rooms, classrooms, and faculty offices, as well as the LeFrak Gymnasium, a swimming pool, and dance studios. The Sulzberger Parlor on the third floor is used for meetings and special events. The Julius S. Held Lecture Hall, an electronically equipped multimedia classroom, is also on the third floor.
Adele Lehman Hall, 1959, contains the Wollman Library and two floors of faculty offices and classrooms. The library includes the reserve room and the Lehman Computer Center on the first floor; the reference area, periodicals, microforms, and open book stacks on the second floor; and on the third floor, audiovisual facilities and more open stacks. Computer facilities for the Economics and Political Science departments are also located in Lehman. The building overlooks a lawn surrounded by trees and shrubs.

Helen Goodhart Altschul Hall, 1969, and construction site of Nexus (formerly McIntosh, 1969), face each other across an open plaza. The 14 stories of Altschul Hall are devoted to the sciences. Herbert H. Lehman Auditorium is on the first floor.

Milbank Hall, 1897, occupies the northern end of the campus and houses administrative and faculty offices, classrooms, the Arthur Ross Greenhouse, and the Minor Latham Playhouse, a well-equipped modern theater. Substantial renovations took place in Milbank recently, yielding expanded neuroscience research laboratories and animal facilities, the Krueger Lecture Hall, as well as a redesigned and updated Math Help Room/Computer Laboratory.

In the immediate neighborhood, Barnard maintains additional residence halls, including Plimpton Hall, acquired in 1968, and Eleanor Thomas Elliott Hall, formerly 49 Claremont Avenue, acquired in 1982 and renamed in 1992. In addition, three apartment buildings on West 116th Street, 600 (acquired in 1971), 616 (acquired in 1964), and 620 (acquired in 1968) are Barnard residence halls. The College also rents additional spaces at 601 West 110th Street. Cathedral Gardens is the proud new member of the residential options. Located at 110th and Manhattan Ave., students have the opportunity to share this new facility with faculty members and their families, as well as with neighbors in the adjacent luxury high-rise condominium tower.

Columbia University is directly across the street on Broadway.

Barnard Catalogue 2008-2009
ADMISSIONS

The Committee on Admissions selects young women of proven academic strength who exhibit the potential for further intellectual growth. In addition to their high school records, recommendations, and standardized test scores, the candidates' special abilities and interests are also given careful consideration. While admission is highly selective, no one criterion determines acceptance. Each applicant is considered in terms of her individual qualities and her potential for successfully completing the course of study at Barnard.

Barnard seeks students from diverse educational and cultural backgrounds and from all geographic regions. However, no preconceived profile of an ideal student population limits the number of applicants accepted from any one group. The College admits students and administers its financial aid and loan programs, educational policies and programs, recreational programs, and other College programs and activities without regard to race, color, creed, national origin, sexual orientation, or disability.

First-Year Application Procedures

Application for admission to the first-year class should be made by January 1 for entrance in September of the same year. Barnard accepts the Common Application along with the Barnard supplement. Application forms may be obtained by contacting the Office of Admissions. Students may also obtain copies of the Common Application from their high schools or via the Web. Applicants should ordinarily be at least 15 years of age at entrance.

A non-refundable fee of $55 must accompany each application. Checks or money orders must be in U.S. funds drawn on a U.S. bank and made payable to Barnard College. Students may also submit payment directly through the common application website. Students with significant financial hardship should request a fee-waiver from their high school counselor on school letterhead and submit it with the application.

Secondary School Preparation

Each candidate for admission must offer a college preparatory program from an accredited secondary school or an equivalent education representing a four-year course of study. Academic preparation for admission should be based on the requirements for the A.B., or liberal arts, degree. A recommended program would comprise four years of work in English; three or more years in mathematics; three or more years in a foreign language (ancient or modern); three or more years in science with laboratory; and three years or more in history. An introduction to a second foreign language is generally useful. The remainder of the program should include additional work in the aforementioned subjects with the possible addition of music and art. Applications varying from this pattern are considered without discrimination if the candidate's records indicate genuine intellectual ability and high motivation.

First-Year Entrance Tests

Barnard requires all candidates to take the College Board’s SAT I Reasoning Test and two SAT II Subject Tests. The ACT with writing can be substituted for the SAT I and SAT II Subject Tests. We recommend that students take these standardized tests by the fall of their senior year. Candidates should contact the College Board or the American College Testing Program for the Bulletin of Information containing descriptions of the tests, directions for filing applications, the dates on which examinations are administered, and a list of examination centers as early as possible. Dates vary from year to year, and applications to take the test must be received by the College Board and ACT well in advance. Students who require non-standard administration of the tests should consult with their guidance counselors for testing accommodations.

It is the student's responsibility to direct the College Board or American College Testing Program to send official test scores to the Office of Admissions. The SAT tests code number for Barnard is 2038. The ACT code number for Barnard is 2718.

Another important part of the application is the submission of three recommendations, one from the high school counselor and two from academic teachers. Students should submit teacher recommendations from 11th or 12th grades in English, math, science, social sciences, or foreign language courses. These recommendations give the Committee on Admissions additional information about the candidate's interests, character, skills, and aptitude.
Interviews

Although not required, an interview is recommended. For students who are able to visit the campus, an interview can be arranged by contacting the Office of Admissions. Appointments are scheduled Monday through Friday from 9:30 A.M. to 4:00 P.M., and on selected weekends throughout the Fall. Applicants who are unable to visit the College may request an interview with a local Barnard Alumnae Admissions Representative (BAAR) by calling Admissions or by submitting an online request form from our website.

Early Decision

Well-qualified high school seniors who have selected Barnard as their first-choice college may apply under a binding Early Decision plan. To be considered under Early Decision, a candidate should submit her application and other required credentials (listed under First-Year Application Procedures) to Admissions by November 15. The Committee's decision is mailed by Admissions no later than December 15. A student may initiate regular applications to other colleges; she must, however, withdraw all other applications upon admission to Barnard. Notification of financial aid for those candidates who have demonstrated financial need will follow the admissions decision. To reserve a place in the first-year class, an Early Decision student must submit a nonrefundable enrollment deposit. This deposit is applied toward tuition and fees for the first year.

The Committee on Admissions may choose to postpone a decision on an Early Decision application until the spring. In that event, the student is asked to submit a record of schoolwork from the first half of the senior year.

Centennial Scholars Program

The Centennial Scholars Program offers a limited number of intellectually independent students an early opportunity to engage in challenging projects tailored to their individual interests. Centennial Scholars work with faculty mentors on the development, execution, and presentation of these projects.

The program is limited to 15 students in any single class, approximately half chosen at the time of their admission to college. The remaining Scholars are selected later from the first-year class. Admission of a future first-year student to the program is based on the Centennial Scholar Committee's review of her Barnard application, including her secondary school record, recommendations from her counselors and teachers, her personal statement, standardized test scores, and evidence of advanced preparation. Consideration of an enrolled first-year requires i) submission of a project proposal, ii) a faculty recommendation letter, iii) a writing sample, and iv) an interview with the Program Directors. This process occurs annually following the midterm break of spring semester.

Deferred Enrollment

An admitted first-year or transfer student who wishes to defer enrollment in Barnard for one year must obtain permission in writing to the Dean of Admissions explaining the reasons for the deferral request. Such a request is normally granted for purposes of work, travel, or pursuit of a special interest. Students admitted in early decision must request the deferral by February 15th; students admitted regular must request the deferral by May 1st. Students admitted from the waiting list cannot defer their admission.

International Students

Barnard welcomes applications from international students following the same application procedure and presenting the same credentials as domestic candidates. Fluency in the English language is essential for admission. Those international students whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL); international applicants who have lived in the United States for less than four years must also submit scores for the TOEFL. Information about registration for the test is obtained by contacting the TOEFL Program at the Educational Testing Service. For more information on international students click here.

Transfer Students
Barnard welcomes transfer students in the fall and spring term of each year. Applications for admission will be reviewed according to the following schedule:

<table>
<thead>
<tr>
<th>Deadline</th>
<th>Notification</th>
<th>Enroll</th>
</tr>
</thead>
<tbody>
<tr>
<td>April 1</td>
<td>rolling</td>
<td>Fall</td>
</tr>
<tr>
<td>November 1</td>
<td>December 1</td>
<td>Spring</td>
</tr>
</tbody>
</table>

Each candidate must submit the Common Application for Transfer Admission and the following credentials: the Barnard Supplement for Transfer and Visiting Students; an official secondary school transcript; the results of the SAT I Reasoning Test or ACT, and, if appropriate, the TOEFL; the official transcripts of all college work and a copy of the college catalogue in which the courses taken are clearly marked. Two recommendations are also required: one each from a college faculty member and a college dean or adviser. Transfer applicants may also submit a recommendation from the high school counselor (optional).

A strong record at an accredited college, university, or equivalent institution is required. In some cases, advanced credit cannot be assigned until a student has had an opportunity to establish a satisfactory record at Barnard, but, in general, credit is given for courses which are similar in content and depth to Barnard courses.

After acceptance, academic and general guidance is provided by the advisers to Transfer Students in the Dean of Studies Office. For information on financial aid, students should consult the Financial Aid website.

**Visiting Students**

Undergraduate students who are degree candidates at other colleges may apply for admission as visiting students for one or two semesters. In addition to the traditional visiting student program offered in the fall semester, Barnard offers a unique program during the spring semester. In the “Spring in New York” program, students combine the opportunity to study at Barnard with guided cultural and career opportunities. For more information on visiting students click here.

**Other Degree Credit**

Students who have satisfactorily completed college courses before entering Barnard as first-year students may apply for a maximum of 15 points of degree credit. The courses must be intended primarily for college students and taught at the college by members of its faculty and must be in excess of the courses required for the high school diploma. With the expection of Advanced Placement courses overseen by the College Board, and of International Baccalaureate work, courses taught in high school, either by specially trained high school teachers or college instructors, will not be credited towards the Barnard degree.

**Resumed Education Program**

Former Barnard students who wish to return to the College after an absence of five years or more in order to complete their degree may obtain applications from Dean Aaron Schneider in the Dean of Studies Office. Alumnae who wish to pursue further study in new areas of interest after graduation should contact Dean Ani Bournoutian.

FINANCIAL AID

Insofar as possible, Barnard assists qualified students who demonstrate financial need. Barnard does not discriminate against applicants for financial aid on the basis of race, color, creed, national origin, or disability.

Financial aid from the College consists of grants, loans, and opportunities for part-time employment. In addition to providing financial aid from its own funds, i.e., gifts, endowment, and general income, Barnard participates in the following federal programs: the Federal Pell Grant Program, the Federal Supplemental Educational Opportunity Grant Program, the Federal Perkins Loan Program, the Federal Family Education Loan Program, and the Federal College Work Study Program. Barnard also participates in the New York State Higher Education Opportunity Program (HEOP). Federal and state funds are administered by the College in accordance with government regulations and the College’s general policies relating to financial aid. To supplement the above-mentioned financial aid sources, students are urged to investigate state loan and scholarship/tuition assistance programs and college tuition financing plans. The Controller’s Office has additional information and applications for payment plans.

Any student who thinks she will need financial assistance in order to attend Barnard is encouraged to apply. The decision of the Committee on Admissions to admit a student is not affected by the fact that a student has applied for or demonstrated need for financial aid.

A detailed explanation of current College policies and awarding practices may be found in the brochure, *Barnard College Financial Aid Policies and Procedures*, available from the Office of Financial Aid or from the Financial Aid website.
FINANCIAL INFORMATION

The costs of education at Barnard are met by tuition, income from endowment, current gifts from alumnae and other friends of the College, and grants from foundations, corporations, and government agencies. The College makes every effort to limit the charges to students, but must reserve the right to set tuition and fees at the level necessary for the maintenance of a high quality of instruction. For more information please see the Bursar's website.
THE CURRICULUM

A Barnard education seeks to provide women with the tools and techniques needed to think critically and act effectively in the world today. It fosters a respect for learning, an aptitude for analysis, and a competence in the demanding disciplines of the liberal arts and sciences. By virtue of its special mission and location, Barnard strives to give its students insight into interconnected worlds of knowledge and experience.

Requirements for the Liberal Arts Degree

Requirements for Transfer Students

Other Academic Opportunities
THE CURRICULUM

Requirements for the Liberal Arts Degree

Barnard's motto, Following the Way of Reason (Hepomene toi logismoi), signals the College's continuing commitment to the intellectual breadth and analytical depth of the liberal arts tradition. Since the College's founding in 1889, a Barnard education has been characterized by its distinctive combination of elements: a rigorous, broadly based framework of general education requirements; a focused inquiry into major subjects; and a range of electives. Together these elements allow for substantial personal choice. The exact structure of College requirements has varied over the past century in response to changes in society, education, and student needs. Today, degree candidates complete two first-year foundation courses, general education courses organized around different "ways of knowing," a major, and electives, totaling 122 points (120 points for students entering before Autumn 2003). They also fulfill a physical education requirement reflecting the College's view that physical well-being is an essential part of a healthy and productive life. (Of the 122 required points, 2 must be for PE. Transfer students who have entered with 24 points of credit need 121 points, of which 1 is for PE.)

The Barnard Education

A Barnard education seeks to provide women with the tools and techniques needed to think critically and act effectively in the world today. It fosters a respect for learning, an aptitude for analysis, and a competence in the demanding disciplines of the liberal arts and sciences. By virtue of its special mission and location, Barnard strives to give its students insight into interconnected worlds of knowledge and experience.

The Barnard curriculum enables students to develop strength in language and literature, in social and historical analysis, in mathematics and the natural sciences, and in the arts and the humanities—ways of knowing that incorporate but also transcend traditional academic disciplines. Built around major methods for apprehending the world and organizing knowledge, the College's basic requirements are designed to equip students to respond both critically and creatively to a rapidly changing world. Barnard students learn to employ a variety of analytical methods in order to engage new complexities of social evolution and scientific knowledge. The College dedicates itself to imparting to every student self-renewing intellectual resourcefulness, the mark of a liberal arts education.

The College faculty encourages each student to elect courses in a manner that ensures exposure to distinct forms and traditions of knowledge and to the human experience as lived in various parts of the world. Each student is encouraged to make selections that develop connections among the elements of the curriculum, that promote understanding of global issues, and that acknowledge both the diversity and the commonality of human endeavors in civilizations around the world and through time.

As a college for women, Barnard embraces its responsibility to address issues of gender in all their complexity and urgency, and is committed to an integrated curriculum that recognizes the importance of gender in all forms of human endeavor. The College encourages students to profit from the exceptional and varied opportunities to explore women's histories, challenges, and achievements. Courses explicitly on women and gender are offered by the Department of Women's Studies and by many other departments and programs; students also find gender-related matters incorporated into a wide range of additional courses across the academic disciplines.

Barnard also encourages students to take full advantage of the world city of New York—its international character and economic power; its prominence in science, medicine, and the arts; its cultural abundance; its diverse neighborhoods and peoples; its architectural richness. In their studies, their work, and their personal lives, Barnard students can avail themselves of the city's unparalleled resources. As an extended campus, New York serves not only as a multidisciplinary research laboratory for coursework and guided field experiences, but also as the site for a vast array of internships and wide-ranging, city based student activities.

Barnard seeks to ensure that students become aware of, and knowledgeable about, their physical being. Students complete two courses that focus on physical activity, fitness, and well-being. The College also provides additional opportunities for students to exercise and to learn more about fundamental elements of good health and women's health issues.
First-Year Foundations

Two courses are required of all first-year students to ensure that their skills in reading, writing, and speaking continue to develop in ways that will support their learning throughout their years at Barnard. First-Year Foundation courses are deliberately kept small; they focus on individual participation and on methods of research, analysis, and revision.

1. First-Year English
All first-year students take the one-semester writing course ENGL BC 1201 (First-Year English), designed to cultivate and develop prose writing and related tools of scholarship. Every student, whatever her level of attainment, can learn to improve her skills of writing, analysis, and argumentation. Students choose among several clusters that differ in topic. Reading and writing assignments focus on major works of literature supplemented by material from other sources. Some first-years will be required to take ENGL BC 1202, Studies in Writing, as a prerequisite to First-Year English.

Transfer students who did not pass a satisfactory course at their previous institution are not required to take ENGL BC 1201, but must take ENGL BC 3103 or BC 3104 or a 3-point literature course from the Barnard English department offerings.

2. First-Year Seminar
First-year students take this one-semester course designed to develop the intellectual skills and styles central to subsequent academic work. This course emphasizes the enhancement of writing and communication skills and the group-discussion mode of intellectual inquiry and discourse.

Seminars center on major themes or issues, and participants read and discuss a limited number of important philosophical, historical, literary, or scientific texts. Students and faculty engage in an extended consideration of a theme of general human concern, one that goes beyond departmental boundaries.

Transfer students are not required to take the First-Year Seminar.

General Education Requirements

The aim of the General Education Requirements is to ensure that each Barnard graduate confronts and engages in central ways of knowing the world. These ways of knowing—divided into nine key areas,—include, but also bridge, the traditional disciplines of the liberal arts and sciences. Inquiry into these areas establishes the basis for a Barnard education. Each student studies, from analytical, quantitative, and artistic perspectives, the major means by which human knowledge has been constructed.

To allow for flexibility within this framework, a student chooses among the designated courses that fulfill each of the nine requirement areas. She will find some courses that offer a broad view of a field, exploring issues that help create an educated citizenry; other courses satisfy the purposes of general education by close scrutiny of critical methods and their specific application. Thus, each student will shape her own academic program, deliberately and distinctively, by electing a combination of wide-ranging introductory courses and more specialized upper level courses to fulfill the General Education Requirements. The areas included in the General Education Requirements are:

1. Reason and Value
2. Social Analysis
3. Historical Studies
4. Cultures in Comparison
5. Laboratory Science
6. Quantitative and Deductive Reasoning
7. Language
8. Literature
9. The Visual and Performing Arts

1 course
1 course
1 course
1 course
2 courses in one science
1 course
study through at least the fourth semester
1 course
1 course
Courses used to fulfill these area requirements must be at least 3 points and may also be used to satisfy requirements for majors or minors. Students may not use Advanced Placement Credit to fulfill the area requirements unless specifically noted otherwise.

Designated courses may be listed in more than one area; students are free to choose which area requirement is satisfied, but may not use a single course to fulfill two or more areas. In addition, certain identified course sequences taken together may fulfill more than one area requirement.

A student's choice of specific courses should be influenced by an intent to forge links among topics and ways of knowing, to find common themes across time and form, and to develop an internal coherence within her own set of courses used to fulfill the College's General Education Requirements. A student should also be mindful that her choices of courses can, and should, expand and enrich her understanding of the world at large, of cultural diversity, and of issues of gender.

A Comprehensive list of courses satisfying general education requirements for each area is on the Barnard website. The specific aims for each of these area requirements are set forth below:

1. Reason and Value
   Requirement: One course that allows students to explore ways in which values shape thought, thought shapes values, and both guide human actions.
   Aim: To introduce ways of thinking, both past and present, about the formation of human values, their role in guiding action, and their susceptibility to rational reflection and critical discussion. This requirement allows students to discover how established disciplines in the humanities, social sciences, and natural sciences—as well as newer interdisciplinary fields—approach a wide range of value-related issues. Courses may address such questions as: What does it mean to follow “the way of reason”? What are the sources of human values? How do we arrive at our conceptions of virtue and obligation, and how do such conceptions shape our notions of a good life and a just society? How have questions about values emerged in different traditions at different times? Other possible subjects include the intersecting ethical dilemmas of private and public life, the relation between moral thought and moral action, and issues of human rights, cultural diversity, and global equity.

2. Social Analysis
   Requirement: One course that acquaints students with the central concepts and methods of the social sciences, while also critically examining social structures and processes, and the roles of groups and individuals within them.
   Aim: To introduce various ways of analyzing social structures and processes, and to explore how these institutions and processes both shape and are shaped by group and individual behavior. Courses will focus on a variety of institutions and processes, from the family, to the nation-state, to the international economy. All courses will address fundamental questions such as: How are individual and collective human behavior linked to the cultural, economic, and political context in which they occur? How is power distributed across different groups and among individuals? How do social systems develop and change? How can we come to better understand societal dynamics through a variety of quantitative and qualitative methods?

3. Historical Studies
   Requirement: One course enabling students to study times and traditions of the past, to learn theories and methods of historical analysis, and to discover how different concepts of history shape our understanding of both past and present.
   Aim: To emphasize the importance of historical knowledge for understanding various aspects of human experience and activity, and to develop the skills necessary to conduct or evaluate historical research. Coursework will demonstrate how history is not a simple record of past events, but an interpretation of the past shaped by the theories, methods, and data used to construct it. Among the questions to be raised are: Whose past is remembered? How is it remembered? To serve what purposes?

4. Cultures in Comparison
   Requirement: One course that compares two or more cultures from the perspectives of the humanities and/or social sciences.
   Aim: To study the diversity and the commonality of human experience, and to examine and question personal cultural assumptions and values in relation to others. Through comparative methods, courses will explore the beliefs, ideologies, and practices of different peoples in different parts of the world, across time, and through migrations. Courses may include comparison of cultures from two or more geographical areas or from two or
more cultures within one area, and may approach the subject matter using anthropological, historical, social, and/or humanistic perspectives.

5. Laboratory Science
Requirement: Two courses with laboratory in one science chosen from among: astronomy, biology, chemistry, environmental science, physics, or psychology. Acceptable courses must meet for at least three hours of lecture and three hours of laboratory each week.

Aim: To develop intellectual curiosity about the natural world and the processes of scientific experimentation; to convey an understanding of what is known or can be known about the natural world; to introduce basic methods of analyzing and synthesizing the sources of scientific information; and to create scientifically literate citizens who can engage productively in problem solving. Students are expected to master the tools of science and current understanding in one area, and are encouraged to explore the limitations of existing theories and to learn how to ask strategic questions. Laboratory exercises introduce students to techniques of scientific investigation as they make observations, carry out experimental procedures, and learn how results and analyses are communicated in specific visual, quantitative, and written forms.

Note: Students may fulfill part of this requirement with scores of 4 or 5 on Advanced Placement Examinations in biology, chemistry, environmental science, and physics (or their International Baccalaureate equivalents).

The following courses meet these requirements.

<table>
<thead>
<tr>
<th>Astronomy</th>
<th>ASTR BC 1753–1754, ASTR C 1403–1404 (or C 1420), ASTR BC 1753-C 1235, ASTR BC 1754-C 1234, all with the lab ASTR C 1903–1904, ASTR C 1234–1235 plus PHYS V 1291 plus ASTR C 1904</th>

</tr>
</tbody>
</table>

6. Quantitative and Deductive Reasoning
Requirement: One course in which students learn methods and approaches used in mathematics and related fields involving quantitative expression and logical reasoning.

Aim: To provide a productive acquaintance with at least one means of quantitative and deductive reasoning and to develop an ability to apply this knowledge to the analysis of new problems. Coursework will emphasize how quantitative analysis and deductive reasoning function as creative, elegant, and powerful ways of thinking and as effective sets of conceptual tools and procedures with widespread applications.

Note: Students may fulfill this requirement by securing Advanced Placement Credit in mathematics, chemistry, computer science, physics, or statistics (or their International Baccalaureate equivalents or equivalent transfer credit).

Students who enrolled in Autumn 2000 or later may not use a course for more than one requirement.

7. Language

Requirement: Competence in one ancient or modern language other than English, demonstrated by completion of, minimally, the fourth sequential semester of college-level study, and preferably, a more advanced course with greater emphasis on literary and cultural traditions. (In Latin, both V1201 and V1202 or their equivalents must be completed.)

Aim: To provide basic linguistic competence in at least one language other than English, in order to familiarize students with the language, literature, and culture of at least one non-English speaking people. Students are encouraged to develop their language skills to a level that permits them to live and function in another country; to enable them to conduct research, whatever their field; and to prepare them to work effectively in an increasingly global and multicultural society. In becoming familiar with the form and structure of another language, students consider how languages function as tools for communication. Students are encouraged to apply their language skills in courses that fulfill other general education requirement areas.

Exception:

Enrolled students who complete the third or fourth semester of French outside the Barnard or Columbia department must take a departmental examination to qualify for fulfillment.

Exemptions:

1. Re-centered CEEB SAT II score of 781 or higher; re-centered CEEB SAT II score of 700 or higher in Hebrew only. No exemptions granted for CEEB SAT II scores in Chinese or Japanese.
2. AP score of 4 or 5 in French, German, Italian, Latin or Spanish.
3. Departmental examination.
4. Students with native English who study in a high school where the language of instruction is not English (e.g., French, for alumnae of the Lycée Français).
5. For international students for whom English was not the primary language of instruction in high school, satisfactory completion of English BC 1201 or one satisfactory semester at Barnard.

Placement:

1. Re-centered CEEB SAT II score of 680–780, fourth semester; 570–679, third semester; 400–569, second semester, below 400, first semester, for German.
2. Re-centered CEEB SAT II score of 690–780, fourth semester; 570–689, third semester; 420–569, second semester; below 420, first semester, for French and Spanish.
3. For languages other than French, Spanish, and German, placement will be determined by departmentally administered examinations.
4. For transfer students: the course following the level of the last satisfactorily completed semester course; however, formal withdrawal and reenrollment in a more suitable course may be required for students who are judged by the department to be inappropriately placed and in need of additional preparation or review. In such a case, transfer credit for the previous course is rescinded to allow the student to receive credit for the Barnard/Columbia course of equivalent level. Taking the departmental placement exam is recommended.
5. By departmental examination, if there is no CEEB score or previous college transfer work.

Credit:

1. Credit is given for courses satisfactorily completed in residence at Barnard or, in the case of a transfer, at her previous college.
2. No prior assurance of degree credit is given for summer or transfer work in foreign language courses. For work
completed at other colleges, credit is granted with departmental approval, or by examination, or on completion of the next level at Barnard.

3. No credit is granted for work equivalent to a level already completed and credited.

4. Although credit for the first semester of an elementary language is not normally granted unless a more advanced course is completed, a student is granted one exception maximum to this rule on written request to the Registrar.

8. Literature

Requirement: One course in literature in any language, in the original or in translation; or in comparative literature.

Aim: To develop the skills needed for an informed and aesthetically rewarding reading of literary texts from various times, places, and traditions. Coursework will address the methods and theories by which readers produce meanings and interpretations, and will investigate the pertinence of material such as the authors' biographies or their cultural contexts to literary analysis. Students will study rhetorical strategies employed in literature, becoming more adept at grasping the underlying assumptions and appeal of various forms of discourse.

9. The Visual and Performing Arts

Requirement: One course in architecture, art history, studio art, graphic design, dance, music, film, or theatre.

Aim: To build an understanding and appreciation of creative processes and forms of artistic expression. Courses will provide insight into the ways art is used to explore and enrich the world and the human condition. The requirement will enable students to cultivate their skills, to develop an understanding of the ways various arts communicate and are discussed, and to consider works of art in their complex social and historical contexts.

Physical Education and Health

Requirement: Two courses, one course completed by the end of the first year, and another by the end of the junior year. Two points will be earned for these two courses; no more than 2 points can be earned for Physical Education courses. (Transfer students entering Barnard with 24 or more credits earn 1 point for Physical Education.)

Aim: To enable students to become aware of, and knowledgeable about, their physical being through participation in fitness and sports activities. Students are encouraged to enroll in additional activity and self-paced exercise courses toward the attainment of lifelong well-being.

Majors and Electives

Departments and programs establish majors to provide a structured, focused investigation of an academic discipline or area of interdisciplinary study. Often a major will require courses taken in cognate disciplines. Generally, there are three levels of study within each major: introductory survey courses; mid-level courses that cover more specialized subject matter and where attention is paid to the methodologies, including the writing styles and formats, of the discipline; and advanced-level seminars with an emphasis on independent research. The College has a long-standing commitment to preparing students sufficiently in a subject so that they may undertake a semester- or year-long project, usually during the senior year, on a topic related to their major. Students are encouraged to explore internships in their field, thereby acquiring information and experience that complement what is learned through formal study.

All students complete the requirements of an approved major. Majors vary in the number of credits required. For students transferring credit from another college or university, a minimum of six semester courses must be completed while the student is in residence at Barnard. Only courses graded C- or higher will be credited toward the major.

A student registers her chosen major with the Office of the Registrar and with her major department or program, normally in the second term of her sophomore year. The major may be chosen from any listed in the Barnard Catalogue. A student may major in two fields by satisfying all the major requirements prescribed by each department, with no overlapping courses. A combined or special major may be designed in consultation with the Class Dean and chairs of the appropriate departments, and with the approval of the Committee on Programs and Academic Standing. Committee approval is not needed for a double major that
comprises all the course requirements of two majors with one integrating senior project, but the form designated for such a double major must be filed with the Registrar and the two departments.

Apart from fulfilling general education requirements and major requirements, a student completes the remainder of the 122-point requirement with elective courses, either within or outside the major department, subject to the approval of the appropriate adviser.

No more than 18 points of studio, performing arts, or professional school courses (including film) may be credited toward the A.B. degree. Of these, a maximum of four arts studio courses may be credited. A maximum of six courses in instrumental instruction may be credited (except for Music majors and minors, who may receive credit for eight, including piano instruction).

One-point dance technique courses taken by non-dance majors for credit are also included in the existing 18-point maximum which may be credited toward the degree. A maximum of six courses in dance technique may be credited; however, a student does not receive academic credit for a dance technique course until she has completed or is currently completing the Physical Education requirement.

Exceptions to this rule are allowed only for courses in the major field or for courses taken in fulfillment of requirements for double and joint degree programs with professional schools of the University. A maximum of 24 points may be credited for studio or performance courses in the major field. A minimum of 90 points of traditional liberal arts courses is required for the student who majors in such a field; for all other majors, a minimum of 102 points of such courses is required.

**Minors**

The selection of a minor field of study is optional. A minor requires at least five courses (three of which must be qualifying Barnard or Columbia courses) that total a minimum of 15 points, and may be designated by any student having a major after completing a minimum of three courses in the minor field. Requirements depend on the minor chosen (see individual department curriculum statements); courses are selected in consultation with the department chair. Courses for the major and minor may not overlap. Minor courses may be used in satisfaction of general education requirements. To qualify for the minor, a course must be letter-graded A+ to C-.
THE CURRICULUM

Requirements for Transfer Students
A student admitted to Barnard with fewer than 24 points of credit is considered a first-year student and is subject to all requirements for first-year students, including First-Year Seminar and two semesters of Physical Education. A student admitted with 24 credits or more is considered a transfer student. To receive the A.B. degree at Barnard, a transfer student must be enrolled at Barnard (Morningside Heights, Reid Hall, or the Berlin Consortium) for at least four full-time regular academic terms during which she must complete at least 60 points, including at least six courses in the major field (and three in the minor field, if a minor is elected). Additional major (and minor) courses, as well as general education requirements, may be satisfied by transfer courses. Exemption from the language requirement may be attained on the basis of College Entrance Examination Board Achievement scores alone or by a combination of those scores and additional college work. Those who do not receive exemption must complete the normal language requirement. Transfer students are eligible for general honors when both overall and Barnard averages meet the required academic standards.

Transfer Credit
Courses completed at other accredited colleges and universities which are similar in content and depth to Barnard courses may be submitted for transfer credit. Transfer courses are evaluated after a complete official transcript is received in the Office of the Registrar. Students are asked to submit catalogues and course descriptions with their requests for transfer credit to the Admissions Office.

Credit for approved work at another institution is applied to Barnard's 122-point (120 points for students entering prior to Autumn 2003; 121 points for transfer students) graduation requirement with a maximum of 16 points per term. Credit cannot be granted for courses with grades lower than C minus. Acceptable transfer work does not usually include applied or professional courses or more than the equivalent of two Barnard studio courses. The first term of an elementary language course is not normally credited unless or until the second term or a more advanced course has been satisfactorily completed, but a student may request a single exception to this ruling.

Transfer students who entered Barnard in or after Autumn 2003 with fewer than 24 points need 122 points to graduate, and two of those points are for PE, either at the previous school or here. Those entering with 24 or more points must complete 121 points for the Barnard degree, and 1 of those points is for PE (1 is both the minimum and the maximum).

Transfer students may apply for credit for previous summer courses under the regulations governing summer study.

First-year students with a record of prior coursework taken as non-matriculants at an accredited college in the United States may request up to 15 points of transfer credit. Such work will be evaluated after the student has completed 12 points at Barnard. Grades for this course work are included in the overall average.
THE CURRICULUM

Other Academic Opportunities

Writing Fellows Program

The Writing Fellows Program offers students with strong writing, reading, and communication skills an opportunity to become peer tutors in writing. During their first semester in the program, students take a seminar and practicum in the teaching of writing (The Writer’s Process, see ENGL BC3101), usually in the autumn term of their sophomore or junior year. As Writing Fellows, they work in different settings (e.g., The Jong Writing Center, writing-intensive courses across the curriculum) with Barnard undergraduates at all levels and in all disciplines. Writing Fellows receive a stipend and are asked to make a commitment of three semesters to the Program.

Writing-Intensive Courses Across the Disciplines

Students in these courses undertake at least three writing projects, each of which goes through at least two drafts. Writing Fellows read and confer with students on the first drafts of their papers, which students may then revise, handing in both first and second drafts to their instructors, who comment on and grade the revised drafts.

The departments of Anthropology, Architecture, Art History, Asian and Middle Eastern Cultures, Biology, Dance, Economics, Education, English, Environmental Science, French, History, Philosophy, Political Science, Psychology, Religion, Slavic, Sociology, Spanish, Theatre, and Women’s Studies have offered writing-intensive courses. Both instructors and students report positive results. Students appreciate the help they get in revising drafts and experience significant gains in their writing skills. Instructors find that the revised papers they receive permit them to focus their comments on course content, rather than on the mechanics of writing.

The Writing Center

In addition to their work in specific courses across the curriculum, Writing Fellows staff The Erica Mann Jong Writing Center (121 Reid Hall). Any Barnard student is welcome to confer on a particular writing project or to discuss some broader aspect of her writing (e.g., how to articulate, organize, and structure thoughts, how to use evidence effectively, how to work on English as a second language). Students confer on chapters of their senior theses, drafts of papers for First-Year English, outlines or ideas for papers in upper-level courses, lab reports, personal statements for admission to law school, etc.

Senior Scholar Program

The Barnard Senior Scholar Program allows a qualified student to undertake a single project for the entire senior year, or for one semester of the senior year (normally the second). The Program is intended for a student who is unusually well prepared in an academic discipline or in one of the performing arts. It offers the special advantages of concentration on one project, designation as Senior Scholar on the permanent transcript, and the amendment of some major requirements. Senior Scholars are allowed credit for no more than 30 points for the project. In the past, Barnard Senior Scholars have gained approval for a wide range of proposals.

A qualified student interested in the Senior Scholar Program should consult the Senior Class Dean in the Dean of Studies Office, who is coordinator of the program, in her junior year. Before the beginning of the senior year, the student should have completed all but the major requirements for the A.B. degree. Her written application for the Senior Scholar Program is submitted to the Committee on Honors for approval.

Centennial Scholars Program

The Centennial Scholars Program offers intellectually independent students an early opportunity to engage in challenging projects, tailored to their individual interests, with faculty mentors. The program is limited to 15 students in any single class. Selection is based on the Centennial Scholars Committee’s review of a student’s application for admission or on an application made by the student herself during the spring semester of her
first year. Students selected for the program will be notified by the Committee.

The Program confers a maximum of 18.5 points of credit toward the degree. In the spring of a Centennial Scholar's sophomore year, she enrolls in CTSC BC 1889, Working With Ideas, an interdisciplinary course designed to lay the foundation for the core of the Program, an extended apprenticeship with her mentor(s). Her project may extend over two or three semesters and may include a summer to accommodate travel or other particular needs. The Program culminates in the Centennial Scholars Symposium, devoted to preparing a public presentation of the project. Dinner lectures, outings to museums, performances, and research laboratories, and similar activities, are additional features of the Program.

Barnard Leadership Initiative

The Barnard Leadership Initiative (BLI) is an exciting new effort in the College's mission to prepare women to move into positions of leadership and authority in our society. This initiative musters and combines the curricular and co-curricular efforts and resources of the College to help prepare ambitious Barnard women to lead more effectively. It focuses on integrating Barnard's rigorous liberal arts curriculum with vibrant experience-oriented co-curricular programming, building upon the enriching experiences of the close-knit Barnard community and the vast educational, cultural and professional opportunities of New York City.

Arthur O. Eve Higher Education Opportunity Program

The Arthur O. Eve Higher Education Opportunity Program (HEOP) is an academic support and financial assistance program for undergraduate New York State residents who meet New York State economic and education guidelines. HEOP provides individual tutoring and tutorials, as well as individual counseling, workshops, study groups, and mentorship. All incoming HEOP students participate in an intensive summer academic program that includes instruction in English, mathematics, science, research and public speaking skills.

Collegiate Science and Technology Entry Program

The Collegiate Science and Technology Entry Program (CSTEP) is a New York State Department of Education initiative designed to provide services to students from underrepresented populations or economically disadvantaged backgrounds who are seeking careers in the sciences, mathematics and technological fields, and the licensed professions.

During the academic year CSTEP provides faculty mentors, academic support (tutorials), financial assistance for specialized preparation courses for standardized examinations (e.g. GRE, LSAT, MCAT, etc.), workshops, placement in internships and academic counseling.

Mellon Mays Undergraduate Fellowship Program

The Barnard Mellon Mays Undergraduate Fellowship (MMUF) Program, in accordance with the mission of the Andrew W. Mellon Foundation, seeks to increase the number of minority students and students with a demonstrated commitment to eradicating racial disparities who will pursue Ph.D.s in core fields in the arts and sciences. The program's longer-term goal is to address the under-representation of minority groups on American college and university faculties. Mellon Mays Fellowships provide opportunities for talented undergraduates to work with faculty mentors in research and other activities designed to encourage the pursuit of the Ph.D. in the humanities and sciences.

Study Abroad

Several options for study abroad are available to academically-qualified Barnard students. The Faculty has set the following guidelines for eligibility. By the time they plan to study abroad, students should:

1. have two years or the equivalent at the college-level of the language of the host country (this includes AP test scores, language proficiency exam or courses taken at another college or university), provided the language is offered at Barnard or Columbia, OR have completed one year or the equivalent at the college-level of the language of the host country and enroll in a program with a home stay or an intensive language practicum at the start of the semester. For students studying the sciences or mathematics abroad, language requirements vary
slightly. When the language is not offered at Barnard or Columbia, students should have some knowledge of the language of the host country;
2. have no outstanding incompletes;
3. be in good academic standing;
4. have worked out, in consultation with the major advisor and Dean for Study Abroad, a plan for the completion of all major and general education requirements for graduation.

The educational interests of each applicant are of primary concern in acting on a student's request to study abroad for degree credit. Interested students should begin the process of applying to study abroad by consulting the Dean for Study Abroad Advising in the Dean of Studies Office no later than the first semester of the sophomore year. Students must obtain her approval, as well as that of the class dean, the academic adviser, and the department chairs through which credit is being requested in order to receive the College's permission to study abroad for credit toward the Barnard degree. Students pay Barnard tuition and an off-campus comprehensive fee for the period of study abroad. All other costs (housing, meals, other fees, etc.) are payable directly to the other institution at their own rate.

Barnard approves programs of study throughout the world. Some programs—in partnership with Barnard—require nomination by the College, e.g., St. Peter's College at Oxford University.

Barnard students who wish to study for degree credit in Paris may apply to the Columbia University in Paris program, which offers a varied and attractive curriculum in French language, literature, culture, art history, political science, history, philosophy, film studies, and women's studies. In addition to the courses offered at Reid Hall, students enroll in courses in the French university system in a variety of academic disciplines. To qualify for admission, a student must have completed two years of college French with grades of B or better. It is possible to spend one term or an academic year in Paris. Some participants are French majors, but most are not. The student body comprises undergraduates from Barnard and Columbia, as well as those from other colleges and universities. The program is owned and administered by Columbia University. It is located in the Montparnasse district of Paris, near the Luxembourg Gardens. The administrative staff assists students in planning academic programs and in finding housing accommodations. Credit is awarded for no other programs in Paris.

Barnard students who wish to study for degree credit in Germany may apply to the Berlin Consortium for German Studies program, based at the Free University of Berlin. This program makes it possible for humanities, science, and social science majors who have completed at least two years of college German or the equivalent to become German university students for an academic year or semester. The program involves full immersion into the German language, enrollment directly into courses shared with German students, access to university libraries and student housing, internship opportunities during vacation periods, and maximum exposure to contemporary German cultural and political life. The program is administered by Columbia University, and both a full-time academic director and resident director located at Free University assist students in planning academic programs.

Bulletins and applications for Columbia University in Paris and the Berlin Consortium are available in 203 Lewisohn Hall and in 105 Milbank.

Barnard also offers the opportunity for study in Japan at the Kyoto Center for Japanese Studies through its participation in a consortium directed by Columbia, as well as directly through other universities. Students with advanced Chinese language skills may study at Columbia's program in Beijing at Tsung Hua University in Beijing; Barnard also offers students the opportunity to study at several other programs throughout China.

In addition to the programs that Barnard oversees with Columbia, study through the programs of many other U.S. colleges and universities have been approved for Barnard credit. Please visit the Study Abroad website, which includes a list of all approved programs. Course credit for courses taken at institutions abroad other than the Barnard-Columbia programs is generally treated as transfer credit.

**Study at Spelman**

Barnard participates in an exchange program with Spelman College, the historically Black college for women in Atlanta, Georgia. Barnard students in the program may register for classes at any of the institutions within the Atlanta University Center: Clark Atlanta University, Morehouse College, Morehouse School of Medicine, the Interdenominational Theological Center, as well as Spelman. In addition, students may participate in the Columbia University—Howard University Exchange Program. Barnard students studying at Spelman pay
Spelman's rates for tuition, fees, room, and board to Barnard. Barnard students studying at Howard pay Barnard’s tuition and fees to Barnard and Howard's room and board costs directly to Howard.

Applications for both programs may be obtained in the Dean of Studies Office.

**Study at Jewish Theological Seminary**

The Jewish Theological Seminary of America (JTS), located two blocks from the Barnard campus, offers opportunities to Barnard students for specialized study under a cooperative arrangement. Students may enroll in courses at the Seminary under any of two options: (1) individual courses; (2) a double-degree program.

A student wishing to study at the Seminary should consult her adviser and obtain the written permission of the chair of her major department. Courses taken at the Jewish Theological Seminary are evaluated as transfer credit. Students who wish to obtain simultaneously the degree of Bachelor of Arts from Barnard and Bachelor of Hebrew Literature from the Seminary must consult the appropriate dean in the Dean of Studies Office at Barnard and at the Seminary’s List College and must be separately admitted to each institution.

Barnard students who are enrolled in the Double-Degree Program may request housing at the Seminary. Double-degree students who enroll in the Seminary College will be subject to both Barnard and Seminary tuition charges and pay their student accounts separately to each institution. Students taking JTS courses pay the Seminary directly for those courses at the JTS rate.

**Study at the Juilliard School**

The Juilliard School at Lincoln Center offers opportunities to Barnard students for individual courses in music. For a five-year program leading to the Barnard A.B. and the Juilliard M.M., rigorous auditions are required for which early application must be made. Students interested in these options may obtain further information and audition dates by consulting Dr. Gail Archer, Coordinator of the Barnard Music Program (319 Milbank), at the time of admission to Barnard or as early as possible. Students enrolled at Barnard taking music lessons at Juilliard pay tuition only to Barnard. Students admitted to the Juilliard M.F.A. program pay tuition to Barnard for courses taken at Barnard and to Juilliard for courses taken at Juilliard.

**Study at the Manhattan School of Music**

The Manhattan School of Music is located one block to the north of the Barnard campus. Under a cooperative program of cross-registration, musically qualified Barnard students who pass required auditions have the opportunity to enroll in six semesters of private instrumental lessons at the Manhattan School, subject to the regulations specified in the application form available at the Office of the Registrar. Majors and minors in Music may take eight semesters of lessons. Students must complete a Barnard approval form each semester before receiving permission to enroll at the Manhattan School. Students pay Barnard tuition.

**Study at Teachers College**

Permission is needed to take a course at Teachers College. Students should obtain an application from the Office of the Registrar, obtain course approval from the Dean Blank, and return the completed form to the Office of the Registrar. TC courses require the payment of additional tuition at the Teachers College rate over and above Barnard tuition.

**Joint Degree Intrauniversity Programs**

Barnard offers double and joint degrees in coordination with other schools in the University system, including the School of International and Public Affairs (SIPA), the Fu Foundation School of Engineering and Applied Science (SEAS), the School of Law, and the School of Dental and Oral Surgery. Details on specific programs are given below.

**School of International and Public Affairs: International Affairs and Public Administration**
Barnard College and the Columbia University School of International and Public Affairs offer two joint programs leading to the A.B. degree at the end of four years and the Master of International Affairs (M.I.A.) or Master of Public Administration (M.P.A.) after one additional year.

Interested students should consult Dean Runsdorf in the Dean of Studies Office as early as the sophomore year.

Qualified students, nominated by the Dean of Studies Office, complete the application in the spring of the junior year. The final decision on admission to a program rests with the SIPA Review Committee.

Admission to a joint program does not constitute automatic admission to the M.I.A. or M.P.A. graduate program. Final admission is conditional upon the applicant’s receiving the A.B. degree from Barnard. A Barnard student’s eligibility for the joint programs is governed by the following conditions:

2. At least four semesters of matriculation at Barnard before enrolling in a joint program.
3. Fulfillment of all general education requirements and almost all major requirements before the senior year.
4. No more than four courses in the major to be completed during the senior year.
5. Completion of introductory courses in microeconomics and macroeconomics and a strong background in quantitative courses.
6. Pertinent professional experience.

A Barnard student in the Program must satisfy all Barnard degree requirements. Courses in the School of International and Public Affairs may be used to fulfill major requirements only with the written permission of the chair of the major department. During the senior years she must complete at least 24 points of course work at the 4000 level or above, including the first-year required core courses. An internship, usually during the summer between the fourth and fifth years, is also required.

School of Law

Each year Barnard College has the option of nominating, in conjunction with the Columbia University School of Law, juniors with outstanding records to enter the Law School under the Accelerated Program in Interdisciplinary Legal Education (A.I.L.E.).

Each student must submit a record of 90 points, at least 60 of which will have been completed at Barnard. She must have fulfilled all degree requirements except those for the major, which she must be able to complete together with the final 30 points at the Law School. Twelve of the 30 must be in the liberal arts and the remainder in appropriate law courses.

To be nominated, a student must have an outstanding academic record and have taken the LSAT by March of her junior year with a score in keeping with the median level of applicants accepted to the law school in that academic year. Students interested in the program should consult with Dean Kuan Tsu or Dean Starks-Allen early in the junior year and with the Dean Schneider to ensure fulfillment of graduation requirements. LSAT registration information is available in the Dean of Studies Office.

School of Dental and Oral Surgery

A limited number of qualified students may enter the Columbia University School of Dental and Oral Surgery after three years of undergraduate work at Barnard. To be eligible for this program, the student must have completed 90 points of academic work at Barnard and all of the prerequisite courses for the School of Dental and Oral Surgery. To be eligible for the A.B. degree, she must have completed 120 points, 30 of which may be taken at the School of Dental and Oral Surgery, and she must have completed all of the general and major requirements of Barnard College.

A student interested in this option should consult with Dean Bournoutian or Dean Starks-Allen in her first year for early program planning. Before her admission to the School of Dental and Oral Surgery, she should consult with the Dean Schneider to make certain that she will be eligible for the A.B. degree.

Fu Foundation School of Engineering and Applied Science

The first three years of the five-year program leading to the degrees of Bachelor of Arts and Bachelor of
Science are spent under the jurisdiction of Barnard College with a few courses taken in the School of Engineering and Applied Science. During the junior year the student applies for admission to the School of Engineering and Applied Science, where the remaining two years of more specialized engineering and major study are taken. Completion of the general education requirements is required for the Barnard A.B. degree. A maximum of 30 Engineering points may be credited toward the Barnard degree. Students interested in the program are encouraged to consult Dean Blank in the Dean of Studies Office to plan an appropriate schedule of Barnard courses.

COURSE CATALOGUE

COURSE LISTINGS

We invite you to use this interactive and searchable catalogue for program planning. You will find current information for all courses offered at Barnard, along with links to Columbia courses, the University Directory of Classes and departmental websites.

The Curriculum

Listing of courses in this catalogue is not a guarantee of their availability, and the College may revise its degree requirements from time to time.

Reading the Course Listings

Autumn term courses are followed by an x; spring term courses are followed by a y.

Individual Barnard courses that run throughout the year are marked with a dash between the numerals (e.g., SPAN V101-V110). The first semester of a summer course also the second semester is completed. However, a single exception to this rule is allowed upon written request to the Registrar.

Certain courses are offered in both Autumn and Spring terms and may be taken in either term.

The following alphabetical prefixes designate the division of the university for whose students the course is primarily offered or indicate joint courses.

- BC - Barnard College
- C - Columbia College
- F - School of General Studies
- G - Graduate School of Arts and Sciences
- H - Columbia University in Paris
- R - School of the Arts
- S - Summer Session
- V, W - Joint undergraduate course

The level of the course is generally as follows:

1000-3999 Undergraduate
4000-4999 Advanced undergraduate and first-year graduate
5000-8999 Graduate, normally not open to undergraduates

AFRICANA STUDIES

African Studies
328 Milbank Hall
www.barnard.edu/africana

This program is supervised by the Committee on Africana Studies:

Director of Africana Studies: Kim F. Hall (Lucy B. Hook Professor of English)
Professor of French: Sergei Georgiev
Professor of Anthropology: Lesley Sharp
Assistant Professor of Anthropology: Brian Larkin
Assistant Professor of Dance: Paul Scolieri
Assistant Professor of English: Bashir Abu Manneh
Assistant Professor of English: Monica Miller
Assistant Professor of French: Kusina Glover
Assistant Professor of History: Abosede George
Senior Associate of English: Guadua Prettyman

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/academic.html

The Africana Studies major offers an interdisciplinary, comparative approach to the study of the history, politics, cultures, literatures, and experiences of peoples of African origin in Africa and the African diaspora. In addition to fulfilling the requirements, students focus on a central subject, theme, or set of questions.

In consultation with the program director, each student chooses an adviser from among several departments and works closely with both to define a thematic concentration within the major.

Themes might include Gender and Africa; the Multicultural Caribbean; Media and Social Change; Culture and Politics in the African Diaspora; Prisons and Globalization; Literature, Arts, and National Identity.

A series of required courses spanning the disciplines, the junior colloquium, and the directed research provide a solid foundation for interdisciplinary study. The major offers training in methodology as well as in the use of primary and critical materials, and lays the foundation for the research and writing of a senior thesis.

REQUIREMENTS FOR THE MAJOR

I. Introductory Courses: Two-semester sequence (preferably to be taken before the junior year):
   - AFRS BC 3004x  Introduction to Africana Studies: Africa Past, Present and Future
   - AFRS BC 3006y  Introduction to Africana Studies: The African Diaspora

II. Language: Each student must demonstrate proficiency in any of the languages of Africa or the diaspora (in addition to
   English) by completing at least the fourth semester of that language, or its equivalent. This requirement is not in addition to the
   general foreign language requirement.

III. Harlem: Each student will take a course on Harlem, chosen from among the offerings at Barnard or Columbia.

IV. Electives: Each student will, with the approval of the program director, select five electives which focus on a central
    subject, theme, or set of questions. Of these five, at least two must be on Africa and at least one must be on the African
    Diaspora. At least one course must be in the humanities, and one in the social sciences, and these courses can overlap with
    the courses on Africa and the African Diaspora.

V. One Semester Junior Colloquium in Africana Studies:
   - AFRS BC 3110  Colloquium: Issues in the Studies of the African Worlds

VI. Senior Thesis: AFRS BC 3998x and AFRS 3999y Senior Seminar, a two-semester program of interdisciplinary research
    leading to the writing of the senior essay. In some cases, a senior seminar in one of the departments contributing to the
    program may be substituted for the first semester of the Senior Thesis.

No minor is offered in Africana Studies.

Courses of Instruction

AFRS BC 3004x Introduction to Africana Studies: Africa Past, Present and Future
Interdisciplinary and thematic approach to the study of Africa, moving from pre-colonial through colonial and post-colonial
periods to contemporary Africa. Focus will be on its history, societal relations, politics and the arts. The objective is to provide
a critical survey of the history as well as the continuing debates in Africana studies.

- A. George

AFRS BC 3006y Introduction to Africana Studies: The African Diaspora
Interdisciplinary and thematic approach to the African diaspora in the Americas: its motivations, dimensions, consequences,
and the importance and stakes of its study. Beginning with the contacts between Africans and the Portuguese in the 15th
century, this class will open up diverse paths of inquiry as students attempt to answer questions, clear up misconceptions, and
challenge assumptions about the presence of Africans in the "New World."

AFRS BC 3100y Medicine and Power in African History
Examines medical discourse and practice in Africa, emphasizing relationships between power and medical knowledge. Topics
include: medicine and empire, tropical medicine, colonial public health and social control, labor, reproductive health, and
HIV/AIDS.
AFRS BC 3100y (Section 01) Medicine and Power in African History
Examines medical discourse and practice in Africa, emphasizing relationships between power and medical knowledge. Topics include: medicine and empire, colonialization, and colonial public health and social control, labor, reproductive health, and HIV/AIDS. - C. Cynn
*General Education Requirement: Social Analysis (SOC).*
4 points

AFRS BC 3109y Junior Colloquium: Critical Race Theory
Engages social constructions of race and racial identity through literary representations. Our conversations will draw upon a number of articulations of race theory including specific post-1980s Critical Race Theory. In negotiating the persistent links between concepts of race and racialized discursive practice, we will also draw into our discussions anthropological and linguistic theories about race.
- Y. Christiane
*General Education Requirement: Social Analysis (SOC). General Education Requirement: Literature (LIT).*
4 points

AFRS BC 3110x Junior Colloquium: Post Colonialism & Beyond
Introduces students to the origins and development of postcolonial theory, to the historical and political contexts in which postcolonial theory emerged, and to some of the central historical texts and debates in postcolonial studies. Among other topics, we will examine the Marxist analysis of imperialism; race and/or the negritude and the indigenous movements; decolonization, nationalism, and gender; the critique of Orientalism; and feminism, the postcolonial state, and globalization.
4 points

AFRS BC 3120y History of African-American Music
A broad survey of the development of African-American musical modes of expression. Utilizes both historical and ethnomusicological methodologies to examine sacred and secular musics of slave communities and "free," inside and outside mainstream American culture. Includes studies of blues, gospel, jazz, rhythm & blues, soul, funk, and hip-hop. Analyzes social, cultural, and political issues and movements, and their impact on the development of various musical elements. - W. Lowe
*General Education Requirement: The Visual and Performing Arts (ART).*
3 points

AFRS BC 3122y Ethnography of Black Americans In the United States
An interdisciplinary survey of writings, film and music on and by black Americans from the 17th-20th century. Examines theories of race and gender constructions, performance and power, as well as systems of image construction in popular culture. Also explores the dynamic nature of notions of authenticity and authority.
4 points
AFRS BC 3144x Black Theater

Instr. Shawn Garrett, T 12:10pm-2:00pm, 318 Milbank Hall. Limited spaces are reserved for Africana Studies Majors.

- S. Garrett
General Education Requirement: Literature (LIT).
4 points

AFRS BC 3148x Literature of the Great Migration
(Also ENGL BC 3148) Examination of fiction, poetry, essays and films about the Great Migration (1910-1950) of African-Americans from the rural South to the urban North, focusing on literary production in New York and Chicago. (This course satisfies the Harlem Requirement for the Africana Studies major).

- C. Prettyman
General Education Requirement: Literature (LIT).
3 points

AFTH BC 3150y Race and Performance In The Caribbean
Analysis of the shifting place and perception of Afro-Caribbean performance in Caribbean societies. Taking a cross-cultural approach examines performance through the lens of ethnography, anthropology, music and literary criticism.

- M. Horn
Prerequisites: Permission of the instructor. Sophomore Standing. Enrollment limited to 12 students. General Education Requirement: The Visual and Performing Arts (ART).

AFRS BC 3560x Human Rights and Social Change in Sub-Saharan Africa
Examines the evolution of the ideas, institutions and practices associated with social justice in Africa and their relationship to contemporary international human rights movement and focuses on the role of human rights in social change. A number of themes will re-occur throughout the course, notably tensions between norms and reality, cultural diversity, economic and political asymmetries, the role of external actors, and women as rights providers. Countries of special interest include Liberia, Senegal, South African and Tanzania.

AFRS BC 3998x-BC3999y Senior Seminar
A two-semester program of interdisciplinary research leading to the writing of the senior essay. Senior Seminar is not an independent study, but a structured seminar on methodology and criticism, which in the first semester results in an approved and substantial thesis proposal and annotated bibliography, and in the second semester produces the final thesis. In some cases, a senior seminar in one of the departments contributing to the program may be substituted for the first semester of the Senior Thesis.

The Program in American Studies offers an interdisciplinary approach to the study of the society and cultures of the United States. American Studies majors examine the changing narratives and practices of American domestic and international arrangements in a curriculum that emphasizes both historical depth and theoretical breadth.

As an American Studies major, you will have the opportunity to take courses in American history, literature and other related disciplines. In addition to the junior colloquium, you will work with your advisor to devise a four-course concentration organized around a topic (for example, immigration, migration and ethnicity) and a historical period (for example, Civil War and Reconstruction). This four-course cluster will serve as the intellectual foundation of your year-long senior thesis.

AMERICAN STUDIES

American Studies
413 Barnard Hall
854-5046
www.barnard.edu/amstud

REQUIREMENTS FOR THE MAJOR

1. Two semesters of the American History survey, HIST BC1401 and 1402. Majors are urged to complete this requirement by the sophomore year. This requirement may be waived for those with scores of 4 (waives one semester) or 5 (waives two semesters) on the Advanced Placement exam. Those students should substitute two upper-level American history courses, one that covers pre-Civil War material, and the other that covers post-Civil War material.

2. Two semesters of the American literature sequence:
   a. Either ENGL BC 3179 or 3180
   b. Either ENGL BC 3181 or 3183

3. One course in any discipline that focuses on American culture before 1917. (Examples include but are not limited to HIST BC 3424x "Approached by Sea: Early American Maritime Culture," ENG BC 3140x, "Explorations of Black Literature: 1760-1890," and AHIS BC 3642x or y "North American Art and Culture."

4. Junior Colloquium: AMST BC 3401, "Cultural Approaches to the Past." This course offers an introduction to the theoretical approaches of American Studies, as well as methods and materials used in the interdisciplinary study of American cultures and society. Offered only in the fall. Students studying abroad in the fall of their junior year will be expected to take the colloquium in the fall of their senior year.

YOUR CONCENTRATION

Themes
- Gender and Race
- Race
- Class
- Media and popular culture
- Disability
- Political theory and culture
- Labor, production, and consumption
- Transnational America
- Natural and built environment
- Family and kinship
- Immigration, migration and ethnicity
- Spirituality and belief
- Proposed topic submitted via petition to the Chair

Historical Period
- Aboriginal and Columbian period
- Colonial, Revolutionary and Early Republic
- Antebellum America
- Civil War and Reconstruction
- 1900-1945
- 1945-present
- Proposed time period submitted via petition to the Chair

Sample concentration 1: Natural and Built Environment / 1900-1945
1. ARCH V 3114 Making the Metropolis: Urban Design and Theories of the City since 1850
2. URBS V 3810 Production, Consumption, and Control of Public Spaces
3. ENGL BC 3184 House and Home in American Culture
4. HIST W 3441 Making of the Modern American Landscape

Sample concentration 2: Race / Civil War and Reconstruction
1. HIST BC 4411 Race in the Making of the US
2. AFRS BC 3122 Ethnography of Black Americans in the United States
3. HIST W 3432 The United States in the Era of Civil War and Reconstruction
4. AMST BC 3300 Pedagogy of the Dispossessed: Indigenous Sovereignty, Democracy and Education in the United States

ANCIENT STUDIES

Ancient Studies
210 Milbank Hall
www.barnard.edu/classics

This program is supervised by the Committee on Ancient Studies:

Professor of Classics: Helen Folby
Associate Professor of Classics: Kristina Milner
Assistant Professor of Classics (Columbia): Elizabeth Irwin (Representative for Columbia)
Assistant Professor of Classics: Katharine Volk (Representative for Columbia)
Professor of History (Columbia): William Harris

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/academiclist.html

Ancient Studies is designed to allow the student to explore various aspects of the ancient Mediterranean and Mesopotamian cultures while concentrating on one of these major civilizations. By studying these cultures in several academic disciplines the student will acquire a general knowledge and a context for her area of specialization. At Barnard and in the University a very large number of courses pertaining to antiquity are offered each year, and the program prepares an annual list to aid students in making their selections. This list may be obtained from the Representative for Barnard or the Barnard Classics website.

ANCIENT STUDIES

Ancient Studies
216 Milbank Hall
www.barnard.edu/classics

REQUIREMENTS FOR THE MAJOR

Each student, after consultation with the Representative for Barnard, chooses an adviser whose field is closely related to her own and with whom she will do her senior reading. The programs of all the students are reviewed by the Ancient Studies Committee in order to maintain control and a sense of collective enterprise.

A total of 36 points are required in the major, including at least four courses in one geographical area or period, courses in at least three departments (to ensure proper interdisciplinary training and experience); the elementary sequence of a relevant ancient language; the appropriate history course; and at least the first semester of ANCS V 3998. V 3999.

In some cases, a senior seminar in one of the departments or ANCS V 3996 may be substituted for ANCS V 3998, V 3999. Ancient language courses may be used toward the major requirement; however, where a second ancient language is offered, one second-year sequence must be offered for a student to gain credit for the first year.

No minor is offered in Ancient Studies.

Anthropology examines how cultures provide frames for the ways people think, act and make sense of their society. Now, with the quickening movement of culture, ideas and people we seek to examine the forms of life that emerge from this movement and the interactions and conflicts that result. Barnard Anthropology provides students new ways to perceive and analyze the world, to understand difference and to think on a global scale while still focused on the lived experiences of everyday life.

Majors in anthropology can take advantage of internships offered by several major museums and libraries in New York City. Various summer schools provide opportunities for research in archaeology and ethnography and, under certain circumstances, such work may be credited toward the Barnard degree. Students interested in cultural anthropology are encouraged, whenever possible, to conduct research in the New York area, or, during their summer vacations, in other localities. The department also encourages majors to consider spending a semester abroad; students who plan to do so should plan early, in consultation with the chair and their advisor, in order to incorporate required courses in proper sequence.

All courses, except those limited to majors, satisfy the College's distribution requirements. Courses listed as W 4000 are open to majors, non-majors, and interested graduate students.

The department also cooperates with related programs such as Africana Studies, American Studies, Foreign Area Studies, Human Rights Studies, Urban Studies, and Women's Studies, and with other departments offering, as an option to their majors, a four-course cluster in Anthropology. Arrangements for combined, double, joint, and special majors are made in consultation with the chair.

Anthropology  
411 Milbank Hall  
854-9389, 5428  
www.barnard.edu/anthro

REQUIREMENTS FOR THE MAJOR

Every major is urged to acquire a general knowledge of three of the four fields of anthropology (social and linguistic anthropology, archaeology, and physical anthropology) and of their interrelationship. To this end, the student's program should be designed in consultation with her adviser as soon as possible after the declaration of the major. Continuing and frequent meetings with the adviser are encouraged.

Ten courses are required for the major, including:

ANTH V 1002  The Interpretation of Culture

and two of the following:

ANTH V 1007  The Origins of Human Society

1 of 2

</tr>
<tr>
<td>ANTH V 3041</td>
<td>Anthropological Theory II</td>
</tr>
</tbody>
</table>

plus at least three other courses of the student's own choosing.

In consultation with advisers, programs will be designed to reflect the students' interests and plans—whether they intend to go on to graduate studies in anthropology or expect to enter other fields.

It is recommended that students who plan to major and do so in socio-cultural anthropology take BC 3868y (Ethnographic Field Research in New York City) **before their senior year**. Many seniors choose to incorporate a fieldwork component in their thesis research and having some experience of field methods is extremely important. Those interested in other sub-disciplines may wish to take this or another “methods” course and should consult their advisers. Students are also encouraged to check listings for courses offered by EEEB and ANEB at Columbia for possible Anthropology credit, in consultation with the Barnard department chair.

**Senior Essay**

All students majoring in Anthropology are required to submit an essay of substantial length and scholarly depth. Such a paper will usually be written during the course of the Senior Seminar (BC3871–BC3872) or, under special circumstances and with department approval, in one or two semesters of BC 3999x, y Individual Projects.

**Double and Joint Majors**

Students doing a double or joint major in Anthropology and another subject are required to register for at least one semester of BC 3871–BC 38

**REQUIREMENTS FOR THE MINOR**

The minor consists of five courses: ANTH V 1002; one of the following: ANTH V 1007, ANTH V 1008, ANTH V 1009, or EEEB 1010; plus three other Anthropology courses selected in consultation with the chair.

Pre-law and premedical students who wish to minor in anthropology should seek the advice and approval of the department chair.

ANTH V 1007x The Origins of Human Society

Examines the grand sweep of human development from our first bipedal steps some six million years ago, to the earliest evidence of art and symbolism, and on to the emergence of the first agricultural villages. Given the immensity of time under consideration, emphasis is placed on those heightened periods of change commonly described as "revolutions". Participants will become familiar with the fossil and/or archaeological records or those revolutions and the competing theories of why they occurred.

- S. Fowles

General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Social Analysis (SOC).
ANTH V 1008y The Rise of Civilization

Rise of major civilizations in prehistory and protohistory throughout the world, from the initial appearance of sedentism, agriculture, and social stratification through the emergence of the ancient empires. Description and analysis of a range of regions that were centers of significant cultural development: Mesopotamia, Egypt, the Indus River Valley, China, North America, Mesoamerica, and Andean South America.

General Education Requirement: Cultures in Comparison (CUL).

ANTH V 1009x Introduction to Language and Culture

Introduction to the study of the production, interpretation, and reproduction of social meanings as expressed through language. In exploring language in relation to culture and society, the focus is on how communication informs and transforms the sociocultural environment.

- P. Kockelman

Prerequisites: Enrollment limited to 100 students. General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Social Analysis (SOC).

3 points

EEEB V 1011y Behavioral Biology of the Living Primates

Study of non-human primate behavior from the perspective of phylogeny, adaptation, physiology and anatomy, and life history. Focuses on the four main problems primates face: finding appropriate food, avoiding being eaten themselves, reproducing in the face of competition, and dealing with social partners.

3 points

ANTH BC 1099x Introduction to the Social Sciences at Barnard

Introduction to social science departments and faculty at Barnard. Faculty informally discuss their departments, disciplines, research methodologies, and interdisciplinary projects. Barnard graduates (social science majors) share their academic and career histories, discussing how undergraduate concentrations helped prepare them for their professional and personal lives.

1 point

ANTH V 3906y Functional Linguistics

Introduction to functional linguistics: describing, classifying and explaining the relation between linguistic form and linguistic function; and language typology: describing and comparing the forms and functions of the world's languages in order to uncover, classify and explain cross-linguistic patterns. - P. Kockelman

Prerequisites: ANTH V1009 Language and Culture, or permission of instructor.

4 points
ANTH V 3940y Ethnographies of the Mid East

Explores the themes that have shaped ethnographic literature of the Middle East. These include topics such as colonialism, gender, Islam, nationalism and the nation-state. - A. Heo

Prerequisites: Previous enrollment in an Anthropology course. Sophomore standing. Enrollment limited to 20 students. 4 points

ANTH G 6129y Economy, Value and Society

This course is about economy and society, as seen through the lens of two classic works: Marx's Capital (volume 1) and Evans-Pritchard's Nuer (books 1 and 2). It has several overarching goals. First, to give students the opportunity to read, compare, and discuss two classic works in social theory—works that are often read in a piece-meal and rushed fashion, or presupposed as general canon. Second, to introduce students to key categories in British social anthropology, and Marxist and substantivist economics—and to provide a genealogy of these categories. To sketch an alternative metalanguage for examining social relations vis-à-vis the economy—one which is grounded in American Pragmatism and Boasian (Linguistic) Anthropology. And finally, in light of this genealogy and metalanguage, to reconsider a key set of disjunctures in the theoretical imaginary: household to moneymaking, status to contract, community to society, quality to quantity, use-value to exchange-value, concrete domination to abstract domination, private to public, punishment to discipline, and so forth.

- Paul Kockelman

3 points
Topical Courses

ANTH V 2004x Introduction to Social and Cultural Theory

Introduces students to theoretical works and ideas that have formed the modern field of anthropology. These include classic 19th century social theories (e.g., those of Durkheim, Weber, Marx), 20th century interpretive approaches (for example, structuralism), and contemporary modes of sociocultural analysis.

ANTH V 3465x Women and Gender in the Muslim World
Practices like veiling that are central to Western images of women and Islam are also contested issues throughout the Muslim world. Examines debates about Islam and gender and explores the interplay of cultural, political, and economic factors in shaping women's lives in the Muslim world, from the Middle East to Southeast Asia.
- L. Abu-Lughod
3 points
ANTH V 3525x Introduction to South Asian History and Culture

Looks at four major aspects of contemporary South Asian societies: nationalism, religious reform, gender, and caste. The object is to provide a critical survey of the history as well as the continuing debates over these crucial themes of society, politics, and culture in South Asia. Readings include primary texts that were part of the original debates as well as secondary sources that represent the current scholarly assessment on these subjects.

ANTH BC 3868y Ethnographic Field Research in New York City

A seminar-practicum on field research in New York City. Exploration of anthropological field research methods followed by supervised individual field research on selected topics in urban settings.
Prerequisites: Recommended for majors prior to the senior year. Open to non-majors by permission of the instructor.
4 points

ANTH V 3903y The Ethnoarchaeology of Cities

Consideration of cities from several points of view: a developmental and comparative perspective, looking at urban origins. Focus on New York City from its inception to the present, examining its spatial defined subunits ("neighborhoods"), structured by class and ethnicity.
3 points

ANTH V 3904x Native Americans and Europeans

Examines European-indigenous interactions in varied North American settings, from the 15th - 19th centuries, through archaeological, ethnographic, and historic materials. Focuses on power relationships expressed in a material nexus and through landscape reorganization.
3 points

ANTH V 3906y Functional Linguistics

Introduction to functional linguistics: describing, classifying and explaining the relation between linguistic form and linguistic function; and language typology: describing and comparing the forms and functions of the world's languages in order to uncover, classify and explain cross-linguistic patterns.
Prerequisites: ANTH V1009 Language and Culture, or permission of the instructor. General Education Requirement: Cultures in Comparison (CUL).
4 points
ANTH V 3907y Posthumanism
Explores what a post-human anthropology might look like. Readings draw from anthropology, actor-network theory, science studies, media studies, and science fiction.
General Education Requirement: Cultures in Comparison (CUL).

ANTH V 3928y Religion and Mediation
Analyzes the role of mediation in religious practice. Explores the ways in which religion is encoded into specific semiotic forms and how the nature of those forms - and their performance contexts - affect the practice of religion and the ways of making the divine manifest. Topics include word, print, image, sound, film and video in relation to Islam, Pentecostalism, Buddhism and animist religions.
- B. Larkin
Prerequisites: Permission of the instructor. Sophomore standing.
ANTH V 3932x Anthropology of Jazz
4 points

ANTH V 3939x Millennial Futures: Mass Culture and Japan
Addresses mass culture and its relationship with Japan at the end of the century, as it anticipates the continuation of millennial anxieties and fantasies into the 21st century. With one of the most developed, mass-mediated formations in the world, Japan becomes a compelling instance of late modernity, non-western, yet not. With ethnographic sensibilities, approaches such thematic domains as everyday orderliness, criminality and terror, gender and sexuality, and money and consumption through the media of print, video, film, sound recordings, and photography. Theoretical works in mass cultural criticism and Japan-specific readings are paired with weekly seminar discussions.
General Education Requirement: Cultures in Comparison (CUL).

ANTH V 3942x Anthropological Study of Ritual
4 points

ANTH V 3943x Youth and Identity Politics in Africa
Examines ways in which African youth inevitably occupy two extremes in academic writings and the mass media: as victims of violence, or as instigators of social chaos. Considers youth as generating new cultural forms, as historically relevant actors, and informed social and/or political critics. At the core of such critiques lie possibilities for the agentive power of youth in Africa.
4 points

ANTH W 3945x The Ethnographic Problem in Ethnic Studies
General Education Requirement: Cultures in Comparison (CUL).
4 points

ANTH V 3946x African Popular Culture
4 points

ANTH V 3947x Text, Magic, and Performance
Examination of text and performance, as informed by magic and related articulations of power. Topics explored include: prophetic writing, historical inscription; divine kingship, cosmology, divination; colonial fiction, nationalist figuring; spirit possession, ritual sacrifice; mask performance, music, shadow theatre. Draws principally on Southeast Asian sources. Key concerns are subjectivity and repetition.
Prerequisites: Permission of the instructor required. Enrollment limited to 20 students. General Education Requirement: Cultures in Comparison (CUL). Not offered in 2008-2009.
4 points

ANTH V 3949x Sorcery and Magic
Prerequisites: Enrollment limited to 20 students. General Education Requirement: Cultures in Comparison (CUL). Not offered in 2009-2009.
4 points

ANTH V 3950x Anthropology of Consumption
Examines theories and ethnographies of consumption as well as the political economy of production and consumption. Compares historic and current consumptive practices, compares exchange based economies with post-Fordist economies. Engages the work of Mauss, Marx, Godelier, Baudrillard, Appadurai, and Douglas among others.
Prerequisites: Permission of the instructor required. Enrollment limited to 20 students. General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Social Analysis (SOC).
4 points
ANTH V 3951y Pirates, Boys, and Capitalism

Detailed analysis of the history and figure of the pirate in the Western imagination. Asks why the pirate exerts such appeal through the ages and aims at introducing key problems in anthropological and cultural theory concerning colonialism, violence, homosexuality, rebellion, and the importance of the child's imagination of the above.

4 points

ANTH V 3952y Taboo and Transgression

Transgression of taboos is the basis of crime, sex, and religion in any society. As "the labor of the negative", transgression is also a critical element in thought itself. Working through anthropology of sacrifice and obscenity, as well as relevant work by Bataille, Foucault, and Freud, this course aims at understanding why taboos exist and why they must be broken.

Prerequisites: Permission of the instructor required. Enrollment limited to 20 students. General Education Requirement: Cultures in Comparison (CUL). Not offered in 2008-2009.

ANTH V 3961y Subsequent Performances

Explores the dynamic interaction between operatic compositions (especially Mozart's Don Giovanni and The Marriage of Figaro) and their subsequent performances, with particular emphasis on the cultural, political, and economic contexts that shape both the original composition and the following reproductions. Critical apparatus includes Abbate and Butler.

Prerequisites: Permission of the instructor. Enrollment limited to 15 students. Priority given to upper class anthropology and music majors; students must attend operas outside of class. General Education Requirement: Cultures in Comparison (CUL). Not offered in 2008-2009.
4 points

ANTH V 3962y History and Memory

3 points

ANTH V 3966y Culture, Mental Health and Clinical Practice

Considers mental disturbance and its relief by examining historical, anthropological, psychoanalytic and psychiatric notions of self, suffering, and cure. After exploring the ways in which conceptions of mental suffering and abnormality are produced, we look at specific kinds of psychic disturbances and at various methods for their alleviation.

Prerequisites: Enrollment limited to 20 students. Junior standing or completion of introductory course(s) in Psychology and/or Anthropology. General Education Requirement: Cultures in Comparison (CUL).
4 points
ANTH V 3969x Specters of Culture

Pursues the spectral effects of culture in the modern. Through a consideration of anthropologically significant, primarily non-western sites and various domains of social creation-performance, ritual practice, narrative production, technological invention-traces the ghostly remainders of cultural machineries, circuitries of voice, and representational forms crucial to modern discourse networks.

- J. Pemberton

General Education Requirement: Cultures in Comparison (CUL).
4 points

ANTH V 3970x Biological Basis of Human Variation

Examination of the biological data for modern human diversity at the molecular, phenotypical, and behavioral levels, as distributed geographically.

ANTH V 3971x Environment and Cultural Behavior

Examines human understandings and transformations of nature, drawing on theories of the relationship between nature and culture and the social production and construction of nature. Analyzes contemporary environmental use, conservation projects, and environmentally focused ethnographic writing. Demonstrates the relationship between nature ideologies and productions, and the social, economic, and environmental politics they engender.

- P. West

Prerequisites: Enrollment limited to 20 students. General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Social Analysis (SOC).
4 points

ANTH V 3972y Reproduction as Ideology: Conception and the Fetus Cross-Culturally

The goal of this course is to imagine conception and the fetus as cultural ideas. We will explore how various cultures throughout time and in contemporary discourse rationalize conception and the identity of the fetus. This cross-cultural discussion will provide the basis for a discussion of how kinship structure, social life and family are constructed. These concepts will then be related to American contemporary controversies surrounding abortion, new reproductive technologies, and the sociopolitical issues embedded within conception and childbirth. Finally we will place these issues within a global context of debates over reproduction ideology and population strategies.

- M. Weisgrau

General Education Requirement: Cultures in Comparison (CUL).
4 points

ANTH V 3974x Lost Worlds, Secret Spaces: Modernity and the Child

General Education Requirement: Cultures in Comparison (CUL).
4 points

ANTH V 3976x Anthropology of Science

Examines debates in the social studies of science, beginning with a focus on questions of epistemology and analyzing the significance of social interests, laboratory and social practices, and "culture(s)" in the making of scientific knowledge. The course then turns to consider the role of the sciences in fashioning larger social worlds.

Prerequisites: Permission of the instructor required. General Education Requirement: Cultures in Comparison (CUL).
General Education Requirement: Social Analysis (SOC).
3 points

ANTH V 3977y Trauma

Examines trauma as an individual, collective, and international political phenomena. Topics include the history and physiology of trauma, trauma and psychoanalysis, trauma and politics, and trauma after 9-11.

Prerequisites: Enrollment limited to 20 students. General Education Requirement: Cultures in Comparison (CUL).
3 points
### ACG V 3978y Dialogic Imagination

Draws on the perspectives of Bakhtin and other theorists to analyze the logic of five opera performances the class will attend this semester. Productions scrutinized in terms of the forms of communication utilized; the class, status, and gender perspective mobilized; and the specified mechanisms used to engage or distance the audience from them. Performance rather than musicological angle emphasized.

**Prerequisites:** Permission of the instructor required. Enrollment limited to 15 students. 

**General Education Requirement:** Cultures in Comparison (CUL).

4 points

### ANTH V 3979x Fluent Bodies

The recent proliferation of writings on the social significations of the human body have brought to the fore the epistemological, disciplinary, and ideological structures that have participated in creating a dimension of the human body that goes beyond its physical consideration. The course, within the context of anthropology, has two considerations, a historical one and a contemporary one. If anthropology can be construed as the study of human society and culture, then, following Marcel Mauss, this study must be considered the actual, physical bodies that constitute the social and the cultural.

**General Education Requirement:** Cultures in Comparison (CUL).

4 points

### ANTH V 3980x Nationalism: History and Theory

Covers the basic readings in the contemporary debate over nationalism and different disciplinary approaches and looks at recent studies of nationalism in the formerly colonial world as well as in the industrial West. The readings offer a mix of both theoretical and empirical studies, including the following: Eric Hobsbawn: *Nationalism since 1700*; Ernest Gellner: *Nations and Nationalism*; Benedict Anderson: *Imagined Communities*; Antony Smith: *The Ethic Origins of Nations*; Linda Coley: *Britons*; Peter Sahlins: *Boundaries*; and Partha Chatterjee: *The Nation and Its Fragments*.

4 points
ANTH W 4001x The Ancient Empires
Prerequisites: ANTH V1002 or permission of the instructor. General Education Requirement: Cultures in Comparison (CUL). Not offered in 2008-2009. 3 points

ANTH W 4002y Controversial Topics in Human Evolution
Prerequisites: Permission of the instructor and introductory biological/physical anthropology course. General Education Requirement: Cultures in Comparison (CUL). Not offered in 2008-2009. 3 points

ANTH W 4009y Class and Culture in the United States
Prerequisites: Enrollment limited. Junior standing; preference to seniors and graduate students, and to anthropology majors and anthropology graduate students if necessary. General Education Requirement: Cultures in Comparison (CUL). Not offered in 2008-2009. 3 points

ANTH W 4011x Critical Social Theory
Prerequisites: Junior standing. Enrollment limited to 30 students. General Education Requirement: Cultures in Comparison (CUL). Not offered in 2008-2009. 3 points

ANTH W 4013y Thailand: History, Modernity, Nation
General Education Requirement: Cultures in Comparison (CUL). Not offered in 2008-2009. 3 points

ANTH W 4042x or y Agent, Person, Subject, Self
This course treats the interrelated notions of agent, person, subject, and self from a semiotic and social perspective. General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Social Analysis (SOC). 3 points

ANTH W 4065x Archaeology of Idols
Explores 40,000 years of the human creation of, entanglement with, enchantment by, and violence towards idols. Case studies roam from the Paleolithic to Petra and from the Hopi to the Taliban, and the theoretical questions posed include the problem of representation, iconoclasm, fetishism and the sacred.
- S. Fowles
Prerequisites: Sophomore standing. General Education Requirement: Cultures in Comparison (CUL). 3 points

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleavelist.html

Architecture majors experience and investigate the central aspects of the field. The major provides an inclusive program offering opportunities to explore historical and contemporary relationships among physical, social, and cultural forms and environmental contexts.

There are two tracks to the architecture major: the first, while incorporating lectures, seminars, and scholarly research, is more strongly studio based and is recommended for the student who thinks she will continue to do graduate work in architecture or design; the second, while incorporating studio components, is geared toward the history and theory of architecture and is more strongly allied with the Art History department.

Students considering an Architecture major or minor should consult with the adviser before sophomore registration to develop the most appropriate sequence of studio and lecture courses. Those interested in graduate study in architecture should consult with the adviser in their junior year concerning their programs.

The Architecture program is a liberal arts major, not a professional degree program. It does not qualify students for a license in Architecture.

Students who wish to continue in graduate studies in Architecture for a professional degree are also advised to take two semesters (or comparable) of college level physics and calculus.

Printable Version

Architecture
310 Barnard Hall
854-8430
www.columbia.edu/cu/archprogram

REQUIREMENTS FOR THE MAJOR

The studio major in Architecture is required to complete 14 courses:

Four studio courses, to be taken one per semester (studio courses have limited enrollment and priority is given to Architecture majors)

| ARCH V 3101 | Architectural Representation: Abstraction |
| ARCH V 3103 | Architectural Representation: Perception |
| ARCH V 3201, V 3202 | Architectural Design I and II |

Required history/theory courses:*

Five elective courses following the distribution requirement below:

ARCH V 3117  Perceptions of Architecture

1- course with a topic that is pre-1750
1- course with a topic that is post-1750
2- electives (it is suggested that one of these be on a non-western topic)

Senior courses:*
1- ARCH V 3901 Senior Seminar

1- either a second Senior Seminar (from our program), a seminar from a related department (and related to student's disciplinary specialization/cluster), Architectural Design III, or Independent Research.

Cluster of related courses:

Three courses which together focus student interest in a related department or departments. (May not overlap with history/theory courses or senior courses.)

Senior Requirements:

Portfolio and Research Paper from Senior Seminar or Senior Course.

*These are courses offered by the architecture major or other applicable courses offered within the University. Students should consult the program office for a list of applicable courses each semester.

REQUIREMENTS FOR THE HISTORY AND THEORY OF ARCHITECTURE MAJOR

The History and Theory of Architecture major is required to complete 15 courses, plus a senior thesis.

Two studio courses, to be taken one per semester:

ARCH V 3103 Architectural Representation: Perception
ARCH V 3101 Architectural Representation: Abstraction

Seven lecture courses:

Three architecture lectures. One of these must be ARC V 3117 Perceptions of Architecture.

Four Art History lectures above and beyond the prior three. Two of these must be

AHIS BC 1001, 1002 Introduction to History of Art.

Three seminars to be taken in the junior or senior year. Two should be in Architecture (see Seminar List and Note under Studio Major), one in Art History.

Three cluster courses in an area of study related to Architecture (see description under Studio Major).

The Architecture program is a liberal arts major, not a professional degree program. It does not qualify students for a license in Architecture.

REQUIREMENTS FOR THE MINOR

The minor in Architecture consists of five courses, including V 1020, V 3101 or V 3103, three history/theory courses, and a fifth course to be chosen in consultation with the adviser.

ARCH V 3114y Making the Metropolis: Urban Design and Theories of the City since 1850

Introduces the project of understanding modern cities, focusing on theories, practices and examples in Europe and North America since 1850. The global reach of Euro-American ideas will also be examined. There are two primary goals: to investigate diverse strategies of urban development and to evaluate the social implications of built form. Course material includes built projects as well as unbuilt and theoretical work, all of which shaped how architects and planners interpreted the city.

- D. Smiley

3 points

ARCH V 3117y Perceptions of Architecture

Introduction to various methods by which we look at, experience, analyze, and criticize architecture and the built environment; development of fluency with architectural concepts. Attendance is mandatory at the first class meeting in order to form class registration lists. - R. Rouhe

Prerequisites: Designed for but not limited to sophomores; enrollment beyond 20 at the discretion of the instructor. General Education Requirement: The Visual and Performing Arts (ART).

### ARCH V 3901x or y Senior Seminar

Readings, individual class presentations, and written reports. Attendance is mandatory at the first class meeting in order to form class registration lists.

- S. Stephens, K. Baxi

**Prerequisites:** Enrollment limited to 15 students per section. Open to architecture majors only unless space permits.

4 points

### ARCH V 3920y Critical Analysis of Architectural Representation

Readings and discussions on representation and representational systems in modern architecture in conjunction with the production of Barnard/Columbia architecture students publication. Attendance is mandatory at the first class meeting in order to form class registration lists.

- L. Bulman

**Prerequisites:** ARCH V3101 or ARCH V3103 or equivalent with instructor's permission. Limited to 15 students.

**Pre-registration at department required.**

3 points

### ARCH V 3997x Independent Study

**Prerequisites:** Permission of the program director in term prior to that of independent study. Independent study form available at departmental office.

ARCH V 3201x: Architectural Design, I

Introduction to architectural design taught in a studio environment, through a series of design projects requiring drawings and models. Field trips, lectures, and discussions are organized in relation to studio exercises. Portfolio of design work from Architectural Representation: Abstraction and Perception will be reviewed the first week of classes.

Prerequisites: ARCH V3101 and ARCH V3103. Open to architecture majors or with permission of instructor.

4.5 points
ARCH V 3202y Architectural Design, II

Studio workshop continuation of ARCH V3201. Emphasis on the manipulation of an architectural vocabulary in relationship to increasingly complex conceptual, social, and theoretical issues. Field trips, lectures, and discussions are organized in relation to studio exercises.

- K. Fairbanks, J. Moore, M. Kroeckel, K. Yao

Prerequisites: ARCH V3201. Open to architecture majors or with permission of instructor.

Adjunct Professors: Mary Ann Ainsworth, Isolde Brielmaier, Christopher Phillips

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleavelist.html

Art History, which is devoted to the study of the visual arts, is one of the broadest of the humanistic disciplines. It is concerned not only with the nature of works of art— their form, style, and content—but also with the social, political, and cultural circumstances that shape them. The introductory-level courses aim at developing in students a lifelong understanding and appreciation of works of art. The rest of the curriculum is geared to preparing majors either for graduate study leading to careers in university teaching and museums or for positions in the art world, galleries, publication, criticism, the visual media, art consultation, conservation, and the like. These courses also provide opportunities for correlated learning to students in other fields. The department, fortunate to be located in New York City, one of the world's great art centers, takes full advantage of the rich resources of the city's museums and galleries in its course of study.

REQUIREMENTS FOR THE MAJOR

The department offers both a major in the History of Art and a major in Art History with a concentration in the Visual Arts. In each case the student chooses a faculty adviser who assists her in planning a program incorporating personal interests while meeting departmental requirements.

A minimum of 12 Art History courses is required for the major, including:

AHIS BC 1001 and 1002 Introduction to Art History. This two-course sequence is required.

AHIS BC 3970 Methods and Theories of Art History. To be taken during the junior or senior year.

AHIS BC 3959x and/or 3960y Senior Research Seminar. Students write their senior thesis in conjunction with the Senior Research Seminar. Students will develop, research, and write either a 1 semester or 2 semester thesis project in consultation with an individual faculty member in Art History. They will also attend and participate in group seminars convened during the academic year in which all students will present their work. Students who plan to study abroad during their senior year and those who expect to graduate early must begin the senior research seminar sequence in the second semester of the junior year.

Seven elective courses, with the following requirements:

Two of these courses must be seminars. None of the seminars listed above may count toward this requirement.

At least one Western and one Non-Western art history course. BC1001 and 1002 may not count toward
this requirement.

Four of these must cover a broad range of disciplinary areas. Students concentrating on Western art must have at least one course each in four of the following five periods: Ancient, Medieval, Renaissance, Baroque, and Modern. Students concentrating on non-Western art must work out a similarly comprehensive course of study in consultation with their advisers. Lecture classes or seminars can be used to fulfill this requirement. BC 1001 and 1002 or any other broad survey cannot be used to fulfill this requirement.

Courses in film are accepted toward the major requirements; studio courses are not.

Recommended: One or two studio courses should be taken by Art History students.

Students who plan to undertake graduate work should acquire a reading knowledge of at least two foreign languages in which the major contributions to the history of art have been made. Most graduate schools require a reading knowledge of French, German, or Italian. The department strongly recommends a student's taking one of these languages while at Barnard.

Requirements for the major in Art History with concentration in the Visual Arts:

A minimum of 12 courses is required for the major in Art History with concentration in the Visual Arts:

-BC 1001 and 1002 Introduction to the History of Art
-One course in 19th- or 20th-century art
-One seminar in art history

Five studio courses including ARH BC 3530 Advanced Studio and ARH BC 3031 Imagery and Form in the Arts

Art History Senior Thesis Option for Visual Arts Concentrators:

Art History Majors concentrating in Visual Arts may elect to substitute the Senior Thesis for the Senior Project. To do this they must:

Notify their adviser of their intention to do so by the end of their junior year

Take both Methods and Theories of Art History (BC 3970) and the Senior Research Seminar (BC 3959 and 3960)

Requirements for the major in the History and Theory of Architecture:

See Architecture Program offerings.

REQUIREMENTS FOR THE MINOR

The minor in Art History consists of five lecture courses, including BC 1001, BC 1002, and three courses in the following areas, of which one must be non-European: European and American: Ancient, Medieval, Renaissance, Baroque, and Modern Non-European: Chinese, Japanese, Indian, African, Mesoamerican, and Native American

AHIS BC 3651y Native American Art II

Introduction to Native American art of the plains, southwest, and California regions from the period of European contact to the present, and to issues of historiography. Surveys painted, carved, tailored, and architectural works. Focuses on understanding the relationship between social organization and artistic expression, and cross-cultural discourses.

3 points

AHIS BC 3654y Institutional Critique

Examines precedents for institutional critique in the strategies of early twentieth-century historical avant-garde and the
post-war neo-avant-garde. Explores ideas about the institution and violence, investigates the critique and elaboration of institutional critique from the late 1970s to the early 1990s, and considers the legacies of institutional critiques in the art of the present.

- R. Deutsche

Prerequisites: Enrollment limited to 15 junior and senior students. Permission of the instructor.

3 points

AHIS BC 3655y The Discourse of Public Art and Public Space

Examination of the meaning of the term "public space" in contemporary debates in art, architecture, and urban discourse and the place of these debates within broader controversies over the meaning of democracy. Readings include Theodor Adorno, Vito Acconci, Michel de Certeau, Douglas Crimp, Thomas Crow, Jürgen Habermas, David Harvey, Fredric Jameson, Miwon Kwon, Henri Lefebvre, Bruce Robbins, Michael Sorkin, Mark Wigley, and Krzysztof Wodiczko.

3 points

AHIS BC 3673x The History of Photography

Focuses on the intersection of photography with traditional artistic practices in the 19th century, on the mass cultural functions of photography in propaganda and advertising from the 1920s onwards, and on the emergence of photography as the central medium in the production of postwar avant-garde art practices.

Discussion Section Required. General Education Requirement: The Visual and Performing Arts (ART).

AHIS BC 3674x Art since 1945

Introduction to the history of art in post-war Europe and the United States from 1945 to the present, emphasizing questions of methodology of modernist studies and the diversity of theoretical approaches.

3 points

AHIS BC 3675y Feminism and Postmodernism in Contemporary Art

Examines art and criticism of the 1970s and 1980s that were informed by feminist and postmodern ideas about visual representation. Explores postmodernism as (1) a critique of modernism, (2) a critique of representation, and (3) what Gayatri Spivak called "a radical acceptance of vulnerability." Studies art informed by feminist ideas about vision and subjectivity. Places this art in relation to other aesthetic phenomena, such as modernism, minimalism, institution-critical art, and earlier feminist interventions in art.

AHIS BC 3990x Japanese Prints: Images of Japan's Floating World

Ukiyo-e, the "images of the floating world," present a vivid and highly romanticized vision of the dynamic urban culture of Japan.
during the 17th through 19th centuries. Considers ways in which these images promoted kabuki theater, glamorized life in the licensed prostitution quarters, and represented sexuality and gender. We will study how print designers and publishers dodged government censorship as they ruthlessly parodied contemporary life, literature, and venerable artistic traditions.

- J. Reynolds

**Prerequisites:** Enrollment limited to 15 students. Permission of the instructor. Sophomore standing. General Education Requirement: The Visual and Performing Arts (ART).

**AHIS W 4703y Japanese Architecture from the mid-19th C. to the Present**

This course will examine Japanese architecture and urban planning from the mid-19th century to the present. We will address topics such as the establishment of an architectural profession along western lines in the late 19th century, the emergence of a modernist movement in the 1920's, the use of biological metaphors and the romanticization of technology in the theories and designs of the Metabolist Group, and the shifting significance of pre-modern Japanese architectural practices for modern architects. There will be an emphasis on the complex relationship between architectural practice and broader political and social change in Japan.

**Seminars**

Seminars have limited enrollment. Permission of the instructor is required for admission to all Barnard and Columbia seminars. In addition, it is strongly recommended that students seeking admission to a seminar have previously had a lecture course in the area. Students must sign up for Columbia seminars at 826 Schermerhorn.

**AHIS BC 3031y Imagery and Form in the Arts**

Operation of imagery and form in dance, music, theater, visual arts and writing; students are expected to do original work in one of these arts. Concepts in contemporary art will be explored.

- J. Snitzer

**Prerequisites:** Enrollment limited to 15 Students. Note Barnard Art History seminar application required by 12/1/08. See dept. website. General Education Requirement: The Visual and Performing Arts (ART).

3 points
AHIS BC 3941y Contemporary African Photography and Video

Explores the development of contemporary photographic and video practices as they relate to Africa. Organized thematically, it focuses on the individual case studies, artists, and exhibitions that comprise the dynamic and international realm of contemporary photography and video by artists living on and off the African continent.

Prerequisites: Enrollment limited to 15 students. Barnard Art History seminar application required by 12/1/08. See dept. website. General Education Requirement: The Visual and Performing Arts (ART).

4 points

AHIS BC 3948y The Visual Culture of the Harlem Renaissance

Introduction to the paintings, photographs, sculptures, films, and graphic arts of the Harlem Renaissance and the publications, exhibitions, and institutions involved in the production and consumption of images of African-Americans. Focuses on impact of Black northward and transatlantic migration and the roles of region, class, gender, and sexuality.

- E. Hutchinson

4 points

AHIS BC 3949x The Art of Witness: Memorials and Historical Trauma

Examines aesthetic responses to collective historical traumas, such as slavery, the Holocaust, the bombing of Hiroshima, AIDS, homelessness, immigration, and the recent attack on the World Trade Center. Studies theories about trauma, memory, and representation. Explores debates about the function and form of memorials.

- R. Deutscher

4 points

AHIS BC 3950x Contemporary Photography and Video in Asia

Explores the range of contemporary photographic and video work being made in Japan, China, Korea, Taiwan, and Hong Kong. Considers the artists, institutions, publications and exhibitions that have contributed to the growing centrality of Asia in the contemporary art world.

Prerequisites: Enrollment limited to 15 students. Barnard Art History seminar application required. See dept. website. General Education Requirement: The Visual and Performing Arts (ART).

4 points

AHIS BC 3951y Contemporary Art and the Public Sphere

Critically examines contemporary debates about the meaning of public art and public space, placing them within broader controversies over definitions of urban life and democracy. Explores ideas about what it means to bring the term "public" into proximity with the term "art." Considers the differing ideas about social unity that inform theories of public space as well as feminist criticisms of the masculine presumptions underlying certain critical theories of public space/Art.

Prerequisites: AHIS BC1001 - BC1002 or equivalent. Enrollment limited to 15 students. Permission of the instructor. Preference to seniors and Art History majors. General Education Requirement: The Visual and Performing Arts (ART).

4 points

AHIS BC 3952x Art and Mass/Popular/Everyday Culture: 1850 to the Present

Examines interactions between art in Europe and the United States during the 19th and 20th centuries, on the one hand, and
non-art forms of culture that are called variously "mass," "popular," and "everyday" culture, on the other. Places art/mass culture interactions within the rise of bourgeois society, the invention of democracy, and relations of class, gender, sexuality, and race. Studies major critical theories and debates about the relationship between art and mass culture.

**Prerequisites:** AHIS BC1001 - BC1002 or equivalent. Enrollment limited to 15 students. Permission of the instructor. Preference to seniors and Art History majors. General Education Requirement: The Visual and Performing Arts (ART).

4 points

**AHIS BC 3957x or y 1980s Feminism and Postmodernism in the Visual Arts**

Examination of art and criticism that is informed by feminist and postmodern ideas about subjectivity in visual representation which first achieved prominence in the late 1970s and 1980s, exerting a profound influence on contemporary aesthetic practice. Explored in relation to earlier concepts of feminism, modernism, social art history, and "art as institution." Artworks discussed include those of Barbara Kruger, Cindy Sherman, Louise Lawler, Krzysztof Wodiczko, Hans Haacke, Mary Kelly, and Catherine Opie, among others.

4 points

**AHIS BC 3959x Senior Research Seminar**

Independent research for the senior thesis. Students develop and write their senior thesis in consultation with an individual faculty adviser in art history and participate in group meetings scheduled throughout the senior year.

- R. Deutsche

**Studio Courses in Art**

Studio courses 2003x, 2004y, 2005x, 2006y, 2007x, 2008y are given at Barnard. Enrollment is limited and students must sign up in advance. Other studio courses are given at the School of the Arts, in Dodge Hall, and students may register for these only with written permission of the department chair. Classes are limited in size. Students who wish to enter the Columbia courses are required to apply for space in 305 Dodge Hall during the pre-registration period prior to each term. Model fees range from $20 to $45. For students other than those majoring in Art History with Visual Arts concentration, a maximum of four courses of studio work may be credited toward graduation.

**AHIS BC 2001x and y Introduction to Drawing**

Introduction to drawing as an open-ended way of working and thinking. The class is primarily a workshop, augmented by slides, lectures and field trips. Throughout the semester, students will discuss their work one-on-one with the instructor and as a group. Starting with figure drawing, we will investigate drawing as a practice involving diverse forms of visual culture.

The primary aim of Asian and Middle Eastern Cultures is to introduce major Asian civilizations and their works and values as a means of expanding knowledge of the varieties and unities of human experience. The General Courses below are designed for any student, whatever her major interests, who wishes to include knowledge of Asian life in her education.

The satisfactory completion of one of the following courses offered in the departments of East Asian Languages and Cultures and Middle East Languages and Cultures satisfies the college requirements in the respective languages: Akkadian G 4113 Intermediate Akkadian; Arabic W 1215 Intermediate Arabic; Armenian W 1313 Intermediate Armenian; Bengali W 1202 Intermediate Bengali; Chinese C 1202 or F 1202 Intermediate Chinese (second stage); Hebrew W 1513 Intermediate Modern Hebrew; Hindi-Urdu W 1613 Intermediate Hindi-Urdu; Japanese C 1202 or F 1202 Intermediate Japanese (second stage); Iranian W 1713 Intermediate Modern Persian; Korean W 1202 Intermediate Korean; Sanskrit W 4813 Intermediate Sanskrit; Tamil 1202 Intermediate Tamil; Telugu W 1202 Intermediate Telugu; Tibetan W 4413 Intermediate Tibetan; or Turkish W 1913 Intermediate Turkish.

Literature courses in the departments of East Asian Languages and Cultures and Middle East and Asian Languages and Cultures in which readings are in the original languages may be used to fulfill the Barnard distribution requirements only with the permission of the Chair of Asian and Middle Eastern Cultures.

Students who wish to enter Chinese, Japanese, or Korean language courses above the introductory level must pass a language placement test before registering. Placement exams are given during the week before classes begin-contact the Department of East Asian Languages and Cultures (407 Kent) for exact dates. For placement above the introductory level in Arabic, Armenian, Bengali, Hindi-Urdu, Panjabi, Persian, Sanskrit, Tamil, Tibetan, or Turkish, contact the Department of Middle East and Asian Languages and Cultures (602 Kent). All students wishing to enter the Hebrew language program or wishing exemption from the Hebrew language requirement must take a placement test. Contact the Department of Middle East and Asian Languages and Cultures (602 Kent) for details.
www.barnard.edu/amec

REQUIREMENTS FOR THE MAJOR

A student who plans to major in Asian and Middle Eastern Cultures is advised to consult a member of the department in the spring term of her first year in order to be sure to plan for an appropriate sequence of language study.

*Important note:* Students majoring in any of the East Asian tracks (China, Japan, Korea) may only study abroad in the Spring of their junior year if they take Research in East Asian Studies V 3999 in the Spring of their sophomore year.

To major in Asian and Middle Eastern Cultures, a student will choose to follow one of two tracks, East Asian or Middle East and South Asian.

The East Asian Track

The major requires a minimum of 10 courses (if a student has already satisfied the language requirement) or more (if she starts the language requirement from the beginning). The requirements include:

1) Language:
   Three years of Chinese, Japanese, or Korean, or the proficiency equivalent (to be demonstrated by a placement examination).

2) Core Courses:
   - Asian Humanities V 3400 *Colloquium on Major Texts*
   - Two of the following survey courses:
     - Asian Civilizations-East Asia V 2002 *Introduction to Major Topics in Asian Civilizations: East Asia*
     - Asian Civilizations V 2359 *Introduction to the Civilization of China*
     - Asian Civilizations V 2361 *Introduction to the Civilization of Japan*
     - Asian Civilizations V 2363 *Introduction to the Civilization of Korea*
     - Asian Civilizations V 2365 *Introduction to the Civilization of Tibet*

3) Disciplinary Courses: Three courses, to be chosen in consultation with the adviser. Because Asian studies is an area-study rather than an academic discipline, it is important that the student also develop competence in a particular discipline. She is therefore asked upon entering the major to choose from among the following: history, literature, philosophy, religion, art history, anthropology, political science, sociology, or economics. Typically, one of the courses taken in satisfaction of the disciplinary requirement will be a basic introductory or methodology course, and the other two will be in East Asia related courses in the discipline. Under certain circumstances the adviser may approve a combination of two basic courses and one East Asia-related course; courses in closely related disciplines may also be substituted with the approval of the adviser. However, if a student chooses one or two disciplinary courses that are not specifically Asia-related, these courses will be considered qualifying in terms of the disciplinary requirement, but not as counting toward the 10-course minimum for the major. Only those courses that are Asia-related are considered to count toward this 10-course minimum.

As their basic introductory disciplinary course, majors specializing in history should take *Historiography of East Asia* (East Asian W 4103y), those specializing in language should take *Literary and Cultural Theory East and West* (East Asian W 4101y), and those specializing in the social sciences (anthropology, economics, political science, or sociology) should take *Critical Approaches to East Asia in the Social Sciences* (East Asian W 4102y). These three courses are offered in the Spring term and should normally be taken in the junior year.

4) Elective Courses: Two courses related to East Asia, to be chosen in consultation with the adviser.

5) Research in East Asian Studies V 3999y: To be taken in the junior year.

6) Senior Paper: Each student is expected to prepare a research paper or an annotated English translation of an East Asian text. The paper should be in the chosen disciplinary field and will be written in the Fall semester of the senior year in Senior Thesis (East Asian W 3901) in consultation with an appropriate faculty adviser. All students should enroll for the autumn term. Under special circumstances, with the adviser's approval, the senior paper may be written in conjunction with Asian Studies BC 3999, *Independent Study*. Note that in all East Asian language courses, the minimum grade required to advance from one level to the next is B-.

The Middle East or South Asian Track

A minimum of 13 courses is required, including:

   - Asian Humanities AHUMV 3399x,y *Colloquium on Major Texts*
   - Middle East & South Asia MDE W 3000x *Theories of Culture: Middle East and South Asia*
Two of the following courses:
Asian Civilizations-Middle East V 2001 Introduction to Major Topics in Asian Civilizations: The Middle East and India
Asian Civilizations-Middle East V 2003x Introduction to Islamic Civilization
Asian Civilizations-Middle East V 2008y Contemporary Islamic Civilizations
Asian Civilizations-Middle East V 2357x Introduction to Indian Civilizations
Asian Civilizations V 2365 Introduction to the Civilization of Tibet

Four to six courses of an appropriate language (Akkadian, Arabic, Amenian, Bengali, Hebrew, Hindi-Urdu, Panjabi, Persian, Sanskrit, Tamil, Telegu, Tibetan, or Turkish), selected in consultation with the adviser.

A minimum of five courses chosen as a concentration. The concentration may be in the languages and cultures of ancient Semitic, Arabic, Armenian, Hebrew, Indic, Iranian, Persian, or Turkish.

A senior thesis, to be written under the supervision of a faculty member chosen in consultation with the adviser. Students whose sole major is Asian and Middle Eastern Cultures should take two semesters of Independent Study (ASST BC 3999x/y) with their adviser for the purposes of producing the thesis. Students who are double-majoring in a second department that requires a group seminar should enroll in that seminar and work with the AMEC advisor on the side.

The courses listed under Middle East and South Asia below represent a selection among those required in one or another of the concentrations. Students should consult the Middle East and Asian Languages and Cultures department office in 602 Kent Hall for a complete list of course offerings. Also see the note on graduate courses at the end of this section.

No minor is offered in Asian and Middle Eastern Cultures.

ASCE W 3925y Wisdom Literatures
Focus on the ancient literary and philosophical traditions known as "wisdom literature," broadly defined as works that offer political and religious instruction on living an ethical life in a corrupt world. Exploration of commonalities and differences between East Asian, Near Eastern, and Greco-Roman modes of wisdom writing.
4 points

HSEA W 3997x World War Two in History and Memory
3 points

EAAS W 4000x History of East Asian Writing
3 points

EAAS W 4212y Topics in Early China and Japan
Explores rhetorical traditions of Early China and Japan, examining types of speech situations (instruction, persuasion, or court entertainment) and devices important to the construction of argument (anecdotes, parallel structures, and topical clusters).
Prerequisites: Some prior knowledge of Chinese or Japanese history or literature is required. General Education Requirement: Literature (LIT). Not offered in 2008-2009.
4 points

ASCV W 4320x Human Rights and Social Justice in Comparative Perspective
Considers issues of human rights through cross-national and cross-cultural studies of modern China and Korea.
4 points

EAAS W 4408x Social Movements in Contemporary East Asia
Examines basic theories and concepts of the social movement literature and how it is utilized for the study of social movements in contemporary East Asia from a comparative perspective. By navigating through major studies of social movements in China, Taiwan, South Korea, and Japan, the course focuses on the varying contexts and dynamics through which social movements emerge, develop, and leave traces. This course will help us better understand how social, political, and cultural history unfolds through the intricate interaction between the status quo and the incessant challenges against it.

**ASRL W 3772y Perspectives on Evil and Suffering in World Religions**
Exploration of the problems of evil and suffering in Christianity, Judaism, Hinduism, and Confucianism, with attention to such questions as what is "evil," why it exists, how suffering fits into the religious world view, and how religious people cope with threats to their analytic capacities, powers of endurance, and moral insight. Draws on classical texts, myths, and modern fieldwork.
*General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Reason and Value (REA).*
3 points

**ASRL V 3974y Hindu Goddesses**
Study of a variety of Hindu goddesses, focusing on representative figures from all parts of India and on their iconography, associated powers, and regional rituals. Materials are drawn from textual, historical, and field studies, and discussion includes several of the methodological controversies involving interpretation of goddess worship in India.
Prerequisites: One course in Indian culture or religion or permission of instructor. Not offered in 2008-2009.
4 points

ASST W 4001y Bengal: Culture and Identity

Introduces the history, culture, and literature of Bengal from the 12th century to the present, in West Bengal and Bangladesh, with a view to identifying components of what has been claimed as a specific "Bengali cultural identity." We will survey figures, ideological trends, and social structures; read Bengali primary texts in translation; and sample new monographs on the region.

- R. McDermott

Prerequisites: ASCE V2357–Introduction to Indian Civilizations or the equivalent, is recommended as background. General Education Requirement: Historical Studies (HIS).

The Barnard Leadership Initiative
Curriculum
www.barnard.edu/bli

This Program is supervised by the Faculty Committee for the Barnard Leadership Initiative:

Director: Alan Dye (Associate Professor of Economics)
Committee: Flora Davidson (Professor of Political Science and Urban Studies), Owen Gutfreund (Associate Professor of History and Urban Studies), Peter Levin (Assistant Professor of Sociology), Debra Minkoff (Professor of Sociology), Lorraine Minnite (Assistant Professor of Political Science), Richard Pious (Professor of Political Science), Rosalind Rosenberg (Professor of History), David Weiman (Professor of Economics)
Visiting Faculty: Liz Abzug (Adjunct Professor of Urban Studies), Thomas Kamber (Adjunct Professor of Urban Studies)

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleave.html

For more than a century, Barnard College has been at the forefront of advancing the roles and position of women in society. The Barnard Leadership Initiative (BLI) is a multifaceted, interdisciplinary program that combines curriculum and co-curricular opportunities to prepare women for the challenges of undertaking roles as potential leaders in environments including, non-profit, for profit, and public sectors. Students will explore concepts of leadership, how institutions and systems work, and common systemic barriers faced by potential women leaders. The program offers critical perspectives on gender, institutional and leadership issues. The goal of the program is to provide tools and strategies to enable women to advocate for, and assume, full participation in positions of leadership at the highest levels of achievement in our society.

The Leadership Initiative does not constitute a major; instead, students pursue it in conjunction with a major in one of the College’s departments or programs.

The program culminates in the Interdisciplinary Senior Seminar (BLIC BC3997-BLIC BC3998), which is taken concurrently with the senior requirement in one’s major department. Instruction, discussion and presentations in the BLI Interdisciplinary Seminar enhance the capstone experience in one’s major while serving also as a capstone for the BLI sequence by bringing together the senior BLI participants, using multiple disciplinary approaches, to identify and compare perspectives and analysis from their respective disciplines and the BLI curriculum. The Seminar includes discussion of selected readings and topics and opportunities for participants of the seminar to present their senior research projects in the Seminar and at the end-of-year BLI symposium. Students in the Seminar are eligible to receive associated BLI grants to fund expenses associated with their senior research projects.

Students who plan to participate in the program should file a Declaration of Intent, typically by the end of the sophomore year, with the director of the program.

The Barnard Leadership Initiative
Curriculum
www.barnard.edu/bli

REQUIREMENTS

Six courses are required to complete the program: Women and Leadership (BLIC BC3450), three elective courses selected from the BLIC cross-listed courses; and the two-semester Interdisciplinary Senior Seminar (BLIC BC3997-BLIC BC3998). Courses taken to satisfy the requirements of the BLI Curriculum may also be counted as credit toward one's major. Suitable electives other than those explicitly cross-listed for the BLI Curriculum may be substituted with the director's permission.

Enrollment in the BLIC BC3997-3998 BLI Interdisciplinary Senior Seminar is limited. Eligibility depends on prior completion of BLIC BC3450 and two of the three elective BLI course requirements. Admission is based on prior academic achievement and on the suitability of the senior research project for the focus of the Seminar. If the third elective has not been completed prior to enrollment in the Seminar, it must be completed concurrently.

Students who plan to participate in the program should file a Declaration of Intent, typically by the end of the sophomore year, with the director of the program.
Required Courses and Approved Cross-Listed Electives

BLIC BC 3450x and y Women and Leadership

An examination of the social conditions and linguistic practices that have shaped the gendering of power in the United States and around the world over the past century. Through examples drawn from education, labor, civil rights, business, and politics, we will explore leadership in varying racial, class, and regional contexts.

- L. Abzug, R. Rosenberg
Prerequisites: Permission of instructor. Limited to 15.

BLIC BC 3997x-BC3998y Interdisciplinary Senior Seminar

Draws students from multiple disciplines using a variety of approaches to discuss senior research projects and reinforce analytical perspectives on problems women encounter in the workplace, or other institutional environment, as they pursue positions of leadership and related issues. This course is taken in conjunction with the senior seminar in the student's major department, or related requirement. Students will present, and discuss their research in the seminar and at the end-of-the-year symposium for other students, alumnae, and business, political, or community leaders.
Prerequisites: BLIC BC3450 and two other courses from the BLI cross-listed electives. Enrollment limited; admission by application only.

Department Administrator: Lorin Johnson

For a complete list of faculty on leave see: http://www.barnard.edu/provost/facleave.html

Biology is a field that explores the structure, function, interactions, and evolution of living organisms. Some of the
most exciting issues of our era—such as those relating to biotechnology, genetic engineering, environmental
problems, and health—require a strong background in biology. Biology courses at Barnard cover a broad range of
topics, including molecular and cellular biology, genetics, development, physiology, evolution, and ecology.

Many students specialize in biology in preparation for a career in medicine, dentistry, public health, nutrition, or
law. Others anticipate graduate work in one of the many subfields of biology leading to a teaching and/or research
career. Still others plan futures as scientific writers, illustrators, photographers, industry or government
researchers, or in areas such as environmental policy and law.

The biology major is designed to provide a student with a broad education in the field as well as an opportunity to
cover a specific aspect of biology in depth if she desires. The major has a strong research component, with all lab
sections at both the introductory and advanced levels limited to 16 students, ensuring ample opportunity for
interaction with faculty. Students also have the option of conducting individual research projects under the
guidance of a faculty member, as described below. The senior requirement for the biology major can be completed
either by enrolling in a senior seminar that involves reading and discussing the current literature in a specific area
of biology or by completing a guided research project.

Research
Students are strongly encouraged to engage in research at Barnard. Guided Research and Seminar (BIOL BC
3591-3592) and Senior Thesis Research (BIOL BC 3593-3594) may be used to fulfill major requirements as
described below while BIOL BC 3597 Guided Research may be used for degree credit.

In addition to conducting research during the academic year, students are encouraged to pursue summer research
internships. Barnard faculty engage many students in paid research projects during the summer. The
departmental office also has information about summer internships outside Barnard. In addition, the department
awards funds on a competitive basis to support summer research not otherwise funded by internships.

Introductory Course Selection
The Biology Department offers several options at the introductory level; students should select courses on the
basis of their preparation and background in biology. Students who took advanced biology in high school should
enroll in the 1500-level sequence (BIOL BC 1500, BC 1502, and the lab courses BC 1501 and BC 1503). This
sequence can be started either in the fall (BIOL BC 1500 and BC 1501) or the spring (BIOL BC 1502 and BC
1503) and fulfills the laboratory science portion of the General Education Requirement as well as the premedical
requirement in biology.

Students with little or no experience in biology should enroll in the 1000-level sequence, which provides an
appropriate introduction to important concepts in the field. Both BC 1001 and BC 1002 include a laboratory
component and together fulfill the laboratory science portion of the General Education Requirement. Students who
wish to move on to the 1500-level courses, which are prerequisites for advanced classes in biology, are eligible to
do so upon completion of BC 1001.

AP Course Credit
Students who have passed the Advanced Placement examination in biology with a grade of 4 or 5 are exempt from
BIOL BC 1001 and receive 3 points of credit. Students with an AP biology score of 4 or 5 may complete the
Barnard lab science requirement with (a) BIOL BC 1002, (b) BIOL BC 1500 and BC 1501, or (c) BIOL BC 1502
and BC 1503. However, students must complete the entire 1500-level sequence (BC 1500, 1501, 1502, and 1503)
for the Biology major or minor and for the biology premedical requirements. AP credit is granted regardless of
which introductory courses are completed at Barnard.

REQUIREMENTS FOR THE MAJOR  
CLASSES OF BC’08 AND BC’09

Classes of BC’08 and BC’09 these are the old requirements. *Nothing changes for students in these two classes, although the following reflects the new course names and numbers.*

The curriculum for biology majors complements the general education mission of a liberal arts college by providing a broad education in the field. It also satisfies the needs of students who anticipate postgraduate study in biology or medically oriented fields. The requirements for a major in biology are listed below:

**Introductory Biology.** Students must complete both semesters of the 1500-level introductory sequence, including the lecture and laboratory components (BIOL BC 1500, 1501, 1502, 1503). This series is equivalent to the previous 2001-2004 series which was completed by BC08 and BC09 students.

**Six Upper Level Lecture Courses.** Students must complete at least six lecture courses beyond the introductory sequence. One of the six lecture courses must be selected from each of the following three groups:

1. **Molecular and Cellular Level of Organization:**  
   BIOL BC 3302 Molecular Biology OR  
   BIOL BC 3310 Cell Biology OR  
   BIOL BC 2100 Mol. and Men. Genetics (previously BIOL BC 3200)

2. **Physiological Level of Organization:**  
   BIOL BC 3360 Animal Physiology OR  
   BIOL BC 3340 Plant Physiology OR  
   BIOL BC 3320 Microbiology

3. **Ecological and Evolutionary Level of Organization:**  
   BIOL BC 2278 Evolution (previously BIOL BC 3278) OR  
   BIOL BC 2272 Ecology (previously BIOL BC 3372) OR  
   BIOL BC 3280 Applied Ecology and Evolution OR  
   BIOL BC 2240 Plant Evolution and Diversity (previously BIOL BC 3240):

Three additional lecture courses may be selected from any Barnard Biology offering (including all of the courses listed above) or, with the department’s chair’s permission, from offerings in the Columbia Department of Biological Sciences and the Department of Ecology, Evolution, and Environmental Biology.

**Three Upper Level Laboratory Courses:** Students must complete at least three laboratories beyond the 1500 level (formerly BIOL BC 2001-2004). Laboratories may require a lecture course as co-requisite or prerequisite; such requirements are specified in the Barnard catalog. A student may count a Guided Research project (now BC 3597) with the accompaniment of Research Seminar 1 as a laboratory course for the major, but only one term of Guided Research will receive credit toward the major. Biology laboratories at Barnard require a lab fee. Appropriate Biology courses at Columbia University may be used to satisfy the lab requirement, as may those at other institutions, with permission of the department chair.

**Senior Seminar or Individual Research with Seminar:** Students must enroll in one section of the Senior Seminar (BC 3590) or complete a Guided Research with a member of the Barnard Biology Department (BC 3597), including concurrent participation in the Research Seminar (BC 3595). If a student completes an individual research project in lieu of the senior seminar, she may not also use an individual research project to fulfill part of the laboratory requirement. Starting in Fall 2008 students who sign up for Research Seminar (BC 3595) will attend the Seminar component of BIOL BC 3591 Guided Research and Seminar.

**Chemistry Requirement:** One year of Chemistry with laboratory, including one term of Organic Chemistry, is required.

REQUIREMENTS FOR THE MAJOR  
CLASSES OF BC’10
The requirements for Introductory Biology, 6 Upper Level Lecture Courses and 3 Upper Level Lab courses have NOT changed, nor has the Chemistry requirement. They are the same as the requirements for the BC'08 and BC'09 classes.

The only changes applicable to the class of BC'10 concern Guided Research and Senior Requirement:

*Guided Research:* Beginning in the 2008-09 Year, the Biology department will offer two new guided research courses: Guided Research and Seminar BC 3591x and BC 3592y. These two courses combine Guided Research and Research Seminar, which we offered separately in the past. An important and exciting new feature of the Guided Research and Seminar course is that you can conduct the research either at Barnard or anywhere else in the city.

For this research to replace a laboratory class, you will be required to take two consecutive semesters of the Guided Research and Seminar. Students who wish to do research for degree credit—not major credit—without the seminar component will still have the option of taking the current Guided Laboratory Research (now BIOL BC 3597) course for 1-4 points.

*Senior Requirement:* Beginning in the 2008-09 Year, the Biology department will also offer two new Senior Thesis Research courses: Senior Thesis Research (BC 3593x - BC 3594y). As with Guided Research and Seminar above, these two new courses will cover both the research and the seminar components in a single course and the seminar component will overlap with the seminar component of Guided Research and Seminar. Senior Seminar will continue to be offered and students can fulfill the senior requirement with either two semesters of Senior Thesis Research or with one Senior Seminar. A student cannot take both Senior Thesis Research and Guided Research and Seminar at the same time.

**REQUIREMENTS FOR THE MAJOR**

**CLASSES OF BC'11**

The Introductory Biology requirement is the same as above.

**Genetics:** Students must complete BIOL BC 2100 Molecular and Mendelian Genetics. It is recommended, but not required, that this be completed immediately following the completion of the Spring semester Introductory courses (BIOL BC 1502 and 1503). NOTE: This requirement does NOT exclude students from taking Molecular Biology and/or Cell Biology.

**Five Upper Level Lecture Courses:** Students must complete at least five additional lecture courses at the 2000 and 3000 levels. One of the five lecture courses must be selected from each of the following two groups:

1. **Physiological Level of Organization**
   - BIOL BC 3360 Animal Physiology OR
   - BIOL BC 3340 Plant Physiology OR
   - BIOL BC 3320 Microbiology

2. **Ecological and Evolutionary Level of Organization**
   - BIOL BC 2278 Evolution OR
   - BIOL BC 2272 Ecology OR
   - BIOL BC 3280 Applied Ecology and Evolution OR
   - BIOL BC 2240 Plant Evolution and Diversity

The three additional lecture courses may be selected from any Barnard Biology offering (including all of the courses listed above) or, with the permission of the department chair, from offerings in the Columbia Department of Biological Sciences and the Columbia Department of Ecology, Evolution, and Environmental Biology.

The Chemistry, Upper Level Lab, Research and Senior components of the major requirement for the BC'11 class will be the same as the requirements described above for the BC'10 class.

**REQUIREMENTS FOR THE MINOR**

A minor in biology must include one year of introductory biology (BIOL BC 1500, BC 1501, BC 1502, BC 1503), three additional lecture courses at the 2100 level or higher, and two additional laboratory courses. One of the lab courses may be replaced by two semesters of Guided Research and Seminar (BIOL BC 3591x followed by BIOL BC 3592y).

Biochemistry, chemistry, environmental science, physics, and psychology majors need to take only one advanced laboratory instead of two, but the lab may not be a guided research course.

Requirements for the major in Environmental Biology are listed alphabetically.
Introductory Courses

BIOL BC 1001x Revolutionary Concepts in Biology

Exploration of the major discoveries and ideas that have revolutionized the way we view organisms and understand life. The basic concepts of cell biology, anatomy and physiology, genetics, evolution, and ecology will be traced from seminal discoveries to the modern era. The laboratory will develop these concepts and analyze biological diversity through a combined experimental and observational approach.

- K. Shepard

Prerequisites: Course does not fulfill Biology major requirements or premedical requirements. Enrollment in laboratory limited to 16 students per section. Lab Required.

4.5 points

BIOL BC 1002y Contemporary Issues in Biology

Exploration of modern biology as it pertains to contemporary issues. One module examines the microbiological agents that cause disease and addresses how such agents can be used as weapons for terrorism or war. Another module considers human physiology, focusing on major health issues. The third module explores growth and resource use, emphasizing the uniqueness of human populations. Lab exercises introduce biological techniques for studying these topics.

- H. Callahan, J. Mansfield, E. Bauer

Prerequisites: Course does not fulfill biology major requirements or premedical requirements. BIOL BC1001 or equivalent preparation and background. Enrollment in laboratory sections limited to 16 students per section. Lab Required.

**Intermediate Level Courses**
BIOL BC 2100x or y Molecular and Mendelian Genetics

Mendelian and molecular genetics of both eukaryotes and prokaryotes, with an emphasis on human genetics. Topics include segregation, recombination and linkage maps, cytogenetics, gene structure and function, mutation, molecular aspects of gene expression and regulation, genetic components of cancer, and genome studies.

- B. Morton, J. Mansfield
Prerequisites: BIOL BC1500, BC1501, BC1502, BC1503 or the equivalent.

BIOL BC 2250x or y Invertebrate Zoology

The biology and biodiversity of invertebrate animals: the internal organs of invertebrates; the development, behavior, and evolution of these animals, stressing their adaptations to marine, freshwater, and terrestrial habits; and a systematic survey of invertebrates will structure the course.
3 points

BIOL BC 2262y Vertebrate Biology

Systematic survey of the Phylum Chordata: fossil history, biogeography, systematics, natural history, body architecture, energetics, locomotion, feeding, and behavior.

- P. Hertz
Prerequisites: BIOL BC1500, BC1501, BC1502, BC1503 or equivalent. Offered 2008-2009

BIOL BC 2272x Ecology

Introduction to evolutionary ecology; life history strategies, population growth, competition, predator-prey interactions, population regulation, species diversity, community organization, biogeography. Lectures integrate theory with empirical studies.
3 points

BIOL BC 2276x Evolution

Study of the process of evolution with an emphasis on the mechanisms underlying evolutionary change. Topics include the origins of life, rates of evolutionary change, phylogenetics, molecular evolution, adaptive significance of traits, sexual selection, and human evolution.
3 points

BIOL BC 2280x Animal Behavior
Introduction to animal behavior; physiological bases of behavior (sensory systems, neurophysiology of behavior, appetitive and reproductive behavior), ethological approaches to behavior (communication, territoriality, dominance, and aggression) and evolution of behavior (behavior genetics, behavioral ecology, sociobiology).

A. Horowitz

Prerequisites: BIOL BC1500, BC1501, BC1502, BC1503 or equivalent. Offered Fall 2008

BIOL BC 2286y Statistics and Research Design

Introduction to basic principles of statistics and experimental design. Topics include common statistical procedure, analysis of data, sampling populations, power analysis, and the design of experiments. This course differs from traditional statistics courses by explicitly integrating statistics into research process.

- J. Gienning

3 points

BIOL BC 2801x Laboratory in Genetics

Exercises in genetics at both the Mendelian and molecular levels. Basic principles of genetic analysis will be studied using Drosophila and bacteria. A project in molecular genetics, involving such techniques as PCR, gel electrophoresis, and cloning, will be undertaken using plant genes.

- B. Morton

Prerequisites: BIOL BC1502, BC1503; and pre or corequisite, BC2100 or BC3310. Enrollment limited to 16 students per section.

Upper Level Courses
Suitable for Juniors and Seniors.

**BIOL BC 3302y Molecular Biology**

Introduction to molecular biology. Topics include: genome organization, DNA replication, regulation of RNA synthesis, protein synthesis, macromolecular cell biology, and control of gene expression in development.  
*Prerequisites:* BIOL BC1500, BC1501, BC1502, BC1503 or the equivalent, and one term of organic chemistry. *Not offered in 2008-2009.*  
3 points

**BIOL BC 3303y Laboratory in Molecular Biology**

Introduction to the use of molecular techniques to answer questions about subcellular biological phenomena. Techniques include isolation of genomic and plasmid DNAs, restriction enzyme analysis, DNA and protein electrophoresis, bacterial transformation, and plasmid subcloning.  
- J. Mansfield  
*Prerequisites:* BIOL BC3302 OR BC3310 (which can be taken as corequisites) or permission of instructor. *Limited enrollment to 16.*  
3 points

**BIOL BC 3305y Project Laboratory in Molecular Biology**

A project laboratory in molecular biology of Drosophila. Experiments will include isolation of plasmid, genomic, and plasmid DNA; screening of DNA libraries; restriction mapping, Southern analysis, and characterization of RNA transcripts. Project will characterize a particular unknown Drosophila sequence and RNA derived in vivo from that DNA.  
*Prerequisites:* BC3302 or permission of instructor. *Enrollment limited to 12. Not offered 2008-2009*  
5 points

**BIOL BC 3308x Genomics and Bioinformatics**

Advanced topics in genetics focusing on genome-level features and methods of sequence analysis. Topics will include genome composition and structure, microarray analysis, RNA interference, and medical genomics; readings will involve case studies from the primary literature. The material will include practical applications using available computer databases.  
*Prerequisites:* BIOL BC1500, BC1501, BC1502, BC1503 and Molecular and Mendelian Genetics (BIOL BC2100). *Not offered 2008-2009*  
3 points

**BIOL BC 3310x Cell Biology**

Study of structures and functions of eukaryotic cells. Cell membranes and the endomembrane system, proteins (with emphasis on enzymes and antibodies), organelle biogenesis, intracellular trafficking, cytoskeleton and motility, cell cycle control, and signaling. Methods of study and both landmark and contemporary experiments are examined.  
- N. Pfaffl-Lugassy  
*Prerequisites:* BIOL BC1500, BC1501, BC1502, BC1503, or equivalent, and one term of organic chemistry.  
3 points

**BIOL BC 3311y Laboratory in Cell Biology**

Introduction to cell biological techniques used to investigate structural, molecular, and physiological aspects of eukaryotic cells and their organization into tissues. Techniques include light and electron microscopy, cell culture, isolation of cellular organelles, protein electrophoresis and Western Blot analysis.  
- M. Wallenfang  
*Prerequisites:* BIOL BC3302 OR BC3310 (which can be taken as corequisites) or permission of instructor. *Limited enrollment to 16. Enrollment limited to 16.*

BIOL BC 3320x Microbiology

Study of prokaryotic and selected eukaryotic microorganisms with regard to cell structure, physiology, and metabolism; genetic mechanisms and interrelationships in bacteria. Some aspects of applied microbiology, the role of microorganisms in natural processes, aspects of pathogenicity and immunity to disease.

Prerequisites: BIOL BC1500, BC1501, BC1502, BC1503 or the equivalent, and one term of organic chemistry.

BIOL BC 3340y Plant Physiology

Processes of metabolism, growth, and development in green plants, particularly the angiosperms. Photosynthesis, nutrient and water acquisition, respiration; hormones and plant movement; responses to environmental stimuli and stresses; defenses against pathogens; flower, fruit, and seed formation. Experimental approaches are emphasized.

- K. Shepard

Prerequisites: BIOL BC1500, BC1501 BC1502, BC1503, or the equivalent, and one term of organic chemistry.

BIOL BC 3341y Laboratory in Plant Physiology

Introduction to techniques used to investigate aspects of physiology, including photosynthesis, water relations, mineral nutrition, germination, flowering, and hormone function. Methods include infrared carbon dioxide analysis, spectrophotometry, chromatography, and bioassay. Students conduct independent projects in the last month of term.

- K. Shepard

3 points

BIOL BC 3342x Plant Development

Processes of growth, differentiation, and organization in plants; major morphogenetic events in the transition from zygote to flowering plant; hormonal and environmental effects and mechanisms of action.

3 points

BIOL BC 3343x Laboratory in Plant Development

An experimental approach to patterns, processes, and control mechanisms of plant development. Meristems and cell differentiation; embryogenesis and organogenesis; responses to hormones and environmental variables. Work with whole plant, organ, and cell cultures.

3 points

BIOL BC 3352x Development
Introduction to animal development emphasizing the molecular and cellular mechanisms that control developmental processes. Topics include: fertilization; cleavage; establishment of body plans; morphogenesis and organogenesis; and control of gene expression in development.

- J. Mansfield, K. Shepard

*Prerequisites: BIOL BC1500, BC1501, BC1502, BC1503, BC2100 or equivalent. Offered Fall 2008*

</table>
BIOL BC 3364y Advanced Neurobiology

Analysis of molecular aspects of neuronal function, emphasizing recent discoveries. Topics include molecular mechanisms of synaptic transmission, synaptic plasticity and synaptic formation, and relationship between structure and function for ion-channels, neurotransmitter receptors, and neurotoxins.

Prerequisites: One of the following: BIOL BC3362 Neurobiology, BIOL BC3360 Animal Physiology, PSYC BC1119 Behavioral Neuroscience, or the equivalent. Not offered in 2008-2009.

3 points

BIOL BC 3380y Applied Ecology and Evolution

Ecological and evolutionary models of populations (exponential and density-dependent growth; species interactions; genetic differentiation resulting from mating, random drift, and selection) applied to problems resulting from human-induced environmental change (endangered species; use of pesticides and antibiotics; escaping transgenic organisms; global climate change; emerging pathogens; etc.)

- H. Callahan

Prerequisites: BIOL BC1500, BC1501, BC1502, BC1503 or equivalent.

3 points

---

BIOL BC 3590x and y Senior Seminar in Biology

Required of all majors who do not select Guided Research (BIOL BC3591 or BC3597) to fulfill the senior requirement, these seminars allow students to explore the primary literature in the Biological Sciences in greater depth than can be achieved in a lecture course. Attention will be focused on both theoretical and empirical work. Seminar periods are devoted to oral reports and discussion of assigned readings and student reports. Students will write one extensive literature review of a topic related to the central theme of the seminar section. 1. Plant Development 2. Evolutionary Ecology 3. Animal Development and Evolution 4. Evolutionary Genetics 5. Virus Structure and Propagation 6. Neurobiology 7. Sensory Ecology 8. The Nobel Prize 9. Molecular Evolution 10. Microbiology 11. Genomics

- N. Paffett-Lugassy

4 points

---

BIOL BC 3591x-BC3592y Guided Research and Seminar

An independent research project in Biology under the guidance of a faculty member and fulfilling the needs of the individual student. Projects conducted outside of the Barnard Biology Department must have a member of the Department acting as a sponsor. A biweekly recitation is included.

- E. Bauer

Prerequisites: Permission of a faculty sponsor. 3 points per semester. Cannot be taken concurrently with BIOL BC3592

---

8 of 10
BIOL BC 3593x-BC3594y Senior Thesis Research
Same as 3591x-3592y, including the bi-weekly seminar, but taken for the Senior requirement.
- E. Bauer
Prerequisites: Permission of a faculty sponsor. Cannot be taken concurrently with BIOL BC3591 or BIOL BC3592
3 points

This program is supervised by the Directors:
Directors: Elizabeth Castelli, Professor of Religion; Timothy Halpin-Healy, Professor of Physics
CS Faculty Assistant: Kathryn McLean

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleave/list.html

The Centennial Scholars Program offers students of outstanding achievement and ability an opportunity to engage in challenging independent projects tailored to their individual interests. Supplemeniting the regular Barnard curriculum, the Program enables Centennial Scholars to pursue individual objectives in specialized areas with the assistance of mentors, chosen in consultation with the Centennial Scholars Program Directors.

Admission to the Centennial Scholars Program is based on evidence of intellectual creativity and advanced academic preparation. While roughly half of the students in the Centennial Scholars Program are selected at the time of their admission to the College, the Program is also accessible to first-year students who distinguish themselves during their first year at the College. The application process, initiated by the First-Year Dean’s Office following Spring Break, involves: i) a mini project proposal; ii) a graded essay; and iii) a recommendation letter written on the student’s behalf by a Barnard College/Columbia University professor. These items are due in the Dean’s Office by April 15. Students advancing beyond the first stage of this selection process are invited for: iv) a short interview during the Spring Term pre-exam Reading Period. Results are then announced during the first week of May. Each Centennial Scholars class year is limited to fifteen students total.

The Centennial Scholars Program confers a maximum of 18.5 points of credit toward the degree. In the spring of the student’s sophomore year, she enrolls in CTSC BC189y-Working with Ideas, 4.5pts, an interdisciplinary course designed to lay the foundation for the core of the program, which is an extended apprenticeship with her mentor(s). Her Centennial Scholars Project may extend over 2-3 semesters (typically, but not necessarily, starting Spring Term, Junior Year), and may include a summer to accommodate travel or other particular needs. During semesters that she is actively engaged with a mentor, the Centennial Scholar enrolls in successive versions of the Apprenticeship course, CTSC BC3501, 4.0pts.

The Program culminates in a Centennial Scholars Symposium devoted to the public presentation of the Centennial Scholars Project in the term of completion. All Centennial Scholars Seniors enroll in CTSC BC35978-Presentation Seminar, 1.0pt, both fall & spring semesters. Public presentations are usually given anytime from mid-March through late April; though some students often hold their Centennial Scholars Symposium in December. Dinner lectures, outings to museums, concerts, artists' studios, research laboratories & similar activities are additional features of the Centennial Scholars Program; these are especially organized for Scholars in the semesters preceding their sophomore seminar.

### Courses of Instruction

**CTSC BC 1889y Working With Ideas**
An interdisciplinary course designed to lay the foundation for the core of the Program, which is an extended apprenticeship with the student's mentor(s). - E. Castelli, T. Halpin-Healy
4.5 points C.N. - 06732

**CTSC BC 3501x or y First Semester Apprenticeship**
First semester working with mentor(s). - E. Castelli, T. Halpin-Healy
4 points C.N. - 03319

**CTSC BC 3502x or y Second Semester Apprenticeship**
Second semester working with student's mentor(s). - E. Castelli, T. Halpin-Healy
*Prerequisites: CTSC BC 1889y Working with Ideas. CTSC BC 3501 First Semester Apprenticeship.*
4 points C.N. - 06204

**CTSC BC 3503x or y Third Semester Apprenticeship**
Third semester working with student's mentor(s). - E. Castelli, T. Halpin-Healy
*Prerequisites: CTSC BC 1889y Working with Ideas, 06732 4.5pts. CTSC BC 3501 First Semester Apprenticeship 03319
4.0pts. CTSC BC 3502 Second Semester Apprenticeship 06204 4.0pts
4 points C.N. - 06203

**CTSC BC 3597x Presentation Symposium**
- E. Castelli, T. Halpin-Healy
1 point C.N. - 04615

**CTSC BC 3598y Presentation Symposium**
- E. Castelli, T. Halpin-Healy
*Prerequisites: CTSC BC 3597x Presentation Symposium 04615 1.0pt.
1 point C. N. - 07023

Chemistry
607 Altschul Hall
854-8460
www.barnard.edu/chem

Professors: Sally Chapman
Associate Professor: Christian Rojas (Chair)
Assistant Professors: Kristina Harris (Term), Dina Merrer, John Magyar
Senior Lecturer: Alison Williams
Directors of General Chemistry Laboratories: Olympia Jebejian, Jacob Alexander
Director of Organic Chemistry Laboratories: Meenakshi Rao
Associates: Craig Allen, Suzanne Charnick, Toby Holtz, Grace Lee, SuQing Liu, Jean Vadakkan
Professor Emeritus: Leslie Lessinger

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleaveList.html

Chemistry is the study of the nature of substances and their transformations. In a three-year sequence of core courses, a chemistry or biochemistry major gains familiarity with the basic areas of the field: inorganic, organic, physical, analytical, and biological chemistry. In addition, she acquires sufficient skill in laboratory work that she is prepared for research.

The laboratories of the department are modern and well-equipped for both coursework and independent projects. Students may undertake research projects under the guidance of members of the department during the academic year or the summer. Opportunities are also available for research with Columbia faculty as well as staff members of the many medical schools and research institutions in New York City.

AP credit: Students with scores of 4 or 5 on the Chemistry Advanced Placement Test receive credit for Fundamentals of Chemistry, BC 1002 (3 points). They may enroll in BC 2001x. No AP credit is given for lab.

Pre-medical program: Non-majors wishing to fulfill the minimum two-year chemistry requirements for medical school should take General Chemistry I, CHEM BC 2001x; Organic Chemistry I and II with laboratory, CHEM BC 3328y, 3320y, and 3231x; and Intermediate General Chemistry, CHEM BC 3232y. The laboratory courses CHEM BC 3333x (Modern Techniques of Organic Chemistry) and CHEM BC 3338y (Quantitative and Instrumental Techniques) are recommended.

Introductory course selection: Based on their preparation and background in chemistry, most students begin their study with CHEM BC 2001x (General Chemistry), an integrated lecture and laboratory course. For a limited number of students with a weaker background in chemistry who want to complete further courses in chemistry, the department offers the preparatory lecture course CHEM BC 1002y (Fundamentals of Chemistry). Consult the department regarding this choice.

REQUIREMENTS FOR THE MAJOR

Two majors are offered by the department: chemistry and biochemistry.

A student interested in chemistry or biochemistry should consult any member of the department during her first year. In the first year she should take Chemistry BC 2001, BC 3328, and BC 3230, and start or continue the study of calculus. It is then possible for her to fulfill the basic requirements for the major in three years and to take advanced courses in the senior year. After completing the undergraduate curriculum, students are encouraged to undertake research projects, and to take graduate courses at Columbia.

Qualified seniors are invited to participate in the senior honors program in which they carry out a year-long research project leading to a thesis.

Research experience is strongly recommended. Interested students should consult with individual faculty members about the research problems currently being investigated.
Chemistry

Courses required for the chemistry major are:

- CHEM BC 2001: General Chemistry I
- CHEM BC 3328, 3330: Organic Chemistry I with Laboratory
- CHEM BC 3231: Organic Chemistry II
- CHEM BC 3335: Modern Techniques of Organic Chemistry Laboratory
- CHEM BC 3340: Quantitative and Instrumental Techniques Laboratory
- CHEM BC 3252: Introduction to Thermodynamics and Kinetics
- CHEM BC 3253: Structure, Bonding, and Spectroscopy
- CHEM BC 3271: Inorganic Chemistry
- CHEM BC 3365, 3368: Integrated Chemistry Laboratory

Mathematics

- Calculus I and II in any sequence (I and III also accepted)

PHYS BC 2001, 2002: Calculus-based Physics with Laboratory

Elective: one of

- CHEM BC 3245: Methods and Applications in Physical Chemistry
- or CHEM BC 3262: Biological Chemistry
- or CHEM BC 3280: Advanced Organic Chemistry
- or CHEM G 4103: Advanced Inorganic Chemistry

**Senior requirement:** Either Senior Honors Thesis (CHEM BC 3901x-3902y, by invitation of the department), or Guided Research at Barnard (CHEM BC 3597 or CHEM BC 3599) or elsewhere (CHEM BC 3598), or Senior Colloquium (CHEM BC 3590y, or CHEM C3920x, y).

Recommended: Calculus III.

A list of major requirements, several possible course sequences, and information about the senior requirement can be obtained from any member of the department.

Biochemistry

Courses required for the biochemistry major are:

- CHEM BC 2001: General Chemistry I
- CHEM BC 3328, 3330: Organic Chemistry I with Laboratory
- CHEM BC 3231: Organic Chemistry II
- CHEM BC 3335: Modern Techniques of Organic Chemistry Laboratory
- CHEM BC 3338: Quantitative and Instrumental Techniques Laboratory
- CHEM BC 3252: Introduction to Thermodynamics and Kinetics
- CHEM BC 3253: Structure, Bonding, and Spectroscopy

Mathematics

- Calculus I and II in any sequence (I and III also accepted)

PHYS BC 2001, 2002: Calculus-based Physics with Laboratory

- BIOL BC 1500, 1502: General Biology with at least one semester of Laboratory with 1501 or 1503

- CHEM BC 3282: Biological Chemistry
- BIOL BC 2100: Molecular and Mendelian Genetics
- CHEM BC 3355: Biochemistry Laboratory Techniques (5 credits)
- or CHEM BC 3357: Biochemistry Laboratory Techniques (3 credits)
- and BIOL BC 3303: Laboratory in Molecular Biology

An elective course from a list of approved Biology and Chemistry courses.

**Senior requirement:** Either Senior Honors Thesis (CHEM BC 3901x-3902y, by invitation of the department), or Guided Research at Barnard (CHEM BC 3597 or CHEM BC 3599) or elsewhere (CHEM BC 3598), or Senior Colloquium (CHEM BC 3590y or CHEM C3920x, y).
A list of major requirements, including possible elective courses, and information about the senior requirement may be obtained from any member of the department.

**REQUIREMENTS FOR THE MINOR**

Courses required for the Chemistry minor are: CHEM BC 2001, BC 3328, BC 3230, BC 3231, BC 3333, BC 3338, and one of BC 3232, BC 3252, BC 3271, or BC 3282. There is no minor in Biochemistry.

Courses of Instruction

CHEM BC 1002y Fundamentals of Chemistry

Introduction to the fundamental concepts of chemistry from an electronic and molecular perspective as well as the macroscopic behavior of matter.
Prerequisites: High school algebra and geometry. Designed as an introduction to more advanced work for students with little background in chemistry or weak problem-solving skills. Students who receive a D in Chemistry 2001x may subsequently take BC1002 without forfeiting credit for 2001x. Does not count toward laboratory science general education requirement. Enrollment limited to 30. Lecture: MWF 10:00-10:50. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
3 points

CHEM BC 2001x General Chemistry I

Atoms; elements and compounds; gases; solutions; equilibrium; acid-base, precipitation, and oxidation-reduction reactions; thermochemistry. Laboratory experience with both qualitative and quantitative techniques.
Prerequisites: Algebra (Math SAT I score of 600 or permission of the instructor for first-year students). Corequisites: Lecture and laboratory must be taken together unless permission of the instructor is given. Laboratory fee: $28. Lecture: TuTh 9:10-10:25; Lab lecture and laboratory one afternoon: MTWRF: 1:10-5:00. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

CHEM BC 2002y General Chemistry II
Kinetics and mechanisms of chemical reactions; nuclear chemistry and radioactivity; atomic and molecular structure; selected topics in environmental chemistry, organic chemistry, and biochemistry.

**Prerequisites:** BC2001 or permission of the instructor. Students who have completed BC3230 or its equivalent may not subsequently receive credit toward the degree for BC2002. Laboratory fee: $28. Lecture: TuTh 9:10-10:25; Lab lecture and laboratory: M 1:10-5:00.

5 points

GREEK AND ROMAN LANGUAGE, LITERATURE, AND CULTURE; ANCIENT STUDIES; MODERN GREEK

The objective of the department is to provide students with a knowledge of the language and an understanding of the literature and civilization of the ancient Greeks and Romans. The close cooperation of Barnard and Columbia in planning and implementing the curriculum offers students a wide range of specialties from which to construct a sound and coherent program of studies according to their individual interests. All members of the Barnard department are available as advisers and should be consulted as early as possible in the planning of a major program.

Students may fulfill the foreign language requirement in Greek by completing Greek V 1201 and V 1202, or in Latin by completing Latin V 1201 and V 1202, or by completing one semester of study above Greek V 1201 and V 1202 or Latin V 1201 and V 1202, or by passing an exemption examination with a sufficiently high grade. This examination tests the student's knowledge of grammar and her ability to translate written Greek or Latin.

The Classics Department is the beneficiary of the Matthew Alan Kramer Fund, whose principal purpose is the support of the production of plays in Ancient Greek and Latin. In recent years students of the department have produced Antigone, Medea, Acestis, Persians, Eumenides, Cyclops, Electra, Clouds, Trojan Women, Rudens, Helen, Trachiniae, Bacchae, Hippolytus, Heracles, Thyestes, Women at the Assembly, Hecuba, Medea, Pseudolus, Ajax, Oedipus the King, Iphigeniae in Aulis, and Birds, which have not only proved satisfying in themselves but have provided an exciting and different learning experience for the participants.

Barnard College participates in the program of the Intercollegiate Center for Classical Studies in Rome. Majors in Classics or Ancient Studies are eligible to apply for admission to the program of the Rome Center for one semester, preferably in the junior year. Courses taken at the Rome Center may be used in the major and, in some cases, may be used to satisfy general education requirements. Barnard College is a Supporting Institution of the American School of Classical Studies at Athens and the American Academy in Rome, and certain privileges of those schools are open without fee to graduates of the College.

Requirements for the Major in Greek, Latin, and Greek & Latin

The major in Greek or Latin requires a minimum of eight courses above the elementary level.

In Greek, this would be fulfilled by taking

Greek W 4139 Elements of Greek Prose Style
Greek W 4105-W 4106 History of Greek Literature
and five others, including Greek V 3996x Major Seminar

In Latin, this would be fulfilled by taking

<table>

</thead>
<tbody>
<tr>
<td>Latin W 4139</td>
<td>Elements of Latin Prose Style</td>
</tr>
<tr>
<td>Latin W 4105-W 4106</td>
<td>History of Latin Literature</td>
</tr>
<tr>
<td>and five others, including</td>
<td>Latin V 3996x Major Seminar.</td>
</tr>
</tbody>
</table>

Greek or Latin V 3998 may be substituted for a semester of the survey or for elements of prose style, but students planning to go on to graduate study in classics are strongly urged to take both W 4105 and W 4106.

In addition, two semesters of ancient history appropriate to the major are required. For one of these, however, a relevant course in ancient art, classical civilization or literature, ancient philosophy, or religion may be substituted.

Majors in Latin, especially those who have begun their study in high school, are strongly advised to take at least two semesters of Greek.

A student may elect to major in both Greek and Latin by completing the major requirements in one language and five courses above the elementary level in the other.

**Note:** For the requirements for the major in Ancient Studies.

**REQUIREMENTS FOR THE MINOR**

The minor in Greek, Latin, or Modern Greek requires five courses above the elementary level.

Classics in Translation

CLCV V 3110 The Ancient City

Uses archaeological and literary sources to discuss the beginnings of urbanism in the ancient Mediterranean region, with particular focus on 5th-century Athens and Imperial Rome. Aims not just to study how cities developed, but also how that development affected the ways in which people of the time thought about community living and the meaning of their physical environment.

3 points

CLLT V 3132x and y Classical Myth

Survey of major myths from the ancient Near East to the advent of Christianity, with emphasis upon the content and treatment of myths in classical authors (Homer, Hesiod, Aeschylus, Euripides, Sophocles, Vergil, Livy, Ovid).

- E. Scharffenberger

General Education Requirement: Literature (LIT).

3 points

CLLT V 3140 Comedy Past and Present: Fantasy, Adventure, and Satire

Examines ancient Greek and Roman works of comedy in conjunction with 20th-century texts composed in English. Explores how fantasy and satire grapple with political, social, and cultural issues and the remarkable continuity within this particular comic tradition. Authors include Aristophanes, Petronius, Lucian, Apuleius, Seneca, Tom Stoppard, Thomas Pynchon, Douglas Adams, and John Waters.

- E. Scharffenberger

General Education Requirement: Literature (LIT).

CLCV V 3145 Cities and Sanctuaries in Ancient Greece

Examines the development of major elements and noteworthy peculiarities of Greek cities and Sanctuaries. Emphasis on individual monuments and arrangement of sites and their political, social, and religious functions throughout the Greek world from the rise of city-states through the formation of the Roman provinces.
3 points

CLCV V 3158x Women in Antiquity

Examines the role of women in ancient Greek and Latin literature; the portrayal of women in literature as opposed to their actual social status; male and female in ancient Mediterranean cosmologies; readings from ancient epics, lycic drama, history, historical documents, medical texts, oratory, and philosophy, as well as from contemporary sociological and anthropological works that help to analyze the origins of the Western attitude toward women.
3 points

CLCV V 3162 Ancient Law

Greek and Roman legal systems; archaic law in its social context; philosophy of law; development of private law in Rome. - J. Zetzel

CLLT V 3230 Classics and Film

Considers cinematic representations of the ancient Mediterranean world, from early silent film to movies from the present day. Explores films that purport to represent historical events (such as Gladiator) and cinematic versions of ancient texts (Pasolini's Medea). Readings include ancient literature and modern criticism.
3 points

CLCV W 4015 Roman Law

Examines the history of the development of Roman law and legal thought. The role of law in Roman society. Introductions to Roman methods of legal analysis, with emphasis on study and class discussion of cases from the Roman jurists.
3 points

CLLT W 4100x or y The Reception of Antiquity

Introduction to the heritage of classical antiquity, primarily Greece, in later European culture. Translation, iconography, the history of classical scholarship, architectural and artistic manifestations of the classical tradition, Greek tragedy on stage and on film, the images of Athens and Sparta.
- S. Said
3 points

CLCV W 4110 Gender and Sexuality in Ancient Greece

Examination of the ways in which gender and sexuality are constructed in ancient Greek society and represented in literature and art, with attention to scientific theory, ritual practice, and philosophical speculation. Topics include conceptions of the body, erotic, homoerotic literature and practice, legal constraints, pornography, rape and prostitution. - H. Foley
Prerequisites: Sophomore standing or permission of the instructor.

CLLT W 4116 Tragedy and Performance

Intensive study of issues relating to the interpretation and performance of Greek and Roman tragedy, including modern stage versions. Special consideration will be given to staging, the changing role of actors and chorus, Aristotle's Poetics, and the reception of ancient tragedy, as well as to social and philosophical issues, including gender conflict.
- H. Foley
3 points

CLCV W 4145 Political Theory in the Ancient World

Major texts of ancient political theory. Topics include constitutional theory, origins and legitimation of government, ethics, and politics, the regulation of private life, the rule of law, and the cosmopolis. Authors include Sophists, Plato, Aristotle, Cicero, Polybius, Dio of Prusa, and Augustine.
3 points

CLLT W 4300x or y Classical Tradition

Overview of Greek and Roman literature. Close analysis of selected texts from the major genres accompanied by lectures on literary history. Topics include the context of which the genres rose, the suitability of various modern critical approaches to the ancient texts, the problem of translation, and the transmission of the classical authors and their influence on modern literature.
- C. Charles

General Education Requirement: Literature (LIT).

The program is supervised by the Committee on Comparative Literature.

Chair of Program: Erk Grimm (German)
Professors: Taylor Carman (Philosophy), Helene Foley (Classics), Serge Gavronsky (French), Maire Jaanus (English), Alfred Mac Adam (Spanish), Catherine Nepomnyashchy (Slavic), Annie Prescott (English), Wadda Rios-Font (Spanish)
Associate Professors: Peter T. Connor (French), Erk Grimm (German), Ross Hamilton (English), Max Moerman (Asian and Middle Eastern Studies), Nelson Moe (Italian), Maura Spiegel (English), Caroline Weber (French), Nancy Woman (Classics)
Assistant Professors: Bashir Abu-Manneh (English), Wiebke Denecke (Asian and Middle Eastern Cultures), Rebecca Stanton (Slavic), Phillip Usher (French)
Senior Lecturers: James Crapotta (Spanish), Cary Plotkin (English), Laurie Postlweate (French)
Lecturer: Brian O’Keeffe (French)

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facelavlist.html

The program enables the student to pursue the study of at least two literatures in two different languages and to explore the possibilities and methods of literary study comparatively across national boundaries. In consultation with her adviser, the student will shape a program that will give her a foundation in her two central literatures (at least one of them in a non-English language) and in one major period, genre, theme, or theoretical issue.

www.barnard.edu/complit

REQUIREMENTS FOR THE MAJOR

To enter the program a student must normally have completed the required sequence necessary for entry into the advance literature courses of her major program. This varies from language to language; students should consult the chair. Each student, after consultation with the chair, chooses an adviser from one of her two fields of concentration in a language. This adviser guides her in developing a sequence of courses appropriate for her goals in the major. All students are required to take Comparative Literature BC 3001 and 14 courses normally to be chosen from the following categories:

One course in appropriate classical texts chosen from The Classical Tradition (CLLT W 4300), Introduction to the Hebrew Bible (REL V 3201), and Introduction to the New Testament (REL V 3202), for those specializing in languages and literature in the Western tradition; Asian Humanities (AHU V 3399 or V 3400), for those specializing in languages and literatures in Eastern traditions; or other courses with approval of the adviser.

One course in literary theory. Students will normally be expected to satisfy this requirement by taking CSO V 3950 The Colloquium in Literary Theory. If study abroad plans make this impossible, other courses may be substituted such as ENG BC 3194, FRE BC 3048 (x or y), CLN W 4902.

Three courses from each of two literary traditions studied in the original languages. Foreign literature courses must be beyond the introductory level.

Five elected courses in comparative literature or literary theory (studied in the original or in translation) related to the student's individual program. These courses must be comparative or theoretical in nature.

One course, either an appropriate seminar or a tutorial, for the writing of a senior thesis.

The Senior Thesis must deal with material from at least the two central literatures in the student's major. In addition this thesis must treat, entirely or in part, the one period, genre, theme, or theoretical issue that has shaped the student's program. The choice of topic for this senior essay and the appointment of a second adviser.
are determined in consultation with the area adviser and the chair of the program. A detailed memorandum on planning the major is available from the chair and the Comparative Literature website.

Students who wish to major in Comparative Literature, but who for valid reasons wish to pursue a program at variance with the above model, should consult the chair.

Courses of Instruction

CPLS BC 3001x Introduction to Comparative Literature

Introduction to the study of literature from a comparative and cross-disciplinary perspective. Readings will be selected to promote reflection on such topics as the relation of literature to the other arts; nationalism and literature; international literary movements; post-colonial literature; gender and literature; and issues of authorship, influence, originality, and intertextuality.

- P. Connor

3 points

CPLS BC 3103x Holocaust Literature and Film: The Limits of Realism

Exploration of the strengths and weaknesses of realistic modes of depiction in literature and film of the Holocaust. The concepts of realism, experience, survival, and testimony will be discussed. Questions of narrative form, the impact of technology, and issues surrounding "post-modernism" will also enter. Readings of texts by Spiegelman, Celan, Peref, Levi, and Wiesel, as well as screenings of video testimony and films by Lanzmann, Spielberg and Resnais.

CPLS BC 3120x or y Poetics of the Mouth

Explores the imagery of eating, drinking, spitting, choking (and other unmentionables) in relation to insults and excessive behaviors. Readings from Greek poetry (e.g., Homer, Aristophanes) to modern theory (e.g., Kristeva, Powers of Horror, Bakhtin, Rabelais and His World), including modern novels and films.

3 points

CPLS BC 3122 Big Brother: Poetics of Power

Explores the representation of institutional power and personal authority in world literature and international cinema through the
lens of contemporary theory and with an emphasis on the fantasies of “Big Brother”. Readings and screenings include Orwell, Nabokov, Kafka, Lucan, Winter'sall as well as Coppola, Hitchcock, Chaplin and Godard. - P. Usher

General Education Requirement: Literature (LIT).

CPLS BC 3123x or y Poetics and Politics of Friendship: Modern Literature and the Experience of Bonding

With an emphasis on equality and social justice, this course examines and compares significant 19th c./20th c. literary approaches to friendship as intermediary between individualism and communal life. Discussion of culturally formed concepts and attitudes in modern or postcolonial setting. Reading of Dickens, Hesse, Woolf, Ocampo, Puig, Fugard, Emerson, Derrida, Rawls.

Prerequisites: DC 3001 Intro to Comp. Lit.; completion of intermediate language courses. Not offered in 2008-2009.
3 points

CPLS BC 3125y Opera and Literature/Opera as Literature

What is an operatic text and how do we "read" it? Examination of the changing relationship between text and music in opera; operatic transformations of literature; opera's representation in literature; critical readings of opera (psychoanalytic, feminist, queer). Works by Monteverdi, Gluck, Mozart, Donizetti, Verdi, Wagner, Strauss, Debussy, and Britten.

CPLS BC 3135x or y Americans (and Others) in Paris

Explores 19th and 20th century expatriate American writers and their French forebears and contemporaries. Texts by Flaubert, James, Proust, Wharton, Colette, Stein, Hemingway, Duras.
3 points

CPLS BC 3140y Europe Imagined: Images of the New Europe in 20th-Century Literature

Compares the diverse images of Europe in 20th-century literature, with an emphasis on the forces of integration and division that shape cultural identity in the areas of travel writings and transculturation/cosmopolitanism, mnemonic narratives and constructions of the past; borderland stories and the cultural politics of translation. Readings include M. Kundera, S. Rushdie, A. Scour, O. Parnak, C. Noteboom, W.G. Sebald, J. Barnes, and others.

- E. Grimm

CPLS BC 3141y Fascism and Resistance: An Examination of Power in Italy and Germany

Explores the cultural forces that defined the rise and fall of Italian fascism as well as the rise of Nazism, with a particular focus on the relationship between Germany and Italy and the similarities and differences between the two dictatorships. Readings addressing the question of literary representation and its political message will include "official" newspaper stories, trials, and propaganda films in addition to personal narratives such as diaries and autobiographies.
Prerequisites: Not offered in 2008-2009.
3 points

CPLS BC 3142y The Spanish Civil War in Literature and the Visual Arts

The Spanish Civil War (1936-39), which culminated with the beginning of Francisco Franco's long dictatorship, foreshadowed the WWII European conflict. It generated unprecedented foreign involvement, as well texts and images by artists from both within and outside Spain - from film (documentary and fictional), through painting (Picasso), to narrative and nonfiction.
W. Ritos-Font
General Education Requirement: Literature (LIT).
3 points

CPLS BC 3149x Urchins, Adulteresses, and Orphans: The Specter of the Other in Nineteenth-Century Bourgeois Literature

Exploration of the 19th-century bourgeois fascination—as evidenced in narrative texts produced and consumed by that class—with marginalized figures from the fringes of acceptable society. Texts consist mainly of novel/short stories featuring protagonists from the poor urban masses, transgressive females such as the adulteress and the prostitute, and the lineage-less figure so popular in the 19th-century narrative, the orphan outcast.

- TBD

CPLS BC 3155y Epic Travel: Text to Road Movie

Examines how heroes in literature and film 'come into being' through the journeys they make. Readings by Virgil, Chrétién de Troyes, Luiz Vaz de Camões, Aphra Behn, Voltaire and others; films by Jean-Luc Godard, Francis Ford Coppola, Ridley Scott and others. - P. Usher
Prerequisites: Not offered in 2008-2009.
3 points

CPLS BC 3156y Figures in a Landscape: Literary Topographies from Homer to H.D.

Exploration of how and why landscape imagery is deployed in the western literary tradition as a map of cultural values, aesthetic ambitions, ideological critique, and for artistic authority. Readings will include Aristophanes' Frogs, Plato's Phaedrus, Shakespeare's A Midsummer Night's Dream, Proust's Under the Shadow of Young Girls in Flower, and H.D.'s poems. These will be supplemented with images from different periods of landscape painting. Secondary readings will take advantage of the recent explosion of interest in landscape and topographical imagery in many fields, including cultural geography and landscape architecture. - N. Woman

CPLS V 3190x Aesthetics of the Grotesque

Examination of the grotesque in different cultural contexts from late Renaissance to the postmodern period comparing modes of transgression and excess in Western literature and film. Particular emphasis on exaggeration in style and on fantastic representations of the body, from the ornate and corpulent to the iconic and anorexic. Readings in Rabelais, Swift, Richardson, Poe, Gogol, Kafka, Meyrink, Pirandello, Greenaway, and M. Python.

- E. Grimm
3 points

CPLS BC 3200x The Visual and Verbal Arts

Analysis and discussion of the relation of literature to painting, photography, and film. Emphasis on artistic and literary concepts concerning the visual dimension of narrative and poetic texts from Homer to Burroughs. Explores the role of description, illustration, and montage in realist and modern literature.

- E. Grimm
3 points

CLSP BC 3212x or y New World Novella

The novels in the New World during the 19th and 20th centuries: a comparative reading of novellas from Latin America and North America. The course seeks to define the genre and examine main themes such as obsession with historical issues, especially relations among the races.

- A. MacAdam
3 points

CPLS V 3235x or y Imagining the Self

Examines the literary construction of the self by comparing autobiographical and fictional texts from antiquity to the present. Focus on how the narrating self is masked, illusory, ventriloquized, or otherwise problematic. Works include Homer, Virgil, Rousseau, Wordsworth, Dostoevsky, Nabokov, and theoretical texts.

General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Literature (LIT). Not
3 points

CPLS V 3290y Contemplation and Experimental Knowledge in Modern Literature and Art

Origin of the concept of contemplation in Plato and Neoplatonists; contemplation as a form of spiritual practice in the 16th century; the place of contemplation in the industrialized world, with emphasis on its role in literature and the visual arts. Selections from Plato, Plotinus, Augustine, Ignotius, Weber, Proust, Weil, Heidegger; Beckett, Arendt; films by Eisenstein, Marker, and others; and various art works. Not offered in 2008-2009.
3 points

CLIA V 3660y Mafia Movies: From Sicily to The Sopranos

Examines representations of the mafia in American and Italian film and literature. Special attention to questions of ethnic identity and immigration. Comparison of the different histories and myths of the mafia in the U.S. and Italy. Readings includes novels, historical studies, and film criticism.

- N. Moe

General Education Requirement: The Visual and Performing Arts (ART).

Computer Science is the study of how to communicate and transform information. Developments in the field over the past few decades have profoundly changed society, and this effect is likely to accelerate in the future. Information processing techniques are being applied increasingly in the fields of medicine, business, law, science, and finance. The goal of the theoretical side of computer science is to characterize the inherent complexity of computations, including the issue of what problems are solvable. The goal of the applied side of the field is to design cost-effective computer systems that are easy and pleasant to use, including the possibility of "intelligent" systems that mimic some aspects of human behavior.

The bachelor of arts degree in Computer Science encourages students to obtain broad exposure to the arts, humanities, and social sciences while at the same time providing them with the appropriate Computer Science background necessary for graduate study or a professional career. Computers have an impact on nearly all areas of human endeavor, so the department also offers several courses intended for students who do not plan a Computer Science major or concentration.

PROGRAM OVERVIEW

The Computer Science major offers maximum flexibility by providing students with a range of options for specializing their degree program. Students study a common core of fundamental topics, supplemented by a track that identifies specific areas for deeper study.

The foundations track prepares students for advanced work in fundamental theoretical and mathematical aspects of computing, including analysis of algorithms, scientific computing, and security. The systems track prepares students for immediate employment in the computer industry as well as advanced study in such areas as software engineering, operating systems, computer-aided digital design, computer architecture, programming languages, and user interfaces. The artificial intelligence track provides specialization for the student interested in natural language processing and systems capable of exhibiting "human-like" intelligence. The applications track is for students interested in the implementation of interactive multimedia content for the Internet and wireless applications. The vision of graphics track exposes students to computer vision, graphics, human-computer interaction and robotics. A combination track is available to students who wish to pursue an interdisciplinary course of study combining computer science and another field in arts, humanities, mathematics, natural sciences, or social sciences. A student planning a combination track should be aware that one additional course is required to complete this option.

REQUIREMENTS FOR THE MAJOR
All majors should confer with the program consultant each term in planning their programs of study. Students considering a major in computer science are encouraged to talk to a program consultant during their first or second year. The requirements that follow are special to this department and must be read in conjunction with the general requirements for the bachelor's degree. This program is a major revision from prior years. As a rule, no more than 12 transfer credits will be accepted toward the degree.

Program of study:

- The introductory classes Computer Science W 1004 in the first year
- Computer Science W1007, W3203, W 3157 and W 3137 in the second year
- Most of the remaining required core courses in the second and third years

This allows the most freedom possible in selecting a specialized track and completing the requirements during the junior and senior years. It is particularly important to complete the core requirements and to seek advice from a track consultant to better plan your course of study as early as possible. W1004, W1007, or W1009, and W3137 or W3139 are taught in Java. Advanced Programming (W 3157) is taught in C/C++, so students will become multilingual. Programming classes make use of an extensive array of computing facilities available on campus.

Required courses: 41 or 44 points.

**Computer Science Core (23 points):** W 1004, W 1007, W 3203, W 3137, W 3157, W 3261, W 3827. Students may take the honors class W 1009 in place of W 1007, and the honors class W 3139 in place of W 3137. Students who have taken AP Computer Science in high school and received a grade of 4 or 5 can waive W 1004.

**Mathematics (3 points):** one semester of calculus.

**Track requirement (15 or 18 points):** each student must also fulfill the track requirement by selecting one of six upper-level tracks. Each track, except the combined track, requires five courses of which 2 or 3 are required, 1 is an elective breadth course, and 1 or 2 are elective track courses. The combined track requires a cohesive selection of six advanced courses: three 3000- or 4000-level Computer Science courses and three 3000- or 4000-level courses from another field. The elective breadth course in each track can be any 3-point COMS 3000-level or higher course that is not a Computer Science Core course or a technical elective in that track.

**Systems track (12 points):** for students interested in networking, programming languages, operating systems, and software systems. The required track courses are COMS W4115, W4118, W4119. The elective track courses include any COMS W 41xx course, any W48xx course, W 4444, W 3902, W 3998, W 4901, W 4995, W 4996.

**Artificial intelligence track (12 points):** for students interested in machine learning, robots, and systems capable of exhibiting "human-like" intelligence. The required track course is COMS W 4701, plus any two of W 4705, W 4731, W 4733, W 4771. The elective track courses include COMS W 3902, W 3998, W 40xx, W 4165, W 4252, W 47xx, W 4901, W 4995, W 4996.

**Applications track (12 points):** for students interested in interactive multimedia applications for the Internet and wireless networks. The required track courses are COMS W 4115, W 4170, W 4701. The elective track courses include COMS W 3902, W 3998, W 41xx, W 47xx, W 4901, W 4995, W 4996.

**Vision and graphics track (12 points):** for students interested in computer vision, graphics, and advanced forms of human-computer interaction. The required track courses are COMS W 4160 and W 4731. The elective track courses include COMS W 3902, W 3998, W 4162, W 4165, W 4167, W 4170, W 4172, W 4701, W 4733, W 4735, W 4771, W 4901, W 4995, W 4996.

**Combination track (15 points):** for students who wish to combine Computer Science with another discipline. A coherent selection of six courses is required: three 3000- or 4000-level Computer Science courses and three 3000- or 4000-level courses from another discipline. This track should be selected by the end of the first semester of the junior year and the courses should be planned with your advisor. The other discipline can be any one in the arts, humanities, mathematics, natural sciences, or social sciences.

**REQUIREMENTS FOR A MINOR IN COMPUTER SCIENCE**

**Courses:** 23 points. Required computer science courses - 23 points: W 1004, W 1007, W 3203, W 3137, W 3157, W 3261, and W 3827 or any 4000-level computer science course. W 1009 may be substituted for W 1007, and W 3139 may be substituted for W 3137.

SEARCH COURSES

Instructions:
Below are listed all department courses for the upcoming term.
To view a refined subset of courses, modify the criteria, then click the "Search" button.
To remove all search parameters and list all courses, click the "Show All" button.

In the listing below, the designator COMS (Computer Science) is understood to precede all course numbers for which no designator is indicated.

NOTE: Students may receive credit for only one of the following two courses: COMS W1003 and W1004. Likewise students may receive credit for only one of the following four courses: COMS W3133, W3134, W3137, and W3139.

COMS W 1001x and y Introduction to Information Sciences

Basic introduction to concepts and skills in Information Sciences: human-computer interfaces, representing information digitally, organizing and searching information on the World Wide Web, principles of algorithmic problem solving, introduction to database concepts, introduction to programming in Python.

General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect: 3.3 pts.

COMS W 1003x or y Introduction To Computer Science and Programming In C

A general introduction to computer science concepts, algorithmic problem-solving capabilities, and programming skills in C. Columbia University students may receive credit for only one of the following three courses: 1003, 1004, and 1005.

General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect: 3. 3 pts.
COMS W 1004x and y Introduction To Computer Science and Programming In Java

A general introduction to computer science for science and engineering students interested in majoring in computer science or engineering. Covers fundamental concepts of computer science, algorithmic problem-solving capabilities, and introductory Java programming skills. Assumes no prior programming background. Columbia University students may receive credit for only one of the following three courses: 1003, 1004, and 1005.

- A. Aho

**COMS W 1007x or y Object-oriented programming and design in Java**

The second course for majors in computer science. A rigorous treatment of object-oriented concepts using Java as an example language. Development of sound programming and design skills, problem solving and modeling of real world problems from science, engineering, and economics using the object-oriented paradigm.

- Adam Cannon

**Prerequisites: COMS W1004 or AP Computer Science with a grade of 4 or 5. General Education Requirement: Quantitative and Deductive Reasoning (QUA).**

**COMS W 1009x Honors Introduction To Computer Science**
An honors-level introduction to computer science, intended primarily for students considering a major in computer science. Computer science as a science of abstraction. Creating models for reasoning about and solving problems. The basic elements of computers and computer programs. Implementing abstractions using data structures and algorithms. Taught in Java.

- John Kender

Lect: 3. 3 pts.

**ECBM E 3060x Introduction To Genomic Information Science and Technology**

Introduction to the information system paradigm of molecular biology. Representation, organization, structure, function and manipulation of the biomolecular sequences of nucleic acids and proteins. The role of enzymes and gene regulatory elements in natural biological functions as well as in biotechnology and genetic engineering. Recombination and other macromolecular processes viewed as mathematical operations with simulation and visualization using simple computer programming. This course shares lectures with ECBM E4060, but the work requirements differ somewhat.

- D. Anastassiou

General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect: 3 pts

**COMS W 3101x and y Programming Languages**

Introduction to a programming language. Each section is devoted to a specific language. Intended only for those who are already fluent in at least one programming language. Sections may meet for one hour per week for the whole term, for three hours per week for the first third of the term, or for two hours per week for the first six weeks. May be repeated for credit if different languages are involved.

Prerequisites: Fluency in at least one programming language. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect: 1. 1pts.

**COMS W 3133x or y Data Structures In C**

Not intended for computer science majors. Data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection, storage management. Rudiments of the analysis of algorithms. Taught in C. Note: Due to significant overlap, students may receive credit for only one of the following four courses: COMS W3133, W3134, W3137, and W3139.

Prerequisites: COMS W1003 or knowledge of C. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect: 3. 3 pts.

**COMS W 3134x or y Data Structures In Java**

Not intended for computer science majors. Data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Rudiments of the analysis of algorithms. Taught in Java. Note: Due to significant overlap, students may receive credit for only one of the following four courses: COMS W3133, W3134, W3137, and W3139.

Prerequisites: COMS W1004 or knowledge of Java. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect: 3. 3 pts.

COMS W 3139y Honors Data Structures and Algorithms

An honors introduction to data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Storage management. Design and analysis of algorithms. Taught in C/C++. Note: Due to significant overlap, students may receive credit for only one of the following four courses: COMS W3133, W3134, W3137, and W3139.

Lect. 4. 4 pts.

COMS W 3157x or y Advanced Programming

Practical, hands-on introduction to programming techniques and tools for professional software construction, including learning how to write code to given specifications as well as document the results. Provides introductory overview of C and C++ in a UNIX environment, for students with Java background. Also introduces scripting languages (perl) and basic web programming. UNIX programming utilities are also covered.

Prerequisites: COMS W1007 or COMS W1009 Lab Required. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect. 4. 4 pts.

COMS W 3203x or y Discrete Mathematics: Introduction To Combinatorics and Graph Theory

Logic and formal proofs, sequences and summation, mathematical induction, binomial coefficients, elements of finite probability, recurrence relations, equivalence relations and partial orderings, and topics in graph theory (including isomorphism, traversability, planarity, and colorings).

- J. Gross, Z. Grunschlag

Prerequisites: Any introductory course in computer programming. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect. 3. 3 pts.

COMS W 4101x or y Topics in Computer Science Technology

Introduction to current topics in computer science technology. Each section will be devoted to a specific technology. Sections may meet for 1.5 hours per week for the whole term or 3 hours per week for a half term. May be repeated for credit if different technologies are involved.

Prerequisites: Fluency in at least one programming language and familiarity with computer systems. General Education Requirement: Quantitative and Deductive Reasoning (QUA). Not offered in 2008-2009. 1.5 points

COMS W 4111x and y Introduction to Databases

The fundamentals of database design and application development using databases: entity-relationship modeling, logical design of relational databases, relational data definition and manipulation languages, SQL, XML, query processing, physical database tuning, transaction processing, security. Programming projects are required.

- L. Gravano

Prerequisites: COMS W3137 or W3134, fluency in Java, or permission of the instructor. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

COMS W 4112y Database System Implementation

The principles and practice of building large-scale database management systems. Storage methods and indexing, query processing and optimization, materialized views, transaction processing and recovery, object-relational databases, parallel and distributed databases, performance considerations. Programming projects are required.

- L. Gravano, K. Ross

Prerequisites: COMS W4111; fluency in Java or C++. COMS W3827 is recommended.

COMS W 4115x and y Programming Languages and Translators

Modern programming languages and compiler design. Imperative, object-oriented, declarative, functional, and scripting languages. Language syntax, control structures, data types, procedures and parameters, binding, scope, run-time organization, and exception handling. Implementation of language translation tools including compilers and interpreters. Lexical, syntactic and semantic analysis; code generation; introduction to code optimization. Teams implement a language and its compiler.

- S. Edwards, A. Aho

Prerequisites: COMS W3137 or equivalent, W3261, and CSEE W3827, or the instructor's permission. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect. 3, 3 pts.

COMS W 4117x or y Compilers and Interpreters

Continuation of COMS W4115, with broader and deeper investigation into the design and implementation of contemporary language translators, be they compilers or interpreters. Topics include: parsing, semantic analysis, code generation and optimization, run-time environments, and compiler-compilers. A programming project is required.

- A. Aho
Prerequisites: COMS W4115 or the instructor's permission. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect. 3. 3 pts.

COMS W 4118x and y Operating Systems, I

Design and implementation of operating systems. Topics include process management, process synchronization and interprocess communication, memory management, virtual memory, interrupt handling, processor scheduling, device management, I/O, and file systems. Case study of the UNIX operating system. A programming project is required.

- J. Neh
Prerequisites: CSEE W3627 and knowledge of C and programming tools as covered in W3157 or W3101, or the instructor's permission. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect. 3. 3 pts.

COMS W 4156x or y Advanced Software Engineering

Assumes substantial prior software development experience in one or more of C++, Java or C#, as well as basic familiarity with using SQL. Focuses primarily on component model frameworks (EJB, .NET/COM+, Web Services) and quality assurance (code inspection, unit and integration testing, stress testing). Introduction to UML. Surveys other software lifecycle topics as time permits. Centers on an intense semester-long multi-iteration team project building an N-tier application.

- G. Kaiser
Prerequisites: Any one or more of COMS W4111, COMS W4115, COMS W4118, or COMS W4444. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect. 3. 3 pts.

COMS W 4160y Computer Graphics

Introduction to computer graphics. Topics include 3D viewing and projections, geometric modeling using spline curves, graphics systems such as OpenGL, lighting and shading, and global illumination. Significant implementation is required: the final project involves writing an interactive 3D video game in OpenGL.

- R. Ramamoorthi
Prerequisites: COMS 3137 or 3139, 4156 is recommended. Strong programming background and some mathematical familiarity including linear algebra is required. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect. 3. 3 pts.

COMS W 4162x or y Advanced Computer Graphics

A second course in computer graphics covering more advanced topics including image and signal processing, geometric modeling with meshes, advanced image synthesis including ray tracing and global illumination, and other topics as time permits. Emphasis will be placed both on implementation of systems and important mathematical and geometric concepts such as Fourier analysis, mesh algorithms and subdivision, and Monte Carlo sampling for rendering. Note: Course will be taught every two years.

- Ravi Ramamoorthi
Prerequisites: COMS 4160 or equivalent, or instructor's permission. General Education Requirement: Quantitative and
Deductive Reasoning (QUA).
Lect. 3. 3 pts

COMS W 4165x Computational Techniques In Pixel Processing
Intended for graduates and advanced undergraduates. An intensive introduction to image processing—digital filtering theory, image enhancement, image reconstruction, anti-aliasing, warping, and the state-of-the-art in special effects. Topics form the basis of high-quality rendering in computer graphics and of low-level processing for computer vision, remote sensing, and medical imaging. Emphasizes computational techniques for implementing useful image-processing functions.
Prerequisites: COMS W3137, W3251 (recommended), and a good working knowledge of UNIX and C. General Education Requirement: Quantitative and Deductive Reasoning (QUA). Not offered in 2008-2009.
Lect. 3. 3 pts.

COMS W 4167x or y Computer Animation
Previous familiarity with C is recommended. Intensive introduction to computer animation, including: fundamental theory and algorithms for computer animation, keyframing, kinematic rigging, simulation, dynamics, free-form animation, behavioral/procedural animation, particle systems, post-production; small groups implement a significant animation project; advanced topics as time permits.
- E. Grinspun
Prerequisites: COMS W3137 or W3139, and W4156 is recommended. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect. 3.3 pts.

COMS W 4170x User Interface Design
Introduction to the theory and practice of computer user interface design, emphasizing the software design of graphical user interfaces. Topics include basic interaction devices and techniques, human factors, interaction styles, dialogue design, and software infrastructure. Design and programming projects are required.
- S. Feiner
Prerequisites: COMS W3137. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect. 3. 3 pts.

COMS W 4180x or y Network Security
Introduction to network security concepts and mechanisms. Foundations of network security and an in-depth review of commonly-used security mechanisms and techniques, security threats and network-based attacks, applications of cryptography, authentication, access control, intrusion detection and response, security protocols (IPsec, SSL, Kerberos), denial of service, viruses and worms, software vulnerabilities, web security, wireless security, and privacy.
- A. Keromytis
Prerequisites: COMS W3137 or W3139, and W4119, or the instructor's permission. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect: 3, 3 pts.

COMS W4203y Graph Theory

General introduction to graph theory. Isomorphism testing, algebraic specification, symmetries, spanning trees, traversability, planarity, drawings on higher-order surfaces, colorings, extremal graphs, random graphs, graphical measurement, directed graphs, Burnside-Polya counting. Voltage graph theory.

- J. Gross

Lect: 3, 3 pts.

COMS W4205x Combinatorial Theory

Sequences and recursions, calculus of finite differences and sums, elementary number theory, permutation group structures, binomial coefficients, Stirling numbers, harmonic numbers, generating functions.

- J. Gross

Prerequisites: COMS W3203 and a course in calculus. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect: 3, 3 pts.

COMS W4231x Analysis of Algorithms, I

Introduction to the design and analysis of efficient algorithms. Topics include models of computation, efficient sorting and searching, algorithms for algebraic problems, graph algorithms, dynamic programming, probabilistic methods, approximation algorithms, and NP-completeness. Note: This course is same as CSOR W4231 (CS and IEOR Department).

- M. Yannakakis

Prerequisites: COMS W3137 or W3139, and W3203. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect: 3, 3 pts.

COMS W4236y Introduction To Computational Complexity
Develops a quantitative theory of the computational difficulty of problems in terms of the resources (e.g., time, space) needed to solve them. Classification of problems into complexity classes, reductions and completeness. Power and limitations of different modes of computation such as nondeterminism, randomization, interaction and parallelism.

- M. Yannakakis, R. Servidio

**Prerequisites:** COMS W3261. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect: 3. 3 pts.

**COMS W4252x or y Introduction To Computational Learning Theory**

Possibilities and limitations of performing learning by computational agents. Topics include computational models of learning, polynomial time learnability, learning from examples and learning from queries to oracles. Computational and statistical limitations of learning. Applications to Boolean functions, geometric functions, automata.

- R. Servidio

**Prerequisites:** COMS W4231 or COMS W4236 or (COMS W3203 and permission of instructor) or (COMS W3261 and permission of instructor). General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect: 3. 3pts

**COMS W4261x or y Introduction To Cryptography**

An introduction to modern cryptography, focusing on the complexity-theoretic foundations of secure computation and communication in adversarial environments; a rigorous approach, based on precise definitions and provably secure protocols. Topics include private and public key encryption schemes, digital signatures, authentication, pseudorandom generators and functions, one-way functions, trapdoor functions, number theory and computational hardness, identification and zero knowledge protocols.

- T. Malkin

**Prerequisites:** Comfort with basic discrete math and probability. Recommended: COMS W3261 or COMS W4231. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect: 2.5. 3 pts.

**COMS W4281x or y Introduction to Quantum Computing**

- H. Wozniakowski

**Prerequisites:** Knowledge of linear algebra. Prior knowledge of quantum mechanics is not required although helpful. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

10 of 16

11/14/2008 9:23 AM
CSEE W 4340x Computer Hardware Design
Practical aspects of computer hardware design through the implementation, simulation, and prototyping of a PDP-8 processor. High-level assembly languages, I/O, interrupts, datapath and control design, pipelining, busses, memory architecture. Programmable logic and hardware prototyping with FPGAs. Fundamentals of VHDL for register-transfer level design. Testing and validation of hardware. Hands-on use of industry CAD tools for simulation and synthesis. Lab required.
Lect: 2. 3 pts

COMS W 4444x Programming and Problem Solving
Hands-on introduction to solving open-ended computational problems. Emphasis on creativity, cooperation, and collaboration. Projects spanning a variety of areas within computer science, typically requiring the development of computer programs. Generalization of solutions to broader problems, and specialization of complex problems to make them manageable.
Team-oriented projects, student presentations, and in-class participation required.
- K. Ross
Prerequisites: COMS W3139 and W3824. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect: 3. 3 pts

COMS W 4560x Introduction to Computer Applications in Health Care and Biomedicine
An overview of the field of biomedical informatics, combining perspectives from medicine, computer science and social science. Use of computers and information in health care and the biomedical sciences, covering specific applications and general methods, current issues, capabilities and limitations of biomedical informatics. Biomedical Informatics studies the organization of medical information, the effective management of information using computer technology, and the impact of such technology on medical research, education, and patient care. The field explores techniques for assessing current information practices, determining the information needs of health care providers and patients, developing interventions using computer technology, and evaluating the impact of those interventions.
- M. Chiang
Prerequisites: Experience with computers and a passing familiarity with medicine and biology. Undergraduates in their senior or junior years may take this course only if they have adequate background in mathematics and receive permission from the instructor General Education Requirement: Quantitative and Deductive Reasoning (QUA).
3 points

COMS W 4701x or y Artificial Intelligence
Provides a broad understanding of the basic techniques for building intelligent computer systems. Topics include state-space problem representations, problem reduction and and-or graphs, game playing and heuristic search, predicate calculus, and resolution theorem proving, AI systems and languages for knowledge representation, machine learning and concept formation and other topics such as natural language processing may be included as time permits.
- K. McKeown, S. Stolfo
Prerequisites: COMS W3139. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect: 3. 3 pts.
COMS W 4705x Natural Language Processing

Computational approaches to natural language generation and understanding. Recommended preparation: some previous or concurrent exposure to AI or Machine Learning. Topics include information extraction, summarization, machine translation, dialogue systems, and emotional speech. Particular attention is given to robust techniques that can handle understanding and generation for the large amounts of text on the Web or in other large corpora. Programming exercises in several of these areas.

- J. Hirschberg
Prerequisites: COMS W3133, or W3134, or W3137, or W3139, or the instructor's permission. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect: 3. 3 pts.

COMS W 4706y Spoken Language Processing

Computational approaches to speech generation and understanding. Topics include speech recognition and understanding, speech analysis for computational linguistics research, and speech synthesis. Speech applications including dialogue systems, data mining, summarization, and translation. Exercises involve data analysis and building a small text-to-speech system.

- J. Hirschberg
Prerequisites: Prerequisites: COMS W3133, or W3134, or W3137, or W3139, or the instructor's permission. General Education Requirement: Quantitative and Deductive Reasoning (QUA). Not offered in 2008-2009.

COMS W 4725x or y Knowledge Representation and Reasoning

General aspects of knowledge representation (KR). The two fundamental paradigms (semantic networks and frames) and illustrative systems. Topics include hybrid systems, time, action/plans, defaults, abduction, and case-based reasoning. Throughout the course particular attention will be paid to design tradeoffs between language expressiveness and reasoning complexity, and issues relating to the use of KR systems in larger applications.
Prerequisites: COMS W4701. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect: 3. 3 pts.

COMS W 4731x or y Computer Vision

Introductory course in computer vision. Topics include image formation and optics, image sensing, binary images, image processing and filtering, edge extraction and boundary detection, region growing and segmentation, pattern classification methods, brightness and reflectance, shape from shading and photometric stereo, texture, binocular stereo, optical flow and motion, 2-D and 3-D object representation, object recognition, vision systems and applications.

- S. Nayar
Prerequisites: The fundamentals of calculus, linear algebra, and C programming. Students without any of these prerequisites are advised to contact the instructor prior to taking the course. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
Lect: 3. 3 pts.

COMS W 4733x or y Computational Aspects of Robotics

Introduction to robotics from a computer science perspective. Topics include coordinate frames and kinematics, computer architectures for robotics, integration and use of sensors, world modeling systems, design and use of robotic programming
languages, and applications of artificial intelligence for planning, assembly, and manipulation.

- P. Allen

Prerequisites: COMS W3137 or W3139. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect. 3, 3pts.

COMS W 4735x or y Visual Interfaces To Computers

Visual input as data and for control of computer systems. Survey and analysis of architecture, algorithms, and underlying assumptions of commercial and research systems that recognize and interpret human gestures, analyze imagery such as fingerprint or iris patterns, generate natural language descriptions of medical or map imagery. Explores foundations in human psychophysics, cognitive science, and artificial intelligence.

Prerequisites: COMS W3137 or W3139. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect. 3, 3pts.

COMS W 4737x or y Biometrics

In this course we will explore the latest advances in biometrics as well as the machine learning techniques behind them. Students will learn how these technologies work and how they are sometimes defeated. Grading will be based on homework assignments and a final project. There will be no midterm or final exam. This course shares lectures with COMS E6737. Students taking COMS E6737 are required to complete additional homework problems and undertake a more rigorous final project. Students will only be allowed to earn credit for COMS W4737 or COMS E6737 and not both.

- P. Behumueir

Prerequisites: A background at the sophomore level in computer science, engineering, or like discipline. Corequisites: None

General Education Requirement: Quantitative and Deductive Reasoning (QUA).

CBMF W 4761x or y Computational Genomics

Provides comprehensive introduction to computational techniques for analyzing genomic data including DNA, RNA and protein structures; microarrays; transcription and regulation; regulatory, metabolic and protein interaction networks. The course covers sequence analysis algorithms, dynamic programming, hidden Markov models, phylogenetic analysis, Bayesian network techniques, neural networks, clustering algorithms, support vector machines, Boolean models of regulatory networks, flux based analysis of metabolic networks and scale-free network models. The course provides self-contained introduction to relevant biological mechanisms and methods.

Prerequisites: Introductory probability and statistics and basic programming skills. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect. 3, 3pts.

COMS W 4771y Machine Learning

Topics from generative and discriminative machine learning including least squares methods, support vector machines, kernel methods, neural networks, Gaussian distributions, linear classification, linear regression, maximum likelihood, exponential family distributions, Bayesian networks, Bayesian inference, mixture models, the EM algorithm, graphical models and hidden Markov
models. Algorithms implemented in Matlab.

- T. Jebara

Prerequisites: Any introductory course in linear algebra and any introductory course in statistics are both required. Highly recommended: COMS W4710 or knowledge of Artificial Intelligence. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect. 3, 3 pts.

COMS W 4772x Advanced Machine Learning

An exploration of advanced machine learning tools for perception and behavior learning. How can machines perceive, learn from, and classify human activity computationally? Topics include: Appearance-Based Models, Principal and Independent Components Analysis, Dimensionality Reduction, Kernel Methods, Manifold Learning, Latent Models, Regression, Classification, Bayesian Methods, Maximum Entropy Methods, Real-Time Tracking, Extended Kalman Filters, Time Series Prediction, Hidden Markov Models, Factorial HMMs, Input-Output HMMs, Markov Random Fields, Variational Methods, Dynamic Bayesian Networks, and Gaussian/Dirichlet Processes. Links to cognitive science.

- T. Jebara

Prerequisites: COMS W4771 or permission of Instructor; knowledge of linear algebra & introductory probability or statistics is required. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

CSEE W 4823x or y Advanced Logic Design

An introduction to modern digital system design. Advanced topics in digital logic: controller synthesis (Mealy and Moore machines); adders and multipliers; structured logic blocks (PLDs, PALs, ROMs); and iterative circuits. Modern design methodology: register transfer level modelling (RTL); Algorithmic design; System-level modelling and simulation; design examples.

- S. Nowick

Prerequisites: CSEE 3827, or a half semester introduction to digital logic, or the equivalent. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect. 3, 3 pts.

CSEE W 4825y Digital Systems Design
Dynamic logic, field programmable gate arrays, logic design languages, multipliers. Special techniques for multi-level NAND and NOR gate circuits. Clocking schemes for one- and two-phase systems. Fault checking: scan method, built-in-test. Survey of logic simulation methods. Other topics to be added as appropriate.

Lect. 3. 3 pts.

**CSEE W4840y Embedded Systems**

Embedded system design and implementation combining hardware and software. I/O, interfacing, and peripherals. Weekly laboratory sessions and term project on design of a microprocessor-based embedded system including at least one custom peripheral. Knowledge of C programming and digital logic required.

- S. Edwards

**Prerequisites:** CSEE W4823. Lab Required. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect. 3. 3 pts.

**COMS W4996x or y Special Topics in Computer Science, II**

A continuation of COMS W4995 when the special topic extends over two terms.

**Prerequisites:** The instructor’s permission. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Lect. 3. 3 pts.

**COMS W4999y Computing and the Humanities**

Text databases. Language applications, such as machine translation, information and retrieval, and computational stylistics (determining authorship). Digital library applications, including issues in text acquisition, text markup, networking display, and user interfaces. Educational applications. Legal reasoning, history applications involving inferencing and databases.

Lect. 3. 3 pts.

There are currently no cross-listed courses for your department.

The Barnard Dance Department seeks to develop technical versatility in dance performance, skill and originality in choreography, and critical understanding of the art of dance as a part of history and culture. Emphasis is placed on performing opportunities each semester, and on the encouragement of each student's growth as a creative artist.

Studios and theaters in New York City provide Barnard students opportunities to study and view an array of dance, while major libraries and dance institutions offer rich possibilities for research. The Dance Department regularly invites guest artists to teach and choreograph throughout the year.

All dance courses except Senior Seminar are open to students who meet the prerequisites. Barnard College Dance Department is an accredited institutional member of the National Association of Schools of Dance.

Students contemplating a dance major should consult with a member of the department in their first year. Declaration of the major requires departmental approval.

REQUIREMENTS FOR THE MAJOR

Majors must fulfill an 11 course requirement to include BC 3591 Senior Seminar for Dance, one course in dance history (BC 2565 or BC 2566), one in movement science (BC 2501or BC 2561 or BC 2562), one in dance composition (BC 2563 or BC 2564 or BC 3565), and one with a significant writing component (such as BC 2570, BC 3570, BC 3574, BC 3576, BC 3577 or BC 3980). Majors normally take two technique courses per semester: a minimum of eight points of dance technique courses are required. Under the supervision of the dance faculty, seniors are expected to present a final thesis to demonstrate their acquired skill and knowledge of dance.

Research papers should be 25-30 pages in length. For the performance requirement, a student can present in one of the following two categories: (1) in repertory and (2) in her own choreography. Students may elect to fulfill the thesis requirement by taking either BC 3592 or BC 3593 as part of the 11 course requirement. The remaining courses for the major may be selected from the following:

- DNCE BC 2501 Biomechanics for the Dancer: Theory and Practice
- DNCE BC 2555 Ensemble Dance Repertory: Modern
- DNCE BC 2556 Ensemble Dance Repertory: Ballet
- DNCE BC 2557 Evolution of Classic Spanish Dance
- DNCE BC 2558 Tap Ensemble
- DNCE BC 2560 Exploring Dance: An Introduction to Dance as an Art Form
DNCE BC 2561 Applied Anatomy for Human Movement
DNCE BC 2562 Movement Analysis
DNCE BC 2563 Dance Composition: Form / Dance Composition: Form, dance/theater
DNCE BC 2564 Dance Composition: Content
DNCE BC 2565 World Dance History
DNCE BC 2566 Western Theatrical Dance from the Renaissance to the 1960s
DNCE BC 2567 Music for Dance
DNCE BC 2570 Dance in New York City
DNCE BC 2575 Choreography for the American Musical
DNCE BC 2580 Tap as an American Art Form
DNCE BC 3000 From the Page to the Dance Stage
DNCE BC 3099 Independent Study
DNCE BC 3200 Dance in Film
DNCE BC 3565 Group Forms: Advanced Dance Composition
DNCE BC 3567 Dance in Asia
DNCE BC 3570 Latin American and Caribbean Dance: Identities in Motion
DNCE BC 3571 Solo Repertory: Performance Styles
DNCE BC 3572 Dance Production
DNCE BC 3574 Seminar on Contemporary Choreographers and Their Works
DNCE BC 3575 George Balanchine and the Reinvention of Modern Ballet
DNCE BC 3576 Dance Criticism
DNCE BC 3577 Performing the Political
DNCE BC 3578 Traditions of African-American Dance
DNCE BC 3580 Rehearsal and Performance in Dance (for 3 points)
DNCE BC 3591 Senior Seminar in Dance
DNCE BC 3592 Senior Project: Research for Dance x, y
DNCE BC 3593 Senior Project: Repertory for Dance x, y
DNCE BC 3880 Performing the Political (as seminar)
DNCE BC 3882 Diaghilev's Ballet Russes and Its World

Note: If planning to study abroad, a Dance History course must be completed prior to Junior year. A minimum of six points of dance technique courses above and beyond the two technique courses taken to fulfill the Physical Education requirement. Students are also encouraged to elect courses outside the department in pursuit of the historical and cultural context of dance.

REQUIREMENTS FOR THE MINOR

Six courses constitute a minor in Dance. Normally, three history/criticism and three credit-bearing performance/choreography courses are taken.

In the listing below, the designator DNCE (Dance) is understood to precede all course numbers for which no designator is indicated.

DNCE BC 2501x and y Biomechanics for the Dancer: Theory and Practice
Links conditioning skills, movement therapies, and neuromuscular patterning through the process of building strength, alignment, and awareness in essential musculature needed for foundational work in ballet and modern.
Prerequisites: Basic knowledge of dance techniques in ballet or modern.
3 points

DNCE BC 2555x Ensemble Dance Repertory (Modern Dance)
Study and performance of choreography using three approaches: learning excerpts from the repertoire of selected choreographers, analyzing through reconstruction of classic repertory works, and understanding the choreographic process by working in a creation from initial concept to finished dance.
Prerequisites: Intermediate level technique and permission of instructor. General Education Requirement: The Visual and Performing Arts (ART).
3 points

DNCE BC 2555y Ensemble Dance Repertory (Ballet)
Study and performance of choreography using three approaches: learning excerpts from the repertoire of selected choreographers, analyzing through reconstruction of classic repertory works, and understanding the choreographic process by working in a creation from initial concept to finished dance.
Prerequisites: Intermediate level technique and permission of instructor.
3 points

DNCE BC 2557x Evolution of Spanish Dance Style
Study of Spanish dance and music from late-17th century to the present. Dance and music styles including castaret technique. Through historical documents, students will experience the cultural history of Spain.
- G. Marina
**Prerequisites:** Research paper and presentation required, BC3250 or permission of instructor. General Education Requirement: The Visual and Performing Arts (ART).

<table>

**DNCE BC 2562x Movement Analysis**

Introduction to the theories and methods of movement analysis, focusing on its application to dance performance and research. Through lectures, readings, integrative movement exercises, and observation labs, students will learn to analyze and describe the qualitative aspects of human movement; to notate movement in motif writing; and to refine their ability to move efficiently and expressively. - P. Scoller

Prerequisites: An intermediate or advanced dance technique course or permission of instructor. Limited to 10.

<table>

DNCE BC 2567y Music for Dance

Study of musicianship and musical literacy in relation to dance. Using computer software, drumming studies, score and audio-visual analyses, students will learn to identify the compositional elements of dance music with a multi-cultural emphasis. Presentation of individual and collective research in written and performance format.

- G. Obermay

General Education Requirement: The Visual and Performing Arts (ART).

DNCE BC 2572x Dance in New York City

Study of the cultural roots and historical contexts of specific communities using New York City's dance scene as a laboratory. Students observe the social environments in which various modes of dance works are created while researching the history of dance in New York City. Course includes attendance at weekly events, lecture-demonstrations, and performances.

- K. Gisiner, L. Garafola, L. Gennaro, P. Scoleri,

DNCE BC 2572x or y Choreography for the American Musical

Explores the history and evolution of American Musical Theater dance, a uniquely American art form, with special focus on the period known as "The Golden Era." Analysis of the genre's most influential choreographers (including Balanchine, de Mille, Robbins), their systems, methodologies and fusion of high and low art on the commercial stages.

DNCE BC 2580y Tap as an American Art Form

Studio/lecture format focuses on tap technique, repertory, improvisation, and the development of tap explored through American history, jazz music, films, videos, and biographies. - M. Morrison

Prerequisites: DNCE BC1446 or equivalent experience. General Education Requirement: The Visual and Performing Arts (ART).

3 points

DNCE BC 3000y From the Page to the Dance Stage

The study of dance works which have their origins in the written word. Topics considered include: Is choreography a complete act of creative originality? Which literary genres are most often transformed into dance pieces? Why are some texts privileged with dance interpretation(s) and others are not?

General Education Requirement: The Visual and Performing Arts (ART).

DNCE BC 3009x and y Independent Study

1-4 points.

DNCE BC 3200x or y Dance in Film

Survey of theatrical dance in the 20th century specific to film production. Five kinds of dance films will be examined: musicals, non-musicals, documentaries, film essays and pure dance recording.

3 points

DNCE BC 3565y Group Forms: Advanced Dance Composition

Advanced study in dance composition to include the creation of a trio, quartet, and quintet. Issues of structure and modes of expression will be addressed as they relate to choreographic form. Techniques employed by contemporary choreographers will be explored. Students will be encouraged to participate in music, architectural, and visual arts collaborations.

- C. Thomas

Prerequisites: Two semesters of dance composition or permission of instructor.

DNCE BC 3567x or y Dance in Asia

Focus on the major dance genres and personalities in East Asia-China, Korea, and Japan-from two aspects: (1) continuity of traditional forms, with emphasis on the social, economic, and historical factors in their development; and (2) changes that have occurred from within and from outside the traditions. - U. Coorlawa

General Education Requirement: The Visual and Performing Arts (ART).

DNCE BC 3570x or y Latin American and Caribbean Dance: Identities in Motion

Examines the history and choreographic features of Latin American and Caribbean dance forms. Dances are analyzed in order to uncover the ways in which dancing shapes national, racial, and gender identities. Focuses on the globalization of these dances in New York City.

3 points
DNCE BC 3571y Solo Repertory: Performance Styles

Study of solo excerpts from classical and modern repertory and the presentation of individual research in both written and performance format. Emphasis on the role that the dancer must play to facilitate the realization of the choreographer's concept.

Prerequisites: Intermediate level technique and permission of instructor.

3 points

DNCE BC 3572y Dance Production

The rigorous study of the visual elements of dance design through aesthetic and critical evaluation of lighting, costume, and scenicographic techniques as they relate to specific dance repertory works.

3 points

DNCE BC 3574x Seminar on Contemporary Choreographers and Their Works

Explores modern/contemporary dance in the United States and Europe since the 1960's. Major units are devoted to the Judson Dance Theater and its postmodernist aftermath, Tanztheater and European dance revisionism, and African-American dance and the articulation of an aesthetic of cultural hybridity. Sources include assigned readings, film/video and interviews with guest artists. Students attend live performances, write short analytical papers, and present a final research project.

- L. Garafola

3 points

DNCE BC 3575x or y George Balanchine and the Reinvention of Modern Ballet

Examines the life and major works of Balanchine, founder of the New York City Ballet, tracing his development as an artist, his landmark collaborations with Stravinsky, his role in defining modern ballet style, and his reinvention of the modern ballerina. - L. Garafola

3 points

DNCE BC 3576x Dance Criticism

Intensive practice in writing about dance. Readings drawn from 19th- and 20th-century criticism. Observation includes weekly performances and classroom videotape sessions.

3 points

DNCE BC 3577y Performing the Political: Embodying Change in American Performance

Examines ways in which political and social ideologies are embedded in American performance of the last 75 years. Topics include venues designed to support traditional values, as well as to propagandize, such as pageantry, worker's theatre and dance, and performance art. Reading and viewing assignments.

3 points

DNCE BC 3578x Traditions of African-American Dance

Traces the development of African-American dance, emphasizing the contribution of black artists and the influence of black traditions on American theatrical dance. Major themes include the emergence of African-American concert dance, the transfer of vernacular forms to the concert stage, and issues of appropriation, cultural self-identification, and artistic hybridity. - Lynn Garafola

3 points
DNCE BC 3590x and y Rehearsal and Performance in Dance

Students are graded and take part in the full production of a dance as performers, choreographers, designers, or stage technicians. - V. Artists

Prerequisites: Audition. Subject to cap on studio credit. Can be taken more than once for credit up to a maximum of 3 credits a semester.

1-3 points.

Courses for Instruction

DNC 3583y Gender and Historical Memory in American Dance of the 1930's to the Early 1960's

Seminar poses the question of why so many women dancer/choreographers of the 1930's - to the early 1960's, including relatively well-known ones, have ended up as peripheral rather than central players in what has become the master narrative of a crucial era of the recent dance past. - L. Garafola
Prerequisites: One course in dance history/studies or permission of the instructor.
General Education Requirement: The Visual and Performing Arts (ART).

Modern

Level I courses, except Dance Styles courses, receive a P/D/F grade and have no prerequisite. All others will receive a letter grade and require a placement audition (at the first meeting) or permission of the instructor. All courses listed below may be taken to fulfill the physical education requirement. One-point dance technique courses taken by non-dance majors for credit over and above the physical education requirement are included in the existing maximum of 18 points of studio, performing art, or professional school courses which may be credited toward the degree; a maximum of six courses in dance technique can be credited. A student may receive academic credit for a dance technique class only if she has completed or is concurrently completing the Physical Education requirement.

All technique courses require permission of the Instructor.

The study of contemporary dance based on the work of 20th-century innovators, including Cunningham, Graham, Limón, Taylor and release. Aesthetic principles of modern dance will be taught with increased technical demands required at each successive level.

DNC 1330x-BC1331y Modern, I: Beginning Modern Dance

### DNCE BC 3338x and y Contact Improvisation

An examination of the gender-neutral partnering technique that is now common in contemporary dance. Focus is placed on recent improvisatory forms, sensation building, center connection and risk. Emphasis is placed on listening and sensing rather than controlling or leading.

**Prerequisites:** Limited to twenty people.

1 point

### DNCE BC 3339x and y Advanced Contact Improvisation

Examination of this gender-neutral partnering technique further exploring compositional forms as they arise from the practice. Students will also investigate a variety of set repertoire dance texts that have originated from contact improvised material.

**Prerequisites:** DNCE BC3338 Contact Improvisation. Sophomore standing or permission of instructor required.

1 point

**Dance Styles**

Level I courses, except Dance Styles courses, receive a P/D/F grade and have no prerequisite. All others will receive a letter grade and require a placement audition (at the first meeting) or permission of the instructor. All courses listed below may be taken to fulfill the physical education requirement. One-point dance technique courses taken by non-dance majors for credit over and above the physical education requirement are included in the existing maximum of 18 points of studio, performing art, or professional school courses which may be credited toward the degree; a maximum of six courses in dance technique can be credited. A student may receive academic credit for a dance technique class only if she has completed or is concurrently
completing the Physical Education requirement.

All technique courses require permission of the instructor.

The study of indigenous dance forms including African character, classical Spanish, jazz, musical theatre, and tap. All styles courses require permission of the instructor.

Ballet

Level I courses, except Dance Styles courses, receive a P/D/F grade and have no prerequisite. All others will receive a letter grade and require a placement audition (at the first meeting) or permission of the instructor. All courses listed below may be taken to fulfill the physical education requirement. One-point dance technique courses taken by non-dance majors for credit over and above the physical education requirement are included in the existing maximum of 18 points of studio, performing art, or professional school courses which may be credited toward the degree; a maximum of six courses in dance technique can be credited. A student may receive academic credit for a dance technique class only if she has completed or is concurrently completing the Physical Education requirement.

All technique courses require permission of the instructor.

Technique of classical ballet emphasizing proper alignment and graduated study of its vocabulary. Artistry of articulation, phrasing, dynamics, and nuance in the spectrum of classical materials will be addressed at each level.

Barnard Catalogue 2008-2009
Economics
4A Lehman Hall
854-3454
www.econ.barnard.columbia.edu

Professors: Marcellus Andrews (term), Andre; Burgstaller, Perry Mehring, David Weiman (Alena Wels Hirschorn '58 Professor)
Associate Professors: Rajiv Sethi, Alan Dye (Chair), Sharon Harrison, Lalith Munasinghe
Assistant Professors: Mariana Colacelli, Kristin Mammen, Sonia Pereira (Adjunct), Randall Reback, Sanjay Reddy

Other officers of the University offering courses listed below:
Professors: Alessandra Casella, Yeon-Koo, Pierre-Andre Chiappori, Padma Desai, Prajit Dutta, Ronald Findlay, Michael Woodford
Associate Professor: Mitali Das, Lena Edlund
Assistant Professors: Stephanie Albanesi, Wojciech Kopczuk, Till von Wachter
Adjunct Professors: Carl Riskin
Lecturers: Susan Elmes, Sunil Gulati

For a complete list of faculty on leave see: http://www.barnard.edu/provost/facleavelist.html

The Department of Economics offers a broad course of study in economic theory and applied economics. The study of economics is an important foundation for a student’s general understanding of modern history and society. Barnard’s major programs in economics also prepare students for graduate work in economics, business, law, public administration, and international relations, as well as for careers in business, finance, and government. The aims of the programs are: (i) to foster a critical understanding of economics and its relation to other disciplines; and (ii) to develop students’ mastery of modern economic theory and its tools of analysis.

Barnard will allow 3 points credit with a score of 4 or 5 on the AP exam in Macroeconomics. Barnard will also allow 3 points credit with a score of 4 or 5 on the AP exam in Microeconomics only if the student passes the Economics Department placement exam. A student who chooses credit for AP Macro and AP Micro cannot receive Barnard credit for ECON BC 1003 or ECON W 1105 (only one AP exam, either macro or micro, can be credited if a student wants also to receive credit for ECON BC 1003 or W 1105). For Statistics, Barnard will allow 3 points credit with a score of 5 on the Statistics AP exam. Economics track majors, however, will not be exempt from the statistics requirement ECON BC 2411 or the equivalent, even if they receive 3 points AP credit for Statistics.

Printable Version

Economics
4A Lehman Hall
854-3454
www.econ.barnard.columbia.edu

REQUIREMENTS FOR THE MAJOR

There are two tracks for the major in Economics equal in rigor, but different in scope and focus. The track in Economics teaches students the theory and the analytical and mathematical tools now expected of entering graduate students in economics and useful for graduate study in related fields such as business. The track in Political Economy emphasizes the roots of modern economics in the history of economic thought and the interconnections between social forces, political institutions, and economic power. This track constitutes an excellent preparation for a variety of professional schools and careers.

Prospective majors should discuss their programs with any member of the department no later than the second semester of their sophomore year. At the time of declaring the major, the student meets with the department chair and chooses a major adviser, who will advise her as to choice of program and courses. Students planning to major in Economics or Political Economy should complete both intermediate macro- and microeconomic theory by the beginning of their junior year.

Students who wish to complete a double or joint major that includes Economics should consult the chair of the department as early in their planning as possible.

All majors must file the "Major Requirements Declaration" form available from the department office-no later than
at registration for the second semester of their senior year.

**Economics**

The Economics track major requires two semesters of calculus (or one semester of ECON BC 1007 Mathematical Methods for Economics) and nine courses in economics, including:

- ECON BC 2411   *Statistics for Economics* (or STAT W 1111 or STAT W 1211
  *Introduction to Statistics*)
- ECON BC 3018   *Econometrics*
- ECON BC 3033   *Intermediate Macroeconomic Theory*
- ECON BC 3035   *Intermediate Microeconomic Theory*
- ECON BC 3041   *Theoretical Foundations of Political Economy*

Two electives with intermediate micro- or macroeconomic theory as a prerequisite; and either ECON BC 3061-62 *Senior Thesis*, or ECON BC 3063 *Senior Seminar* and an additional upper-level elective in economics with intermediate micro- or macroeconomic theory as a prerequisite.

**Political Economy**

The Political Economy track major requires 11 courses, including:

- ECON BC 3033   *Intermediate Macroeconomic Theory*
- ECON BC 3035   *Intermediate Microeconomic Theory*
- ECON BC 3041   *Theoretical Foundations of Political Economy*

Three electives in economics, two of which have intermediate micro- or macroeconomic theory as a prerequisite; two electives in economics (excluding introductory economics) or a related discipline; one upper-level course in political science; and either ECON BC 3061-62 *Senior Thesis*, or ECON BC 3063 *Senior Seminar* and an additional upper-level elective in Economics with intermediate micro- or macroeconomic theory as a prerequisite.

*The following political science courses are not considered upper level:

- BC 1001   *Dynamics of American Politics*
- V 1501   *Introduction to Comparative Politics*
- V 1501   *International Politics*
- BC 1013   *Political Theory*

We recommend that all Political Economy track majors—especially those who plan to go on to business school or to graduate school in public administration or international relations—take one semester of college-credit math (either pre-calculus or calculus or ECON BC 1007) and Economics BC 2411. Political Economy track majors who plan to go on to graduate school Ph.D. programs in economics should take two years of mathematics, including one year of calculus or ECON BC 1007, and statistics and econometrics.

**Mathematics Training for the Major**

The department expects all majors to have a working knowledge of arithmetic, high school algebra, and the fundamentals of analytic geometry.

Economics track majors may take ECON BC 1007 Mathematical Methods for Economics to satisfy the calculus requirement. If majors take calculus to satisfy the major requirement, two semesters of calculus are required although only one semester need be taken if the student has received advanced placement credit or has placed out of Calculus 1. The recommended calculus sequence is MATH V1101, Calculus I followed by MATH V1201, Calculus II. (Students who have not previously studied calculus should begin with Calculus I. Students with 3 or higher on the Calculus AB or BC advanced placement test may start with MATH V1102 Calculus II. Students with 5 on the Calculus BC test may start with Calculus III.)

**REQUIREMENTS FOR THE MINOR**

The minor in economics requires five courses, including an introductory course in economics, BC 3033 or BC 3035, and three electives, one of which has an intermediate micro- or macroeconomic theory course as a prerequisite.

Course Description Contains The Keyword(s)

Introductory Courses

The principles of economics and statistics, may be taken without previous study of economics or statistics.

ECON BC 1003x and y Introduction to Economic Reasoning

Covers basic elements of microeconomic and macroeconomic reasoning at an introductory level. Topics include Individual Constraints and Preferences, Production by Firms, Market Transactions, Competition, The Distribution of Income, Technological Progress and Growth, Unemployment and Inflation, the Role of Government in the Economy.

This one-semester introductory course replaces the traditional two-semester introductory courses previously offered, ECON BC1001 Introduction to Macroeconomics and ECON BC1002 Introduction to Microeconomics. Note: Students cannot get credit for ECON BC1003 if they have taken either ECON BC1001 or ECON BC1002 or the Columbia introductory course ECON W1105.

- D. Weiman, M. Andrews

General Education Requirement: Social Analysis (SOC).

ECON BC 1007x and y Mathematical Methods for Economics

Covers basic mathematical methods required for intermediate theory courses and upper level electives in economics. Topics
include sets and functions, matrix algebra, equilibrium analysis, comparative statics, constrained optimization, and linear programming. This course satisfies the Calculus requirement for the Economics track of the Economics major.

- S. Harrison

**General Education Requirement: Quantitative and Deductive Reasoning (QUA).**

ECON BC 3018y Econometrics

Specification, estimation and evaluation of economic relationships using economic theory, data, and statistical inference; testable implications of economic theories; econometric analysis of topics such as consumption, investment, wages and unemployment, and financial markets.

- R. Reback
Prerequisites: ECON BC3033 or ECON BC3035, and ECON BC2411 or STAT W1111 or STAT W1211, or permission of the instructor.
3 points

Core Theory Courses

The courses listed below, required of Political Economy and/or Economics track majors, constitute the core of the Barnard Economics major.

ECON BC 3033x and y Intermediate Macroeconomic Theory

Systematic exposition of current macroeconomic theories of unemployment, inflation, and international financial adjustments.

- M. Colacelli
Prerequisites: An introductory course in economics and a functioning knowledge of high school algebra and analytical geometry or permission of the instructor.
4 points

ECON BC 3035x and y Intermediate Microeconomic Theory

Preferences and demand; production, cost, and supply; behavior of markets in partial equilibrium; resource allocation in general equilibrium; pricing of goods and services under alternative market structures; implications of individual decision-making for labor supply; income distribution, welfare, and public policy. Emphasis on problem solving.
Prerequisites: An introductory course in microeconomics (ECON BC1002, ECON BC1003, ECON W1105, or the equivalent) and one semester of calculus or ECON BC1007, or permission of the instructor.
4 points

ECON BC 3041x and y Theoretical Foundations of Political Economy

Intellectual origins of the main schools of thought in political economy. Study of the founding texts in classical political economy, Marxist economics, neoclassicism, and Keynesianism.

- D. Weiman, A. Burgstaller
Prerequisites: An introductory course in economics or permission of the instructor. General Education Requirement: Reason and Value (REA).
3 points
Upper-Level Elective Courses

The following economics elective courses have either ECON BC3033, ECON BC3035, or both as prerequisites.

ECON BC 3011x Inequality and Poverty

Conceptualization and measurement of inequality and poverty, poverty traps and distributional dynamics, economics and politics of public policies, in both poor and rich countries.

- S. Reddy
Prerequisites: ECON BC3035 or ECON BC3033, or permission of the instructor. Not offered in 2008-2009.
3 points

ECON BC 3012y Economics of Education

Analyzes education policies and education markets from an economic perspective. Examines challenges that arise when researchers attempt to identify the causal effects of inputs. Other topics: (1) education as an investment, (2) public school finance, (3) teacher labor markets, (4) testing/accountability programs, (5) school choice programs, and (6) urban public school reforms.

- R. Reback
Prerequisites: ECON BC3035 and ECON BC2411 or permission of the instructor. Not offered in 2008-2009.
3 points

ECON BC 3013y Economic History of the United States

Economic transformation of the United States from a small, open agrarian society in the late colonial era to the leading industrial economy of the 20th century. Emphasis is given to the quantitative, institutional, and spatial dimensions of economic growth, and the relationship between the changing structures of the economy and state.

- D. Weiman
Prerequisites: ECON BC3035 or ECON BC3033, or permission of the instructor. General Education Requirement: Historical Studies (HIS).
3 points

ECON BC 3014y Entrepreneurship

Examines theoretical, empirical, and normative studies of entrepreneurial behavior and its significance. Examines their relationships with risk-taking and innovation. Explores entrepreneurship as applicable to a variety of behaviors, activities or contexts, including large organizations, small business networks, new venture creation, comparative financial institutions that support entrepreneurial environments, and entrepreneurship's contributions to a dynamic economy.

- A. Dye
Prerequisites: ECON BC3035, or ECON BC3033, or equivalent, or permission of the instructor. Not offered in 2008-2009.
3 points

ECON BC 3017y Economics of Business Organization

Economics of firm organization and the evolution of the modern business enterprise. The function of organizations in coordinating the use of economic resources. The role of technology, labor, management, and markets in the formation of the business enterprise. Includes international comparisons and attention to alternative economic theories on the role of business organizations on national competitive advantage.

- A. Dye
Prerequisites: ECON BC3035 or permission of the instructor.
3 points
### ECON BC 3019x Labor Economics

Factors affecting the allocation and remuneration of labor; population structure; unionization and monopsony; education and training, mobility and information; sex and race discrimination; unemployment; and public policy.

- L. Munasinghe

Prerequisites: ECON BC3035, or permission of the instructor.

ECON BC 3039y Environmental and Natural Resource Economics

Link between economic behavior and environmental quality: valuation of non-market benefits of pollution abatement; emissions standards; taxes; and transferable discharge permits. Specific problems of hazardous waste; the distribution of hazardous pollutants across different sub-groups of the U.S. population; the exploitation of commonly owned natural resources; and the links between the environment, income distribution, and economic development.

- S. Pereira
3 points

ECON BC 3045x Business Cycles

Theories and policy implications of business cycles. IS/LM, AS/AD and the Phillips Curve; dynamic general equilibrium models based on microfoundations including the Real Business Cycle model; New Keynesian models; models of the political business cycle. Particular episodes in the macroeconomic history of the US will provide case studies in which to study these models and the application of policies within.

- S. Harrison
Prerequisites: ECON BC3033.

This program is supervised by the Committee on Economic History:
Economics: Alan Dye (Program Adviser), David Weiman
History: Deborah Valenze, Carl Wennerlind

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facileavelist.html

The Economic History Program is an interdisciplinary program combining history and economics. It seeks to develop a knowledge of the human experience through the record of the past and an understanding of the historical process from an economic perspective. The program combines the discipline of investigation and interpretation of the past with the study of the tools of economic analysis and quantitative skills and their use in historical investigation. Majors in this program will have a broad academic exposure that will prepare them to enter graduate programs in law, business, public policy, or administration, as well as economics and history.

REQUIREMENTS FOR THE MAJOR
A major in Economic History must complete the following 11 courses or their equivalents:

ECON BC 2014   Topics in Economic History
ECON BC 3013   Economic History of the United States
ECON BC 3041   Theoretical Foundations of Political Economy

Two of the following:
ECON BC 3033   Intermediate Macroeconomic Theory
ECON BC 3035   Intermediate Microeconomic Theory
ECON BC 2411   Statistics for Economics

Four history courses (three within a single concentration) selected in consultation with the major adviser.

ECHS BC 3066x-3067y Two semesters of Senior Research Seminar in Economic History is to be supervised by a faculty member approved by the program adviser.

No minor is offered in Economic History.

The Economics and Mathematics major provides the student with a grounding in economic theory comparable to
that provided by the general economics major and exposes the student to rigorous and extensive training in
mathematics. The program will be particularly useful for students planning to do graduate work in economics,
which frequently demands greater mathematical training than that acquired through the minimum requirements of
the basic economics degree.

REQUIREMENTS FOR THE MAJOR
A major in Economics and Mathematics must complete the following 14 courses or their equivalents:

Economics: (7 courses)

ECON BC 3018    Economometrics
ECON BC 3033    Intermediate Macroeconomic Theory
ECON BC 3035    Intermediate Microeconomic Theory
ECON BC 3041    Theoretical Foundations of Political Economy
ECON BC 3062    Senior Thesis (two semesters of the Senior Thesis are optional) or a
                Senior Seminar in Economics or Mathematics (ECON BC
                3063, MATH V 3951, MATH V 3952 or an equivalent approved by the
                Chairs of the Mathematics and Economics majors)

Two economics electives with an intermediate micro- or macroeconomic theory course as prerequisite.

Mathematics: (7 courses)

MATH V 1102, 1201  Calculus II, III
MATH V 2010        Linear Algebra
MATH V 2500        Analysis and Optimization or
MATH W 4061        Introduction to Modern Analysis
SIEO W 3500        Introduction to Probability and Statistics

Two electives at or above the 2000 level, one of which can be MATH V 3951 or MATH V 3952, the
undergraduate seminar in mathematics. MATH E 1210 is also an approved elective.

Students must obtain approval from each department representative before selecting electives. In exceptional
cases, these may be from related fields; other courses can be taken with prior approval.

The mission of the Barnard College Education Program is to prepare students to become skilled and reflective teachers who can effectively respond to the learning needs of diverse learners, and create supportive and intellectually stimulating classroom communities. We are committed to strengthening public education and addressing issues of equity and social justice, particularly in urban schools. The Program serves all undergraduates of Barnard College and Columbia University, (Columbia College, General Studies and Fu School of Engineering), who are interested in becoming certified teachers, working with young people in human service agencies, or preparing for careers related to education.

Students combine their liberal arts major with coursework in psychology, educational foundations (History, Economics, Philosophy, and Sociology of Education; Contemporary Issues in Education), pedagogy (Methods of Teaching; Seminar in the Teaching-Learning Process), and field-based experience in urban classrooms (Practicum; Student Teaching). During senior year, students are placed with experienced teachers in New York City public schools for a semester of full-time student teaching.

The Education Program is accredited by the Regents and registered by the New York State Education Department to recommend students who complete the program for Initial Certification in either Childhood Education (Grades 1-6) or Adolescence Education (Grades 7-12). Graduates of the program are also eligible for membership in the Interstate Certification Agreement, a reciprocal certification among forty-one states. We provide ongoing support to those who teach in the New York City area through our New Teacher Network.

To apply, download an information packet from our website or pick one up in 336 Milbank. Students may apply for admission any time during the sophomore year but no later than the first Monday in October of the junior year. Those who plan to study abroad during junior year should apply and take the Methods and Practicum courses by the end of sophomore year. Admission criteria include good academic standing; evidence of commitment to the field of education; interest in issues of social justice as they affect education, particularly in urban schools; and capacity for growth as an intellectually resourceful and reflective teacher. Enrollment is limited.

</tbody>
</table>

**Educational Foundations:** One course chosen from among the foundations courses listed under the Childhood Education Program.

**Psychology:** One course (in addition to PSYC BC 1001x,y Introduction to Psychology) chosen from among the psychology courses listed under the Childhood Education Program.

Students seeking certification in Adolescence Education must also complete 36 credits in the content area for which they seek certification.

**English:** A total of 36 credit hours of English

**Foreign Languages:** A total of 36 credit hours in French, German, Greek, Italian, Latin, Russian, or Spanish

**Mathematics:** A total of 36 credit hours of Mathematics
Science: A total of 36 credit hours in sciences including a minimum of 18 credits of collegiate-level study in the science or each of the sciences for which certification is sought: Biology, Chemistry, Physics, or Earth Science

Social Studies: A total of 36 credit hours, including 6 credits of American History; 6 credits of European or World History; 3 credits of non-Western study; and any other distribution to make 36 credits, chosen from credits in History, Political Science, Anthropology, Sociology, and Economics.

CERTIFICATION REQUIREMENTS

Certification is based on demonstrated quality in fieldwork and academic coursework, requisite hours of practice in the field, completing sessions on state-mandated topics, fingerprinting, and passing three New York State Teacher Certification Exams (NYSTCE). Students fulfill 100 hours of pre-student teaching fieldwork experience (60 hours in practicum plus 40 hours of independent fieldwork), and complete 200 hours of student teaching (100 hours of teaching plus 100 hours of observation at two grade levels within the certification age range). Students are required to complete sessions in Identifying and Reporting Child Abuse, Prevention of School Violence, Drug and Alcohol Abuse Prevention, and Inclusion of Students with Special Needs. Graduates of the Education Program have a 100 percent pass rate on the NYSTCE.

REQUIREMENTS FOR THE EDUCATION MINOR

The minor requires a minimum of six courses: EDUC BC 3063x, y, EDUC BC 3064x, y, the methods and practicum courses, and two others from the foundations and psychology courses listed above. The last two courses cannot be counted towards the major.

Urban Studies Specialization in Education

EDUC BC 2032x Contemporary Issues in Education
PSYC BC 2134x Educational Psychology OR
PSYC BC 3382y Adolescent Psychology
ECON BC 3012x Economics of Education
EDUC BC 2052y Seminar in Elementary Multicultural Pedagogy OR
EDUC BC 2062y Seminar in Secondary Multicultural Pedagogy
EDUC BC 2055x, y Urban School Practicum

Note: Urban Studies majors who wish to pursue certification to teach may also take EDUC BC 3063 Student Teaching and EDUC 3064 Seminar in the Teaching-Learning Process. Please speak with an Education Program faculty member for further details. We encourage you to plan ahead carefully if you wish to pursue this option.

Courses of Instruction

EDUC BC 2032y Contemporary Issues in Education
Study of critical issues confronting education today and their relation to contemporary society. Topics include equity in learning experiences for bilingual, culturally diverse, gifted, and disabled students—girls and boys. The impact of technology, school choice, and standards will be addressed. Fieldwork required.

- M. Rivera
Prerequisites: Enrollment limited to 25 students. Permission of instructor. General Education Requirement: Social Analysis (SOC).

EDUC BC 2052y Seminar in Multicultural Elementary Pedagogy
Provides prospective teachers with theory and methods for teaching elementary school subjects (grades 1-6) to meet intellectual, social and emotional needs of diverse learners. Topics include foundations of multicultural, student-centered and critical pedagogies, all aspects of literacy, utilizing literacy across content areas, constructivist mathematics instruction, authentic assessment, diversity and inclusion.

- J. Broderick
Prerequisites: This course meets the requirement for Foundations of Education, and is a pre-requisite for student teaching. Open to Education Program applicants; others only with permission of instructor. Corequisites: This course should be taken in the spring term of the junior year with corequisite EDUC BC2055, Elementary Urban School Practicum.

EDUC BC 2055y Urban School Practicum

Consists of weekly class meetings combined with elementary, middle or high school classroom internship (depending on desired certification level). Students observe and apply theoretical principles of pedagogy to teaching and learning. Class meetings provide opportunities to reflect on internship and focus on instructional strategies and classroom management techniques.

- Section 1: J. Broderick; Section 2: M. Rivera
Corequisites: Section 1, Elementary, EDUC BC2052 or Section 2, Secondary, EDUC BC2062. Meets for two hours per week, plus a minimum of six hours per week in the field.

EDUC BC 2062y Seminar in Multicultural Secondary Pedagogy

Prospective teachers explore methods for teaching English, social studies, the sciences (biology, physics, earth science and chemistry), mathematics, ancient and foreign languages (Grades 7-12). Topics include multicultural, critical pedagogical methods appropriate to specific content areas, content area standards and literacy, diversity, inclusion, and assessment.

- M. Rivera

Prerequisites: This course is a prerequisite for student teaching in secondary schools; grade of B or better required to continue. Corequisites: This course should be taken in the spring term of the junior year with corequisite EDUC BC2055. Open to Education Program applicants; others only with permission of instructor.

EDUC BC 3063x and y Student Teaching in Urban Schools

Supervised student teaching in elementary or secondary schools includes creating lesson plans, involving students in active learning, using cooperative methods, developmentally appropriate assessment, and meeting the needs of diverse learners in urban schools. Teaching skills developed through weekly individual and/or group supervision meetings (to be scheduled at the beginning of the semester), conferences, and portfolio design. Requires 100 hours of teaching at two different grade levels, full-time for one semester.

- L. Bell, M. Rivera Mauucci, L. Edstrom

Prerequisites: Completion of EDUC BC2052 or BC2062 and BC2055. Corequisites: EDUC BC3064. Enrollment limited.

DEPARTMENTAL INFORMATION

Professors: James Basker (Richard Gilder Professor of Literary History), Christopher Baswell (Ann Whitney Olin Professor), Mary Gordon (Millicent C. McIntosh Professor in English and Writing), Lisa Gordis, Achsah Guillory, Kim Hall (Lucyle Hock Professor of English), Maire Jaanus, Peter Platt (Chair), Anne Lake Prescott (Helen Goodhart Aitschul Professor), William Sharpe, Maura Spiegel (Term)

Associate Professors: John Beller (Visiting), Aaron Hamburger (Visiting), Ross Hamilton (Director of Film Concentration), Saskia Hamilton (Director of Women Poets at Barnard), Jennie Kassanoff, Julia Leigh (Visiting), Ellen McLaughlin (Visiting), Sigrid Nunez (Visiting), Richard Panek (Visiting), Cathleen Schine (Visiting)

Assistant Professors: Bashir Abu-Manneh, Catherine Barnett (Visiting), Elizabeth Benedict (Visiting), Myla Goldberg (Visiting), Julia Jordon (Visiting), Monica Miller, Eliza Minot (Visiting), Sean Singer (Visiting)

Senior Lecturers: Pamela Cobin (Director, Writing Program), Patricia Denison (Acting Chair, Theatre Department), Peggy Ellsberg, Cary Plotkin, Tima Szew (Director of Creative Writing), Margaret Vandenburg (Director of First-Year English)

Lecturers: Constance Brown, Mary Cregan, John Pagano, Tori Ratekin, James Runsdorf, Elizabeth Schmidt, Aaron Schneider, Marya Steinkoler

Senior Associates: Quandra Prettymean

Associates: Shelly Fredman, Mary Helen Kolinsky

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facnoleavelist.html

The offering in English is designed to foster good writing, effective speaking, and heightened understanding of culturally significant texts. Students majoring in English are encouraged to develop their responsiveness to the literary imagination and their sensitivity to literary form through disciplined attention to language and to critical and scholarly methods.

For all students, including transfers, "a minimum of six semester courses must be completed while the student is in residence at Barnard". Non-majors may satisfy the distribution requirement in the Humanities (Part A) and in Culture and Societies (Part B) by electing appropriate courses listed under Language and Literature.

REQUIREMENTS FOR THE MAJOR

A major program consists of at least ten courses:

1. Majors should complete the following requirements by the end of the junior year:

   a) English BC 3193x or 3193y. Literary Criticism and Theory: an introduction to the methods of literary analysis. A prospective major should, if possible, elect this course in her sophomore year.

   b) English BC 3159x-3160y. The English Junior Colloquium: an introduction to some major texts and ideas of the Middle Ages, the Renaissance and the Enlightenment. Sophomores may be admitted, but are advised to wait if possible. Students planning to go abroad for their junior year should see their advisers about substitutions for this requirement.

   Students may substitute 3 courses for the 2 semesters for Junior Colloquium from among the following: Only one of the three Shakespeare courses: ENGL 3163 or 3164 or ENTH 3136y
ENGL 3154 - 3158, 3165-3169
ENGL 3173y, and 3174 (or W4301), and 3179x
At least one of these 3 courses must cover material before 1600 (i.e., Medieval or Renaissance); at least
one, material of the 17th or 18th century. One of these courses will also count towards satisfying the
"before 1900" requirement. Students may also take 1 colloquium and 2 substitutions. For suggestions of
specific courses, please see the English Department website.

2. In addition, a major will elect five courses so distributed as to extend her knowledge of English and American
literature:
   a) At least two of these must be in literature before 1900:
      ENTH 3136, 3137
      ENGL 3141x
      ENGL 3154 (Chaucer) through ENGL BC 3180 (American Literature 1800-1870)
   b) Of the three remaining elective courses, two may be in writing (3105-3120), film (ENGL 3119-3201),
      speech (ENGL 3121), theatre (ENTH 3136-3140), or seminars on special themes (3140, ENTH 3144).
   c) As a senior an English major will complete advanced work in two seminars (BC 3997, 3998). Seniors
      concentrating in Theatre or Writing will normally substitute the Special Project in Theatre or Writing (BC
      3996) for one of the required seminars. Under special circumstances qualified senior majors may request
      permission to substitute Independent Study for one of the seminars (see BC 3999, below).

REQUIREMENTS FOR THE MINOR

A minor consists of at least five English courses: one from either Chaucer (BC 3154 or BC 3155), Shakespeare
(ENTH 3136, ENGL BC 3163, or BC 3164), or Milton (BC 3167); two additional courses in literature before 1900
(See above 2a); and two electives (See above 2b).

CONCENTRATIONS IN THE MAJOR

All concentrations in the major except that in American Literature require 11 courses.

American Literature

Students interested in an American Literature concentration should consult with Professor Gordis (408d Barnard).
In addition to ENGL BC 3158, 3160 (or appropriate substitutes), and 3193, an American concentration consists of
either 3179 or 3180, either 3181 or 3183, one other American literature course, and one senior seminar with a
focus on American literature. (The Department requires two senior seminars for the major.)

Film

Students interested in a film concentration should consult Professor Ross Hamilton (419 Barnard). A film
concentration consists of four courses:

1) Introduction to Film and Film Theory (FILM 3201x or Columbia's W3001)
2) A writing course, either Screenwriting (FILM 3119), Advanced Screenwriting (FILM 3120) or Film
   Criticism
3) A Film/Literature Senior Seminar (3997/3998)
4) The final course, which requires approval, is a film and literature class from among specific offerings at
   Barnard or Columbia.

These four courses will count in place of two electives and one Senior Seminar in the regular English major.

Theatre

Students interested in a Theatre concentration should consult Professor Denison (Room 412 Barnard). A Theatre
concentration consists of four courses: three courses, either two Theatre History (THR 3150, 3151) and one
dramatic literature seminar or one theatre history and two dramatic literature seminars and a fourth course,
Special Project in Theatre (ENG BC 3996) in combination with a dramatic literature course. These four courses
will count in place of two electives and one Senior Seminar in the regular English major. An eleventh course
should be in dramatic literature in English, offered by the English Department or the Theatre Department (selected
in consultation with the director of the Theatre concentration).

Writing

Open to a limited number of majors. Students enter the writing concentration by application only. Interested
students must submit a portfolio of their work to the director of Creative Writing during the second semester of
their junior year, no later than the program filing deadline. A writing concentration consists of at least four courses:
two writing courses, of which one will be introductory (BC 3105-3113 and 3120: Creative Non-fiction) and one advanced (BC 3114-3118); a Senior project written either in a third writing course combined with a Special Project in Writing (BC 3996) or in an Independent Study (BC 3999); and a fourth course, either literature (in English or another language), or creative writing. Consult the Director of Creative Writing, Professor Szell (423 Barnard), for applicability of Columbia courses. These four courses will count in place of two electives and one Senior Seminar in the regular English major. (N.B. BC 3119: Screenwriting, and 3103 & 3104: Essay Writing do not count toward the writing concentration.)

Course Description Contains The Keyword(s)

Introductory

Any literature course in the department of English fulfills the general education requirement, Literature. Be aware that not all courses automatically qualify. Eligible courses must clearly emphasize literary texts, methods, and theories.

ENGL BC 1201x and y First-Year English: Reinventing Literary History

[For more information, see course website]. Close examination of texts and regular writing assignments in composition, designed to help students read critically and write effectively. Sections of the course are grouped in three clusters: I. Legacy of the Mediterranean; II. The Americas; III. Women and Culture. The first cluster features a curriculum of classic texts representing key intellectual moments that have shaped Western culture, as well as excursions to the opera, the theatre, and museums. Offering revisionist responses to the constraints of canonicity, the last two clusters feature curricula that explore the literary history of the Americas and the role of women in culture.

Prerequisites: Required for all first-year students. May not be taken for P/D/F. Consult department bulletin board for section times.

Theatre

Registration in each course is limited. Students may sign up for theatre courses outside the Theatre Office, Room 507 Milbank Hall. See Theatre Department course descriptions for Theatre History (THTR BC 3150, 3151), Drama and Film (THTR BC 3143), Drama, Theatre, and Theory (THTR BC 3166), Modernism and Theatre (THTR BC3737), and The History Play (THTR BC 3750).

ENTH BC 3135 19th-Century Social Drama

Late 19th-century social drama in the context of earlier melodrama. The shifting relationship between the visual and the verbal in the theatre and its implications for social and theatrical change. Playwrights include Jerrold, Scribe, Mowatt, Taylor, Robertson, Ibsen, Pinero, Wilde, Shaw, and Robins.

- P. Denison

4 points

ENTH BC 3136y Shakespeare in Performance

The dramatic text as theatrical event. Differing performance spaces, production practices, and cultural conventions promote different modes of engagement with dramatic texts. Explores Shakespeare’s plays in the context of actual and possible performances from the Renaissance to the 20th Century.

Prerequisites: Enrollment limited to 16 students. General Education Requirement: Literature (LIT). General Education Requirement: The Visual and Performing Arts (ART).

4 points
ENTH BC 3137y Restoration and 18th-Century Drama

Restoration drama represents a reawakening and revitalization of English theater, after eighteen years of Puritan-mandated silence. After the Restoration of King Charles, the new theater exploded with a reawakened sensuality, a love of the pleasure to be found in the material world. Comedy—witty, sensual, cynical, ruthless in the pursuit of happiness—was the dominant achievement of the period.

ENTH BC 3139y Modern American Drama and Performance

Modern American drama in the context of theatrical exploration and cultural contestation. Playwrights include Glaspell, O'Neill, Odets, Johnson, Hurston, Hansberry, Williams, and Hellman, Stein, Miller, and Fornes.

Prerequisites: Enrollment limited to 18 students. $60 fee. General Education Requirement: Literature (LIT). General Education Requirement: The Visual and Performing Arts (ART). Not offered in 2008-2009. 4 points

ENTH BC 3140y Women and Theatre

Exploration of the impact of women in theatre history—with special emphasis on American theatre history—including how dramatic texts and theatre practive have reflected the ever-changing roles of women in society. Playwrights include Glaspell, Crothers, Grimes, Hellman, Finley, Hughes, Devere Smith, and Vogel.

ENTH BC 3144x Black Theatre

General Education Requirement: Literature (LIT). 4 points

ENTH BC 3145y Early American Drama and Performance: Staging a Nation

Competing constructions of American identity in the United States date back to the early republic when a newly emerging nation struggled with the questions: What makes an American American? What makes America America? From colonial times forward, the stage has served as a forum to air differing beliefs as well as medium to construct new beliefs about Nation, self and other. The texts we will read, from colonial times through WWI, explore diverse topics such as politics, Native American rights, slavery, labor unrest, gender roles, and a growing immigrant population.

ENWS BC 3144y Minority Women Writers in the United States

Literature of the 20th-century minority women writers in the United States, with emphasis on works by Asian, Black, Hispanic, and Native American women. The historical and cultural as well as the literary framework.

3 points

Explores, through fiction, poetry, essays, and film, the historical context and cultural content of the African American migration from the rural south to the urban cities of the north, with particular emphasis on New York, Chicago, Boston, and Philadelphia.

3 points
ENGL BC 3149y Cultures of Colonialism: Palestine/Israel

The significance of colonial encounter, statehood, and dispossession in Palestinian and Israeli cultures from 1948 to the present, examined in a range of cultural forms: poetry, political tracts, cinema, fiction, memoirs, and travel writing. Authors include: Darwish, Grossman, Habibi, Khalifeh, Klief, Karanfaris, Oz, Shabtal, Shalev, and Yehoshua.

- B. Abu-Manneh
3 points

ENGL BC 3154x or y Chaucer Before Canterbury

Chaucer's innovations with major medieval forms: lyric, the extraordinary dream visions, and the culmination of medieval romance, *Troilus and Criseyde*. Approaches through close analysis, and feminist and historicist interpretation. Background readings in medieval life and culture.

3 points

ENGL BC 3155y Canterbury Tales

Chaucer as inheritor of late-antique and medieval conventions and founder of early modern literature. Selections from related medieval texts. Formalist, historicist, and feminist approaches.

3 points

ENGL BC 3156x Topics in Chaucer: Troilus and Dream Visions

A survey of Chaucer's dream vision poems, the great romance *Troilus and Criseyde*, and related medieval texts. We will also examine the rich visual and musical traditions associated with these works.

- C. Baswell

*General Education Requirement: Literature (LIT).*
3 points

ENGL BC 3158x Medieval Literature: Paths to Heaven and Hell

3 points

BC 3159-3160 - THE ENGLISH COLLOQUIUM PREFACE: Required of majors in the junior year. All sections of 3159 (fall semester) are on the Renaissance; all sections of 3160 (spring semester) are on the Enlightenment. Students may substitute 3 courses—from ENGL BC3154-BC3158, BC3163-BC3164, BC3165-BC3169, or ENTH BC3136-BC3137. Students may also take 1 colloquium and 2 substitutions. At least one of these courses must cover Medieval or Renaissance material; at least one material of the 17th or 18th Century. One of these will also count toward satisfying the "before 1900" requirement.

ENGL BC 3159x-BC3160y (Section 1) The English Colloquium: Imagination and Creation

New ideas of the mind's relation to the world. New perspectives, the emergence of new forms, experimentation with old forms, and the search for an appropriate style.

4 points
ENGL BC 3159x-BC3160y (Section 2) The English Colloquium: Skepticism and Affirmation

4 points

ENGL BC 3194x (Section 1) Critical and Theoretical Perspectives on Literature: A History of Criticism

What is literature? This question forms the matter of a conversation among philosophers, writers, thinkers, and, latterly, "critics" that has gone on for two-and-a-half millennium. Their responses both reflect and influence the literature contemporary with them. Readings from Classical, Renaissance, Baroque, neo-Classical, Romantic, post-Romantic, late 19th-century, and 20th-century authors to 1960, with attention to contemporaneous literature.

3 points

ENGL BC 3194x (Section 2) Critical and Theoretical Perspectives on Literature: Literary Theory

Examines nineteenth century foundational texts (Marx, Freud, Nietzsche), landmarks of the twentieth century (Gramsci, Foucault, Deleuze, Butler,Jameson, Spillers, Said, Spivak, Anzaldua, Debray, Kelly, Rafael), the novels of Jose Rizal, and selected critical essays.

General Education Requirement: Literature (LIT).
3 points

ENGL BC 3194x (Section 3) Critical and Theoretical Perspectives on Literature: Psychoanalytic Approaches to Literature

Literary expression in the light of psychoanalytic thought. Psychoanalytic writings by Freud and Lacan; literary works from Shakespeare to the present.

3 points

ENGL BC 3194x (Section 4) Critical and Theoretical Perspectives on Literature: Postmodern Texts and Theory

Literary and theoretical postmodern texts. Our focus will be the revolutionary redefinition of the image, word, pleasure, love, and the unconscious.

4 points

ENGL BC 3194x (Section 5) Critical and Theoretical Perspectives on Literature: Marxist Literary Theory

Evolution of the Marxist criticism from Marx to Jameson and Eagleton. Central questions: What is unique about Marxist cultural analysis? What are the different Marxist schools of criticism? Is there a future for Marxism? Issues considered: capitalism and culture, class analysis, commitment, modernism and postmodernism, commodification and alienation, and postcolonialism.

3 points

ENGL BC 3195x Modernism

Modernist responses to an exhausted civilization, "an old bitch gone in the teeth" (Pound). The invention of new forms; the breaking of old taboos. Liberation, fragmentation, the struggle to express centrifugal experience. Works by Joyce, Yeats, Eliot, Pound, Stein, Lawrence, Stevens, Williams, Dos Passos, Freud, Frazer, Rosenberg, Read, Ortega y Gasset.

3 points

ENGL BC 3196x Home to Harlem: Literature of the Harlem Renaissance

Explores the cultural contexts and aesthetic debates surrounding the Harlem or New Negro literary renaissance, 1920-30s. Through fiction, poetry, essays, and artwork, topics considered include: modernism, primitivism, patronage, passing and the problematic of creating a "racial" art in/for a community comprised of differences in gender, class, sexuality, and geographical origin.

General Education Requirement: Literature (LIT).
3 points
ENGL BC 3198x Poetry Movements since the 1950's

Major poetry movements since the 1950's, including Beat Poetry, Confessional Poetry, the Black Arts Movement, Black Mountain, the Belfast group, and Language Poetry.
3 points

ENGL BC 3199x Poetics.

Investigation of poetry and imagination in practice and theory in the work of lyric poets from the fourteenth century to the present. Selected prose and poetry by Petrarch, Herbert, Cowper, Blake, Keats, Clare, Dickinson, Baudelaire, the Modernists, Celan, and others.
General Education Requirement: Literature (LIT).

ENGL BC 3992x Senior Postcolonial Literature Seminar: The Literature of the Middle Passage

Focusing on the literature of the Atlantic Slave Trade, this course culminates in a trip to Ghana. Texts from Africa, Britain, and the Americas, reflecting the historical impact of involuntary migration out of Africa, will include Achebe, Ama Ata Aidoo, Du Bois, Conrad, Equiano, and Baldwin. Open to all seniors by application.
4 points

PREFACE for 3996: All independent study projects require a completed form being filed with the English Department (417 Barnard Hall).

ENGL BC 3995x and y Special Project in Theatre, Writing, or Critical Interpretation

Senior majors who are concentrating in Theatre or Writing and have completed two courses in writing or three in theatre will
normally take the Special Project in Theatre or Writing (BC3996 x or y) in combination with an additional course in their special field. This counts in place of one of the Senior Seminars. In certain cases, Independent Study (BC3999 - see below) may be substituted for the Special Project. 
Prerequisites: Permission of the instructor and chair required. In rare cases, with the permission of the chair, a special project in conjunction with a course may be taken by other English majors. 
1 point 

Enrollment in 3997 and 3998 is limited to senior English majors (and film majors for the English/film section). Signing up is accomplished through a special tab in eBear. 

ENGL BC 3997x (Section 1) Senior Seminars: Studies in Literature: City in Literature 

London in the Nineteenth Century. How does urban experience provoke formal innovations, deformations, and fascination with the sensational, the grotesque, the mysterious? Special emphasis on the nighttime as a site of exploration and transgression. Works by Dickens, Engels, Mayhew, Doré, Whistler, Ruskin, Stevenson, Wilde, Doyle, and others. 
Prerequisites: Sign up through special tab in eBear. Enrollment limited to seniors. 
4 points

ENGL BC 3997x (Section 3) Senior Seminars: Studies in Literature: Poets and their Correspondence 

How do poets' letters inform our understanding of their poetry? From the eighteenth to the twentieth century, poets have used their intimate correspondence to "baffle absence," as Coleridge remarked. This course will examine the ways several masters of the letter (including Cowper, Keats, Dickinson, Eliot, Bishop, and Lowell, among others) shaped their prose to convey spontaneity in paradoxically artful ways, illuminating their major work as poets and making the private letter a literary form in its own right.

ENGL BC 3997x (Section 4) Senior Seminars: Studies in Literature: Toni Morrison 

Examines Toni Morrison's oeuvre and aesthetic in the context of the last 30 years of African American literary criticism and cultural studies. Literary critical movements to be discussed include: black feminist criticism, literary black nationalism, gender studies and queer theory, post-colonialism and the writing of the black diaspora, "racial" writing and the literature of witness, trauma, memory and forgetting.

ENGL BC 3998y (Section 6) Senior Seminars: Studies in Literature: Wit & Humor in the Renaissance

What was funny in the Renaissance? We will look at various ways writers sought to be dryly witty, harshly satirical, subtly ironic, amusingly parodic, or broadly comic. Texts will include background materials by Lucian and other classical satirists and Renaissance works by Erasmus, Rabelais, Marguerite de Navarre, Louise Labé, John Donne, Ben Jonson, Shakespeare, Tom Nashe, Sir John Harington, and Joseph Hall as well as extracts from jestbooks and several parodic almanacs.

PREFACE for 3999: All independent study projects require a completed form being filed with the English Department (417 Barnard Hall).

ENGL BC 3999x and y Independent Study

Senior majors who wish to substitute Independent Study for one of the two required senior seminars should consult the chair. Permission is given rarely and only to students who present a clear and well-defined topic of study, who have a department sponsor, and who submit their proposals well in advance of the semester in which they will register. There is no independent study for screenwriting or film production.
Prerequisites: Permission of the Instructor and Department Chair.  
4 points

CLEN W 4122y Renaissance in Europe II: Figuring Eros

How did Renaissance writers imagine Eros? What obstacles does he meet? How does he relate to other kinds of love? To loss and to wit? Readings include Plato, Ovid, and Petrarch for background, then Stampa, Ariosto, Rabelais, Labé, Marguerite de Navarre, Ronsard, Rabelais, Wyatt, Marlowe, Spenser, Sidney, Shakespeare, and Donne.——A. Prescott

CLEN G 4205x 17th-Century Literature and Culture: Religious Difference and the English Revolution

Explores the intertwining of religion, politics, and literature during the seventeenth century, focusing on the English Revolution (1640-1660). What was the role of religion, and the nature of religious differences in post-reformation England? Beginning with brief selections from Herbert’s The Temple but focusing on writings by religio-political radicals and self-proclaimed prophets such as Gerrard Winstanley and Anna Trapnel but especially Milton (e.g., probably Areopagitica, Paradise Regained), we will consider the proliferation of religious divisions and sectarian options, anti-Catholicism, the question of Jewish readmission, and the relation between religion and “nation.”

A. Gulbrassy
3 points

CLEN W 4560x Backgrounds to Contemporary Theory

What are the intellectual antecedents of contemporary critical, cultural, and social theory? Where do the vocabularies and questions that occupy us most urgently today, or that we occupy—history, the subject, the other, the aesthetic, culture, society, discourse, and so on—come from, and how does this history illuminate their current challenges and relations? How do we interpret the tension between theory and the current aggressive return of “history”? This course will look back at certain thinkers of the 18th, 19th and early 20th centuries (Rousseau, Kleist, Kant, Hegel, Marx, Nietzsche, Bergson, Bakhtin, Freud, Weber) who offer indispensable continuities with and counterpoints to the methodologies of academic literary theory from the
New Criticism to the more recent practices of cultural studies. Though some knowledge of feminist, Marxist, and poststructuralist theory would be helpful, only minimal acquaintance will be presumed; selected 20th-century readings that illustrate lines of connection will be provided.

CLEN G 4563y Psychoanalysis & Literature: Reading Lacan

Reading excerpts from Lacan's Seminar VI Desire and Its Interpretation with Hamlet; Seminar VII The Ethics of Psychoanalysis with Antigone, Kant, & Sade; Seminar VIII Transference with Plato's Symposium, Seminars XVI on the Four Discourses and XX Encore: On Feminine Sexuality with selected novels and novelitas. Emphasis on the relevance of Lacanian thought to literature and culture and to questions of war, science, capitalism, imperialism, and democracy.

3 points

ENGL W 4670x Film Studies: American Film Genres

Some critics contend that all Hollywood film is either melodrama or morality play, no matter what its claims to the contrary; others see it as purely wish-fulfillment fantasy. This course will examine a range of genres in Hollywood film, while also scrutinizing and questioning the formation and usefulness of genre distinctions. Our orientation will be formal as well as social and historical, as we explore codes and conventions of generic illusion and verisimilitude, the rise and fall of genres (the Western, the "weepie"), increasing self-reflexiveness (in noir, musicals, romantic comedy), genre and acting style, genre-bending and postmodernity, mise en scene. Why are certain genres linked to political parties, as are specific styles of heroism? Genres will include: the Western, War Movie, Romantic Comedy, Horror, Action, Gangster, Melodrama, Social Conscience, Musicals and "Women's films." Two Screenings per week.

Barnard Catalogue 2008-2009
Environmental Biology
1203 Altschul Hall
854-2437

Advisers: Paul E. Hertz (Biological Sciences), Stephanie Pfriman (Environmental Science)

For a complete list of faculty on leave see:
http://www.barnard.edu/provos/facleave/leave.html

The program in Environmental Biology is jointly administered by the departments of Biology and Environmental Science, and students should maintain contact with the advisers in both departments. A major in Environmental Biology provides a strong background for students interested in the intersection of Biology and Environmental Science. The major is suitable for students who intend to pursue a research career in conservation biology, ecology, or environmental biology as well as for students interested in environmental law or policy. Students who elect the Environmental Biology major will enroll in introductory and advanced courses in Biology and Environmental Science and related fields. All Environmental Biology majors complete a senior essay.

Students may substitute courses taught at Columbia (in the Departments of Biology, EEB, Earth and Environmental Sciences, or Statistics) or at other institutions with the prior approval of both major advisers. Students interested in Environmental Biology often choose to spend a semester abroad in the field. Courses completed in such programs may be accepted in fulfillment of some major requirements.

Students may also pursue an interdisciplinary program by electing a major in either Biology or Environmental Science and a minor in the other discipline, or by planning a double major.

There is no minor in Environmental Biology.

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleavelist.html

Environmental Science provides a scientific basis for management of earth systems. It focuses on the interaction between human activities, resources, and the environment. As human population grows and technology advances, pressures on earth's natural systems are becoming increasingly intense and complex. Environmental Science is an exciting field where science is used to best serve society. The department offers two majors, Environmental Science and Environmental Policy. A third major, Environmental Biology, is offered in conjunction with the Department of Biological Sciences.

The curriculum recognizes the need for well-trained scientists to cope with balancing human requirements and environmental conservation. Majors acquire an understanding of earth systems by taking courses in the natural sciences, as well as courses investigating environmental stress. Students learn to critically evaluate the diverse information necessary for sound environmental analysis. Our courses foster an interdisciplinary approach to environmental problem-solving.

Internships or some type of work or field experience are extremely valuable in preparing students for a career in Environmental Science. We strongly encourage students to consider an internship in the summer before the senior year because it may lay the foundation for the senior thesis.

Students wishing to go on to graduate school or careers in earth science and the physical sciences should take at least two semesters each of calculus, physics, and chemistry. Those interested in graduate school or careers in biological/chemical fields are recommended to take calculus as well as upper-level courses in biology and chemistry, and may wish to consider enrolling in an Environmental Biology major or minors in these fields.

Students interested in pursuing further work in environmental policy, economics, environmental law, journalism, or teaching may consider majoring in Environmental Policy or pursuing a double major, a special major, or a major/minor combination in relevant fields.

REQUIREMENTS FOR THE ENVIRONMENTAL SCIENCE MAJOR

Part A. The following four courses with labs:
EESC V 2100  Earth’s Environmental Systems: Climate
EESC V 2200  Earth’s Environmental Systems: Solid Earth
CHEM BC 2001  General Chemistry I
BIOL BC 1500  Physiology, Ecology, and Evolutionary Biology
BIOL BC 1501  Biodiversity Laboratory

Part B. Two other courses in chemistry, physics, and/or biology (see department web site for a list of approved courses).

Part C. Two courses in calculus, statistics, data analysis, and/or microeconomics (see department web site for a list of approved courses).

Part D. Four courses in environmental science and decision-making (see department web site for a list of
REQUIREMENTS FOR THE ENVIRONMENTAL SCIENCE MINOR

Students wishing to minor in Environmental Science should have a plan approved by the Environmental Science Department chair. Five courses are required, including 2 laboratory science courses (such as EESC BC 1001, BC 1002, V 2100, V 2200, V 2300) and 3 electives that form a coherent program in conjunction with the student's major field. In some cases, courses in other sciences can be substituted with approval of the chair.

Students wishing to minor in Environmental Science who are interested in field programs and seek minor credit must contact the department Chair, Stephanie Pfirman. The only current field program within Columbia University is SEE-U. There is no minor in Environmental Biology or Environmental Policy.

ENVIRONMENTAL POLICY

Advisers: Stephanie Pfirman (Environmental Science Department), Richard Pious (Political Science), Rajiv Sethi (Economics), Paige West (Anthropology), TBA (Urban Studies)

Environmental Policy is a growing field at the intersection of science and society. It focuses on political institutions, societal processes, and individual choices that lead to environmental stress, as well as the impact of environmental stress on institutions, processes, and individuals, and the development of approaches to reduce environmental impact.

The Environmental Policy major is designed to equip students to play effective roles as citizens or career professionals who can actively engage in environmental decision-making and policy. Majors learn to analyze and evaluate environmental, political, and economic systems and public policies in the context of environmental concerns. The major begins with foundations in the natural sciences, social sciences, and quantitative analysis, followed by upper level electives in both the natural and social sciences. Student research at the junior level is required in Political Science, Anthropology or History, and at the senior level in Environmental Science. Many exciting opportunities for student research exist on this campus and in the greater metropolitan community. Majors have their primary affiliation with the Environmental Science Department (Stephanie Pfirman) and a second advisor chosen from Political Science (Dick Pious), Economics (Rajiv Sethi), Anthropology (Paige West), or Urban Studies (TBA).

Environmental Policy graduates go on to a variety of careers, including national and international environmental policy, law, economics, journalism, business, public administration, government agencies, corporations, multilateral institutions, nongovernmental organizations, academia, and consulting firms.

There is no minor in Environmental Policy.

REQUIREMENTS FOR THE ENVIRONMENTAL POLICY MAJOR

1. Natural Science Foundation (three courses with labs):
   EESC V 2100       Earth's Environmental Systems: Climate with lab
   CHEM BC 2001      General Chemistry I with lab
   BIOL BC 1500, 1501 Physiology, Ecology, and Evolutionary Biology with Biodiversity
   Lab
   BIOL W 2002, EESC V 2300, or Columbia SEE-U Summer Program

2. Second semester of one of the three natural science foundation courses, Biology, Chemistry, or Environmental Science (see department web site for a list of approved classes).

3. Quantitative Assessment (two courses):
   EESC BC 3017       Data Analysis
   and either EESC BC 3016, EAE E 4009, EESC W 4050, or URBS V 3200

4. Decision-making Foundation (three courses):
   ECON BC 1002       Introduction to Economics
   or ECON W 1105     Principles of Economics
   POLS V 1601        International Politics
   ANTH V 3004        Introduction to Environmental Anthropology
   or ANTH V 1010     Human Species-Place in Nature
5. **Natural Science Elective** in an upper level course in natural science (see department web site for a list of approved classes).

6. **Social Science Elective** in an upper level course in social science (see department web site for a list of approved classes).

7. **Junior research colloquium or other research experience in the social sciences or psychology** (see department web site for a list of approved classes).

8. **Senior Thesis**

EESC B 1002y Environmental Science II

An interdisciplinary, integrated study of groundwater, radionuclides, toxins, and human health in the context of a semester-long, detailed exploration of a simulated brownfield and local community. Includes a reading of Jonathan Harr’s *A Civil Action* and Rachel Carson’s *Silent Spring*.

- P. Bower

Prerequisites: Enrollment limited. BC1001. Course is not required for an environmental policy major. Laboratory fee $30. Lab Required. 4.5 points

EESC V 2100x and y Earth’s Environmental Systems: Climate

Formation of winds, storms, and ocean currents. Recent influence of human activity: global warming, and climate change. Laboratory exploration of topics through demonstrations, experimentation, computer data analysis, and modeling.
4.5 points

EESC BC 3014x Field Methods in Environmental Science

Problem-oriented, hands-on approach emphasizing the tools, techniques, and observational skills necessary for the
understanding of forest ecology and deer management. Field and laboratory work as well as data analysis and interpretation. Field Methods utilizes the outdoor resources of the Hudson River Valley, especially the forest environment at Black Rock Forest, a 4,000-acre preserve near Cornwall, N.Y.

Prerequisites: Enrollment limited; students must sign up in 404 Altschul during the program-planning period of the previous term. Four required field trips.

EESC BC 3016x Environmental Measurements

A hands-on approach to learning environmental methods. Students take a one-day cruise on the Hudson River to collect environmental samples. These samples are then analyzed throughout the semester to characterize the Hudson River estuary. Standard and advanced techniques to analyze water and sediment samples for nutrients and contaminants are taught.

Prerequisites: Enrollment limited. Required field trip on first Friday of the semester.

EESC BC 3019x Energy Resources

Environmental policy implications of energy resources, production, and use in the United States. Present and potential use of fossil fuels (coal, oil, natural gas), nuclear fission, fusion, biomass, hydropower, wind, solar, and geothermal energy.

Prerequisites: One year of college science or permission of instructor. Alternate years.

3 points

EESC BC 3021x Forests and Environmental Change

Discussion of global forests distribution and links to climate, forest ecology, paleoecology, role of forests in the global ecosystem, and case studies of forests in relation to environmental change. Resources, including biodiversity, medicinal/ethnobotany, conservation and management strategies; role in carbon cycle.

Prerequisites: One year of college science or permission of instructor. Alternate years.

4 points

EESC BC 3025y Hydrology

Hands-on study and discussion of the basic physical principles of the water cycle (evaporation, condensation, precipitation, runoff, and subsurface flow), as well as environmentally relevant applications based on case studies. Special focus on the New York City area, the arid Southwest, and the developing world. Coverage of contemporary global water resources issues, including pollution control, sustainable development, and climate change.

- M. Stute

Prerequisites: EESC V2100, physics, or permission of instructor. Includes a weekend field trip. Alternate years. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

3 points

EESC BC 3026y (Section 001) Case Studies: Land-use Dynamics

Three case studies of topics related to land-use change and how they impact the living environment. The three topics are: (1)
land-use change over time: a paleoenvironmental perspective, (2) environmental transformations: impact of exotic and invasive plants and birds on local environments, and (3) migration of neotropical songbirds between their wintering and breeding grounds: land-use, crisis, and conservation.

- Terriyane Maenza-Gmelch
Prerequisites: Permission of the instructor required. Alternate years.

#### Courses of Instruction

**FILM BC 3119x and y Screenwriting**

**FALL:** A practical workshop in dramatic writing for the screen. Through a series of creative writing exercises, script analysis, and scene work, students explore and develop the basic principles of screenwriting. Either a polished short film script or a preliminary draft of a feature screenplay is the final project.

**SPRING:** Screenplays are the foundation of much of our popular culture, but can they be art? This intensive writing workshop examines the art and practice of the screenplay form, its roots in classical narrative structure, the ways in which it differs from the other written arts, and how one can engage its particular tools to express original ideas. Weekly writing assignments and class critique form the heart of this workshop. Students should be prepared to share their work with others and participate fully in class discussion. Students will create two short screenplays and a detailed outline for a feature film script. All students encouraged, but Junior and Senior film majors will be given priority. CLASS TIME spring semester: F 10 a.m. - 1 p.m.

**Prerequisites:** Sign up through the English Department required. Preference given to juniors and senior students majoring or concentrating in film who attend the first class session. (Since this is a Film course, it does not count as a writing course for English majors with a Writing Concentration.) General Education Requirement: The Visual and Performing Arts (ART).

**FILM BC 3120y Advanced Screenwriting**

A workshop in feature film writing. Students will enter the course with a story idea, ready to start a feature screenplay. Through lectures and workshop discussions, the course will critique the details of character development and scene construction. Analysis of student work will prompt generalized conversations/lectures on the fundamentals of film writing. Emphasis will be placed on character as the engine of story.

- G. Gallo

**Prerequisites:** Successful completion of FILM BC3119 Screenwriting I or equivalent. A complete story idea, either original or
Research Seminar can be taken in the Spring/Fall or Fall/Spring sequence.

EESC BC 3999x and y Independent Study

Advanced projects for students who have adequate backgrounds to work independently with guidance from a member of the faculty.

Prerequisites: Permission of the chair required. Does not provide major credit.

1-6 points. Variable points to a maximum of 6.

There are currently no cross-listed courses for your department.

Barnard Catalogue 2008-2009
Film Studies

The program is supervised by the Barnard Committee on Film Studies:

**English:** Associate Professor Ross Hamilton (Director), Assistant Professor Monica Miller  
**English/Women’s Studies:** Adjunct Associate Professor Jonathan Beller  
**Film:** Adjunct Assistant Professors David McKenna and Marie Regan, Lecturers Sandra Luckow and Guy Gallo  
**French:** Professor Serge Gavronsky, Assistant Professor Kimberly Glover  
**German:** Associate Professor Erik Grilim  
**Italian:** Associate Professor Nelson Moe  
**Spanish:** Assistant Professor Isabel Estrada  
**Columbia Faculty:** Annette Insdorf, Milena Jelinek, Richard Pena, Andrew Sarris, James Schamus

For a complete list of faculty on leave see:  
http://www.barnard.edu/provost/faceleavelist.html

Film was a dominant cultural medium of the twentieth century and a powerful historical force that shaped the period. Indeed it continues to reflect and form our present experience.

The educational goal of the film major is to provide a solid grounding in the history and theory of film and its relation to other forms of art. Students are introduced to visual storytelling, film technology, and the economic and sociopolitical context of the film industry. The trajectory of the major moves from introductory level courses (four are required), to intermediate-level (three are required), to advanced-level (including two labs and the senior seminar), plus two electives from the approved list. While the course of study is rooted in film history and theory, students take workshops in screenwriting and filmmaking and produce a script and a short film.

**Film Studies**

**REQUIREMENTS FOR THE MAJOR – 12 COURSES**

4 Introductory-level courses:

- FILM BC 3201x Introduction to Film and Film Theory, A prerequisite for all further film classes, and open to first-year students.
- FILM W 3100 American Film History, 1910-50
- FILM W 3202 Silent Screen
- FILM W 3201 International Film History, 1930-60
  or W 3202 International Film History 1960-90

3 Intermediate-level courses:

- FILM R 4005 The Film Medium: Script Analysis
- FILM W 3050 The Documentary Tradition
- or W 4098 Film Theory I
- FILM W 4145 Topics in World Cinema, or, with approval, appropriate substitutions from the list of elective courses below.

3 Advanced-level courses:

- FILM BC 3119x, y Screenwriting  
  or FILM W 3005 Laboratory in Writing for Film  
  or FILM BC 3120 Advanced Screenwriting  
  or FILM BC 3200 Production (substitutes for FILM W 3051: Laboratory in Nonfiction Filmmaking or W 3054: Laboratory in Fiction Filmmaking).
- ENGL BC 3998y Senior Seminar/Film  
  or FILM W 3840x Senior Seminar in Film Studies

2 Film Electives

For current Barnard electives, please consult the Barnard Film Studies website,

For Columbia electives, please consult the Columbia website.

Related Courses: at least 3 courses in other departments to be chosen in consultation with your adviser. There is no minor in film studies. There is no independent study in film studies, nor does Barnard give credit for internships.

**FILM BC 3145y** Topics in Literature and Film: Memory and Forgetting

Links literature to painting, photography and film, as well as texts in psychology (Freudian trauma theory and recovered memory). We will explore the role of personal and cultural memory in the creative process through key examples from the medieval "memory rooms" to the work of Alain Resnais. Weekly screenings.

3 points also listed as ENGL 3145

**FILM BC 3200x and y** Film Production

An exploration of basic narrative tools at the filmmaker's disposal, with a particular emphasis on camera work and editing. Examines basic cinematic syntax that provides a foundation for storytelling on the screen.

Prerequisites: ENGL BC3201 and permission of instructor. Sophomore standing. Enrollment limited to 12 students. General Education Requirement: The Visual and Performing Arts (ART).

**FILM BC 3215y** Auteur Study: TBA

A close examination of the oeuvre of a single filmmaker within a larger cinematic, aesthetic and historical context. Spring 2007 focus of investigation: the films and career of Clint Eastwood.

3 points

**FILM BC 3220y** Topics in Cinema: War and Propaganda

Examines the changing role of film in dramatizing, promoting and critiquing American participation in the military conflicts over the past 70 years. From the gung-ho patriotism of Howard Hawk's SGT. YORR and the front-line reportage of Lewis Milestone's A WALK IN THE SUN to the ambivalence of John Frankenheimer's THE MANCHURIAN CANDIDATE and the calculated cynicism of Barry Levinson's WAG THE DOG, we explore shifting political perspectives and aesthetic strategies.

- D. McKenna

Prerequisites: Permission of the instructor required. Enrollment limited to 55 students. Graduate students, seniors and juniors will be given priority. General Education Requirement: The Visual and Performing Arts (ART). Not offered in 2008-2009.

www.barnard.edu/fysem/

This program is supervised by the First-Year Seminar Committee:

Professor of Classics: Helene Foley
Professor of English: James Basker, Lisa Gordis
Professor of History: Rosalind N. Rosenberg, Herbert Sloan
Senior Lecturers in English: Patricia Denison, Margaret Vandenburg
Senior Lecturer in French: Laurie Postlewaite (Acting Director)
First-Year Class Dean: Lisa Hollibough
Assistant Provost: Hilary Lieberman Link

Instruction in the First-Year Seminar Program is provided by the following regular members of the Barnard College faculty:

Professors: Taylor Carman (Philosophy), Mark Carnes (History), Flora Davidson (Political Science and Urban Studies), Lisa Gordis (English), Laura Kay (Physics and Astronomy), Kimberly Marten (Political Science), Robert McCaughey (History), Stephanie Pfirman (Environmental Science), Richard Plous (Political Science), Anne Prescott (English), Jonathan Riedler (Sociology), Rosalind N. Rosenberg (History), Herbert Sloan (History)

Associate Professors: Mindy Aloff (Dance), Celia Deutsch (Religion), Sharon Harrison (Economics), Kristina Milnor (Classics), Patricia Stokes (Psychology), Caroline Weber (French), Guobin Yang (Asian and Middle Eastern Cultures)

Assistant Professors: Stephanie Beardman (Philosophy), Ronald Briggs (Spanish and Latin American Cultures), Deborah Coen (History), Rebecca Stanton (Slavic), Dylan Thurston (Mathematics)

Lecturers and Other Faculty: Manu Chander (English), Laura Ciolkowski (English), Pamela Cobrin (English), Dorothy Denburg (Dean of the College), Patricia Denison (English), Margaret Ellsberg (English), Georgette Fleischer (English), Lisa Hollibough (First-Year Class Dean), Mara Kaspher (Slavic), Ariella Lang (Italian), Katherine Levin (English), Linn Cary Mehta (English), John Pagano (English), Stefan Pedatella (English), Sonia Pereira (Economics), Cary Plotkin (English), Laurie Postlewaite (French), Timea Szell (English), Maxine Weisgrau (Anthropology)

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleave/list.html

Purpose and Structure

Every Barnard first-year student is required to take a First-Year Seminar during her first or second semester at Barnard. The purposes of the First-Year Seminars are threefold:

1. To develop further the essential and prerequisite skills a student brings to Barnard in the critical reading and analysis of important texts, in effective speaking, and in writing well—this last especially.
2. To develop these skills within an intellectually challenging context where students and teacher alike, through a close examination of important and relevant texts, engage in an extended consideration of a theme central to human concerns and which goes beyond departmental boundaries.
3. To develop these skills and encounter this intellectual challenge in a small-class setting with instruction by a regular member of the Barnard faculty who has chosen to participate in the program. As such, First-Year Seminars should provide entering Barnard students with an early sense of community.

Accordingly, all First-Year Seminars share a common structure:

- Each will meet twice a week in regularly scheduled class periods and earn 3 points.
- Each will have an enrollment of approximately 16 students.
- Reading assignments will consist of a maximum of six book-length assignments or their equivalent (about 2,000 pages).
- Writing assignments will consist of a minimum of an assignment every other week. These assignments will vary in character (e.g., an assigned topic; a selected topic; reworking a previous assignment; editing
the work of others) and length.

- The regular grading practices of the College will be followed. Upon completion of the course, students will have an opportunity to evaluate their First-Year Seminar and to offer suggestions as to how it might be improved in subsequent offerings.

Printable Version

First-Year Seminar
332G Milbank Hall
854-3577
www.barnard.edu/fysem/

COURSES OF INSTRUCTION

The First-Year Seminar program consists of approximately 36 seminars, organized into three categories:

I. Reinventing Literary History
   A. The Legacy of the Mediterranean
   B. The Americas
   C. Women and Culture
   D. Global Literature

II. Reacting to the Past

III. Special Topics

These categories identify thematic concerns or textual emphases common to more than one seminar, while reflecting varying levels of faculty collaboration that went into the development of the individual seminars. They are also intended to facilitate the process by which a student selects her seminar. (Procedures for selecting First-Year Seminars are described in the First-Year registration materials.)

Please visit the First-Year Seminar website for an updated listing of courses.

Printable Version

Barnard Catalogue 2008-2009
Reinventing Literary History

Sections of Reinventing Literary History are grouped in four clusters: Seminars on the Legacy of the Mediterranean feature classic texts representing key intellectual moments that have shaped Western culture, as well as excursions to the opera, the theatre, and museums. Offering revisionist responses to the constraints of canonicity, seminars on the Americas, Women and Culture, and Global Literature cross national boundaries, exploring the literary history of the Americas, the role of women in other cultures, and various approaches to global literature.

FYSB BC 1156x Legacy of the Mediterranean I

The course investigates key intellectual moments in the rich literary history that originated in classical Greece and Rome and continues to inspire some of the world's greatest masterpieces. A lecture series featuring distinguished Barnard and Columbia professors provides a general historical framework, leaving time in the seminars for close readings of individual texts. Trips to museums and the opera situate the works in an interdisciplinary context available only in New York City. Texts include Euripides, *The Bacchae*; the Homeric Hymn to Demeter; Homer, *Odyssey*; Vergil, *Aeneid*; Dante, *Inferno*; Chaucer, *The Canterbury Tales*; Margery Kempe, *The Book of Margery Kempe*; Shakespeare [selection depends on NYC theatre offerings]; Madame de Lafayette, *La Princesse de Cleves.*

**FYSB BC 1164x Women and Culture I**

Literary history often portrays women as peripheral characters, confining their power to the islands of classical witches and the attic of Romantic madwomen. This course offers a revisionist response to such constraints of canonicity, especially as they pertain to the marginalization of female subjectivity in literature and culture. We will therefore explore a more diversified range of intellectual and experiential possibilities. The curriculum challenges traditional dichotomies—culture/nature, logos/pathos, mind/body—that cast gender as an essential attribute rather than a cultural construction. Texts include: Aeschylus, *Orestia*; Hymn to Demeter; Ovid, *Metamorphoses*; Sai Shonagon, *The Pillow Book*; Marie de France, *Lais*; Chaucer, *The Canterbury Tales*; Sor Juana Ines de la Cruz, selected poetry; Shakespeare, *As You Like It*; Aphra Behn, *Oroonoko*; and Lady Hygeygong, *The Memoirs of Lady Hygeygong*.

**FYSB BC 1266x Americas I**

The course transcends the traditional and arbitrary distinction that separates North and South American literatures. The Americas emerge not as a passive colonial object but as an active historical and aesthetic agent. Emanating from what might be called the geographical site of modernity, American literature is characterized by unprecedented diversity and innovation. In addition to classic American novels, short stories, and poetry, the multicultural curriculum features genres ranging from creation myths and slave narratives to gothicism and magic realism. Texts include: Popul Vuh; Shakespeare, The Tempest; Sor Juana Inés de la Cruz; Anne Bradstreet, and Phillis Wheatley, selected poetry; Madre Maria de San Jose, Vida; Charles Brockden Brown, Edgar Huntly; Toussaint L'Ouverture, selected letters; Leonora Sansy, Secret History; Olaudah Equiano, The Interesting Narrative of the Life of Olaudah Equiano; William Apeas, A Son of the Forest; Esteban Echeverría, "The Slaughterhouse"; Herman Melville, "Benito Cereno." - L. Mehta

**FYSB BC 1285xy Global Literature: New World Utopians and Rebels**

When Venezuelan novelist and critic Arturo Uslar Pietri declared that "utopia is American," he was speaking for the New World, north and south. In this course we will explore the writings of iconoclastic thinkers who found American space to be the inspiration for paper dreams of a new society. We will be especially interested in the rhetoric of revolution and the emphasis on the Western hemisphere as both the rupture and continuation of a European narrative. The field of study will range from the 17th to the 20th century, as authors include Sor Juana Inés de la Cruz, Thomas Paine, Flora Tristán, Margaret Fuller, José Martí, and Che Guevara. - R. Briggs

FYSB BC 1584y Global Literature: Imagining South Asia

This seminar considers the representation of South Asian cultures in art and literature over the past five hundred years. We will examine issues of colonialism and nationalism, gender identity, religious identity, and caste/class struggle in works by native authors, English colonial figures, and artists from diasporic communities beyond the subcontinent. How have historically marginalized figures responded to different forms of oppression, both by colonial forces and by governing structures and institutions? What is the relationship between imperial identity and national identity? Where does the "real" South Asia begin and end in relation to the imagined space, place, and tradition that has taken shape over the region's long and turbulent history? Authors considered will include Mahasweta Devi, Salman Rushdie, George Orwell, Mulk Raj Anand, R.K. Narayan, and Rabindranath Tagore. Additionally, there will be two film screenings and a trip to the Dahesh Museum of Art.

Reacting to the Past

In these seminars, students are assigned specific roles that enable them to relive important intellectual debates in three separate historical moments. The class sessions are run by students and take the form of competitive "games." Students with similar roles will commonly work together to enact their dramatic scenarios. Students completing the fall seminar will automatically be entitled (but not required) to take a continuation seminar, designed on the same principles, in the spring semester.

Each seminar will work with the following games: (1) A trial of Socrates, set in fifth-century Greece, with Plato's *Republic* as the main evidentiary text; (2) A succession dispute between the Wan-li Emperor and his Confucian bureaucrats, set in sixteenth-century China, with the *Analects* of Confucius as the main text; (3) A trial of Puritan dissenter Anne Hutchinson, set in seventeenth-century Massachusetts, with the Bible, Calvin's Institutes, and the original trial testimony as the main texts, OR a struggle between women's suffrage advocates and labor activists for the hearts and minds of "Bohemian" Greenwich Village, set in the spring of 1913 with foundational works by Marx, Freud, Wollstonecraft and others as the main texts.

FYSB BC 1157x Love

What is love? What are philosophical and literary interpretations of the course and nature of love? This seminar will discuss various ideas and concepts of love that have developed throughout history from Confucius and Plato, to the idea of romantic love in the age of chivalry, and to the concepts of love in the modern world. The readings will consist only of works of literature. They include: Euripides, Medea; Sophocles, Antigone; Plato, Symposium; excerpts from the Old and New Testament; Boccaccio, Decameron; Pushkin, Eugene Onegin; Turgenev, First Love; Tolstoy, Kreutzer Sonata; Chekhov, The Lady With the Pet Dog and others.

FYSB BC 1166x and y The Art of Being Oneself

Transparency in writing is a creation. It conveys the sense that the writer is putting all of his or her cards on the table, that the voice is candid and reasonable, that the person writing is knowable in an essential respect. Although in recent decades such a prose style has not been especially cherished in literature, it has characterized works that endure and that survive translation. Great artists in whatever medium tend to write clearly, vividly, concisely, and memorably about such complicated subjects as aesthetics, technique, political identity, the workings of society, and the shadings of emotion that galvanize human action. This course will look at examples ranging across time, space, and literary medium: the essay, the lecture, the autobiography, the journal, the letter, and the short story. Readings in the past have included The Personal Essay (edited by Philip Lopate), The Journalist (Eugene Delacroix), Letters (Wolfgang Amadeus Mozart), Home and Exile (Chinua Achebe), Private Domain (Paul Taylor), and One Writer's Beginnings (Eudora Welty).

FYSB BC 1188xy Modernism and Modernity

This course aims to develop an understanding of the terms modernism and modernity in philosophy, literature, theatre, cinema, and the fine arts, and to explore what is meant by postmodernism and postmodern culture. The seminar will begin with an analysis of the characteristics that came to define modernism in the arts. We will read classical and contemporary texts by Immanuel Kant, Virginia Woolf, Walter Benjamin and others that focus on the basis of the notion of modernity. We will also read the writings of cultural critics and artists such as Charles Baudelaire, Berlolt Brecht, Luce Irigaray and Tnozake Shange that address the different ways in which modernism and modernity construct notions of the self. Particular attention will be paid to the relationship between modernity and modernism in the arts. We will visit the Museum of Modern Art to view art and analyze the various ways in which the Museum links modernism and modernity, and watch several films and discuss how their descriptions of modern life differ from painterly and written descriptions of the same.

FYSB BC 1203y Crisis of Authority

Governing authority can be defined as the relationship between ruler and ruled in which the framing of issues, the myths and narrative history of the state, and the reasoned elaboration of the government's decision are accepted by the citizens of subjects of the state. The crisis of authority occurs when this relationship is disrupted. In this seminar we will examine such crises in Ancient Greece, Renaissance Western Europe, twentieth-century United States, and post-communist Eastern Europe, through the writings of such authors as Plato, Machiavelli, Milton, Mill, de Tocqueville, King, and Michnik.

FYSB BC 1256y Chaos

A typical dictionary definition of the word chaos is "a state of utter confusion." However, the earliest examples of chaos depict it as emptiness, while modern mathematicians might define it as "a state of orderly disorder." We will study chaos as defined each of these ways, with applications in the social and physical sciences, literature, the arts and modern life. We will see these definitions and applications not as distinct, but as overlapping and intimately related. Readings will include John Milton's Paradise Lost, which we will compare and contrast with Michael Crichton's Jurassic Park; and Tom Stoppard's play, Arcadia.

FYSB BC 1279x Revolutionary Movements: Visions and Experiences, Causes and Consequences

Few historical events have shaped the modern world as profoundly as revolutionary movements. This seminar explores some of the most important revolutionary movements in modern history. We will look at how literary and artistic forms represent the revolutionary experience at the personal and philosophical level and examine how social analysis reveals the causes and consequences of the movements. Main texts: Gioconda Belli, The Country Under My Skin: A Memoir of Love and War; Barrington Moore Jr., Social Origins of Dictatorship and Democracy: Lord and Peasant in the Making of the Modern World; Craig Calhoun, Neither Gods Nor Emperors: Students and the Struggle for Democracy in China; Jeff Goodwin, No Other Way Out: States and Revolutionary Movements, 1945-1991; Andre Malraux, Man's Fate (La Condition Humaine); and Margarethe von Trotta, director, Rosa Luxemburg

FYSB BC 1284y Staging American Identity

Competing constructions of American identity in the United States date back to the early republic when, following a violent and successful quest for independence, a newly emerging America struggled with the question: What makes an American American? This seminar explores the way in which American performance texts reflect and project ever shifting notions of self, "other," and nation, which always occur at the intersection of race, class, and gender. Over the course of the semester we will examine how American identity has been staged in theatres, novels, political treatises and art as well as how those images have traveled through time, from the early republic to the present. We'll examine texts treating Native American identity by Mary Rowlandson (1682) and John Augustus Stone (1829); texts treating women's role in politics including political treatises and suffrage speeches as well as plays such as Spirit of '77 (1888) and The Parrot Cage (1913); and texts treating African American identity by looking at Harriet Beecher Stowe's novel Uncle Tom's Cabin and texts responding to it including adaptations, vaudeville, Bill T. Jones 1990 dance performance "Last Supper at Uncle Tom's Cabin The Promised Land," and Spike Lee's 2000 film Bamboozled. - P. Cobrin

FYSE BC 1286y Culture, Ethics and Economics

What if humans were only capable of caring for their own interests? What kind of economic world could we expect to find? One in which the common good would be attained by market forces, or one in which many would be left behind? This course uses a diversity of sources to examine the interplay of culture, ethics and economics. The starting point is Adam Smith's work. Economists and policy makers have focused on one side of Adam Smith's work represented by self-regarding behavior and the supremacy of the invisible hand in market functioning. However, Adam Smith also pointed out that one of humans' central emotion is "sympathy", a natural tendency to care about the well-being of others. In light of the recent events as well as research this other side of Adam Smith's work appears now more relevant. We analyze evidence of cooperative versus self-regarding behaviors and its relationship with the economy, human evolution and cultural values in a variety of settings. Readings include works from Adam Smith, Milton Freedman, Charles Dickens, David Rockefeller and Chris Gardner.

FYSE BC 1287y Experiences of Warfare

Why do people go to war, and what affect does warfare have on those experiencing it? What roles do glory, honor, and duty play in warfare? Do gender roles shape people's perceptions of war? How do both civilians and soldiers cope when war tears their lives apart? This course examines some outstanding examples of both fiction and non-fiction writing about warfare across time and place, including works by Thucydides, Shakespeare, Hemingway, Chimamanda Ngozi Adichie, Anthony Shadid, and less well-known women writers of World War I, alongside two notable movies.

FYSE BC 1436x Families, Feminisms and States

Throughout history political and economic events reverberate in states' visions of household, family, and gender norms. Women's roles in families and society are particularly the focus of state policy and strategy. Social and political actors continually revise and redefine the norms and structures of marriage and family life, at times reinforcing and at other times resisting state ideology. This seminar examines how the construction of family—throughout human time and cross-culturally—normalizes gendered sets of behaviors that become encoded in nationalism, social practice and law. We will examine the shifting construction of family in a variety of cultural and historical settings as well as academic disciplines: fiction (Buschi Emchota, The Joys of Motherhood); sociology and anthropology (Hide L. Nelson, ed., Feminism and Families); and history (Frances and Joseph Gies, Marriage and the Family in the Middle Ages). We will also examine recent American court cases that grapple with defining parenthood and appropriate family practices in light of new reproductive technologies, same-sex marriages, and immigrant cultures in America.

FYSE BC 1452x Accent and Voice: Minority and Immigrant Women's Literature

In this seminar we will explore ideal roles prescribed for women, and the relationship of those roles to issues of power, authority, class, race and ethnicity. Our investigation will include a cross-cultural selection of American minority and immigrant women's literature. Theoretical studies will help us to frame our questions and listen to women's voices as they speak through these texts. Readings will include Allende, My Invented Country; Alvarez, How The Garcia Girls Lost Their Accents; Angelou, I Know Why The Caged Bird Sings; Antin, The Promised Land; Anzaldua, Making Face, Making Soul; Danticat, The Dew-Breaker; Gilligan, In a Different Voice; Hurston, Their Eyes Were Watching God; Kingston, The Woman Warrior; Morrison, Beloved; Mukherjee, The Middleman and Other Stories; Rosaldo and Lamphere, Women, Culture and Society; Woolf, A Room of One's Own.

3 points
### FYSB BC 1455y Literature and Justice

In this seminar, we will examine a series of texts from the Western literary tradition—along with a few seminal works of classic and contemporary cinema—to consider how and why they thematize characters' quests for justice. From the ties of kinship to the bonds of citizenship, from the articulation to the deconstruction of transcendental moral codes, from the traumatic demands of law to the (often equally traumatic) exigencies of revenge, we will explore the many intricacies of "justice" as both an ubiquitous literary topos and an abiding ethical issue. Authors studied will include Aeschylus, Sophocles, Shakespeare, Molière, the Marquis de Sade, Heinrich von Kleist, Franz Kafka, Jean Anouilh, Jean-Paul Sartre, W.H. Auden and Martin Amis. Secondary readings will be drawn primarily from philosophical and psychoanalytic sources, such as G.W.F. Hegel, Heinz Kohut, and Jacques Lacan. Along with filmed adaptations of our primary literary works, we will view and discuss the movies Claude Lanzmann's "Shoah" and Joel Schumacher's " Falling Down." - C. Weber

3 points

### FYSB BC 1457x The Beautiful Sea

Consideration of mostly American texts that—writes who—share a central engagement with the sea, seafaring and coastal life. Particular attention to the sea as workplace and as escape. Texts include Homer, The Odyssey; the Book of Jonah; St. Brendan, Navigations; Bradford, Of Plymouth Plantation; Mather, "Surprising Sea Deliverances"; Franklin, "Maritime Observations"; Dana, Two Years Before the Mast; Melville, Moby-Dick, or The Whale; Thoreau, Cape Cod, Twain, Life on the Mississippi; Chopin, The Awakening; Hewett, The Country of the Pointed Firs; Stowe, Sailing Alone Around the World; Beston, The Outermost House; Carson, Under the Sea Wind; Rich, "Diving into the Wreck"; Casey, Spartina.

3 points

### FYSB BC 1459y Narcissism: Self, Science, and Morality

When do people have what Jane Austen called "proper pride," and when are they suffering from the difficult personality problems, the self-love gone wrong, that psychologists refer to as "narcissism"? What is the difference between healthy self-esteem and the kind of egoism and selfishness that people generally dislike and disapprove of? Is genuine altruism part of human nature? The narcissist appeared in ancient Greek mythology and political philosophy, and has since been depicted in poems, fiction, dramas, and operas, and in philosophical, scientific, psychoanalytic, and social scientific research. Narcissists are familiar targets of everyday moralizing, stock figures of misbehavior in sitcoms, archetypal bad choices for friend or spouse. In the abstract, they are disapproved of; in practice they are often admired, rising to the top of corporate and political hierarchies and winning love from the most desirable people around them. How? Why? What creates such people? Texts will include Ovid, "Echo and Narcissus"; Plato, The Republic; Sigmund Freud, "On Narcissism"; Richard Dawkins, The Selfish Gene; Otto Kernberg, "Factors in the Psychoanalytic Treatment of Narcissism"; Christopher Lasch, The Culture of Narcissism; and George Eliot, Middlemarch.

3 points

### FYSB BC 1549y Shapes and Shadows of Identity

A look at the elusive meaning of "black," "white," and other group identities in the United States and the forms—novel, literary essay, stand-up comedy, ethnography, performance, film, television, magazines, radio, memoir, sermon—through which such identities are depicted. Readings will include Johnny Otis, Upside you Head; Upsky; Bomb the Suburbs; Nelson George, The Death of Rhythm and Blues; Mary Waters, Black Identities; James McBride, The Color of Water: A Black Man's Tribute to His White Mother; Ann Douglas, Mongrel Manhattan; selected sermons and speeches of Martin Luther King Jr.
FYSB BC 1568y Mortals, Creatures and Subjects

This seminar examines concepts of the self in ancient, medieval, and modern philosophy and literature. The Greeks saw human beings as mortals, in contrast to the gods. Christians in the Middle Ages regarded themselves as immortal creatures reflecting the image of God. Since the seventeenth century we have come to understand selves very differently, namely as subjects defined by selfreflection, self-determination, self-definition, inwardness, and irreducible psychological complexity. Authors include, Homer, Plato, Augustine, Montaigne, Descartes, Pascal, Camus, and Sartre.

- T. Carman

FYSB BC 1572x Animals in Text and Society

An interdisciplinary examination of the intimate and fraught connections between animals and humans in literature, philosophy and culture. We will consider topics such as the historical constructions of species boundaries and of the multiple meanings and uses of animals in human life; animal and human identity; emotions evoked by animals; and conceptualizations of animals as colonized "others." Readings include Aesop, Edward Albee, Angela Carter, John Coetzee, Geoffrey Chaucer, Gustave Flaubert, Jean LeFontaine, Marie de France, Michael Pollan, Ovid, selections from Genesis (in the Hebrew Bible), and Virginia Woolf.

- T. Szell

FYSB BC 1585y Revolutionary Generations: 1848 and 1968

In this seminar we will discuss the history and meaning of revolution, and try to understand the importance of generations as a catalyst for historical change. 1848 was the "springtime of the peoples." Revolutions erupted demanding freedom, justice, the right to work, the equality of citizens, and liberation from oppression, led by a youthful generation known as "the 48ers." In 1968, throughout the continent of Europe and in the US, South America, and Japan, another wave of civil unrest was experienced, led by another youthful "springtime" movement. We will use readings from Mannheim, Sperber, and Goodwin on revolution, then focus on memoirs (from Flaubert's Sentimental Education to Luisa Passerini's Autobiography of a Generation); books on Gaiibalth, Marx, Vlach Havel and China's Cultural Revolution; and music and art (from Verdi's operas to the musical Hair) from each of these revolutionary generations in our comparisons and investigations.

- M. Tambor

The purpose of Foreign Area Studies is to provide an introduction to the study of a foreign region of the world. Foreign Area Studies majors are encouraged to study abroad in the region of interest. The work is divided into three elements: language, a scholarly discipline, and a diversified approach to a region. The student who wishes to major may choose one of the regions listed below. The courses named under each region include only those most commonly elected. Other courses may be chosen upon approval of the project by an adviser.

REQUIREMENTS FOR THE MAJOR

A major in Foreign Area studies is open to qualified students whose applications are approved by the committee in charge. First-year students and sophomores anticipating such a major should consult their class advisers and the officer in charge by March 1 of the sophomore year.

The senior requirements vary according to the region studied. Majors should consult their advisers for details.

Africana Studies (Advisor: TBA) A student interested in Foreign Area Studies for the nations of Africa should major in Africana Studies.

Asian and Middle Eastern Cultures (Advisor: D. Max Moerman) A student interested in Foreign Area Studies for any region of the Middle East, South Asia, or East Asia should major in Asian and Middle Eastern Cultures.

European Studies (Advisor: Deborah Valenze)

Students may focus on one country or one region of Western Europe. Competence in the language of the region is expected. The major includes:

A. A concentration consisting of five courses in an academic discipline in the Social Sciences chosen in consultation with the major adviser. A maximum of two of these courses that deal with European topics may be counted among the ten courses in the regional concentration (Part B).

B. Ten courses focusing on a country or region to include:

Two courses in European History;

Two courses in the literature or cultural studies of one country in the original language;

Two semester senior projects under the direction of the program advisor or an adviser in the minor field;

Four courses outside the field of concentration dealing with the selected country or region.

The following list is only a sample selection of courses that may be applied to the major:

Anthropology V 3100 Anthropology of Urban Life
Anthropology V 3038 Ethnicity and Race
Art History V 3475, 3521 Art and Culture of the Northern Renaissance Seventeenth-Century Painting and Public Life in the Lowlands, 1580-1700 Comparative Economic Systems
Economics BC 3041 Theoretical Foundation of Political Economy
History BC 1101, 1102 Introduction to European History (recommended as prerequisites for other history courses)

History BC 3321 Colonial Encounters: Europe and the culture of Empire
History BC 3323 European Women in the Age of Revolution
History BC 4360 London: From 'Great Wen' to World City
History BC 4368 History of the Senses
Political Science BC 3007 Modern Political Movements
Political Science BC 3013, 3014 Political Theory
Political Science V 3505 Introduction to Comparative Politics
Religion V 1101 Introduction to the Study of Western Religion
Religion V 3501 18th- and 19th-Century Religious Thought
Sociology V 3100 Introduction to Social Theory

Courses in the French Department have a twofold objective: to perfect fluency in the written and spoken language, and to develop an understanding and appreciation of the literature and culture of France and French-speaking countries.

New students who have already given evidence of advanced training in French (Advanced Placement Examination with a score of 4 or 5; CEEB examinations with a score of 781) are automatically exempted from the language requirement. All other new students who intend to satisfy their requirement in French will, depending upon their preparation, be placed immediately in the appropriate language course or be asked to take a placement test offered at the start of each semester (see College Calendar for exact dates). Those receiving a sufficiently high grade will be exempted from the language requirement. All others will be placed in French language courses according to their score. For additional information about language courses, students should consult the department chair.

Students who have satisfied the language requirement may immediately enroll in literature and culture courses (BC 3021, BC 3022, BC 3023, BC 3024); and advanced language courses (BC 3006-3019).

In cooperation with Columbia College, the department offers a program at Reid Hall in Paris open to majors and non-majors. See Study Abroad.

REQUIREMENTS FOR THE MAJOR

There are three majors available to prospective students in the department:

Language and Literature: This program emphasizes the language, culture, and literature of France and other French-speaking countries.

Translation and Literature: This program teaches students to translate from French into English and English into French, within a context of French culture and literature.

French and Francophone Studies: This program emphasizes the historical and contemporary interrelationship between France and the French-speaking world in their social, literary, and cultural aspects.

The requirements for each specific major are:

Language and Literature

11 courses are required for the major:

- 3021 or 3023 and 3022 or BC 3024
- 3 language courses (from 3006 to 3019)
- 2 literature courses up to, and including 18th century (3029-3036)
- 3 literature courses after 18th century (3037-3075)
- Senior thesis
French and Francophone Studies
11 courses are required for the major:

- 3420 AND 3421
- 2 language courses (from 3006-3019)
- 4 literature courses (from 3029-3075), of which at least 2 from 3069 to 3075
- 2 courses from other departments at BC or CU
- Senior Seminar

Translation and Literature
11 courses are required for the major:

- 3021 or 3023 and 3022 or 3024
- 4 language courses (from 3006-3019)
- 4 literature courses (from 3029-3075)
- Senior Seminar

The student is expected to declare her option by the end of the junior year. Programs may include additional courses in French literature, culture, and language, or in other subjects which vary with the interest of the student. Certain courses in the French and Romance Philology Department at Columbia University may be substituted with the approval of the chair. All students are required to write a thesis in their senior year. This thesis, of about 30 pages in length, will be written while the student is enrolled in BC 3091. Thesis specification will vary depending on the major program that has been chosen.

A student who elects French as part of a combined double or interdisciplinary major will establish her individualized program with the departments concerned. All combined or interdisciplinary majors require approval from the Committee on Petitions and Academic Standing.

REQUIREMENTS FOR THE MINOR
Seven courses are required for a minor:

- FREN BC 3021 or BC 3023, and BC 3022 or BC 3024, or FREN V 3420 and V 3421
- Two language courses chosen from FREN BC 3006-BC 3019
- Three literature and culture courses chosen from FREN BC 3029-BC 3079

Literature and Culture Courses

FREN BC 3021x Major French Texts I
Medieval, Renaissance, and Classical literature in their cultural context.
- L. Postlewaite
Prerequisites: Satisfaction of the language requirement or the equivalent. General Education Requirement: Literature (LIT). 3 points

FREN BC 3022y Major French Texts II
The Age of Enlightenment, Romanticism, Realism, and Symbolism.
- L. Postlewaite
Prerequisites: Satisfaction of the language requirement or the equivalent. FREN BC3021 may be taken for credit without completion of FREN BC3022. General Education Requirement: Literature (LIT). 3 points

FREN BC 3023x The Culture of France I
Historical analysis of mentalités from the Middle Ages to the reign of Louis XIV through symbol, structure, and self-presentation.
Prerequisites: Satisfaction of the language requirement or the equivalent. General Education Requirement: Historical Studies (HIS). General Education Requirement: Literature (LIT). Not offered in 2008-2009. 3 points

FREN BC 3024y The Culture of France II
Major cultural and institutional events in France from the 18th century to the present. Topics include the revolutionary tradition, left-right and secular-religious conflicts over the identity of France: its history, its mission, its people and policies.
- B. O'Keefe
Prerequisites: Satisfaction of the language requirement or the equivalent. Not offered in 2008-2009. 3 points

FREN BC 3029y Performance in France
Sociohistorical survey of theatrical performance in France from the Middle Ages to the present. Course "texts" include liturgical drama, a variety of plays, ceremonies, sermons, cabaret and puppet theatre, as well as contemporary experimental performance. Discussion to include the politics and economics of French theatre in the broadest sense.
- L. Postlewaite
Prerequisites: Students must have completed the language requirement in French. General Education Requirement: Literature (LIT). General Education Requirement: The Visual and Performing Arts (ART). 3 points

FREN BC 3029x or y Laughter in the Middle Ages and Renaissance
Explores both the traditional comic forms of early French literature (farce, sottie, fabliau, burlesque, grotesque) and comedic elements of "serious" genres such as chanson de geste, saints lives, and romance. An investigation into the mentalités of the Middle Ages and Renaissance through an understanding of what made people laugh.
Prerequisites: Satisfaction of the language requirement or permission of the instructor. Not offered in 2008-2009. 3 points

FREN BC 3030x or y Medieval Theatre
Examines a variety of kinds of theatrical representations (liturgical drama, comic farce and "sottie," court entertainments, pageants, religious mystery plays). Lectures and readings will be in English; French majors do written work in French.
Prerequisites: Satisfaction of the language requirement or permission of the instructor. Not offered in 2008-2009.
3 points

**FREN BC 3031x or y History, Literature and Culture of the Middle Ages**
Development and evolution of literary expression in France from the Crusades through the High Middle Ages.
Prerequisites: Satisfaction of the language requirement or permission of the instructor. General Education Requirement: Historical Studies (HIS). Not offered in 2008-2009.
3 points

**FREN BC 3032x or y Women and Writing in Early Modern France**
Examination of cultural and literary phenomena in 15th-17th century France, focusing on writings by and about women.
Prerequisites: Satisfaction of the language requirement or permission of the instructor. Not offered in 2008-2009.
3 points

**FREN BC 3033x or y Literature of the French Renaissance and the Baroque**
Experimentation and discovery in the arts, in science and technology, and in the understanding of the human experience. Explores how the works of French poets, proseateurs, and playwrights reflect both the vibrancy and splendor of the time, as well as the struggle of an era preoccupied with death and "rebirth."
Prerequisites: Satisfaction of the language requirement or permission of the instructor. Not offered in 2008-2009.
3 points

**FREN BC 3034y French Baroque and Classical Literature**
Interdisciplinary exploration of the literature and culture of the "Grand Siècle."
Prerequisites: Satisfaction of the language requirement or permission of the instructor. Not offered in 2008-2009.
3 points

**FREN BC 3035x Eighteenth-Century French Fiction**
Readings of novels and novellas by Prevost, Rousseau, Diderot, Charrière, Laclos, and Sade, with a particular focus on issues of servitude, gender, sexuality, authority, and freedom.

- C. Weber
Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or the equivalent. General Education Requirement: Literature (LIT).
3 points

**FREN BC 3036x or y The Age of Enlightenment**
The challenge of traditional ideas of government, religion, ethics, and aesthetics in 18th-century France.

- C. Weber
Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or the equivalent. Not offered in 2008-2009.
3 points

**FREN BC 3037x Nineteenth-Century French Poetry**
Readings of poems by Lamartine, Hugo, Baudelaire, Rimbaud, and Mallarmé. Focuses on the turn from Romanticism to Modernism in the 19th century.

- A. Boyman
Prerequisites: Satisfaction of the language requirement or permission of the instructor. General Education Requirement: Literature (LIT).
3 points

**FREN BC 3038y The Nineteenth-Century French Novel**
Evolution of the novel, aesthetics of Romanticism, Realism, Naturalism, and Symbolism. Particular attention is paid to the formal problems of narrative, the rhetoric of sentiment, décadence, and issues of sexual identity.

- P. Connor
3 points
FREN BC 3040x Twentieth-Century French Fiction

Topics will include the theory of the gratuitous act, literature and the rise of Fascism, war and the literature of commitment, erotic violence.

- P. Connor

Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or permission of the instructor. General Education Requirement: Literature (LIT).

3 points

FREN BC 3041y Twentieth-Century French Thought

Thorough study of the major intellectual movements in France from Surrealism to post-structuralism. Particular attention given to theories of political commitment, sexuality and deconstruction. Readings include works by Breton, Senghor, Sartre, Lévi-Strauss, and Derrida.

- S. Gavronsksy

3 points

FREN BC 3042x or y Twentieth-Century French and Francophone Poetry

Analysis of some of the major poets in France and in Francophone countries emphasizing theories of the avant-garde and traditional interests in politics, race, and gender. Poets include Cendrars, Saint John Perse, Césaire, Depestre, Aragon, Risset, Albiach, Roubaud, and Tahar Ben Jelloun.

Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or the equivalent. General Education Requirement: Literature (LIT).

FREN BC 3061x or y Marx in France

Examines the persistence and transformation of the sign "Marx" in multiple aspects of 20th-century French thought. Areas covered will include ethics, aesthetics, history, philosophy, and ideologies as of Surrealism through Négritude, existentialism, structuralism and post-structuralism.

3 points

FREN BC 3063x or y Critical Theory

Introduction to the conceptual foundations of structuralism and post-structuralism or to what is known as "French Theory". Readings include works by Saussure, Levi-Strauss, Lacan, Foucault, Cixous, and Deleuze.

Prerequisites: Satisfaction of the language requirement or permission of the instructor. General Education Requirement: Reason and Value (REA). Not offered in 2008-2009.

3 points

FREN BC 3064x France on Film

Films on and of the period from the 1930s to the present, focusing on the interplay between history, ideology, and culture.

FREN BC 3065y Surrealism in Painting and Film

Major surrealist paintings, films, and photographs. Included are works by Breton, Desnos, Buñuel, Clair, Fini, Ernst, Dalí, Magritte, Man Ray, Mollner, Tanguy, and Arp. Critical texts by Sade, Freud, Breton, Bataille, Bellmer, Desnos, and others.

- S. Gavronska

General Education Requirement: The Visual and Performing Arts (ART).
3 points

FREN BC 3068y Jews in France from Dreyfus to Vichy

Jews in France from the Revolution to Vichy. Materials include newspapers, documentaries, films, historical texts and literary works.

- S. Gavronska

Prerequisites: Reading ability in French required for all students. French majors must write their papers in French.
3 points

FREN BC 3069x Blacks, Jews, and Arabs in Modern France

From nègritude to World War II anti-semitism, to contemporary French reactions to North African immigration.

3 points

FREN BC 3070y Nègritude

Analysis of the theoretical and literary precursors of nègritude; major figures of the movement; relations with the Harlem Renaissance; and the formulation of creolity by contemporary Caribbean writers and thinkers. Authors will include Gobineau, Marx, Price-Mars, Hughes, Césaire, Senghor, Damas, Fanon, Sartre, Glissant, and Cheminsou. Taught in French.

3 points

FREN BC 3071x Major Literary Works of the French-Speaking World

Introduction to major works of fiction from the French-speaking countries of the Caribbean, West Africa, North Africa and "Indochina." Considers some of the principal authors of these regions, and examines the socio-political, historical, and aesthetic considerations that have influenced Francophone literary production in the twentieth century.

Prerequisites: Completion of language requirement in French or equivalent. General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Literature (LIT).
3 points

FREN BC 3072x Francophone Fiction: Unhomely Women of the Caribbean

Looks at the portrayal of women as unsettling figures in the Francophone Caribbean literary universe. Examining the uncanny heroines in the novels of both male and female writers, students will identify the thematic commonalities and specific configurative strategies that emerge in the fictional representation of women in the region. The symbolic import of zombies, schizophrenics, and other "disordering" characters will be analyzed as indicators of and reflections on broader social realities.

- K. Glover

General Education Requirement: Literature (LIT).
3 points

FREN BC 3073x Africa in Cinema

Representations of African culture by filmmakers from various cultural backgrounds. Social and ideological positions and the demands of exoticism. The constructions of the African as "other" and the responses they have elicited from Africa's cinéastes.

General Education Requirement: The Visual and Performing Arts (ART).
3 points

FREN BC 3074x or y Women in Francophone Africa: Historical and Cultural Perspectives

Emphasizes cultural and historical representation of Francophone women by both women and men. Works will include novels,
films, and poems, by authors such as Sembène Ousmane, Mariama Bâ, Amadou Kourouma, Camara Laye, Calixthe Beyala. Not offered in 2008-2009.
3 points

**FREN BC 3075x or y Major African Texts: Orality and Ecriture**

Writing from the different parts of the continent. Focus on self-identity and the African experience as conveyed in a variety of genres: poetry, drama, the novel, and film. Not offered in 2008-2009.
3 points

**FREN V 3420x or y Introduction to French and Francophone Studies I**

Conceptions of culture and civilization in France from the Enlightenment to the Exposition Coloniale of 1931. Emphasis on the issue of universalism versus relativism and the ideological foundations of French colonialism. Authors and texts will include selections from the *Encyclopédie*, *la Déclaration des droits de l’homme et du citoyen*, the *Code Napoléon*, Diderot, Chateaubriand, de Tocqueville, Drumont.
Prerequisites: Satisfactory of French language requirement. General Education Requirement: Reason and Value (REA).
3 points

**FREN V 3421y Introduction to French and Francophone Studies II**

Universalism vs. exceptionalism, tradition vs. modernity, integration and exclusion, racial, gender, regional and national identities will be considered in this introduction to the contemporary French-speaking world in Europe, the Americas and Africa. Authors include Aimé Césaire, Léopold Senghor, Frantz Fanon, Maryse Condé.

- K. Glover
Prerequisites: Satisfaction of French language requirement. General Education Requirement: Cultures in Comparison (CUL).
General Education Requirement: Literature (LIT).
3 points

**FREN W 3760x or y French Theory After 1968**

Explores diverse schools of French literary theory and philosophy after 1968, including but not limited to Marxism, psychoanalysis, Situational, deconstruction, and post-structuralism. Authors studied include Foucault, Barthes, Althusser, Deleuze, Lacan, Kristeva, Irigaray, Deleuze, and Baudrillard. All reading, writing, and discussion in French.
Prerequisites: Permission of the instructor. Enrollment limited to 12 students. Advanced undergraduates and graduate students only. Not offered in 2008-2009.
3 points

There are currently no cross-listed courses for your department.

Barnard Catalogue 2008-2009
German
320 Milbank Hall
854-8312
www.barnard.edu/german

Associate Professor: Erk Grimm (Chair)
Senior Associate: Irene Motyl (Language Coordinator)
Associate: Miranda Schmetzer

Other officers of the University offering courses in German:
Professors: Andreas Huyssen (Chair), Mark Anderson, Dorothea von Mucke, Harro Muller
Associate Professors: Stefan Andriopoulos, Michael Eskin
Assistant Professor: Kelly Barry
Senior Lecturer: Richard Korb (Language Coordinator)
Lecturer: Jutta Schmers-Heller

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleavelist.html

Courses in German are designed to develop proficiency in language skills and to present the traditions as well as the current developments in the literature and culture of the German-speaking countries: Austria, Germany, and Switzerland. Courses in Dutch, Finnish, Swedish, and Yiddish are offered by the Department of Germanic Languages. For information contact 319 Hamilton Hall.

The language requirement in German is fulfilled by the completion of V 1202 Intermediate Course II. Entering students with a previous knowledge of German will be placed in the appropriate course on the basis of their CEEB scores or in accordance with their achievements on a placement test taken prior to registration.

Three levels of language instruction are offered with an equal emphasis on reading, writing, oral comprehension, and speaking. The Elementary Full-Year Course, German V 1101-V 1102, includes CD-ROMs that the students will use to supplement their five classroom contact hours. In the Intermediate Course I and II, German V 1201 and V 1202, students work with a broad range of sources, such as newspapers, journals, statistical data, historical texts, literature, etc. These texts help build a foundation in the culture of German speaking countries and at the same time enhance the complexity and accuracy of language use. The content is presented through a wide array of media, such as the Internet, music, film, and art. German V 3001 and V 3002 Advanced German provide opportunity for intensive practice in speaking and writing German. These courses may be taken in reverse sequence. They are recommended as complementary companion courses to lecture/reading-oriented courses.

Satisfactory completion of or exemption from V 1202 is required for enrollment in any of the advanced courses; the sequences in which these should be taken will be determined in consultation with the department.

THE MAJOR IN GERMAN LANGUAGE AND LITERATURE

The courses comprising this program are all taught in German with the twofold objective of combining the study of significant works, literary trends, and cultural manifestations with advanced practice in the use of German as a medium of practical everyday communication and intellectually stimulating discussion or conversation.

Requirements: 10 courses

GERM V 3001-3002 Advanced German Conversation and Composition (3 pts. each)

GERM W 3333x Introduction to German Literature
GERM BC 3061y Seminar

Five one-term advanced literature courses chosen from GERM BC 3027-3050 or their Columbia equivalent GERM W 3443-3675.

A third advanced language course may be substituted for one advanced literature course.

GERM BC 3062x or y Senior Essay

A half-hour oral exit examination is required.

THE MAJOR IN GERMAN STUDIES

This major combines a study of literature with other aspects of German culture and civilization by choosing courses from the social sciences such as history, political science, and economics, and from other humanities dealing with German-speaking regions or communities.

The department will assist and advise students interested in studying in Germany, Austria, or Switzerland. It should be noted that Barnard College is a member of the Berlin Consortium for German Studies and strongly encourages those students wishing to study abroad to do so through this program administered by Columbia University and conducted in association with the Freie Universität Berlin.

Requirements: 14 courses

Two or three of the following language courses or their equivalent:

GERM V 3001-3002, GERM BC 3009, GERM BC 3010

Four or five one-term Advanced Literature and Culture courses numbered:

GERM BC 3011-3061 (or their Columbia equivalent)

One GERM BC 3062x or y Senior Essay*

Six one-term courses in the Social Sciences and Humanities that relate to the German-speaking countries of Europe and define a special field of interest (to be chosen in consultation with the major adviser). Two courses dealing with German history are strongly recommended.

*The major adviser in the German department will work with a second reader in another field if the thesis topic should require it.

THE COMBINED MAJOR: GERMAN AND ANOTHER FIELD

Requirements: 14 courses

Seven courses in each department, including a seminar in one of the departments and a senior essay on a topic bridging both fields.

A student who selects a combined major will establish her special program in consultation with the departments concerned.

THE MINOR IN GERMAN

Requirements: 5 courses

Advanced language courses from GERM V 3001-02 and GERM W 3333.

A minimum of three additional advanced literature courses from GERM BC 3011-3061 or their Columbia equivalent.

STUDY IN BERLIN

Berlin Consortium for German Studies
303 Lewisohn Hall. 854-2559
berlin@columbia.edu
Website: www.columbia.edu/cu/ssp/berlin

Barnard College and Columbia University, in collaboration with John Hopkins University, Princeton University, the University of Chicago, the University of Pennsylvania, and Yale University, offer a program based at the Free University Berlin for students interested in German studies, whether
literature, history, philosophy, or political science. Instruction is in German, and students with majors in all fields who have completed two, or preferably three or more, years of college German (or the equivalent) and who have a 3.0 GPA may apply. To assure validation of credits, students should work closely with their major advisers. Students may study in Berlin for an entire academic year or for the Spring semester only (Autumn only is not available). All students should discuss their proposed programs with their home college advisers and the Dean of Students prior to departure. A bulletin with more complete information about all aspects of the program and an application form are available in the Berlin Consortium Office.

Academic-Year Program
Application deadline: March 1

Spring Program
Application deadline: October 15

Courses Offered at the Berlin Consortium for German Studies

Consult the Berlin Consortium Bulletin for a complete listing of courses available at the Free University Berlin. See sample below:

German I 3335x-I 3336y
The German Language Practicum (3rd year)
Prerequisite: GERM W 1201-W 1202 or the equivalent. The equivalent of GERM W 3335x-W3336y.
6 points.

German I 4335x-I 4336y
The German Language Practicum (Advanced Level)
Prerequisite: GERM W 3335-W3336 or the equivalent.
6 points.

**GERM BC 3006x News and Views: Reception, Reporting, and Video Production**

Advanced students practice and perfect their speaking, writing, and comprehension skills by viewing and analyzing German-language TV broadcasts-news and documentaries-and by researching, writing, producing, and filming their own video programs.

- 3 points

**GERM BC 3010x Current Issues: Media and Politics in Germany and Austria**

Advanced students improve language skills through exploration of political, cultural and intellectual debates and self perceptions in Germany and Austria. Discussion and analysis of print media, Internet, film and T.V.

Prerequisites: GERM V1202 or equivalent.

- 3 points
GERM BC 3012x In Love with Telenovelas

Examines popular culture and language through a German TV series. Advanced students practice and perfect their language skills by examining typical features and intercultural aspects of a German telenovela. Focus on main elements of genre, language, cultural context by comparing different versions.

Prerequisites: Intermediate German II (V1202 or V1225) or equivalent.
3 points

Literature Courses

The literature courses listed below are conducted in German.

GERM BC 3028y Contemporary German Prose Fiction

Study of short prose texts and recent literary developments. Discussions of aspects such as: memory and Germany identity; fantasy and storytelling; borderlands and Berlin in contemporary literature. Readings include works by major writers and younger generation, from Grass and Christa Wolf to Biller, Honigmann, Johnson, Schneider, and Sebald.

Prerequisites: GERM V1202 or the equivalent. Not offered in 2008-2009.
3 points

GERM BC 3031y Major German Poets

Survey of major poets in the German language from classicism to modernism and postmodernism, paying attention to the transition from traditional verse to avant garde forms. Readings from Goethe, Heine, Rilke, Celan, Bachmann. Relevant areas of literary theory will be included.

- E. Grimm

Prerequisites: GERM V1202 or the equivalent. General Education Requirement: Literature (LIT).
4 points

GERM BC 3050x German Migrant Literature

Examination of migration and the nomadic experience in the 19th and 20th centuries. Emphasis on the comprehension and construction of the "other" culture by travelers and migrants in fictional texts; and on questions of orientalism, colonialism, and multiculturalism. Texts by Chamisso, Heine, Seghers, Th. Mann, Oren, Atabay, Deleuze, Said, and Sassen.

Prerequisites: GERM V1202, Sophomore standing or the equivalent or permission of the instructor. Not offered in 2008-2009.
3 points

GERM BC 3057y Close-ups: German Literature and Photography

Discusses the profound influence of photography on modern literature and intellectual debates in the 20th century. Emphasis on creative and critical responses to documentary and aesthetic traditions of this visual medium. Focus on photographic evidence, montage, memory, sensationalism. Authors/Photographers: Benjamin, Rilke, Th. Mann, Tucholsky, Chr. Wolf, Sebald, Sander, Blossfeldt.

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleave/list.html

History encompasses the whole of human experience, helping us understand ourselves in the context of our times and traditions through the study of times and traditions other than our own. History means not only the record of the past but also the discipline of investigating and interpreting the past. The study of history develops habits of critical thinking and effective writing, as well as it cultivates the careful analysis of various types of quantitative and qualitative evidence. It should be of value not only to undergraduates who intend to pursue advanced degrees in the field, but also to students interested in exploring the diversity and complexity of the human past, even as they hone their analytical and expository skills.

requirements for the major

Students who intend to major in history should consult a member of the department in their sophomore year to plan their academic programs. The history major requires a minimum of eleven courses, eight in the area of concentration and three outside the area of concentration.

The three principal areas of concentration are European, American, and Asian history, but majors may, in consultation with their advisers and with the approval of the chair, concentrate in some other field, such as ancient, medieval, Jewish, or African history. *Majors may also, in consultation with their advisers, choose a transnational thematic concentration, such as urban history, empires and colonialism, nationalisms, science and society, money and markets, or gender, sexuality, and the family.

Transnational Thematic Concentrations

Majors in history may now choose to concentrate either in a world region (for example, Asia, Latin America, Europe, the US) or select a transnational thematic concentration (examples are listed below). For both regional and transnational thematic concentrations, two related courses may be chosen from outside the History Department (examples are listed below each concentration).

Urban History
1. BC 3980 World Migration
3. BC TBA Immigrant New York
4. BC 4320 The City in Europe
5. BC 4327 Consumer Culture in Modern Europe
6. BC 4360 London: From Great Wen to World City
7. BC 3496 History of American Cities
8. BC 3825 20th-Century Urbanization in Comparative Perspective
9. BC 4401 Reinventing American Cities
10. BC 4335 Poverty and the Social Order in Europe
11. BC 4332 The Politics of Leisure in Modern Europe
12. W 4417 African-American Urban History
13. W3535 History of the City of New York
14. W3441 Making of the Modern American Landscape

Related courses from other departments

1. AH C3643 The American City: Urban Form and City Planning
2. ARCH V3114 Making the Metropolis: Urban Design and Theories of the City Since 1850

Gender, Sexuality, and the Family

1. BC 3323 European Women in the Age of Revolution
2. BC 3567 American Women in the 20th Century
3. BC 4468 American Woman in the 1920s
4. BC 4466 Progressive Woman, 1890-1920
5. BC 4402 Selected Topics in American Women's History
6. BC 3681 Women and Gender in Latin America
7. BC 4681 Body Histories: Footbinding
8. BC 3840 Gender, Castle, and Nation in South Asia
9. BC 4671 History of the Family in Global Perspective, 1500-Present
10. W4032 Family and Sexuality in Greece and Rome
11. W3460 Topics in the History of American Women and Gender
12. W 4103 Gender, Sex, and Commerce in Europe, 1200-1800
13. W 4886 Gender, Passions, and Social Order in China Since 150
14. W 4120 Witchcraft and the State
15. W 4103 Gender, Sex

Barnard history courses are numbered to reflect the type of course and world region:

By course type:
1000-level: introductory lecture courses
3000-level: other undergraduate lecture courses
4000-level: undergraduate seminars

By world region/epoch:
x000-x050: Ancient
x060-x099: Medieval
x1xx-x199: Early Modern Europe
x2xx-x299: East Central Europe
x3xx-x399: Modern Western Europe
x4xx-x599: United States
x600-x659: Jewish
x660-x699: Latin America
x700-x759: Middle East
x760-x799: Africa
x800-x859: South Asia
x860-x899: East Asia
x9xx-x999: Research, Historiography, Trans-National

The 11 required courses must include:

1. Three introductory courses (i.e., 1000-level courses or their equivalent). For Barnard Class of 1998 onwards, two of the introductory courses must be taken in the field of concentration.
   Students with AP credits may substitute an advanced course(s) for introductory course(s), although AP credits may not be counted toward the 11 required courses.
2. Two seminars
3. The two-semester senior research seminar (HIS BC 4391-92, 4493-94). The Senior Thesis must be taken in sequence over two semesters, beginning in the Fall and continuing through the Spring.

Majors may, with the approval of their advisers, take two of their 11 courses outside the department, provided that such courses are closely related to their concentrations.

American Studies seminars may be substituted for history seminars.

SENIOR RESEARCH SEMINAR

The senior research seminar in which students write their senior essays (30-50 pages), represents the culmination of the undergraduate history major. Students should discuss tentative topics with their advisers by the end of the junior year. Halfway through the first semester of the senior year students must submit a formal prospectus defining the problem under investigation, outlining the issues involved, and identifying the primary and secondary sources consulted. They must draft part of the essay by the end of the Fall semester, then complete their research and writing in the Spring.

REQUIREMENTS FOR THE MINOR

The minor in history requires five courses, four in an area of concentration and one outside the concentration. The five courses must include one seminar. Students planning to minor in history should consult the department chair.

HIST BC 3305y Bodies and Machines

Situates key scientific and technological innovations of the modern era in their cultural context by focusing on the interactions between bodies and machines. Through our attention to bodily experience and material culture, we will explore the ways in which science and technology have shaped and been shaped by the culture of modernity. General Education Requirement: Historical Studies (HIS). Not offered in 2009-2009.  
3 points

HIST BC 3321x Colonial Encounters: Europe and the Culture of Empire

Examines the shaping of European cultural identity through encounters with non-European cultures from 1500 to the post-colonial era. Novels, paintings, and films will be among the sources used to examine such topics as exoticism in the Enlightenment, slavery and European capitalism, Orientalism in art, ethnographic writings on the primitive, and tourism. General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Historical Studies (HIS).

HIST BC 3414x The United States in the World
Examination of the meaning of empire in its relationship to the historical development of what we now call the United States of America. Starting with the thirteen colonies and moving west through time and space, we will examine the relationship of ideas, geography, borders, immigration, culture, economies and the military to the expansion of U.S. power in the world. Using insights from our current "global" moment, we will investigate questions dealing with the control and use of resources, the structure of society, the meaning of political borders, inequality and power.

HIST BC 3457x A Social History of Columbia University
Traces the University's history from 1754 to the present; will focus on institutional interaction with NYC, governance and finance, faculty composition and the undergraduate extra-curriculum; attention also to Columbia professional schools and Barnard Collegio.
Prerequisites: Not offered 2008-09. General Education Requirement: Historical Studies (HIS).
3 points

HIST BC 3468y American Intellectual History Since 1885
Examination of the major ideas engaging American intellectuals from Appomattox to the present, with special attention to their institutional settings. Topics include Darwinism, the rise of the professoriate, intellectual progressivism, inter-war revisionism, Cold War liberalism, and neoconservatism.
Prerequisites: Not offered 2008-09. General Education Requirement: Historical Studies (HIS).
3 points

HIST BC 3494y Era of Independence in the Americas
Comparative examination of colonial independence struggles in the New World, c. 1760-1830. The transition from the monarchical ancient regime to a more or less "republican" order. State formation and the invention of nationality. Special attention to the cases of the United States, Haiti, and Mexico.
3 points
HIST BC 3525y 20th Century Urbanization in Comparative Perspective

Examination of metropolitan growth and development in large cities around the world, placing particular emphasis on cities that have grown rapidly in the 20th century. Examples from South America, Australia, and Asia will be considered as well as cities from the United States and Canada.

3 points

HIST BC 3567x American Women in the 20th Century

A consideration of women’s changing place in modern America; the “family claim”; women in the workplace; educational expansion; the battle for suffrage; social reformers; the sexual revolution; women in the professions; the crisis of depression and war; the feminine mystique; and the new feminism.

HIST BC 3570y Alma Mater: A Social History of American Universities and Colleges

The role of colleges and universities in American life; their changing social and intellectual impact; issues of access, equity, legitimacy and solvency.

Prerequisites: Not offered 2008-09. General Education Requirement: Historical Studies (HIS).

3 points

Middle East, Africa and Latin America

HIST BC 3661y Latin American Civilization II

Explores major themes in Latin American history from the independence period to the present. It will trace economic, political, intellectual, and cultural trends. Particular attention will be given to the enduring issue of social and racial inequality and the ways that the interactions of dominant and subordinate groups have helped shape the course of Latin American history.

Prerequisites: Not offered 2008-09. General Education Requirement: Historical Studies (HIS).

HIST BC 3805y Law and Society in South Asia

Examines law as a critical site from which to explore changing conceptions of self and community from the pre-colonial to the post-colonial periods.

Prerequisites: Sophomore standing.

3 points

HIST BC 3840x Topics in South Asian History

Examines caste and gender as an important lens for understanding the transformations of intimate life and political culture in colonial and post-colonial India. Topics include: conjugality; popular culture violence, sex and the state; and the politics of untouchability.

Prerequisites: Not offered 2008-09. Some background in non-Western history is recommended. General Education Requirement: Historical Studies (HIS). General Education Requirement: Social Analysis (SOC).

3 points

HIST BC 3861x Chinese Cultural History 1500-1800

Introduction to visual and material cultures of China, including architecture, food, fashion, printing, painting, and the theatre. Using these as building blocks, new terms of analyzing Chinese history are explored, posing such key questions as the meaning of being Chinese and the meaning of being modern.

Prerequisites: An introductory Asian history course preferred but not required. General Education Requirement: Historical Studies (HIS).

Seminars

All seminars require permission of the instructor. Enrollment is limited to 15.

**HIST BC 4062x Medieval Economic Life and Thought ca. 1000-1500**

Traces the development of economic enterprises and techniques in their cultural context: agricultural markets, industry, commercial partnerships, credit, large-scale banking, insurance, and merchant culture. Examines usury and just price theory, the scholastic analysis of price and value, and the recognition of the market as a self-regulating system, centuries before Adam Smith.

**Prerequisites:** Permission of the instructor. Enrollment limited to 15. Preregistration required. Not offered 2008-09. General Education Requirement: Historical Studies (HIS).

4 points

**HIST BC 4064y Medieval Science and Society**

The evolution of scientific thinking from the 12th to the 16th centuries, considering subjects such as cosmology, natural history, quantification, experimentation, the physics of motion, and Renaissance perspective. At every point we link proto-scientific developments to social and technological developments in the society beyond the schools.- J. Kaye

**Prerequisites:** Permission of the instructor. Enrollment limited to 15. Preregistration required.

4 points

**HIST BC 4119y Capitalism and Enlightenment**

Traces the lively debates amongst the major European Enlightenment figures about the formation of capitalism. Was the new market society ushering in an era of wealth and civilization or was it promoting corruption and exploitation? Particular emphasis on debates about commerce, luxury, greed, poverty, empire, slavery, and liberty.

- C. Wennerlind

**Prerequisites:** Permission of the instructor. Enrollment limited to 15. Preregistration required. General Education Requirement: Historical Studies (HIS).

**HIST BC 4323y The City in Europe**

A social history of the city in Europe from early modern times; the economic, political, and intellectual forces influencing the growth of Paris, London, Vienna, and other urban centers.

**Prerequisites:** Permission of the instructor. Enrollment limited to 15. Preference to upper-class students. Preregistration required. Not offered 2008-09. General Education Requirement: Historical Studies (HIS).

4 points

**HIST BC 4324y Vienna and the Birth of the Modern**

Examines Vienna from the 1860s through the 1930s as the site of intellectual, political, and aesthetic responses to the challenges of modern urban life. Through readings in politics, literature, science, and philosophy, as well as through art and music, we explore three contested elements of personal identity: nationality, sexuality, and rationality.

**Prerequisites:** Permission of the instructor. Enrollment limited to 15. Preregistration required. Not offered 2008-09. General Education Requirement: Historical Studies (HIS).

4 points

**HIST BC 4327y Consumer Culture in Modern Europe**

The development of the modern culture of consumption, with particular attention to the formation of the woman consumer. Topics include commerce and the urban landscape, changing attitudes toward shopping and spending, feminine fashion and conspicuous consumption, and the birth of advertising. Examination of novels, fashion magazines, and advertising images.

- L. Tiersten

**Prerequisites:** Permission of the instructor. Enrollment limited to 15. Preregistration required. General Education
**Requirement: Historical Studies (HIS).**

**HIST BC 4332y The Politics of Leisure in Modern Europe**

Transformations in the culture of leisure from the onset of industrialization to the present day. Relations between elite and popular culture and the changing relationship between the world work and the world of leisure will be among the topics considered in such settings as the department store, the pub, the cinema, and the tourist resort.

**Prerequisites:** Permission of the instructor. Enrollment limited to 15. Preregistration required. Not offered 2008-09. General Education Requirement: Historical Studies (HIS).

### 4 points

**HIST BC 4360x London: From 'Great Wen' to World City**

Social and cultural history of London from the Great Fire of 1666 to the 1960s. An examination of the changing experience of urban identity through the commercial life, public spaces, and diverse inhabitants of London. Topics include 17th-century rebuilding, immigrants and emigrants, suburbs, literary culture, war, and redevelopment.

**Prerequisites:** Permission of the instructor. Enrollment limited to 15. Preregistration required. General Education Requirement: Historical Studies (HIS).

**HIST BC 4368y History of the Senses**

Examination of European understandings of human senses through the production and reception of art, literature, music, food, and sensual enjoyment in Britain and France. Readings include changing theories concerning the five senses; efforts to master the passions; the rise of sensibility and feeling for others; concerts and the patronage of art; the professionalization of the senses.

**Prerequisites:** Permission of the instructor. Enrollment limited to 15. Preregistration required. Not offered 2008-09. General Education Requirement: Historical Studies (HIS).

**HIST BC 4375y Boundaries and Belonging: Gender and Citizenship in Modern History**

Examines the ways gender has constituted citizenship in modern western history. Topics include suffrage; national belonging; marriage and military service for women and LGBT citizens; social citizenship and the welfare state; “postpolitical citizenship” through economics and consumption; statelessness and migration; cosmopolitan citizenship; and parity, quotas and representation.

**Prerequisites:** Permission of the instructor. Enrollment limited to 20 students. Sophomore standing. Preregistration required. Not offered 2008-09. General Education Requirement: Historical Studies (HIS).

### 4 points

**HIST BC 4391x-BC4392y Senior Research Seminar**

Individual guided research and writing in history and the presentation of results in seminar and in the form of the senior essay. See Requirements for the Major for details.

**Prerequisites:** Open to Barnard College History Senior Majors. General Education Requirement: Historical Studies (HIS).

**HIST BC 4402y Selected Topics in American Women's History**

Critical examination of recent trends in modern U.S. women's history, with particular attention to the intersection of gender, sexuality, class, and race. Topics will include: state regulation of marriage and sexuality, roots of modern feminism, altered meanings of motherhood and work, and changing views of the body.

**Prerequisites:** Permission of the instructor. Enrollment limited to 15. Preregistration required. Not offered 2008-09. General Education Requirement: Historical Studies (HIS).
4 points

HIST BC 4411y Race in the Making of the US

Conders what role "race" plays in U.S. culture, politics, economics and foreign policy. Beginning with the origins of racial slavery, examines how, when and whether the subsequent development of racial systems - and challenges to them - shaped historical developments. Through a survey of theories about "race relations" and contemporary discussions about affirmative action, immigration, empire and rights, ponders the possibilities for a "colorblind" society in the United States.

- E. Esch
Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required. General Education Requirement: Historical Studies (HIS). General Education Requirement: Social Analysis (SOC).

HIST BC 4592y Maritime History Since the Civil War
Critical consideration of the maritime aspects of American life and culture since the Civil War: rise of American sea power, peaking of American maritime commerce and labor; historic seaports and coastal areas as recreational resources; marine science and environmentalist concerns in shaping recent American maritime policies. Seminar will make extensive use of the web for resources and communication.
4 points

HIST BC 4651x or y Jewish Tales from Four Cities: The Immigrant Experience in New York, Buenos Aires, Paris and London
Examines Jewish immigrant experience in New York, Buenos Aires, London, and Paris, c.1880-1930. Focus on the Old World origins of the arrivals, the formation of neighborhoods, ethnic institutions, family, work, cultural expressions, and relations with the rest of society. Based on readings and primary research (newspapers, letters, songs, photographs, etc.).
Prerequisites: General Education Requirement: Historical Studies (HIS)
Permission of the instructor. Enrollment limited to 15. Preregistration required. Not offered 2008-09.
4 points

HIST BC 4669y Inequalities: Interdisciplinary Perspectives on Latin America
Latin America has long been characterized by extreme and enduring inequalities- of class, income, race, and ethnicity. Examines patterns of inequality from different disciplinary perspectives, both historically and in the present. Examines not only causes and solutions but how scholars have approached inequality as an intellectual problem.
- N. Milianich
Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required. A general background on Latin America recommended but not absolutely required. Course limited to 15 students.

HIST BC 4903x Reacting to the Past III: Science and Society

4 points

HIST BC 4905x Capitalism, Colonialism, and Culture: A Global History

From Indian Ocean worlds of the seventeenth century, to Atlantic world slavery, to the establishment of colonies in Asia and Africa during the nineteenth century, colonization was critical to the development of metropolitan ideas regarding politics and personhood. This seminar will examine these histories, along with emerging constrictions of race and gender, as precursors to debates about human rights and humanitarianism in the twentieth century.
4 points

HIST BC 4907y Edible Conflicts: A History of Food

Conflicts emerging from the production and consumption of food from prehistoric to modern times. Settled agriculture and the significance of geography and social stratification in determining food consumption; ideologies of social status and "taste" in Europe; impact of knowledge about health and hygiene on European dietary habits; drink in diets and social life; dining out in European culture; role of transport and technology in consumer culture; food and the welfare state; mass production and globalization of food.
4 points

HIST BC 4908x or y History of Environmental Thinking

A consideration of how experiences of the natural world and the meaning of "nature" have changed over the past three
centuries. Follows the development of the environmental sciences and the origins of environmentalism. The geographical focus will be Europe, with attention to the global context of imperialism.
4 points

With the proliferation of human rights institutions over the past half century and the central place of human rights in current debates about social justice, global equity, the role of war crimes tribunals and truth commissions, the problems of humanitarian intervention, or the changing role of global economic institutions, human rights standards have become crucial touchstones of contemporary ethics and politics. The program in human rights studies engages students in the emergent interdisciplinary discussion of rights, providing them with a knowledge of the theory and practice of human rights, stimulating critical examination of the historical and conceptual antecedents, selection and formulation, enforcement and violation, political and discursive uses of human rights, and allowing them the opportunity to reflect on a set of beliefs and practices fundamental to the shaping of their world. This interdisciplinary program is designed to be pursued alongside a major in one of the departments with a disciplinary or area studies focus-including, but not limited to Africa & African Diaspora Studies, American Studies, Anthropology, Asian and Middle Eastern Cultures, Comparative Literature, English, French, German, History, Italian, Political Science, Psychology, Religion, Slavic, Sociology, Spanish, and Women's Studies.

Human Rights Studies
219 Milbank Hall
www.barnard.edu/humright

**REQUIREMENTS FOR THE COMBINED MAJOR**

A minimum of six courses in the Human Rights Program, including V3001x Introduction to Human Rights and at least two other courses from among those designated "core courses," three "related" courses; and a complete major in a relevant department. Where courses in the Human Rights Program also satisfy departmental requirements, no more than three Human Rights courses may count toward the major. Besides the six courses in Human Rights Program, students will be asked to submit a senior thesis or project in the area of human rights, written in the major department. Those interested in a combined major should consult with the Director or other members of the Committee on Human Rights Program. See the websites www.barnard.edu/humright and www.columbia.edu/cu/humanrights, for updates on course offerings.

Core Courses for Human Rights

HRTS BC 1025y Human Rights in Theory and Practice
Provides a broad overview of the rapidly expanding field of human rights. Lectures on the philosophical, historical, legal and institutional foundations are interspersed with weekly presentations by frontline advocates from the U.S. and overseas. This course is recommended prior to taking Introduction to Human Rights or choosing human rights as a major. - J. Martin

Undergraduate instruction in Italian has long been fully and successfully integrated among the various undergraduate schools-Barnard College, Columbia College, and the School of General Studies. All courses are open to Barnard students. The Advanced Italian courses, though part of the requirement for a major in Italian, are open to all qualified students whose main goal is to improve their competence in the language.

A major in Italian offers the advantages of closely supervised work for a small number of students. Through the senior tutorial, students pursue research in a chosen area of Italian culture under the guidance of a specialist.

The courses given in English have no prerequisites and are open to students majoring in other departments who nevertheless wish to study Italian literature and culture.

The Barnard Italian office is located in 320 Milbank, and the Columbia department is housed in 502 Hamilton. Graduate courses are open to qualified students with permission of the instructor.

REQUIREMENTS FOR THE MAJOR

The courses in Italian are designed to develop proficiency in all the language skills and to present the literary and cultural traditions of Italy. The program of study is to be planned as early as possible.

The following courses are required unless advanced standing is attained in the Department placement examination:

ITAL V 1101-V 1102 Elementary I & II, or
ITAL V 1121 Intensive Elementary Italian
ITAL V 1201-V 1202 Intermediate I & II, or
ITAL V 1203 Intensive Intermediate Italian

Ten courses above V 1202 or V 1203 are required for the major, including:

ITAL V 3333-V 3334 Introduction to Italian Literature I & II, or
ITAL W 4502-W 4503 Italian Cultural Studies I & II
ITAL V 3335 Advanced Italian I
ITAL V 3336 or V 3337 Advanced Italian II
ITAL V 3993y Senior Thesis Seminar

plus at least five more courses in Italian including and numbered above ITAL V 3333-V 3334.
REQUIREMENTS FOR THE MINOR

A minimum of five courses is required for the minor, to be selected from courses including and numbered above ITAL V 3333-V 3334.

LANGUAGE REQUIREMENT

The language requirement can be fulfilled with ITAL V 1101-V 1102 and V 1201-V 1202 or V 1121-V 1203 (or their equivalents). Students who have taken courses in Italian elsewhere (whether in high school, in college, or both) but not at Barnard or Columbia, must take the Italian placement test before registering for any Italian course. The test is given during the preregistration period in 502 Hamilton. Please call 854-8312 or 854-2308 for hours and date.

Literature and Culture Courses

**ITAL V 3642y Italian Film: Imagining the Nation**
Explores the representation of national identity in Italian cinema from the silent era to the present. Focuses on how both geography and history are used to construct an image of Italy and the Italians. Films by major neo-realist directors (Rossellini, De Sica, Visconti) as well as by leading contemporaries (Moretti, Amelio).

3 points

**ITAL V 3993y Senior Thesis Seminar**
Advanced research seminar for senior Italian majors aimed at guiding them in the writing of their thesis. Readings and
discussions will encourage reflection on the significance of doing scholarship within a specific disciplinary context as well as the challenges and rewards of interdisciplinary research. Thesis topic to be chosen in consultation with the instructor; a second faculty member may be the primary director of the thesis.

- N. Moe

Prerequisites: Permission of the instructor required. Not offered in 2008-2009.

ITAL G 4110x Representations of the South in Modern Italian Literature

Literary representations of the Italian South from the late nineteenth century to the present. Special attention to the symbolic importance of the South in modern Italian culture. Short stories and novels by Verga, D’Annunzio, Pirandello, Alvaro, Levi, Lampedusa, and Sciascia.

Prerequisites: Open to qualified undergraduates with permission of instructor. Not offered in 2008-2009.

3 points

ITAL W 4252x Antonio Gramsci: Literature, Culture, Power

Examines the writings of Antonio Gramsci and their influence on literary criticism, cultural studies, and filmmaking. Includes works by Luigi Pirandello, Giuseppe Tomasi di Lampedusa, Pier Paolo Pasolini; criticism by Raymond Williams, Edward Said, Stuart Hall; films by Luchino Visconti, the Taviani Brothers, Pasolini.

3 points

ITAL W 4502x Italian Cultural Studies I: From Unification to World War I

An interdisciplinary investigation into Italian culture and society in the years between Unification in 1860 and the outbreak of World War I. Drawing on novels, historical analyses, and other sources including film and political cartoons, the course examines some of the key problems and trends in the cultural and political history of the period. Lectures, discussion and required readings will be in English. Students with a knowledge of Italian are encouraged to read the primary literature in Italian.

General Education Requirement: Historical Studies (HIS).

Religion: David Halivni (Lucius N. Littauer Professor of Classical Jewish Civilization), David Shtatz (Adjunct Professor)

For a complete list of faculty on leave see:  
http://www.barnard.edu/provost/facleavelist.html

The program in Jewish Studies enables undergraduates to acquire a thorough knowledge of the most important aspects of Jewish culture, civilization, and history in an interdisciplinary setting. The purpose of the program is to help the student identify resources for constructing rigorously detailed and methodological majors.

The program begins from the assumption that a meaningful major can be most profitably framed in one of the existing departments such as, but not limited to, American Studies, Ancient Studies, Anthropology, Art History, Asian and Middle Eastern Cultures, Classics, Comparative Literature, English, History, Music, Religion, Sociology, and Women's Studies. The program director would then certify that the subject matter of that major contains enough interest in Jewish subjects and is rigorous enough in methodology.

Printable Version

Jewish Studies  
219 Milbank Hall  
854-2597  
www.barnard.edu/jewstuds

REQUIREMENTS FOR THE COMBINED MAJOR

A minimum of 6 courses in Jewish Studies, including Introduction to Judaism REL V2620 or the equivalent, and a complete major in a relevant department are required for a combined major in Jewish Studies. Where courses in Jewish Studies also satisfy departmental major requirements, the student must complete at least three courses over and above what is normally required for the major. Students are encouraged to consult the offerings of other relevant departments and frame a major by centering on the methodological requirements of that major and utilizing the advising capacities of that department. Students, especially those who plan to continue in graduate Jewish Studies of any kind, are strongly encouraged to seek competence in Hebrew and other languages which were used by Jews in their particular area of concentration. Where possible, the courses in Jewish Studies should be taken across the major areas of Jewish history: Ancient (biblical); Hellenistic and Talmudic; Medieval; and Modern. Besides the six courses specifically in Jewish Studies, students must submit a Senior Thesis or project in the area of Jewish Studies, written in the major department or in conjunction with JST BC 3998 Directed Research.

http://www.barnard.edu/provost/facleave/list.html

GENERAL INFORMATION
Students who have special placement problems, or are unclear about their level, should make an appointment
with a faculty member or the chair.

Two help rooms, one in 404 Mathematics and one in 333 Milbank, will be open all term (hours will be posted on
the door and the Web) for students seeking individual help and counseling from the instructors and teaching
assistants. No appointments are necessary. However, resources are limited and students who seek individual
attention should make every effort to come during the less popular hours and to avoid the periods just before
midterm and final exams.

COURSES FOR FIRST-YEAR STUDENTS
The systematic study of Mathematics begins with one of the following alternative sequences: Calculus I, II, III, IV
(Math V 1101–2, V 1201–2); Honors Math A-B (Math V 1207–8).

Credit is allowed for only one of the calculus sequences. The calculus sequence is a standard course in
differential and integral calculus. Honors Mathematics III-IV is for exceptionally well-qualified students who have
strong advanced placement scores. It covers second-year Calculus (Math V 1201–2) and Linear Algebra (Math V
2010), with an emphasis on theory.

Calculus II is NOT a prerequisite for Calculus III, so students who plan to take only one year of calculus may
choose between I and II or I and III. The latter requires a B or better in Calculus I and is a recommended option for
some majors.

Introduction to Higher Mathematics (MATH V 2000) is a course that can be taken in their first or second year by
students with an aptitude for mathematics who would like to practice writing and understanding mathematical
proofs.

PLACEMENT IN THE CALCULUS SEQUENCE

College Algebra and Analytical Geometry is a refresher course for students who intend to take Calculus but do
not have adequate background for it.

Advanced Placement: Students who have passed the advanced placement test for Calculus AB with a grade of 4
or 5 or BC with a grade of 4 receive 3 points of credit. Those who passed Calculus BC with a grade of 5 will
receive 4 points of credit or 6 points on placing into Calculus III or Honors Math III and completing with a grade of
C or better.

Calculus I, II, III: Students who have not previously studied calculus should begin with Calculus I. Students with 4
or higher on the Calculus AB or BC advanced placement test may start with Calculus II. Students with 5 on the
Calculus BC test should start with Calculus III.

Honors Mathematics A: Students who have passed the Calculus BC advanced placement test with a grade of 5, and who have strong mathematical talent and motivation, should start with Honors Mathematics III. This is the most attractive course available to well-prepared, mathematically talented first-year students, whether or not they intend to be mathematics majors. Students who contemplate taking this course should consult with the instructor. If this is not possible ahead of time, they should register and attend the first class.

Requirements for the Major

The major program in both mathematics and applied mathematics are appropriate for students who plan to continue their training in graduate school. Students who begin with Honors Mathematics III-IV will need to plan their succeeding course carefully with the help of an adviser.

For a major in Mathematics: 14 courses as follows:

Four courses in calculus or Honors Mathematics III-IV, including Advanced Placement Credit. Six courses in mathematics numbered at or above 2000, and four courses in any combination of mathematics and cognate courses. The courses in mathematics must include:

- V 2010 Linear Algebra (or Honors Mathematics A-B)
- W 4041-2 Introduction to Modern Algebra*
- W 4061-2 Introduction to Modern Analysis*
- V 3951x, 3952y Undergraduate Seminar in Mathematics (at least one term)

However, students who are not contemplating graduate study in mathematics may replace one or both of the two terms of MATH W 4061-W 4062 by one or two of the following courses: MATH V 2500, V 3007, or W 4032. In exceptional cases, the chair will approve the substitution of certain more advanced courses for those mentioned above.

*Note: It is strongly recommended that the sequences Math W 4041-2 and W 4061-2 be taken in separate years.

For a major in Applied Mathematics: 14 courses plus Junior Seminar in Applied Mathematics:

Four courses in calculus or Honors Mathematics A-B, including Advanced Placement Credit.

- V 2010 Linear Algebra
- W 4061 Introduction to Modern Analysis
- APMA E 4901 Seminar in Applied Mathematics: Fall, Junior year
- APMA E 4903 Seminar in Applied Mathematics: Fall, Senior year
- APMA E 3900 Undergraduate Research in Applied Mathematics

(APMA E 3900 may be replaced by the combination APMA E 4902/4904, second semester of the junior and senior applied mathematics seminar, when these are offered or, with approval, another technical elective for seniors that involves an undergraduate thesis or creative research report.)

Additional electives, to be approved by the Applied Math Committee, e.g.:

- V 2500 Analysis and Optimization
- V 3007 Complex Variables
- V 3027 Ordinary Differential Equations
- V 3028 Partial Differential Equations
- V 3030 Dynamical Systems
- W 4032 Fourier Analysis
- SIEO W 3658 Probability

2 of 4
APMA E 4300  Numerical Methods

For a major in Mathematics-Statistics: 14 courses:

Five courses in mathematics:

V 1101, V 1102 and V 1201 Calculus I, II and III or equivalent
MATH V 2010 Linear Algebra
MATH V 2500 Analysis and Optimization

Five courses in statistics:

STAT W 1211 Introduction to Statistics B
STAT W 3000 Introduction to Statistics: Probability Models or
SIEO W 4105 Probability

STAT W 3659 or
W 4107 Statistical Inference

STAT W 4315 Linear Regression Models
IEOR E 4106 Introduction to Operations Research: Stochastic processes or
SIEO W 4606 Elementary Stochastic Processes

One course in computer science that requires substantial work in programming.

Three courses of electives: An approved selection of advanced courses in mathematics, statistics, applied mathematics, computer science, or mathematical methods courses in physical or social sciences, including biology, economics, and physics.

Students should plan to include a senior thesis or the Undergraduate Seminar in Mathematics in their program, in consultation with their advisors.

Note: Students must obtain approval from an adviser in each of the two departments before selecting electives. Students should take MATH V 2010 Linear Algebra in the second semester of the second year. With the approval of their adviser, students may replace the two requirements STAT W 3000 or SIEO W 4105 and STAT W 3659/4107 with the 6-point course STAT W 4109.

For a major in Mathematics-Computer Science:

15 courses as follows:

Courses in mathematics:

V 1101, V 1102, V 1201, V 1202 Calculus I, II, III, IV (including AP Credit)
or V 1207, V 1208 Honors Math A-B (Note A)
V 2010 Linear Algebra
V 3020* Number Theory and Cryptography (Note B)
W 4041 Introduction to Modern Algebra
W 4061* Introduction to Modern Analysis (Note C)
V 3951 or V 3952 Undergraduate Seminars in Mathematics

Courses in computer science:

W 1004 Computer Science I (or AP credit)
W 1007 Computer Science II
W 3137 Data Structures and Algorithms
W 3157 Computer Science III (Advanced Programming)
W 3203 Discrete Mathematics
W 3261 Computability and Models of Computation
W 3827 Fundamentals of Computer Systems
W 4231* Analysis of Algorithms I
W 4241* Numerical Algorithms and Complexity I

*Electives—take two of four; in exceptional cases, other courses may be substituted with the approval of departmental representatives of both departments.

Note A: The Honors sequence also fulfills the MATH V 2010 Linear Algebra requirement.

Note B: May substitute MATH V 3021 or BC 2006 or MATH V 1103.

Note C: May substitute MATH V 2500, V 3007, V 4032, V 3386, or W 4051.

Students seeking to pursue a Ph.D. program in either discipline are urged to take additional courses, in consultation with their advisers.

For a major in Economics and Mathematics, see the catalogue.

REQUIREMENTS FOR THE MINOR

For a minor in Mathematics or Applied Mathematics: Six courses from any of the courses offered by the department except Math W 1003 College Algebra and Analytic Geometry, Math V 1101/2 Calculus I/II.

Printable Version

Barnard Catalogue 2008-2009
MATH W 1003x or y College Algebra and Analytic Geometry

For students who wish to study calculus but do not know analytic geometry. Algebra review, graphs and functions, polynomial functions, rational functions, conic sections, systems of equations in two variables, exponential and logarithmic functions, trigonometric functions and trigonometric identities, applications of trigonometry, sequences, series, and limits.

Prerequisites: Score of 550 on the mathematics portion of the SAT completed within the last year or the appropriate grade on the General Studies Mathematics Placement Examination.

MATH V 1101x or y Calculus I

The Help Room on the 3rd floor of Milbank Hall (Barnard College) is open during the day, Monday through Friday, to students...
seeking individual help from the instructors and teaching assistants. (SC)

Prerequisites: see Courses for First-Year Students. Functions, limits, derivatives, introduction to integrals. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

### MATH V 1202x or y Calculus IV

Multiple integrals, Taylor's formula in several variables, line and surface integrals, calculus of vector fields, Fourier series. (SC)

**Prerequisites:** MATH V1102, V1201, or the equivalent. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

3 points
MATH V 1207x-V1208y Honors Mathematics A-B

The second term of this course may not be taken without the first. Multivariable calculus and linear algebra from a rigorous point of view. Recommended for mathematics majors. Fulfills the linear algebra requirement for the major. (SC) Prerequisites: (see Courses for First-Year Students). Recitation Section Required. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

MATH V 3901x-V3902y Supervised Readings In Mathematics
Guided reading and study in mathematics. A student who wishes to undertake individual study under this program must present a specific project to a member of the staff and secure his or her willingness to act as sponsor. Written reports and periodic conferences with the instructor. Prerequisites: the written permission of the staff member who agrees to act as sponsor (sponsorship limited to full-time instructors on the staff list), as well as the permission of the director of undergraduate studies. The written permission must be deposited with the director of undergraduate studies before registration is completed. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
2-3 points.

MATH V 3951x-V3952y Undergraduate Seminars In Mathematics
The subject matter is announced at the start of registration and is different in each section. Each student prepares talks to be given to the seminar, under the supervision of a faculty member or senior teaching fellow.
Prerequisites: two years of calculus, at least one year of additional mathematics courses, and the permission of the director of undergraduate studies. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

MATH V 3997x-V3998y Supervised individual research

For specially selected mathematics majors, the opportunity to write a senior thesis on a problem in contemporary mathematics under the supervision of a faculty member.

Prerequisites: The written permission of the faculty member who agrees to act as a supervisor, and the permission of the director of the undergraduate studies.

3 points

MATH W 4007x Analytic Number Theory

A one semester course covering the theory of modular forms, zeta functions, L-functions, and the Riemann hypothesis. Particular topics covered include the Riemann zeta function, the prime number theorem, Dirichlet characters, Dirichlet L-functions, Siegel zeros, prime number theorem for arithmetic progressions, SL (2, Z) and subgroups, quotients of the upper half-plane and cusps, modular forms, Fourier expansions of modular forms, Hecke operators, L-functions of modular forms.

Prerequisites: Math V3007

9 of 13
### MATH W 4052x Introduction to Knot Theory

The study of algebraic and geometric properties of knots in $\mathbb{R}^3$, including but not limited to knot projections and Reidemeister's theorem. Seifert surfaces, braids, tangles, knot polynomials, fundamental group of knot complements. Depending on time and student interest, we will discuss more advanced topics like knot concordance, relationship to 3-manifold topology, other algebraic knot invariants.

**Prerequisites:** Math V2010 or equivalent and Math W4041. Recommended: Math W4051 or equivalent. 3 points

MATH G 4073x Quantitative Methods In Investment Management

Surveys the field of quantitative investment strategies from a "buy side" perspective, through the eyes of portfolio managers, analysts and investors. Financial modeling is often involves avoiding complexity in favor of simplicity and practical. All necessary material scattered in finance, computer science and statistics is combined into a project-based curriculum, which give students hands-on experience to solve real world problems in portfolio management. Students will work with market and historical data to develop and test trading and risk management strategies. Programming projects are required to complete this course.

- M. Smirnov

Prerequisites: Knowledge of statistics basics and programming skills in any programming language.

MATH W 4386x-W4387y Geometrical Concepts In Physics

Material from topology and differential geometry with illustrations of their use in electrodynamics, general relativity, and
Yang-Mills theory. In particular topological and differential manifolds, tensors, vector bundles, connections, and Lie groups are covered.

Prerequisites: MATH V1202 or the equivalent and V2010. Not offered in 2008-2009.
3 points

**MATH W 4391x-W4392y Quantum Mechanics: An Introduction for Mathematicians and Physicists**

This course will focus on quantum mechanics, paying attention to both the underlying mathematical structures as well as their physical motivations and consequences. It is meant for undergraduates with no previous formal training in quantum theory. The measurement problem and issues of non-locality will be stressed.

Prerequisites: Math V1202 or the equivalent and Math V2010.
3 points

REQUIREMENTS FOR THE MAJOR

Major programs are established individually with a concentration in one of these disciplines: art history, history, literature, philosophy, romance philology, music, or religion. Each student, after consultation with the chair, chooses an adviser in her area of concentration who guides her in developing a sequence of courses to be taken in the field.

A minimum of 11 courses are required for the major in Medieval and Renaissance Studies:
Five courses in the area of concentration;
Two history courses for students who are not concentrating in history;
Two courses in the other disciplines mentioned above for those who are;
Two electives in areas outside the concentration, to be chosen in consultation with the adviser; and
MRS BC 3998x and MRS BC 3999y, Directed Research, a two-semester program of interdisciplinary research leading to the writing of the senior essay.
(In some cases, a senior seminar in one of the departments may be substituted for MRS BC 3998x or 3999y.)

Students are required to write an interdisciplinary senior essay based on two semesters of research in their field of concentration and in another discipline, carried out under the supervision of their area adviser and another from the second discipline. The choice of topic for this senior project and the appointment of a second adviser are determined in consultation with the area adviser and the chair of the program.

In addition to the language used to fulfill the general four-semester requirement for graduation, the student must have completed two semesters of a second language (or the equivalent) relevant to her area of concentration.
The following courses represent only a sample of those that can be taken to satisfy the program requirement. Other relevant courses may be taken with the permission of the chair.

**No minor is offered in Medieval and Renaissance Studies.**

Courses of Instruction

MEDR BC 3998x-BC3999y Directed Research for the Senior Project

Two semesters of supervised interdisciplinary research in Medieval or Renaissance Studies terminating in the writing of a senior essay. The program of research is determined in consultation with the chair and under the guidance of the area adviser. It is supervised by the latter and an adviser from the second discipline involved in the project.

Columbia Department of Music: 621 Dodge 854-3825
www.barnard.edu/music

REQUIREMENTS FOR MAJOR

Program of Study: to be planned with the department consultant before the end of the sophomore year. Prospective music majors should complete the prerequisites by the end of their sophomore year and are encouraged to complete them by the end of their first year. By the end of her first year as a music major she should select a faculty adviser.

Prerequisite: BC 1001 or 1002, MUSI V 1002 Fundamentals of Western Music, and MUSI V 1312 Introductory Ear-training. Prospective music majors are advised to satisfy the prerequisites prior to their declaration as majors or before the end of their sophomore year. This requirement may be fulfilled either through successful completion of the courses or satisfactory performance on examinations administered each semester by the department.

Courses: At least 40 points, including MUSI V 2318-V 2319 Diatonic Harmony and Counterpoint; V 3321-V 3322 Chromatic Harmony and Counterpoint; four semesters of ear-training, unless the student is exempt by exam; the following two history courses: V 3128 History of Western Music I: Middle Ages to Baroque and V 3129 History of Western Music II: Classical to 20th Century; and at least three 3000- or 4000-level electives in your area of interest (theory, history, composition, or ethnomusicology). The remaining points are chosen from 2000- to 4000-levels. No more than 6 points of 2000-level courses and no more than 4 points of instrumental or vocal lessons will count toward the major.

Senior Project: Working with her adviser, a major must complete an original project in her senior year. Normally, it may be the expansion of a paper done in a 4000-level course (as long as it deals with primary sources), a composition, or a recital.

Keyboard Proficiency: Music majors will be required to take a keyboard proficiency exam, which must be arranged by making an appointment with a member of the piano faculty, immediately upon declaration of the major. Those who do not pass the exam will be required to take MUSI W 1517x-W 1518y, for 1 point each term, which will count against the maximum 4 points allowed toward completion of the major.
Languages: For students who plan to do graduate work in music, the study of German, French, Italian, and/or Latin is recommended.

Note: With the permission of Gail Archer, Barnard Director, students may take lessons at the Manhattan School of Music or the Juilliard School. For non-majors, there is a six semester limit, but majors may continue for the remainder of their program.

Practice Rooms: Piano practice rooms are available, at a nominal fee, upon application to the Music Department in 319 Milbank. Application should be made during the first week of classes. Preference in assigning hours is given to students taking piano instruction, majors, and concentrators, in order of application. The organ studio in St. Paul's Chapel is available for organ practice. Arrangements should be made with Mary Monroe, Associate in Organ Performance, during the first week of classes.

REQUIREMENTS FOR THE MINOR

Courses for the minor: Four terms of theory, four terms of ear-training, and two terms of history.

Performance Activities
Participation in the following activities is open to all members of the University community.

Music majors are urged to join at least one of the groups. Students who wish to receive course credit may register for the courses as listed.

Columbia University Orchestra and Chamber Ensemble. Jeffrey Milarsky, conductor. See MUSI V 1591x-1592y for the audition schedule and description of activities.

Chamber Ensemble. Deborah Bradley, Director of the Music Performance Program. See MUSI V 1598x-1586y for audition information and description of activities.

Barnard-Columbia Chorus and Chamber Singers. Gail Archer, director. See MUSI V 1593x-1594y and MUSI V 1595x-1596y for audition information and description of activities.

Columbia University Jazz Ensemble. Christopher Washburne, director. See MUSI V 1618x-1619y for audition information and description of activities.

World Music Ensemble. See MUSI V1625x-V1626y for audition information and description activities.

Instrumental and Vocal Instruction. With appropriate prior approval, qualified students may take music lessons, one course per term, for a maximum of six terms. Only the music major and minor may take lessons every term.

Collegium Musicum. Auditions are held at the beginning of each term. The aim of the Collegium Musicum is to perform neglected and unfamiliar vocal and instrumental music. Activities are supervised by the graduate student director, and the Collegium usually gives two public concerts each semester.

MUSI V 1591x-V1592y University Orchestra

Prerequisite: an audition to be held during registration period, by appointment at 618 Dodge. Contact the department for further details (854-6689). Students should bring two short works, or movements of longer works, of different stylistic periods; they will also be asked to read brief orchestral or chamber music excerpts at sight. The orchestra performs throughout the academic year in works spanning all periods of music including contemporary compositions. Distinguished guest soloists sometimes perform with the orchestra, and qualified student soloists may also have the opportunity either to perform or read concertos with the orchestra. Staff positions: a few persons interested in managerial work may gain experience as orchestra librarian and personnel manager.

MUSI V 1593x-V1594y Barnard-Columbia Chorus

Prerequisite: auditions by appointment made at first meeting. Contact Barnard College, Department of Music (854-5096). May be taken for Pass credit only. Membership in the chorus is open to all men and women in the University community. The chorus gives several public concerts each season; both on and off campus, often with other performing organizations. Sight-singing sessions offered. The repertory includes works from all periods of music literature. Students who register for chorus will receive a maximum of 4 points for four or more semesters.

Introductory Theory and Ear-Training Courses

MUSI V 1002x Fundamentals of Western Music

Corequisite: MUSI V1312. A student may place out of V1002 with a score of 5 on the Theory Placement Examination given on the first day of class. Similarly, a student may place into a higher level of the co-requisite by passing the Ear Training Placement Test, offered on the first day of the V1312 class. The basic elements of music to be studied in the Fundamentals of Western Music course with the aim of developing musicianship include: notation, dictation, sight-singing, transposition, aural recognition of the simpler forms, triad identification, cadence types, and voice-leading in two parts.

- Zimmerli, Patrick Susser, Peter

General Education Requirement: The Visual and Performing Arts (ART).

3 points.
MUSI V 1312x or y-V1312y Introductory Ear Training

A student may place into a higher level of this course by passing an examination given on the first day of the class. V1312 is an introduction to basic skills in sight reading. Instruction includes reading rhythms in simple meter, solfege recitation, and sight-singing simple melodies.

Lab Required.

Main Theory Sequence

MUSI V 2318x-V2319y Diatonic Harmony and Counterpoint, I and II

Prerequisite: MUSI V1002 or the equivalent. Corequisite: an ear-training class (MUSI V1312, V2314-V2315, V3316-V3317, or W4318-W4319). "Diatonic" is a two-semester course that constitutes the first year of the two-year sequence of courses in music theory required of all music majors and concentrators (the "main theory sequence," of which the second year is Music V3321-3322y; see below). N.B. - All students, without exception, who wish to take Diatonic must pass an entrance examination given on the first day of class in each section. (For a detailed description of the Diatonic entrance exam, and advice on preparing for it, contact the Director of Undergraduate Theory Instruction.) Assigned readings, musical analysis, and compositional exercises, designed to teach the following: (1) analysis and composition of melodies; (2) strict (species) counterpoint in two voices; (3) the idiomatic use of all diatonic chords in major and minor keys, and tonizations of secondary key areas; (4) principles of figured bass; (5) four-part writing; (6) harmonization of melodies, e.g., chorales; (7) basic principles of musical form. Each semester includes some work in tonal composition, e.g., minuets for piano modeled on examples by Haydn and Mozart.

- Feld, Marion Voss, Carlton

MUSI V 3321x-V3322y Chromatic Harmony and Counterpoint, I and II

Continuation of MUSI V2318-V2319. Placement in this class is determined by an exam given in the first class meeting of V2318-V2319 (see above). "Chromatic" is a two-semester course that follows on from Music V2319 and constitutes the second year of the two-year sequence of courses in music theory required of all music majors and concentrators (the "main theory sequence," of which the first year is Music V2318-2319y; see above). Assigned readings, musical analysis, and compositional assignments, designed to teach the following: (1) tonal counterpoint in the style of Bach, in selected contrapuntal forms (e.g., chorale prelude, invention, fugue); (2) more advanced harmonic and voice-leading techniques, including sequences and "chromatic harmony"; (3) forms and genres associated with the Classical and Romantic periods (e.g., sonata-allegro form; Lied).

- Arjomand, Ramin Hisama, Ellie

Prerequisites: MUSI V2318-V2319 and satisfactory completion of any two terms of ear training. Corequisites: An ear-training class (MUSI V2314-V2315, V3316-V3317, or W4318-W4319). Lab Required.

MUSI V 2014x Popular Music of the Americas: Country

A survey of the social, musical, and commercial history of "country and western" music and its antecedent and related genres in the U.S. and as a global style, focusing on the history of recording technology, popular imaginings of rusticity, race, class, and gender in country music, and the lived experience of country music's listeners and creators in various eras and locales. Class projects will include the production of a series of radio shows (by groups of students) for the actual broadcast. General Education Requirement: The Visual and Performing Arts (ART).

- A. Fox
Prerequisites: W1123 or the equivalent, or permission of the instructor. Not offered in 2008-2009.

3 points

MUSI V 2016 Music In the United States

Main currents in American musical life, with emphasis on ragtime, jazz hymnody, spirituals, blues, popular song, and major works of Copland, Ives, Ellington, Gershwin, Billings, Foster, and Reich.

3 points

MUSI V 2016y Jazz

The musical and cultural features of jazz, beginning in 1900.
Prerequisites: HUMA W1123 or the equivalent. General Education Requirement: The Visual and Performing Arts (ART).

MUSI V 2026y The symphony

The symphony orchestra as a musical and social institution in the 18th through 20th centuries, and a survey of the music written for it in those periods.

Prerequisites: HUMA W1123 or the equivalent. General Education Requirement: The Visual and Performing Arts (ART). Not offered in 2008-2009. 3 points

MUSI V 2140 Music and Musical Life in Soviet Russia

Music in the context of Soviet society and culture, with emphasis on compositions of Shostakovich and Prokofiev. Also some consideration of folk and religious music, and of other composers' concert music.

Not offered in 2008-2009. 3 points

MUSI V 2170 Music and Dance from Romanticism to Mark Morris

An exploration of the music-dance relationship from Romanticism to Mark Morris. Specific topics include Romanticism, Tchaikovsky, the Ballets Russes, Copland-Graham, Stravinsky-Balanchine, Jazz/African-American traditions, Cage-Cunningham, and Mark Morris. Special attention will be paid to composer-choreographer collaboration; the interdependence of the musical and choreographic arts; and the role each art has played in the formal and aesthetic/historical development of the other.

MUSI V 2205x Midi Music Production Techniques

An introduction to the potential of digital synthesis by means of the MIDI (Musical Instrument Digital Interface). Teaches proficiency in elementary and advanced MIDI techniques. Challenges some of the assumptions about music built into the MIDI specifications and fosters a creative approach to using MIDI machines.

- B. Garton

Prerequisites: HUMA W1123 or the equivalent. General Education Requirement: The Visual and Performing Arts (ART). 3 points

MUSI W 2340 History of Electronic and Computer Music

Prerequisite: HUMA W1123 or the equivalent. The history, technology, and literature of electronic music over the past century with a particular focus on Columbia's foundational role. Students will be directly engaged using new technologies.

Not offered in 2008-2009. 3 points

MUSI V 2500x Women and Music

Explores the complex relationships of women and Western art music from the Middle Ages to the 20th century. Women are studied not only as creators and performers but also as patrons and muses, and through their musical representations in the repertoire.

- R. Rosenberg

Prerequisites: HUMA W1123 or the equivalent. Not offered in 2008-2009. 3 points

MUSI V 2582x Jazz improvisation: theory, history and practice

This course offers an introduction to jazz improvisation for instrumentalists. Through recordings, transcriptions, daily performance and selected readings, students will actively engage the history of jazz through their instruments and intellect. The idea of improvisation will be explored in an historical context, both as a musical phenomenon with its attendant theory and mechanics, and as a trope of American history and aesthetics. The course will explore improvisation in jazz as 'statements
within frameworks, and investigate the crucial historical junctures when these musical frameworks broadened to accommodate new approaches and options. Further, these moments will be explored in their social and historical contexts in order to understand how societal and cultural factors affect the way musicians play. The class will seek to answer the following questions: How does one construct meaning in improvisation? How does one build a musical narrative? What tensions exist between innovation and tradition in jazz improvisation? How does one draw on one's own musical history and tastes in order to develop an individual voice? How does one perform purely in the moment? Can a musician's playing be dishonest? The goal is to provide the student not only with the instrumental skills required to become a proficient jazz improvisor (thus serving the performance ensembles in which some of these students will go on to participate) but to do so in a way that is informed by the history of the music and the social contexts in which it evolved. While this course will be performance based, it will include strong music theory and music history components. The course will examine the development of jazz improvisation chronologically, yet will also pause to examine certain aesthetic concepts central to building compelling jazz improvisations.

This class is for instrumentalists who wish to deepen their understanding of the theory, history and practice of jazz improvisation. The history of jazz will be used as a prism through which to view approaches to improvisation, from the cadences of the early blues through the abstractions of Free Jazz and beyond. The student will be exposed to the theory and vocabularies of various jazz idioms, which they will also learn to place in their social and historical contexts. Finally the student will be challenged and encouraged to develop an individual voice, at once informed by the theory and history of jazz improvisation and expressive of the student's musical identity.

**General Education Requirement: The Visual and Performing Arts (ART).**

**MUSI V 3115x Monteverdi**

A study of the major works of Claudio Monte Verdi. Focuses on the social and cultural forces that led to the dissolution of Renaissance polyphony and the emergence of opera.

3 points

**MUSI V 3120 From Source To Sound: the Interpretation of Medieval Music**

Fulfills the requirement of either the 3000-level advanced theory elective or the nontonal course. Prerequisites: HUMA W1123 or the equivalent. Methods, problems, and possibilities for recreating the oldest extant body of music in Western Europe, that of the Middle Ages from ca. 1000 to ca. 1300. By directly confronting musical manuscripts, theoretical treatises, and performance contexts from the period, students develop their ability to think critically and historically about the music of the past and modern attempts to describe it.

3 points

**MUSI V 3127x Bach Vocal Music**

Analysis of the vocal music of Johann Sebastian Bach in its historical and cultural context with particular focus on the sacred cantatas, the St. Matthew Passion and the B minor Mass.

- G. Gerbino

**AHMM V 3132 John Cage and the New York School**

Prerequisites: HUMA W1123 or the equivalent. This course examines the music of John Cage and the other New York School composers—Morton Feldman, Earle Browne, and Christian Wolff-postwar New York City.

3 points

**MUSI V 3138x The music of Brahms**

Survey of the music of Brahms, examining a wide range of genres as well as his historical and cultural position.

Prerequisites: HUMA W1123 or the equivalent, and the ability to read musical notation. **General Education Requirement: The Visual and Performing Arts (ART).** Not offered in 2008-2009.

3 points

**MUSI V 3145 Music for piano**
Surveys and analyzes the major literature for piano and other keyboard instruments by 17th through 21st century composers. We will address issues of performing, competitions, historical performance practices; compare the major “piano schools” (Russian, German, French, American), and consider the history and evolution of the instrument. Live performances inside and outside the classroom. Not offered in 2008-2009.

3 points

MUSI V 3158 Music, Race and Nation
The course examines ways in which musical forms, canons, and histories are created and constructed as part of an “economy of symbolic goods” that incorporates and is mediated by conceptions of race, ethnicity, and national identity. The course will examine cases from US and international popular music, 20th and 21st Century classical music, film music, and conceptions of “world music,” focusing on how the creation and reception of forms embodies the intersections of the gendered dynamics of racial formation with debates over national character. Reading knowledge of music is required.

3 points

MUSI V 3163 Sonic texts of the Black Atlantic
The course examines the importance of music and improvisation to the arts of the Black Atlantic, proceeding in semi-chronological fashion in presenting creative writing, recorded performances, and visual forms in which music is a central metaphor. Critical/historical texts are used to support topics that include African oral narrative, music during American chattel slavery, minstrelsy, the music of Harlem Renaissance composers, bebop and the world of the Beats, free improvisation, hip-hop, classical music and opera, and contemporary avant-garde digital technologies of text and sound. Reading knowledge of music is not required.

3 points

MUSI V 3165 Jazz and improvised music after 1950
This course examines the musical forms, techniques, and intellectual and social issues surrounding Jazz and improvised music after 1950, via listening and reading assignments, guest musicians and scholars, and representative live performances. Topics include genre and canon formation, gender, race and cultural nationalisms, debates around art and the vernacular, globalization, and media reception. Reading knowledge of music not required.

3 points

MUSI V 3168 The American musical
Historical and critical survey of American musical theater from the late nineteenth century to the present, with a focus of selected major works.

Prerequisites: HUMA W1123 or the equivalent. Not offered in 2008-2009.

3 points

MUSI V 3244 Tonal Composition
Prerequisite: MUSI V3321 or equivalent. Training in composing in tonal styles, including: Baroque fugues; Classical minuets, variations, and sonata-form movements; Romantic songs and preludes.

3 points

MUSI V 3248x Interactive Music Composition
An introduction to programming techniques and musical concepts in computer music interactivity, where students create software that responds to live musical performance or environmental activity. The MAX/MSP programming platform is used to extend existing proficiencies in MIDI and digital audio, and to introduce techniques designed for interactive environments. Interactive works from the worlds of music, visual art, and performance are also studied. Particular emphasis is placed on creating works for the Disklavier, a unique digitally controlled acoustic piano. Projects are developed at the Computer Music Center, and final projects are presented in a class concert. – G. Lewis

Prerequisites: This class has been revised and is now being offered as G4601. Not offered in 2008-2009.

3 points

MUSI V 3250y Introduction To Music Cognition
Prerequisite: MUSI V2318-V2319 or the equivalent. Study of music cognition from the perspective of music theory, with interdisciplinary connections to psychoacoustics, theoretical linguistics, and, especially, cognitive psychology.

- F. Lerdahl

3 points

MUSI V 3302x (Section 001) Introduction To Set Theory
Fulfills the requirement of either the 3000-level advanced theory elective or the nontonal course. A study of the basic principles of set theory through the writings of Schoenberg, Babbitt, Forte, Martino, Lewin, et al. Concepts illustrated with examples from late 19th- and early 20th-century repertory.
- Feld, Marlon

**Prerequisites:** MUSI V3322 and either V3126 or V3379, or instructor's permission.

3 points

**MUSI V 3305y Theories of Heinrich Schenker**

An examination of Schenker's concepts of the relation between strict counterpoint and free writing; "prolongation"; the "composing-out" of harmonies; the parallels and distinctions between "foreground," "middle ground," and "background," and the interaction between composing-out and thematic processes to create "form."

- D. Cohen

**Prerequisites:** Prerequisite: MUSI V3322 or instructor's permission. Fulfills the requirement of either the 3000-level advanced theory elective or the nonrational course. Not offered in 2008-2009.

3 points

**MUSI V 3310y Techniques of 20th-Century Music**

Materials, styles, and techniques of 20th-century music. Topics include scales, chords, sets, atonality, serialism, neoclassicism, and rhythm.

**Prerequisites:** MUSI V3322 or instructor's permission.

3 points

**MUSI V 3330 Advanced Counterpoint**

The study of baroque counterpoint in the style of J. S. Bach; general aspects of voice-leading; dances, inventions; canons; expositions of fugues.

- Alfred Lerdahl

**Prerequisites:** MUSI V3322 or instructor's permission. Fulfills the requirement of the 3000-level advanced theory elective. Not offered in 2008-2009.

3 points

**MUSIV 3370y Orchestration**

Analysis of techniques in works from the past and explorations into the deeper understanding of orchestral principles that our current knowledge of acoustics and our techniques of sonic analysis offer. Combines empirical and theoretical knowledge in an effort both to understand the masterworks of the past and to provide a framework of each composer's future personal explorations.

- F. Levy

**Prerequisites:** the instructor's permission. Not offered in 2008-2009.

3 points

**MUSI V 3385 Analysis of popular music**

Analysis of western popular music including pop, rock, soul, electronic dance music, and hip hop through recent approaches. Topics will include the applicability of analytical techniques designed for western art music, the role of notation, relationship of text and context, and the roles of popular music in identity formation.

3 points

**MUSI V 3395x Listening to Hip-Hop**

An interdisciplinary exploration of hip-hop music and culture, including MCing, DJing, breakdancing, and graffiti, from its beginnings to the present through historical, analytical, and critical perspectives. The course's primary focus will be on listening and on sound; readings will help to situate particular pieces of music, artists, and genres within their cultural, political, and social contexts.

- E. Hisama

**Prerequisites:** W1123. Masterpieces of Western Music Not offered in 2008-2009.

3 points

**MUSI V 3420x The Social Science of Music**

An introduction to the field of ethnomusicology in the context of the intellectual history of music scholarship.

- L. Ellen Gray

**Prerequisites:** HUMA W1123 or the equivalent. General Education Requirement: Social Analysis (SOC). General Education Requirement: The Visual and Performing Arts (ART).
### MUSI V 3430 Music and Nationalism

This course studies the relationship between music and nationalism, from both aesthetic and political perspectives. The broad historical emergence and development of modern nationalism and related themes of race, gender, globalization, and indignity, are explored through musical case studies focusing on western and non-western, elite, popular, and folk styles and genres. Reading knowledge of music is not required.

3 points

### MUSI V 3432 Music and Place

An introduction to contemporary work on music and place from an ethnomusicological perspective. It situates ethnomusicological work and specific musical case studies within an interdisciplinary theoretical framework that draws from the fields of cultural anthropology, cultural studies, and performance studies.

- E. Gray

3 points

### MUSI V 3435 Music and literature in Latin America

This course is about the relationship between popular music and literature in Latin America. It covers such topics as the relationship between the lettered city and popular culture as well as orality and the written word. In the course we will read novels and poetry by authors who have also been composers and/or musicologists and explore the production of composers who have also been recognized as important literary figures.

- A. Ochoa

3 points

### MUSI V 3440x Survivors' Music

This course will examine the role of music in the lives of survivors of traumatic experiences and discover why music is a special expressive resource for such people. Examples from survivors' music about the nature of traumatic events that other expressive and documentary resources do not yield will be utilized. Course is interdisciplinary and the use of these examples to explore these issues is from a social, cultural, psychological and musicological perspective. Geared towards advanced undergraduates and graduate students from all disciplines.

- J. Pilzer

### MUSI V 3460y Music and the Post-Socialist state

This course analyzes changes in music traditions in the post-socialist context since the fall of the Soviet Union. The focus is on the relationship between music and politics, socialist/post-socialist cultural policy, the rise of popular music genres, new conceptualizations of "folk" music, and the influence of technologies, media, and privatization on music.

*Not offered in 2008-2009.*

3 points

### MUSI V 3462y Music, Gender and Performance

This seminar explores relationships between gender, music and performance from the perspective of ethnomusicology, cultural anthropology, critical music studies, feminist and queer theory and performance studies. We examine debates around issues of sex and gender and nature and culture through the lens of musical performance and experience. Some questions we consider...
include: In what ways is participation in particular music dictated by gendered conventions? What social purpose do these
delinations serve? What might music tell us about the body? What is the relationship between performance and the ways in
which masculinity and femininity, homosexuality and heterosexuality are shaped? How can we think about the concept of nation
via gender and music? How might the gendered performances and the voices of musical celebrities come to represent or
officially "speak" for the nation or particular publics? How does music shape our understanding of emotion, our experience of
pleasure?

- E. Gray

Prerequisites: There are no prerequisites for this course.

**MUSI W 4115y (Section 001) Music and Theatre under the Ancien Régime**

Explores the wealth of music theatre produced in France from 1660s to 1760s. Our focus will be the analysis of interaction of
music, text, dance and staging in opera, but we will also consider spoken dramas and literary texts referenced in the operas,
and situate them in the social and political context of absolutist France. Some of issues addressed will be Why the Opéra
became the prime arena of sovereign representation; Why the role of adversary was conventionally played by a woman;
Correspondences between social organization and theatrical representation; and Why these works have been revived in recent
years. Prof. Burgess is renowned both for his research in this area and as a performer with the Paris-based company Les Arts
Florissants.

- Geoffrey Burgess

Prerequisites: W1123; Music majors need V3128-9; or permission of the instructor. Not offered in 2008-2009.

3 points

**MUSI W 4320y Philosophies of Listening**

Selected introduction to major topics, debates and fields of study in the growing musicological and philosophical literature on
listening. What are our various modes of listening, and how are they organized? To what degree is our listening shaped by
metaphor and intentionality? How is listening tied to subjectivity? How does musical listening differ from everyday listening and
what does this imply for the future of music? These and other questions will be addressed through close readings of the major literature (and supplementary texts) including Adorno, Barthes, Calvino, Cavaglieri, Derrida, Forster, Freud, Kafka, Lacoue-Labarthe, Levinson, Nancy, Scruton, Schaeffer, and others. Intensive reading and sustained critical responses are required weekly for all participants; a final research paper will be required.

- B. Kane
**Prerequisites:** HUMA W1123, Music Humanities or instructor's permission. Not offered in 2008-2009.
3 points

MUSI G 4360y Analysis of Tonal Music

Fulfills the requirement of the 3000-level advanced theory elective. This course was previously offered as V3360, Pre-Tonal and Tonal Analysis. Detailed analysis of selected tonal compositions. This course, for advanced undergraduates and beginning graduates, is intended to develop understanding of tonal compositions and of theoretical concepts that apply to them, through study of specific works in various forms and styles.

- D. Cohen
**Prerequisites:** MUSI V3321 or the equivalent.

MUSI W 4320y Philosophies of Listening

Selected introduction to major topics, debates and fields of study in the growing musicological and philosophical literature on listening. What are our various modes of listening, and how are they organized? To what degree is our listening shaped by metaphor and intentionality? How is listening tied to subjectivity? How does musical listening differ from everyday listening and what does this imply for the future of music? These and other questions will be addressed through close readings of the major literature (and supplementary texts) including Adorno, Barthes, Calvino, Cavarero, Derrida, Forster, Freud, Kafka, Lacoue-Labarthe, Levinson, Nancy, Scruton, Schaeffer, and others. Intensive reading and sustained critical responses are required weekly for all participants; a final research paper will be required.

- B. Kane
Prerequisites: W1123 (Music Humanities) or the instructor's permission. Not offered in 2008-2009.
3 points

MUSI W 4400 Popular Music in Latin America

An introduction to popular music traditions and styles in 20th century Latin America, including Argentina, Brazil, Chile, Colombia, and Uruguay.
3 points

MUSI W 4405y Music and language

- A. Fox
3 points

MUSI W 4415y Musical traditions and modern society in Japan

3 points

MUSI W 4420x Music and Property

This course raises the questions 1) What does it mean to “own” music? 1) In what senses can music be conceptualized as “property”? How do divergent understandings of music’s status as “property” shape contemporary debates and discourses in the particular areas of disputes over “illegal downloading” of copyrighted music and the “repatriation” of Native American musical recordings as “cultural property”? Several relevant major recent statements will be considered and responses discussed. Case studies from ethnomusicological, anthropological, media studies and legal literatures engage issues of appropriation, the role of new technologies in shifting the terrain of musical ownership will be studied. Hands-on look at the Columbia Center for Ethnomusicology's ongoing projects to repatriate historic recordings of Native American music (currently "owned" by Columbia University) to the Navajo and Inupiat tribes.

- A. Fox
Prerequisites: Approval of the instructor.

MUSI G 4465y Performance: Theory & Ethnography

This course provides an introduction to performance studies with a particular focus on the ethnography of expressive culture. Performance has been theorized from a wide range of academic disciplines including: cultural/social anthropology, linguistics, ethnomusicology, musicology, performance and cultural studies, and literary theory. Additionally, in the past decade, performance and performativity have been useful cross-disciplinary tools for thinking through categories such as gender, sexuality, identity and race and concepts of representation and power. This course treats performance (from performance in the arts to theories of performativity in the everyday) as a lens through which to understand relationships between expressive aesthetic practices and social life. What might we learn from thinking about ethnography as performance, history as performance, or text as performance? What challenges do theories of performance pose to the ethnographic study of music and the reception of music? What unique challenges might the study of musical process and artistry pose to performance theory? We will get at some of these questions through situating contemporary performance ethnographies within the context of an historical genealogy of theories of performance from the perspective of the social sciences and the
humanities.
- E. Gray

Prerequisites: Permission of the instructor. Not offered in 2008-2009.
3 points

MUSI G 4505 Jazz Arranging and Composition
Course designed to train students to arrange and compose in a variety of historical jazz styles, including swing, bebop, hard bop, modal, fusion, Latin, and free jazz.
Prerequisites: V2318-19 Diatonic Harmony or equivalent.
3 points

An examination of the new jazz that emerged shortly after the middle of the 20th century. The seminar will include the work of musicians such as Ornette Coleman, Cecil Taylor, Don Cherry, Anthony Braxton, Carla Bley, Albert Ayler, and the Arts Ensemble of Chicago; the economics and politics of the period; parallel developments in other arts; the rise of new performance spaces, recording companies, and collectives; and the accomplishments of the music and the problems it raised for jazz performance and criticism. - J. Szwed
Prerequisites: Permission of the instructor.

MUSI W 4540y Histories of Post-1960’s Jazz

Historiographical issues surrounding the performance of jazz and improvised musics after 1960. Topics include genre and canon formation, gender, race, and cultural nationalism, economics and infrastructure, debates around art and the vernacular, globalization, and media reception. Reading knowledge of music is not required.
Prerequisites: HUMA W1123 or the equivalent. Not offered in 2008-2009.
3 points

MUSI G 4601x Musical Interactivity

The course explores programming techniques and concepts in computer music interactivity, or the creation of compositions that incorporate software that responds to live musical performance, environmental activity, and other real-world contingencies. The Max/MSP programming platform is used for MIDI, digital audio, and other interfacing techniques. Interactive works from the worlds of music, visual art, and performance are also presented. Basic knowledge of computer operation is required; basic knowledge of MIDI, Max/MSP, and/or digital audio is recommended.

- G. Lewis

Prerequisites: Basic computer operating system knowledge.

MUSI G 6440x Survivors’ Music:

This course will examine the role of music in the lives of survivors of traumatic experiences and discover why music is a special expressive resource for such people. Examples from survivors’ music about the nature of traumatic events that other expressive and documentary resources do not yield will be utilized. Course is interdisciplinary and the use of these examples to explore these issues is from a social, cultural, psychological and musicological perspective. Geared towards advanced undergraduates and graduate students from all disciplines.

- J. Pilzer

Prerequisites: Permission of the instructor.

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleaveplist.html

This major provides a strong background in the biological underpinnings of behavior and cognition, and is intended for students who plan to pursue a research career in neuroscience or a related discipline. Students electing this major are exposed to basic courses in Biology and Psychology and to advanced courses in neuroscience and behavior. Majors must choose one of two areas of concentration. The behavior concentration places greater emphasis on behavioral and systems neuroscience, while the cellular concentration places greater emphasis on cellular and molecular neuroscience.

All majors engage in two semesters of independent research during the senior year while taking the Senior Research Seminar. In the junior year, majors must begin developing a plan for the senior research project. There is a meeting for junior majors during the spring semester to begin this process.

Neuroscience and Behavior majors must have completed the introductory courses in Biology, Chemistry, and Psychology by the beginning of their junior year, and maintained at least a B- average in those courses.

As an alternative to the Neuroscience and Behavior major, students may pursue an interdisciplinary program by majoring in either Biology or Psychology and taking a minor in the other discipline.

There are no minors in Neuroscience and Behavior.

NSBV BC 3593x-BC3594y Senior Research Seminar: Neuroscience and Behavior

Discussion and conferences on a research project culminate in a written and oral senior thesis. Each project must be supervised by a scientist working at Barnard or at another local institution. Successful completion of the seminar substitutes for the major examination.

- R. Silver, R. Romeo

Prerequisites: Open to senior Neuroscience and Behavior majors who submit a research proposal which has been approved by the course instructor and the project supervisor. Permission of the instructor. This is a year-long course. 4 points

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleave历list.html

The department offers a wide range of courses designed to acquaint the student with traditional and contemporary work in ethics, metaphysics, aesthetics, theory of knowledge, philosophy of science, logic, and the history of philosophy. The courses are designed to facilitate student participation. The student is expected to develop a competence in techniques of conceptual analysis, argument, and the interpretation of texts.

Although it is not required for the major or for the minor, students who have not had previous training in philosophy are advised to take one of PHIL BC 1001–1006. Credit for only one of PHIL BC 1001–1006 will be given for the major or for the minor.

Philosophy
326 Milbank Hall
854-4689
www.barnard.edu/philosophy

REQUIREMENTS FOR THE MAJOR

A major in Philosophy consists of at least 10 courses, as follows:

1. One course on ancient or early medieval philosophy:
   PHIL V 2101 History of Philosophy I: Pre-Socrates through Augustine
   PHIL V 3121 Plato
   PHIL V 3131 Aristotle

2. One course on early modern philosophy:
   PHIL V 2201 History of Philosophy II: Aquinas through Kant
   PHIL V 3237 Early Modern Philosophy

3. One course in logic:
   PHIL V 3411 Introduction to Symbolic Logic

4. One course in moral philosophy:
   PHIL V 3701 Moral Philosophy
   PHIL V 3653 Mind and Morals

5. One of the following courses:
   PHIL V 4501 Epistemology
   PHIL V 3601 Metaphysics

6. PHIL BC 3900 Senior Seminar

7. Either: Senior Essay (PHIL BC 3950 and 3951) or one advanced seminar (above 4000) and one elective beyond the two stipulated in 6 (below).

8. Two electives in addition to the eight courses stipulated above.
REQUIREMENTS FOR THE MINOR

Five courses constitute a minor in philosophy. The courses must be selected in consultation with the department chair. Only one of PHIL 1001-1005 may be counted among the five.

PHIL BC 1003x Philosophy and Human Existence
Philosophy and its rootedness in fundamental concerns of human existence. What is goodness? What is the self? What can we know? Is life meaningful or meaningless?

- K. Makkai

*General Education Requirement: Reason and Value (REA).*

**PHIL BC 1004x or y Truth, Value, and Knowledge**

Are there many kinds of truth, or just one? Or none? What can we know? Are value judgments true or false? Is inquiry itself guided by values?

**PHIL BC 1005x or y Morality, Self, and Society**

How should we, as individuals, live? What would a just society be? Can disputes about moral values be settled by reason?

*General Education Requirement: Reason and Value (REA).*

**PHIL BC 1401y Elementary Logic**

Explicit criteria for recognizing valid and fallacious arguments, together with various methods for schematizing discourse for the purpose of logical analysis. Illustrative material taken from science and everyday life.

- C. Mendelson

**PHIL V 2003x or y Introduction to the Philosophy of Art**

An introductory course in the philosophy of art. What is art? Should we try to define art? Should photographs count as art? What does it mean to have an aesthetic experience? Can one person's judgment be better than another's? Why do we enjoy watching tragedies or horror movies?

**PHIL V 2100y Philosophy of Education**

Drawing on classical and contemporary sources, discussion will focus on the conditions necessary to produce free and responsible citizens of a just and democratic society. Readings from Plato, Rousseau, Dewey, and others.

- Patricia Rohrer

*General Education Requirement: Reason and Value (REA).*

**PHIL V 2101x History of Philosophy I: Pre-Socratics through Augustine**

Exposition and analysis of the positions of the major philosophers from pre-Socratics through Augustine.

*General Education Requirement: Reason and Value (REA).*
PHIL. V 2110x or y Philosophy and Feminism

Is there an essential difference between women and men? How do questions about race relate to questions about gender? Is there a "normal" way of being "queer"? An introduction to philosophy and feminism using historical and contemporary texts, art, and public lectures. Focus includes essentialism, difference, identity, knowledge, objectivity, and queerness.

*General Education Requirement: Reason and Value (REA).*

3 points

PHIL. V 2120y Existentialism

Study of (human) being in Sartre and in Beauvoir, against the background of Descartes, Kant, Husserl, and Heidegger.

- K. Makkai

3 points

PHIL. V 2201y History of Philosophy II: Aquinas through Kant

Exposition and analysis of the positions of the major philosophers from Aquinas through Kant.

*General Education Requirement: Reason and Value (REA).*

3 points

PHIL. V 2301x or y History of Philosophy III: Kant through Nietzsche

Exposition and analysis of texts by Kant and major 19th-century European Philosophers.

*Prerequisites: None. General Education Requirement: Reason and Value (REA).*

3 points

PHIL. V 3237x or y Early Modern Philosophy

Study of one or more of the major philosophers from the Renaissance through the 18th century. Sample topics: substance and matter; bodies, minds, and spirits; identity and individuation; ideas of God; causation, liberty and necessity; skepticism; philosophy and science; ethical and political issues. Sample philosophers: Descartes, Spinoza, Leibniz, Conway, Locke, Berkeley, Hume, Kant.

*Prerequisites: One philosophy course or permission of the instructor. General Education Requirement: Reason and Value (REA).*

3 points

PHIL. V 3264x Hegel

Examines major themes of Hegel's philosophy, emphasizing his social and political thought. Topics include Hegel's critique of Kant, the possibility of metaphysics, the master-slave dialectic, and the role of freedom in social institutions. Readings from Fichte illuminate how Hegel's thought develops out of Kant's idealism.

*Prerequisites: PHIL. V2201 or W3251. Not offered in 2008-2009.*
3 points

PHIL V 3351x Phenomenology and Existentialism

Survey of selected works of Husserl, Heidegger, Sartre, and Merleau-Ponty. Topics include intentionality, consciousness and self-consciousness, phenomenological and hermeneutical method, the question of being, authenticity and inauthenticity, bad faith, death, and the role of the body in perception.

- T. Carman

Prerequisites: Two prior philosophy courses. Enrollment limited to 30.

PHIL V 3352x or y Recent European Philosophy

Reading and discussion of Heidegger, Sartre, Merleau-Ponty, and Foucault. Topics include the crisis in metaphysics, the question of being, the structure of human existence, subjectivity, motivated irrationality, perception, the body, sociality, art, science, technology, and the disciplinary organization of modern society.

3 points

PHIL V 3353x or y European Social Philosophy

Historical survey of European social philosophy from the 18th to the 20th century, with special attention to theories of capitalism and the normative concepts (freedom, alienation, human flourishing) that inform them. A further topic will be the relation between society and the state. Readings from Smith, Hegel, Marx, and Weber.

Prerequisites: One philosophy course or permission of the instructor. Not offered in 2008-2009.

3 points

PHIL BC 3398x or y Independent Study

Open to students who wish to pursue a project on an individual basis. The study consists in a combination of readings and papers over one semester under the direction of an appropriate instructor. The project and enrollment for the course are both subject to departmental approval.

1-3 points.

PHIL V 3411x or y Introduction to Symbolic Logic

Sentential and first-order logic; the significance of a formal system and its use for analysis of meaning and language. Technical exercises are combined with analysis and parsing of English texts. A weekly required discussion section in addition to lectures.

General Education Requirement: Quantitative and Deductive Reasoning (QUA).

4 points

PHIL V 3525x or y Skepticism

Contemporary and 20th-century responses to skepticism, the view that some of our ordinary claims to knowledge are open to systematic doubt. Representative figures include Heidegger, Austin, Wittgenstein, and Cavael.

Prerequisites: One philosophy course or permission of the instructor. Not offered in 2008-2009.

3 points

PHIL V 3551x or y Philosophy of Science

Philosophical problems within science, and about the nature of scientific knowledge, from 17th- 20th centuries. Sample problems: space, time, and motion; causes and forces; scientific explanation; theory, law, and hypothesis; induction; verification and falsification; models and analogies; scientific revolutions.

Prerequisites: One philosophy course or permission of the instructor. General Education Requirement: Reason and Value (REA). Not offered in 2008-2009.

3 points
PHIL V 3501y Metaphysics

Systematic treatment of some major metaphysical topics, e.g., necessity, causality, particulars and universals, personal identity. Readings from classical and contemporary authors.

3 points

PHIL V 3740x or y Hermeneutics, History, and the Human Sciences

Readings and discussion pertaining to the role of interpretation in our understanding of texts, institutions, and practices. Special emphasis on the nature of historical knowledge and competing contemporary accounts of the political and epistemological status of the humanities and social sciences. Authors include Dilthey, Gadamer, Foucault, Bourdieu.

3 points

PHIL BC 3900x Senior Seminar

Intensive study of a philosophical issue or topic, or of a philosopher, group of philosophers, or philosophical school or movement.

4 points
PHIL BC 3950x Senior Essay
A substantial paper, developing from an Autumn workshop and continuing in the Spring under the direction of an individual advisor.
4 points

PHIL BC 3951y Senior Essay
A substantial paper, developing from an Autumn workshop and continuing into the Spring under the direction of an individual adviser.
4 points

PHIL G 4227y Spinoza
A close study of the Ethics and parts of the Theologico-Political Treatise and other writings. Spinoza's Medieval antecedents and his relation to other 17th-century philosophers.
3 points

PHIL W 4333x or y Wittgenstein
The later work of Wittgenstein (centrally his Philosophical Investigations), with special attention to its influence on current debates.
Prerequisites: Two Philosophy courses above 3000 and permission of the instructor. Enrollment limited.
3 points

PHIL G 4340x or y Topics in Phenomenology
Central issues in phenomenology—for example, intentionality, perception, and embodiment—in Husserl, Sartre, and Merleau-Ponty, and with reference to relevant contemporary literature in philosophy and psychology.
3 points

PHIL G 4345x or y Aesthetics: Experience and Expression
The nature and philosophical significance of aesthetic experience, with readings from Kant, Schiller, Schelling, Nietzsche, Heidegger, Merleau-Ponty, and others. Topics include: perception, discernment and taste; evaluation and criticism; genius and creativity; and art as communication of the otherwise inexpressible.
3 points

PHIL G 4659y Critical Social Theory
Close reading of selected texts in twentieth-century Critical Theory. Topics include rationalization, reification, alienation, and the nature of capitalism and modernity. Theorists may include Weber, Lukacs, Horkheimer, Habermas, and others.
Prerequisites: Prerequisites for undergraduates: PHIL 3353 (or equivalent) and permission of instructor. Enrollment limited to 20 students. Not offered in 2008-2009.
3 points

PHIL G 4600x or y Philosophical Texts in German
Careful reading and translation of a classic German philosophical text to be chosen by the course participants in consultation.
with the instructor. Emphasis on the special problems of translating philosophical prose.  
Prerequisites: Open to students with the equivalent of two years of college German. Not offered in 2008-2009.

DEGREE REQUIREMENT

Students admitted as first-year students must complete two semesters of Physical Education at Barnard. One semester must be passed in the first year and the requirement must be completed by the end of the junior year. Only one course per semester to count towards fulfilling the requirement. Sophomore and junior transfers are required to complete one semester of Physical Education at Barnard. Failure to complete the requirement by the specified deadlines will result in a failing grade. Physical Education courses are graded pass/fail based on attendance and participation.

Health Status: Students with permanent or temporary disabilities will be individually advised and placed in a suitable activity, based upon the recommendations of the Director of Health Services or Disability Services.

Curriculum: The curriculum is organized and administered by the faculty of the Department of Physical Education. Instruction is offered in the areas of sports, aquatics, fitness, mind/body, and self-paced courses. Courses are designed to promote the development and enjoyment of lifetime motor skills, which will afford opportunities to realize one's potential and to provide vigorous exercise to release tensions often generated by strong academic commitments and intense urban life.

Intramurals: The Physical Education Department offers an extensive intramural program, which features basketball, floor hockey, indoor soccer, tennis, and volleyball. The program offers different levels of competitive play and emphasizes participation in a friendly atmosphere; activities are open to all members of the college community. For more information, contact the Director of Intramurals, 206 Barnard Hall, or call 854-6959.

Recreation: Recreational use of the gymnasium, swimming pool, track, and weight room is available at specified times. All students, faculty, and staff are encouraged to use the facilities. In addition, the Physical Education Department sponsors special recreational activities, such as fun runs and sports tournaments, throughout the semester.

Intercollegiate Athletics: The Barnard/Columbia Athletic Consortium provides the opportunity for eligible undergraduate women to compete together as members of University-wide athletic teams. Fifteen varsity sports are currently sponsored: archery, basketball, crew, cross country, fencing, field hockey, golf, lacrosse, soccer, softball, swimming & diving, tennis, indoor and outdoor track & field, and volleyball. Governed by NCAA and Ivy League rules, all teams are Division I. Competition is scheduled with teams from the Ivy League, the metropolitan area, and the eastern region. In addition, students are eligible to qualify for regional and national championships. Physical Education credit may be earned through satisfactory participation on a varsity team. For more information, contact Valerie Richardson, Associate Director of Athletics, Columbia-Dodge Fitness Center, 854-8373.

Registration: Registration takes place at the beginning of each semester. Information 314 Physical Education is available in the Physical Education office or on the department's web site. Incoming students receive information in their registration packets. After confirming registration with the Physical Education Department, students should include the Physical Education course by number, section, title, and I.D. number on final programs filed with the Registrar.

Cross Registration: An agreement between the Department of Physical Education of Barnard College and
Columbia College permits limited enrollment of Barnard students in selected Columbia courses. Barnard students must successfully complete one Physical Education course at Barnard before they may elect a Columbia Physical Education course. Columbia College and School of Engineering students may register for designated Barnard courses during Barnard's registration period. Other Columbia University students must receive permission from the Physical Education Department to register before filing their final programs with the Registrar. Registration is not open to graduate students.

PHED BC 1692x and y Qigong
An introduction to traditional Chinese callisthenics which emphasizes the harmony of breathing and movement; typically used for health promotion, martial arts conditioning and in combination with meditative techniques.

### PHED BC 1593x and y Yoga
An introduction to Hatha Yoga focusing on the development of the physical body to increase flexibility and strength. Breathing practices and meditation techniques that relax and revitalize the mind and body are included.

### PHED BC 1594x and y Yoga Sculpt
A combination of muscle toning and yoga for greater strength and flexibility. Basic yoga postures and relaxation are taught in addition to Body Sculpting with weights, bands and bars.

### PHED BC 1696x and y Yoga-Meditation
Instruction in beginning levels of Hatha Yoga postures, with greater attention on breath work and concentration, to prepare for sitting meditation. Every class will include 5-10 minutes of silent contemplation.

### PHED BC 2694x and y Intermediate Yoga
Intermediate and advanced Hatha Yoga, with emphasis on increasing muscular endurance and flexibility required to maintain the poses. Breathing practices and meditation techniques are included.

### Muscular Strength/Endurance Courses

#### PHED BC 1532x and y Core Strength
A combination of Pilates-based mat class to strengthen "core" (abs, back and hips) and sculpting techniques for entire body using various equipment. Emphasis on proper breathing and alignment.

#### PHED BC 1581x and y Body Sculpting
Muscle definition exercises using weights, bands and bars for the whole body, set to music.
PHED BC 1585x and y Weight Training

Introduction to principles of weight training; use of the Cybex resistance machines and free weights. Programs tailored to individual needs.

PHED BC 1586x or y Intermediate Weight Training

In depth examination into the principles of strength training. Advanced instruction on the use of free weights, resistance machines and other strength training equipment for the development of muscular strength and endurance. Students will develop and implement individualized training programs based on personal strength training goals.

Sports Courses

PHED BC 1300x and y Fundamentals of Sport

The development of fundamental motor skills and movement patterns necessary to participate in a variety of sports and activities.

PHED BC 1350x and y Archery

Techniques of shooting target archery. Individualized instruction for all levels; selection and care of equipment; safety; intraclass tournaments, and novelty shoots.

PHED BC 1353x and y Badminton

An introduction to the basic strokes, rules, etiquette, and strategies of singles and doubles play. Advanced skills and strategies introduced as appropriate.

PHED BC 1362x and y Golf

Introduction to the game of golf through a variety of indoor drills to develop all facets of the game. Includes building an effective swing, the "long and short" game, and rules of play. Field trip included.

PHED BC 1363x or y Soccer

Introduction and development of the fundamental skills used in soccer, including ball control, passing and shooting. Introduction to the rules, terminology and etiquette of the game of soccer. Instruction on strategies to be applied within the game of soccer. Sport-specific training for increased muscular strength and endurance, flexibility and cardiovascular conditioning.

PHED BC 1354x and y Tennis

Introduction to the basic groundstrokes, serve, rules, scoring, strategy, and etiquette of singles and doubles play.
PHED BC 1356x and y Foil Fencing
Techniques of fencing with the foil. Basic offensive and defensive blade skills as well as fencing etiquette, equipment selection, safety, footwork, rules, officiating, and scoring are included. Introduction to electrical apparatus as time permits.

PHED BC 1357x and y Foil/Sabre Fencing
An introductory course presenting the techniques of foil and sabre fencing. Basic offensive and defensive blade skills of both weapons as well as fencing etiquette, equipment selection, safety, footwork, rules, officiating, and scoring are covered.

PHED BC 1455x and y Basketball
Emphasis on the development of fundamental skills and sport-specific conditioning; rules, team play, and strategies.

PHED BC 1456x and y Lacrosse
Development of the fundamental skills and strategies used in lacrosse; rules, team play, and sport specific conditioning.

PHED BC 1470x and y Volleyball
Development of the fundamental skills and strategies of volleyball. Serving, passing, attacking, blocking, team offense, and defense.

PHED BC 2355x and y Intermediate Tennis
Intermediate and advanced tennis strokes and strategy for competitive and recreational play. Students will learn to critically evaluate their own play and learn self-correcting techniques.

Prerequisites: Prerequisite: PHED BC 1354 or permission of the instructor

Self-Paced Courses
Self-Paced Courses are individualized workout programs designed for the intermediate exerciser. Students must agree to workout two times per week on non-consecutive days. Students must pass pre/post tests. No first-year students.

PHED BC 2510x and y Self-Paced Weight Training
Individualized weight room program. Pretest: 1 RM Bench Press and Leg Press.
Prerequisites: PHED BC 1455x; y Weight Training, PHED BC 1102x, y Personal Fitness or permission of the instructor.

PHED BC 2512x and y Self-Paced Running
Indoor/outdoor running. No treadmill. Group runs throughout the semester. Pretest: 1.5 mile run in 15 minutes.

PHED BC 2514x and y Self-Paced Cardio
Cardiovascular workouts on Stairmaster, stationary bike, elliptical, arc trainer or treadmill. Pretest: 4.0 miles on a stationary bike in 15 minutes.

PHED BC 2516x and y Self-Paced Cycling
Aerobic workouts on stationary bike. Pretest: 2.5 miles on a stationary bike in 12 minutes.
PHED BC 2518x and y Self-Paced Fitness
Participation in fitness activities addressing cardio-respiratory endurance, muscular strength, flexibility, and muscular endurance. Pre-tests: 1RM Chest Press, 1RM Leg Press, Crunches/minute, Push Ups.
Prerequisites: PHED BC 1585x,y or PHED BC 1102x,y.

PHED BC 3125x and y Self-Paced Lap Swim
Students develop an individualized swimming program with an instructor. Stroke and turn clinics will be offered throughout the course. Pretest: 500 yards (25 pool lengths) in 12 minutes.

Special Courses
PHED BC 1100x and y Wellness
An exploration of the dimensions of wellness. Class format will consist of discussion and limited physical activity. Presentations by health and wellness specialists within the Barnard community will be an integral part of the class.

PHED BC 1103x and y Fitness Instructor
Learn all the basics of fitness training including how to teach group fitness activities (aerobics, step, sculpt) and one-on-one program design. Other topics include anatomy, nutrition, injury prevention and flexibility training. Students prepare for national certification. Course is part lecture and part activity; teaching presentations are built into the course.

PHED BC 1680x and y Karate
Fundamentals of karate taught in the traditional Japanese manner including: three katas (choreographed movements), terminology, self-defense techniques and body conditioning.

PHED BC 1690x and y Self-Defense
Introduction to the essentials of street self-defense; physical activities and mental preparation.

There are currently no cross-listed courses for your department.
Physics and Astronomy
403 Altschul Hall
854-3628
www.phys.barnard.edu

Professor: Timothy Halpin-Healy (Ann Whitney Olin Professor), Laura Kay, Reshni Mukherjee (Chair)
Associate Professor: Janna Levin
Lab Director: Dr. Stiliana Savin

Other officers of the University offering courses listed below:
Professors: James Applegate, Norman Christ, Arlin Crofts, Jules Halpern, Tony Heinz, David Helfand, Joseph Patterson, Michael Tuts, Jacqueline van Gorkom, William Zajc
Associate Professors: Brian Cole, Zoltan Haiman, Robert Mawhinney, Frederik Paerels, John Parsons
Assistant Professors: Greg Bryan, Kristen Menou, David Schiminovich
Adjunct Professors Morgan May, Burton Budick

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleaveList.html

From Aristotle's Physics to Newton's Principia, the term "physics," taken literally from the Greek φυσική (= Nature), implied natural science in its very broadest sense. Physicists were, in essence, natural philosophers, seeking knowledge of the observable phenomenal world. Astronomy, a sibling science to physics, concentrated specifically on the study of natural phenomena in the heavens with the intent to understand the constitution, relative positions, and motions of the celestial bodies in our universe. Though practitioners of these disciplines have become somewhat more specialized in the past century, the spirit that guides them in their research remains the same as it was more than two millennia ago.

In cooperation with the faculty of the University, Barnard offers a thorough pre-professional curriculum in both physics and astronomy. The faculty represents a wide range of expertise, with special strength and distinction in theoretical physics, condensed matter physics, and observational astrophysics.

Separate majors in physics and astronomy are offered. A major in astrophysics is also possible. Furthermore, there are many special interdisciplinary majors possible, such as biophysics, chemical physics, engineering physics, and mathematical physics. There is a physics minor as well. Students should consult members of the department early on in their undergraduate careers in order to plan the most effective course of study. Qualified seniors are invited to participate in the seniors honors program, in which they carry out a year-long research project leading to the thesis.

There are several quite distinct introductory sequences in physics, only one of which may be taken for credit:

1. PHYS C 1001-2, Physics for Poets, is a two-semester introductory lecture sequence in physics intended for liberal arts students. A single semester of this CU lecture course satisfies the BC Quantitative Reasoning requirement. Note, however, that 1001-2 does not satisfy the premedical nor physics requirement for any major. PHYS C 1001 is not being offered in Fall 2008.

2. PHYS V 1201-2, General Physics, is satisfactory preparation for medical school and is appropriate for most non-science major premedical students. This course, devoted to algebra-based physics, is taught at Columbia in a large lecture hall setting. It is not recommended as a foundation for more advanced work in the field. Taken in conjunction with PHYS V 1201-2, this sequence does satisfy the college LAB requirement, but the students' population is essentially premed.

3. PHYS BC 2001-2, 3001, Physics I, II, III, is Barnard's own three-semester, calculus based introductory sequence in physics. Characterized by modest class sizes, it is designed specifically for Barnard women with a serious interest in any of the natural sciences or mathematics. Moreover, it is especially appropriate for majors in physics, chemistry, or biochemistry, whether premedical or not. Biology majors with some calculus background are also encouraged to take this sequence. Finally, Barnard women contemplating a major in physics or astronomy should take PHYS BC 2001-2 in their first year, if possible, or in their second at the latest, to be followed by the third-semester course, Classical Waves and Optics.

4. First-year students with exceptional aptitude for physics (as evidenced, for example, by scores of 4 or 5 on the advanced placement C exam) and a good mathematical background may be admitted into the Columbia-taught two-semester sequence PHY C 2801-02 General Physics, which replaces all three terms of the sequence for majors. Students inclined toward this sequence are strongly encouraged to consult a Barnard faculty member at the start of the term.
Students unsure about the most appropriate sequence should consult members of the department.

The following courses may be substituted for each other:

PHYS BC 2001-2 (sect.1; 4.5pts) = C1601-2 (3.0pts) + BC 2001-2 (sect.3; 1.5pts)
PHYS BC 3001 (sect.1; 5pts) = C2601 (3.0pts) + BC 3001 (sect.3; 2pts)
ASTR BC 1753-4 = C 1403-4

There is a laboratory fee of $25 for each 1000-level physics course with a laboratory.

Physics and Astronomy
403 Altschul Hall
854-3628
www.phys.barnard.edu

REQUIREMENTS FOR THE ASTRONOMY MAJOR

The courses required for the major in astronomy are:

PHYS BC 2001  Physics I: Mechanics
PHYS BC 2002  Physics II: Electricity & Magnetism
PHYS BC 3001  Physics III: Classical Waves and Optics

Students may substitute a Columbia College three-semester calculus-based introductory physics sequence with lab, as in the physics major.

Calculus through IV is required, with additional work in mathematics recommended.

Also:

ASTR C 2001, 2002 Introduction to Astrophysics I, II

Students who have taken ASTR BC 1753-4 (Introduction to Astronomy I, II) or C 1403-4 may substitute an additional 3000-level ASTR course for ASTR C 2001-2.

Finally, students are required to take four additional 3000-level ASTR or PHYS courses, including at least one of ASTR C 3102 or PHYS W 3003 Mechanics, and selected so that at least six total points of 3000-level lecture classes are ASTR courses. Some of the ASTR courses offered in recent years include:

ASTR C 3101  Stellar Structure and Evolution
ASTR C 3102  Extrasolar Planets and Astrobiology
ASTR C 3601  General Relativity, Black Holes, and Cosmology
ASTR C 3273  High Energy Astrophysics
ASTR C 3602  Physical Cosmology
ASTR C 3646  Observational Astronomy

Students planning to study astronomy or astrophysics in graduate school are strongly urged to take PHYS BC 3006, W 3003, W 3007-B, G 4023, some additional courses in mathematics, and Computer Science (COMS) W 1003 Programming in C or W 1004 Programming in Java. Note: When any of the required courses is not being given, the department will recommend appropriate substitutions.

REQUIREMENTS FOR THE PHYSICS MAJOR

The courses required for the major in physics are:

PHYS BC 2001  Physics I: Mechanics
PHYS BC 2002  Physics II: Electricity & Magnetism
PHYS BC 3001  Physics III: Classical Waves and Optics

In lieu of the above, any three-semester Columbia introductory sequence acceptable for the physics major in Columbia College will do (e.g., PHYS C 1601-2, 2601, taken with PHYS W 1691-3). The accelerated
two-semester Columbia College sequence PHYS C 2801-2 is also acceptable.

Calculus through IV is required, with additional work in mathematics recommended; e.g., Math E 1210x, y Ordinary Differential Equations, APMA E 3102y Applied Mathematics II. The calculus sequence should be completed by the end of the sophomore year.

At the upper level:

| PHYS W 3003 | Mechanics |
| PHYS BC 3006 | Quantum Physics |
| PHYS W 3007 | Electricity and Magnetism |
| PHYS W 3008 | Electromagnetic Waves and Optics |
| PHYS G 4023 | Statistical Physics |

are required, and a total of 6.0 points of advanced lab work, PHYS BC 3086 and 3088, taken concurrently with their cognate lecture courses. Finally, the student must take Computer Science W 1003 Programming in C, W 1004 Programming in Java, or PHYS W 3083 Electronics Laboratory.

Students planning to study physics in graduate school should include several 4000-level electives in their senior year program.

**Astrophysics Majors:** Students wishing to major in astrophysics should consult a member of the department.

**INTERDISCIPLINARY MAJOR**

Special majors in, for example, biophysics, chemical physics, engineering physics, or mathematical physics are all possible and are arranged in conjunction with the relevant second department at Barnard. A student interested in such possibilities should speak to a faculty member early on (i.e., by late fall of her sophomore year) in order to permit the most effective construction of her program of study and the appropriate petition to be made to the Committee on Programs and Academic Standing. The latter is a straightforward procedure associated with the declaration of all special majors at Barnard.

**REQUIREMENTS FOR THE PHYSICS MINOR**

Five courses are required for the minor in physics. They are: any three-semester introductory sequence acceptable for the major (see above) plus two additional 3-point courses at the 3000-level.

Printable Version

Barnard Catalogue 2008-2009
Astronomy Courses

ASTR C 1234x-C1235y Astronomy-Physics-Geology, The Universal Timekeeper: An Introduction to Scientific Habits of Mind

Introduction to ideas and models of thought in the physical sciences, adopting as its theme the use of the atom as an imperturbable clock. Lectures develop basic physical ideas behind the structure of the atom and its nucleus and then explore such diverse applications as measuring the age of the Shroud of Turin, determining the diets of ancient civilizations, unraveling the evolution of the universe, and charting the history of earth's climate.

Prerequisites: Prerequisite for ASTR C1235 is ASTR C1234. Working knowledge of high school algebra. Not offered in 2008-2009.
3 points

ASTR C 1403x and y Earth, Moon, and Planets (lecture)

The overall architecture of the solar system. Motions of the celestial sphere. Time and the calendar. Life in the solar system and beyond. Students may not receive credit for both ASTR BC1753 and ASTR C1403.

Prerequisites: Open to any student offering astronomy in partial fulfillment of the science requirement. Recommended preparation: A working knowledge of high school algebra. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
3 points

**ASTR C 1420x Galaxies and Cosmology**

The content, structure, and possible evolution of galaxies. The "21-centimeter line": the song of interstellar hydrogen. Distribution, mass, seen and unseen, in galaxies and clusters of galaxies. Distribution of clusters over the sky. Quasars and the nuclei of galaxies. The origin of the universe, and the present controversy over its eventual fate.

**Prerequisites:** Working knowledge of high school algebra. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

**ASTR BC 1753x Life in the Universe**

Introduction to astronomy, taught at Barnard, intended primarily for non-science majors. Includes discovery of new planets, the search for life, gravitation and planetary orbits, the physics of the Earth and its atmosphere, and the exploration of the solar system. Students may not receive credit for both ASTR BC1753 and ASTR C1403.

ASTR C 2001x Introduction to Astrophysics I

The first term of a two-term, calculus-based introduction to astronomy and astrophysics. Topics include the physics of stellar interiors, stellar atmospheres and spectral classifications, stellar energy generation and nucleosynthesis, supernovae, neutron stars, white dwarfs, interacting binary stars.
Prerequisites: A working knowledge of calculus. Corequisites: A course in calculus-based general physics.

ASTR C 2002y Introduction to Astrophysics II

Continuation of ASTR C2001. These two courses constitute a full year of calculus-based introduction to astrophysics. Topics include the structure of our galaxy, the interstellar medium, star clusters, properties of external galaxies, clusters of galaxies, active galactic nuclei, cosmology.
Prerequisites: A working knowledge of calculus. Corequisites: A course in calculus-based general physics.

ASTR C 2900x Frontiers of Astrophysics Research

Several members of the faculty will each offer a brief series of talks providing context for a current research topic in the field and will then present recent results of their ongoing research. Opportunities for future student research collaboration will be offered.

1 point Grading is Pass/Fail.

ASTR C 3102y Planetary Dynamics

Planets and planetary dynamics, detecting extrasolar systems, characteristics of extrasolar planets, astrobiology.

3 points

ASTR C 3103x or y The Galaxy and the Interstellar Medium

3 points

ASTR C 3273x High Energy Astrophysics

Prerequisites: One year of calculus-based general physics. Physics majors could take this course with no previous astronomy background. Not offered in 2008-2009.

3 points

ASTR C 3601x General Relativity, Black Holes, and Cosmology

An introduction to general relativity, Einstein's geometrical theory of gravity. Topics include special relativity, tensor calculus, the Einstein field equations, the Friedmann equations and cosmology, black holes, gravitational lenses and mirages, gravitational radiation, and black hole evaporation.

Prerequisites: One year of calculus-based general physics.

ASTR C 3602y Physical Cosmology and Extragalactic Astronomy

The standard hot big bang cosmological model and other modern observational results that test it. Topics include the Friedmann equations, the standard model of particle Physics, the age of the universe, primordial nucleosynthesis, the cosmic microwave background, the extragalactic distance scale, and modern observations.

3 points
ASTR C 3646x Observational Astronomy

An introduction to the basic techniques used in obtaining and analyzing astronomical data. Focus on "ground-based" methods at optical, infrared, and radio wavelengths. Regular use of the telescope facilities atop the roof of the Pupin Labs and at Hanman Observatory. The radio-astronomy portion consists mostly of computer labs; in research projects, students also work on the analysis of data obtained at National Observatories.
3 points.

ASTR C 3997x-C3998y Independent Research

A variety of research projects conducted under the supervision of members of the faculty. Observational, theoretical, and experimental work in galactic and extragalactic astronomy and cosmology. The topic and scope of the work must be arranged with a faculty member in advance; a written paper describing the results of the project will be required at its completion. (A two semester project can be designed so that the grade YC is given after the first term.) Senior majors in Astronomy or Astrophysics wishing to do a Senior Thesis should make arrangements in May of their junior year and sign up for a total of 6 points over their final two semesters. Both a substantial written document and an oral presentation of thesis results will be required.
3 points.

Professors: Xiaobo Lu, Kimberly J. Marten (Chair), Richard M. Flous (Adolf S. and Effie E. Ochs Professor), Flora S. Davidson (Term, in Political Science and Urban Studies), Paula Franzese (Visiting)
Professors Emeritus: Demetrios J. Caraley (Janet H. Robb Professor Emeritus and Research Scholar), Dennis G. Dalton, Peter H. Juviler
Associate Professors: Sheri Berman, Alexander A. Cooley
Assistant Professors: Séverine Auwesserre, Mona El-Ghobashy, Ayten Gündoğdu, Kimberley S. Johnson, Lorraine C. Minnite

Departmental Administrator: Nell Dillon-Erners

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleave/list.html

Political science examines questions about power in society: who exercises it, how, and why. Sometimes it tries to explain past and current events and make predictions about the future; other times it asks normative questions, about how political power should be distributed and for what purposes it should be used. The political science discipline is divided into four subfields: American politics (including the study of the presidency and the bureaucracy, the Congress, the judiciary and the Constitution, political parties and elections, state and local governments, and interest groups and social movements in the United States); international relations (including the study of relationships between nation-states, such as war, intervention, and diplomacy, and aid, trade and investment, as well as international institutions such as the United Nations, and non-state actors who have international influence); comparative politics (including the study of politics in different countries and regions around the world, focusing on what makes national institutions and trajectories similar to or different from each other, such as the rise and fall of democracy, liberalism, radicalism, nationalism, and corruption); and political theory (focusing on the philosophy, both ancient and modern, that underpins and sheds light on all of these institutions, processes, and developments).

The major prepares students to play a leadership or participant role as citizens in a democratic society, as public or party officials, civil servants, commentators, or civic volunteers and voters. It equips students with skills in critical reading, analysis and argument, research, writing, and oral presentation that are vital for a wide variety of professional careers, including law, business, journalism and communications, and work in philanthropic, public interest, or international development organizations. It also prepares students for advanced graduate study in political science or in schools of public and international affairs, leading to careers in research, policy analysis, and teaching.

Students interested in public careers should inquire about the five-year joint-degree programs at Columbia University's School of International and Public Affairs. These include the Graduate Program in Public Policy and Administration (MPA) and the Master of International Affairs Program (MIA).

REQUIREMENTS FOR THE MAJOR

A total of ten courses are necessary to complete the Political Science major:

- Three introductory lecture courses,
- Two colloquia,
- Two semesters of senior research seminar, and
- Three elective courses.

The introductory lecture courses expose students to the study of at least three of the four subfields of political science. Majors can then specialize in one or two subfields, continue a broader mix of courses, or work out interdisciplinary programs enabling them to double-major, or major and concentrate, in additional fields.
After taking the relevant introductory lecture courses, students are eligible to take the two required colloquium courses. The colloquia have limited enrollment to ensure a maximum class size of sixteen; they introduce students to methods of research, and provide opportunities to develop skills in discussion and analysis. The two-semester senior seminar requires students to complete a major research paper and further develop skills in framing a research question, using rigorous analytical methods, and developing primary research sources.

The two colloquia and the two-semester senior seminar sequence must be taken with faculty at Barnard College. Many of the introductory and other lecture courses may also be taken with faculty at Columbia College, if these courses are listed in the Barnard Political Science course catalogue. Various study-abroad options and summer courses may also meet your specialized interests, but these require prior consultation with your major adviser, as well as prior approval by Professor Kimberly Marten, the 2008-09 Department Chair (a form is required) and subsequent approval by the Department Chair once you apply to transfer the credit to Barnard (approval form).

Please use the Progress Report to plan your program and track your courses for the major.

The Introductory Course Requirement

Three introductory courses are required of all majors and concentrators from among the four subfields: American Politics, Comparative Politics, International Relations, and Political Theory. (Note: In this section, an "advanced course" is understood to be 3000-level or higher.)

**What fulfills the American Politics intro requirement:**

A. POLS BC 1001, Dynamics of American Politics, or POLS W 1201, Introduction to American National Government and Politics (offered at Columbia College). Note that these two courses are functional equivalents.

B. Substitution of an equivalent course from another undergraduate college. This requires approval of Professor Kimberly Marten, the 2008-09 Department Chair. (If a course taken elsewhere by a transfer student is not deemed equivalent, then the student must take an advanced course in American politics listed in the Barnard catalogue to satisfy the introductory course requirement.)

C. A score of 5 on Advanced Placement (AP) Examination in American Politics, followed by successful completion of an additional advanced course in American National Government listed in the Barnard College catalogue. This provides the student with an exemption from one requirement, but the AP course itself does not count as one of the ten courses for the major or the five courses for the minor. Where BC1001 Dynamics is listed as a course prerequisite, an AP score of 5 counts as an equivalent.

**What does not fulfill the American Politics Intro requirement:**

A summer session course offered at Columbia or elsewhere may not be used to satisfy this requirement. A student who took a summer session introductory course prior to declaring the major in Political Science at Barnard may apply to Professor Kimberly Marten, the 2008-09 Department Chair, for permission to substitute an advanced course in American Politics (listed in the Barnard catalogue) in lieu of the introductory requirement. Upon completion of the advanced Barnard course, the student will fulfill the American Politics introductory course requirement.

**What fulfills the Comparative Politics introductory requirement:**

A. POLS V 1501x or y, Comparative Politics, which may be taken at either Barnard or Columbia.

B. Substitution of an equivalent course from another undergraduate college. This requires approval of Professor Kimberly Marten, the 2008-09 Department Chair. (If a course taken elsewhere by a transfer student is not deemed equivalent, then the student must take an advanced course in Comparative Politics listed in the Barnard College catalogue to satisfy the introductory course requirement.)

C. A score of 5 on Advanced Placement (AP) Examination in Comparative Politics, followed by successful completion of an additional advanced course in Comparative Politics listed in the Barnard College catalogue. This provides the student with an exemption from one requirement, but the AP course itself does not count as one of the ten courses for the major or the five courses for the minor. Where BC1015 Comparative Politics is listed as a course prerequisite, an AP score of 5 counts as an equivalent.

**What does not fulfill the Comparative Politics intro requirement:**

A summer session course offered at Columbia or elsewhere may not be used to satisfy this requirement. A student who took a summer session introductory course prior to declaring the major in Political Science at Barnard may apply to Professor Kimberly Marten, the 2008-09 Department Chair, for permission to substitute an advanced course in Comparative Politics (listed in the Barnard catalogue) in lieu of the introductory requirement. Upon completion of the advanced Barnard course, the student will fulfill the Comparative Politics introductory course requirement.
What fulfills the International Relations introductory requirement:

A. POLS V 1601x or y, International Politics. Students may take V 1601 at either Barnard or Columbia.  
B. Substitution of an equivalent course from another undergraduate college. This requires approval of Professor Kimberly Marten, the 2008-2009 Department Chair. (If a course taken elsewhere by a transfer student is not deemed equivalent, then the student must take an advanced course in International Relations listed in the Barnard College catalogue to satisfy the introductory course requirement.)

What does not fulfill the International Politics intro requirement:

A summer session course offered at Columbia or elsewhere may not be used to satisfy this requirement. A student who took a summer session introductory course prior to declaring the major in Political Science at Barnard may apply to Professor Kimberly Marten, the 2008-2009 Department Chair, for permission to substitute an advanced course in International Relations (listed in the Barnard catalogue) in lieu of the introductory requirement. Upon completion of the advanced Barnard course, the student will fulfill the International Relations introductory course requirement.

What fulfills the Political Theory introductory requirement:

A. POLS BC 1013x Political Theory I  
B. Substitution of an equivalent course from another undergraduate college. This requires approval of Professor Kimberly Marten, the 2008-2009 Department Chair. (If a course taken elsewhere by a transfer student is not deemed equivalent, then the student must take an advanced course in Political Theory listed in the Barnard College catalogue to satisfy the introductory course requirement.)

What does not fulfill the Political Theory intro requirement:

POLSc W1002, Intro to Political Thought  

POLSc BC 1014y Political Theory II

A summer session course offered at Columbia or elsewhere may not be used to satisfy this requirement. A student who took a summer session introductory course prior to declaring the major in Political Science at Barnard may apply to Professor Kimberly Marten, the 2008-2009 Department Chair, for permission to substitute an advanced course in Political Theory (listed in the Barnard catalogue) in lieu of the introductory requirement. Upon completion of the advanced Barnard course, the student will fulfill the Political Theory introductory course requirement.

The Colloquium Requirement (two one-semester courses)

The colloquium format involves weekly discussion of readings, and development of research skills through completion of a 25- to 30-page research paper, constituting the major piece of written work for the course. Admission is limited to sixteen students who are assigned by the department, not by individual instructors. Students must have completed the relevant introductory course prerequisite before enrolling in the colloquium (or must receive special permission from the instructor for that requirement to be waived). Two colloquia must be completed to fulfill the major requirement. Both colloquia must be taken with Barnard instructors, from the asterisked colloquium offerings listed in the Barnard catalogue. Columbia seminars do not fulfill this requirement.

If you plan on spending part or all of junior year abroad:

Plan to take a colloquium during the second semester of your sophomore year. This means applying for the colloquium near the end of first semester of your sophomore year. Note on your colloquium application that you plan to be abroad one or both semesters during junior year.

If you plan to be away for the entire junior year, plan on taking one colloquium in your sophomore year and one the first semester of senior year. You should e-mail or write both your academic major advisor and the department administrator by the middle of March of your year abroad, in order to apply for a colloquium in your senior year.

The Senior Research Seminar Requirement (a two-semester sequence)

A two-semester course involving group and/or individual tutorials. Students use the course to complete the Senior Essay, a paper of at least 50 pages that involves research using primary sources. Students are required to have taken a colloquium in the subfield of the proposed topic (or must receive special permission from the instructor for that requirement to be waived).

What fulfills the Senior Research Seminar requirement:
A. Both semesters of senior seminar are to be taken at Barnard from offerings listed in the Barnard catalogue under the subheading "Research Seminars."
B. The semesters may not be taken concurrently, but must be taken sequentially. (Fall-Spring or Spring-Fall).
C. The senior research seminar counts for two of the ten courses required for the major.
D. If you double-major, you complete the senior essays in both departments. You may also double-major with a single integrating essay option, or develop a combined major with a single essay, in which case you will have an essay adviser from each department.

What does not fulfill the Senior Research Seminar requirement:

Independent Study Options may involve registration in a Senior Seminar section, but such registration does not count as a semester of senior research seminar.

No summer school course offered at Columbia or elsewhere, no course receiving transfer credit toward the degree, and no Columbia College course listed as a colloquium or seminar may be used to satisfy this requirement.

If you plan on spending junior year abroad:

You should email or write both your academic major adviser and the departmental administrator by the middle of March of your year abroad, in order to apply for a section of senior research seminar (application).

The Major Electives Requirement (three additional courses)

What fulfills the additional Three-Course Electives requirement:

A. All courses offered at Barnard or Columbia in political science listed in the Barnard catalogue, including introductory lecture courses and colloquia, satisfy course requirements. Courses listed in Columbia catalogues which are not listed in the Barnard catalogue require approval by Professor Kimberly Marten, the 2008-2009 Barnard Department Chair, to count towards the major or concentration.
B. The Independent Study option. Students who wish to do an Independent Study Project (I.S.P.) should first speak to a faculty member willing to sponsor it. Credit is given for an academic research paper written in conjunction with an internship, but no academic credit is given for an internship or job experience per se. The student must then apply to the Committee on Programs and Academic Standing (CPAS), which must approve all independent study requests. Once the request is granted, the Registrar creates a section and assigns a call number, and the student is notified of the call number so she can enter the course on her program. (Each instructor has a separate section and call number. Each instructor is limited to sponsoring one independent study per semester.) Students will consult with the sponsoring instructor as to workload and points of credit for the independent study course. Independent study counts as a course for the purpose of the ten-course requirement, provided the project is approved for 3 or 4 points. A project taken for 1 or 2 points does not count as a course toward the major, the minor, or the concentration requirement.
C. With pre-approval from both the individual major advisor and the department chair, a student may substitute a course in another department for one of the three elective courses. Approval after the fact will not be granted.
D. Six of the ten courses for the major must be taken from courses listed in the political science section of the Barnard catalogue. Within the four-course limit of courses taken elsewhere, the following caps usually apply: two transfer courses; two Reid Hall courses; two study-abroad courses; one summer session course. On rare occasions the department chair may grant an exception.

What does not fulfill the additional Three-Course Electives requirements:

The Independent Study Option BC3799x-y does not satisfy the course requirement if the project is for 1 or 2 points.

College-granted AP credit for American Politics or Comparative Politics does not count as major course credit. (See items for American Politics I.C. and Comparative Politics I.C., above.)

Courses taken at other colleges, in summer sessions, or abroad, which are not equivalent in rigor and workload to Barnard courses, as determined by Professor Kimberly Marten, the 2008-2009 Department Chair, in consultation with other faculty of the department, will not count toward the major or minor requirements.

REQUIREMENTS FOR THE COMBINED MAJOR

A student doing a combined major in Human Rights and Political Science must complete the full requirements for the Political Science major in addition to Human Rights courses.
A student doing a combined major in Jewish Studies and Political Science must complete the full requirements for the Political Science major in addition to Jewish Studies courses.

A student doing a combined major in Women's Studies and Political Science must complete, in addition to Women's Studies courses, a minimum of seven political science courses of at least three points each, including two introductory courses and two colloquia. These seven courses must be selected in consultation with Professor Kimberly Marten, the 2007-2008 Political Science Department Chair, at the time of major declaration. The two-semester senior research seminar (for the senior essay) may be written in either department. The student must consult both essay sponsors on a regular basis throughout the two-semester senior research seminar. Both departments must agree on the senior essay grade and the departmental honors nomination.

Any other combined major (for example, Art History-Political Science) requires a petition to the Committee on Programs and Academic Standing and the approval of the Chairs of the sponsoring departments. (For Political Science, obtain the approval of Professor Kimberly Marten, the 2008-2009 Department Chair.) The student will be required to take a minimum of seven political science courses of at least three points each, including two introductory courses and two colloquia, to be selected in consultation with Professor Kimberly Marten. Obtain forms and instructions from the Class Dean in the Dean of Studies Office. The student must consult both essay sponsors on a regular basis throughout the two-semester senior research seminar. Both departments must agree on the senior essay grade and the departmental honors nomination.

**REQUIREMENTS FOR THE DOUBLE MAJOR WITH ONE INTEGRATING SENIOR ESSAY**

The student is required to complete the coursework for each major with no overlapping courses, but will write only one integrating senior essay with an essay sponsor from each of the two departments. The student must consult both essay sponsors on a regular basis throughout the two-semester senior research seminar. Both departments must agree on the senior essay grade and the departmental honors nomination.

**REQUIREMENTS FOR THE MINOR**

A total of five courses are necessary to complete a minor, including one or more of the introductory courses or approved equivalents. Four of these courses must be taken from courses listed in the political science section of the Barnard catalogue. Only one course taken in a summer session, study-abroad program, Reid Hall Program, or another undergraduate college may be used to satisfy the five-course requirement for the minor, with the approval of Professor Kimberly Marten, the 2008-2009 Department Chair.

Introductory Courses

Barnard Political Science majors and concentrators are required to complete three introductory courses from among the four subfields: American Politics, Comparative Politics, International Relations, and Political Theory.

American Politics

POLS BC 1001x and y Dynamics of American Politics

Examination of the American political system, including elections, political parties, and national institutions: the Presidency, the Congress, and the Judiciary. Syllabi.

- K. Johnson, L. Minnile, R. Pious
Prerequisites: Enrollment limited to 50 students per section. L-course sign-up through eBear. General Education Requirement: Social Analysis (SOC).

3 points

Political Theory

POLS V 1013x Political Theory

Critical reading and analysis of key texts in political theory. Emphasis will be placed on political problems such as tensions between justice and law, challenges of democratic citizenship, origins and effects of inequality, paradoxes of modern freedom, and persistent gender inequalities. Syllabus.

- A. Gündoğdu
Prerequisites: L-course sign-up through eBear. Enrollment is limited to 80 students. POLS W1002 does *NOT* satisfy the major or minor requirements. General Education Requirement: Reason and Value (REA).

3 points
Comparative Politics

**POLS V 1501x and y Comparative Politics**

- M. El-Ghobashy

Corequisites: Required discussion section POLS V1511. Enrollment limited to 100 students in fall, 135 students in spring. May be taken at Barnard or Columbia. L-course sign-up through eBear. Discussion Section Required. General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Social Analysis (SOC).

Lecture Courses

Unless otherwise specified, these courses do not have limits on class size. Lecture courses are the primary mechanism of instruction; see individual course descriptions for information on discussion sections.

International Relations and Foreign Policy

**POLS BC 3012y The United Nations in International Politics**

Examination of the purposes, structures, roles, and achievements of the United Nations, focusing on contemporary issues: peacekeeping, sanctions, humanitarian aid, economic development, and international law. Attention is paid to conflict and cooperation between states in the General Assembly and Security Council, the influence of NGOs, and the operation of the bureaucracy. Syllabus.

- K. Marten

Prerequisites: POLS V1601 or the equivalent. Enrollment limited to 45 students. L-course sign-up through eBear. Not offered in 2008-2009.

3 points
American Government and Politics

POLS BC 3200y American Political Development, 1789-1980

Explores the development of the American political system and its institutions, including Congress and the Presidency. Traces the ways in which institutions shape our political life, and conversely the ways politics change institutions. Examines how historical approaches to American politics can shed light on some of the dilemmas now facing the American political system. Syllabus.

- K. Johnson
3 points

American Government and Politics

POLS BC 3210x Power, Politics, Policymaking

Examines government success or failure in achieving policy objectives. Investigates the political, institutional, and organizational factors that shape the policy process. Syllabus.

- K. Johnson
Prerequisites: POLS BC1001 or the equivalent. General Education Requirement: Social Analysis (SOC).

American Government and Politics

POLS BC 3230x The Political Economy of Regionalism in the U.S.

Examines how political and economic institutions shape patterns of regional and urban development. Focuses on the role of national, state and local politics, especially federalism and intergovernmental relations, in explaining how Silicon Valley and Appalachia (or wealthy suburbs and poor inner cities) can exist in the same country. In turn, examines how varied patterns of development influence politics. Syllabus.

- K. Johnson
Prerequisites: POLS BC1001 or the equivalent. Not offered in 2008-2009.
3 points

American Government and Politics

POLS V 3313y American Urban Politics

A study of cities in the US focusing on local government structures and relationships with other levels of government. Themes include power and decision-making; the leadership and administration of cities; and present day problems and strategies to deal with them. Topics include urban political economy, political machines and urban reform, race and ethnicity in urban politics, and urban problems such as fiscal strain, poverty, the burden of growth and attracting economic investment, the costs and consequences of urban terror and disaster, and the global city. Syllabus.

- F. Davidson
General Education Requirement: Social Analysis (SOC).

American Government and Politics

POLS BC 3335y Mass Media and American Democracy

Examines the structure of the mass media in the United States and their impact on the political and social beliefs, opinions, and behaviors of both the mass public and political elites. Particular attention will be paid to the tension that forms between the potential for an informed citizenry and the potential for a manipulated public.
Prerequisites: POLS BC1001 or the equivalent. Not open to students who have taken POLS W4220. For information on POLS BC3336 Workshop in Mass Media and Politics, see Independent Study Project. General Education Requirement: Social Analysis (SOC). Not offered in 2008-2009.
3 points

American Government and Politics Workshop
POLS BC 3336x and y Workshop in Mass Media and Politics

Students intern at mass media organizations in New York City (newspapers, magazines, television, and radio stations, etc.) while doing readings in media and politics. Reading lists are tailored to specific internships. Students meet every other week with instructor to discuss readings and connect them to internship experiences. Research paper required.

Prerequisites: Junior or senior status. Prerequisite internship through the Office of Career Development. Prerequisite or co-requisite: POLS BC3335 or the equivalent. Permission of the instructor.

2 points

Comparative Politics and Foreign Government Lecture Course

POLS V 3401y Democracy and Dictatorship in Europe

Examines the development of democracies and dictatorships in Europe from the French Revolution to the present day. Analyzes the nature and dynamics of European political history and uses the European experience as a foundation upon which to build a broader understanding of how different types of political regimes emerge, function and are sustained over time.

Syllabus.

- S. Berman

Prerequisites: A course in European history or comparative politics preferred but not necessary. General Education Requirement: Historical Studies (HIS). General Education Requirement: Social Analysis (SOC).

International Relations and Foreign Policy Lecture Course

POLS V 3654x Civil Wars and International Interventions in Africa

Analyzes the causes of violence in civil wars. Examines the debates around emergency aid, peacekeeping and peacebuilding. Focuses on recent conflict situations in Africa - especially Congo, Sudan, and Rwanda - as a background against which to understand the distinct dynamics of violence, peace, and international interventions in civil conflicts. Syllabus.

- S. Auesserre

Prerequisites: International Relations (POLS V1601 or equivalent) or Comparative Politics (POLS V1501 or equivalent) or Introduction to Human Rights (HRTS V3001 or equivalent) or Introduction to Africana Studies (AFRS BC3004 or equivalent). Limited to 100 students. L-course sign-up through eBear. General Education Requirement: Social Analysis (SOC).

International Relations and Foreign Policy Lecture Course

POLS V 3615x Globalization and International Politics

Exploration of how globalization affects the structures and functions of the international economy, state sovereignty, international security, and international civil society. Emphasis is placed on problems of international governance, legitimacy and accountability, and the evolving organizational processes that characterize contemporary international politics. Syllabus.

- A. Cooley

Prerequisites: POLS V1601 International Politics. An introductory course in Economics, Political Economy, or International Political Economy is highly recommended. Limited to 55 students. L-course sign-up through eBear.

Comparative Politics and Foreign Government

POLS V 3620y Contemporary Chinese Politics
Introduction to some basic aspects and major events in Chinese political life under the communists since 1949, focusing on the post-Mao reform period since 1978. Examination of economic and political development in China in a broader context of global transition from authoritarianism and state socialism. Syllabus.

3 points

International Relations and Foreign Policy

POLS V 3633x International Political Economy: Theories, Approaches, and Debates

Survey of the contending theories and approaches to the study of international political economy. Topics covered include: hegemony and stability, international cooperation, economic statecraft and sanctions, domestic actors and lobbyists, development and dependency, post-Communist reforms, and globalization. Syllabus.

- A. Cooley

Prerequisites: POLS V1601 or the equivalent; an introductory course in Economics is highly recommended. Not open to students who have taken POLS BC3800. Limited to 55 students. L-course sign-up through eBear. Not offered in 2008-2009.

3 points

International Relations and Foreign Policy

POLS V 3675y Russia and the West

Exploration of Russia's ambiguous relationship with the West, focusing on the political, cultural, philosophic, and historical roots of this relationship, as well as its foreign policy consequences. Cases are drawn from tsarist, Soviet, and post-Soviet periods. Special emphasis is placed on issues of political economy and international security. Syllabus.

- K. Marten

Prerequisites: POLS V1601 or permission of the instructor. Enrollment limited to 28 students. L-course sign-up through eBear. General Education Requirement: Historical Studies (HIS). General Education Requirement: Social Analysis (SOC).

3 points

American Government and Politics

POLS W 4311x American Parties and Elections

Examines the changing role of political parties and elections in the American political system. The historical development of party conflict; the structure of party organization at the local and national levels; the roles of party and the media during presidential elections; who votes and why; and the future of American political parties.

3 points

American Government and Politics

POLS W 4316x The American Presidency

Growth of presidential power, creation and use of the institutionalized presidency, presidential-congressional and presidential-bureaucratic relationships, and the presidency and the national security apparatus. Syllabus.

- R. Pious

Prerequisites: POLS BC1001 or the equivalent.

3 points

American Government and Politics

POLS W 4321y The Constitutional Law of Presidential-Congressional Relations

Constitutional issues involved in presidential-congressional relations, including assertions of presidential emergency powers, control of the administrative agencies, and the constitutional law of diplomatic and war powers. Syllabus.

- R. Pious
Prerequisites: POLS BC1001 or the equivalent. Not offered in 2008-2009.
3 points

Comparative Politics and Foreign Government

POLS W 4414y Making Democracy Work
Examines problems facing the many new democracies which have emerged since mid-1970, which asks what, if anything, outsiders can do to help. Examines the literature on democratic consolidation, the extent to which factors leading to successful consolidation can be influenced by outside actors, and specific cases of U.S. intervention.
- S. Berman
Prerequisites: One course in Comparative Politics. Limited to 40 students. L-course sign-up through eBear. Not offered in 2008-2009.
3 points

Comparative Politics and Foreign Government

POLS W 4435x Political Corruption and Governance
Survey of the social science discourse on political corruption in the contemporary world and its relationship to political and economic development. Exploration of questions concerning political corruption-its causes, consequences, patterns, and effective mechanisms to reduce, contain, and eliminate corruption. Barnard syllabus.
- X. Lu
Prerequisites: POLS V1501 or its equivalent. Additional courses in comparative politics are recommended. Open to undergraduate students with at least sophomore standing and graduate students. Not offered in 2008-2009.
3 points

Comparative Politics and Foreign Government

POLS W 4445y Politics of the Middle East and North Africa
This course has two objectives: studying the political economy and history of the Arab states, Israel, Turkey, and Iran, and reviewing major themes in the Middle East political science literature. Topics include: historical legacies of colonialism, the political economy of state-society relations, the politics of religion, the politics of democratization, and burgeoning forms of new media. Barnard syllabus.
- M. El-Ghobashy
Prerequisites: POLS V1501 or the equivalent. Enrollment limited to 70 students. L-course sign-up through eBear.
3 points

Comparative Politics and Foreign Government

POLS W 4496y Contemporary African Politics
Topics include the transition from colonialism to independence, ethnic and class relations, the state, strategies for development, international influences, and case studies of selected countries.
Prerequisites: POLS V1501 or the equivalent or permission of the instructor. General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Social Analysis (SOC). Not offered in 2008-2009.
3 points

Colloquia
Discussion of readings and development of research skills through completion of a research paper, which constitutes the major work for the course. Admission to each colloquium is limited to sixteen students. Apply through the Barnard Political Science Department office during the preceding semester's program-planning period. Students are assigned by the Department and not by individual instructors. Majors must complete two colloquia. The two colloquia must be taken with different instructors. A second colloquium taken with the same instructor will receive political science elective credit only.

POLS BC 3055X * Colloquium on Political Violence and Terrorism
Analysis of the definitions, goals, causes, and types of terrorist political activity, and of the effectiveness and consequences of various counter-terrorist responses. Focuses on current and recent cases across several countries. Syllabus.
- Kimberly Marten
Prerequisites: POLS V1501 or POLS V1501 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students.
4 points
POLS BC 3118y * Colloquium on Problems in International Security

Readings, discussions, and presentations on selected problems in international security. Syllabus.

- K. Marten
Prerequisites: POLS V1001 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students. Not offered in 2008-2009.
4 points

POLS BC 3300x * Colloquium on Political Participation and Democracy

Examination of the role of citizen participation in the development of American democracy. Topics include movements of women, workers, racial minorities and students; community organizing; voting, parties, and electoral laws; and contemporary anti-corporate movements. Syllabus.

- L. Minnite
Prerequisites: POLS BC1001 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students.
4 points

POLS BC 3302y * Colloquium on First Amendment Values

Examines the first amendment rights of speech, press, religion and assembly. In-depth analysis of landmark Supreme Court rulings provides the basis for exploring theoretical antecedents as well as contemporary applications of such doctrines as freedom of association, libel, symbolic speech, obscenity, hate speech, political speech, commercial speech, freedom of the press and religion. Syllabus.

- P. Franzese
Prerequisites: POLS BC1001 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 18 students.
4 points

POLS BC 3303x * Colloquium on Race, Gender and American Political Development

Explores the development of the American political system and its institutions through a focus on race and gender. Particular attention will be paid on ways in which race and gender shape citizenship, political identity, political participation, institutions, and public policy in the past and present. Syllabus

- K. Johnson
Prerequisites: POLS BC1001 Dynamics of American Politics or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students.
4 points

POLS BC 3326x * Colloquium on Civil Rights and Civil Liberties

Exploration of some currently evolving civil rights and liberties, primarily through analysis of Supreme Court decisions and pending cases. Topics include race and sex discrimination; sexual harassment; desegregation; affirmative action; freedom of expression, including pornography and "hate speech;" and abortion. Syllabus.

- P. Franzese
Prerequisites: POLS BC1001 or the equivalent. Admission by application through the Barnard department only. Enrollment
limited to 18 students.

POLS BC 3327x or y * Colloquium on Content of American Politics

Readings, discussions, and research on contemporary issues in American politics. Specific topics vary each semester, but have included the politics of race, the consequences of federalism, and the politics of the 1960s and its impact on contemporary politics. Syllabus.

Prerequisites: POLS BC1001 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students. Not offered in 2008-2009.

4 points

POLS BC 3331y * Colloquium on American Political Decisionmaking

Readings on decisionmaking, policy analysis, and the political setting of the administrative process. Students will simulate an ad hoc Cabinet Committee assigned to prepare a presidential program to deal with aspects of the foreign aid program involving hunger and malnutrition. Syllabus.

- R. Pious

Prerequisites: POLS BC1001 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students. Not offered in 2008-2009.

4 points

POLS BC 3332y * Colloquium on Exploring Political Leadership in the U.S.

Exploration of the effect of political leadership on political outcomes in the United States, with special attention to how individual characteristics, like personality, political style, ideology, gender, race and class, interact with the political environment in shaping political outcomes.

- F. Davidson

Prerequisites: POLS BC 1001 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students.

POLS BC 3333y * Colloquium on Policy Analysis

Examination and analysis of the political, economic, historical, and pragmatic factors which shape government employment policy today. Includes critical exploration of the economic assumptions that underpin the government jobs policy and the way we do business; changes in the private sector that impact the number and the nature of available jobs; and the global business environment in which American business and workers must compete. Syllabus.

Prerequisites: POLS BC1001 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students. Not offered in 2008-2009.

4 points

POLS BC 3410y * Colloquium on Human Rights in a Diverse World

Exploration of the nature of human rights and questions of their validity and relevance, protection and redefinition, in this world of cultural diversity and diversity of national interests. Syllabus.

- A. Gundagdu

Prerequisites: POLS V1301 or W3001 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 18 students.

POLS BC 3425y * Colloquium on the Politics of Development in East Asia

Designed to inform students about the politics of development in one of the world's most rapidly growing regions-East Asia
(Japan, China, Korea, and Taiwan), focusing on the role of the state in economic development. Syllabus.

- X. Lu
Prerequisites: POLS V1501, V1601 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students. Not offered in 2008-2009.
4 points

POLS BC 3500y * Colloquium on Political Economy of Corruption and Its Control

Comparative political economy course which addresses some important questions concerning corruption and its control: the concept, causes, patterns, consequences, and control of corruption. Introduces students to and engages them in several key social science debates on the causes and effects of political corruption. Syllabus.

- X Lu
Prerequisites: POLS V1501 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students. Not offered in 2008-2009.
4 points

POLS BC 3504y * Colloquium on Social Movements across Time and Space

Examines the origins, trajectories, and effects of social movements, from 18th century Britain to 19th century Iran to late 20th century Argentina, China, and the United States. Focuses on social movements' relation to political parties, the state, and transnational forces and asks whether social movements promote or undermine democratization. Syllabus.

- M. El-Ghobashy
Prerequisites: POLS V1501 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students.

POLS BC 3505x * Colloquium on Making Democracy Work

Examination of democratic consolidation and promotion. What makes democracy work and what, if anything, can outside actors do to help this process along? Topics include the theoretical literature on democratic consolidation, historical cases of intervention, debates about America's role in promoting democracy, and examination of some of the research on democracy promotion. Syllabus.

- S. Berman
Prerequisites: POLS V1501 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students. Not offered in 2008-2009.
4 points

POLS BC 3800y * Colloquium on International Political Economy

Survey of the major theories and issues that inform the study of international political economy. Topics include: hegemony and stability, international cooperation, economy and security, international trade, money and finance, North-South relations, regional integration, and globalization. Syllabus.

- A. Cooley
Prerequisites: POLS V1601 or the equivalent. Admission by application through the Barnard department only. Not open to students who have taken POLS V3633. Enrollment limited to 16 students. Not offered in 2008-2009.
4 points

POLS BC 3805x * Colloquium on International Organization

Exploration of the various structures, institutions, and processes that order relations among states and/or actors in the international system. Emphasis will be placed on contemporary issues such as dilemmas of humanitarian intervention, the politics of international institutions, the rise of non-governmental organizations, and globalization. Syllabus.

- A. Cooley
Prerequisites: POLS V1601 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students.

**Independent Study Option**

**POLS BC 3799x and y Independent Study**

Students, who wish to do an independent study project (ISP), should speak to a faculty member willing to serve as sponsor, then fill out a "Request for Approval of Credit for Independent Study" and obtain signatures from the sponsor and chair of the department. File this form with the Committee on Programs and Academic Standing, which must approve all requests. (No credit is given for an internship or job experience per se, but credit is given for an academic research paper written in conjunction with an internship, subject to procedures outlined above.) Students must consult with the sponsor in advance of filing as to workload and points of credit. A project approved for 3 or 4 points counts as a course for the purpose of the ten-course major or five-course minor requirement. No more than two such 3- or 4-point projects may be used for the major, and no more than one for the minor. An independent study project may not be used to satisfy either the colloquium or senior essay requirements.

1-4 points.

**Research Seminars**

Group or individual meetings, depending on instructor. Course requirements are satisfied through completion of the Senior Essay, a project involving research using primary sources, which may include documents, interviews, field observation, or other data. Admission to each section is limited. Students are admitted by the Barnard Political Science Department and not by individual instructors. Apply through the Department Office during the semester preceding senior standing. Only the two-semester research seminar POLS BC 3761-3762 satisfies the senior essay requirement for Barnard Political Science majors. The senior seminar must be taken for both semesters; there is no single-semester seminar option. These two semesters must be taken sequentially and cannot be taken concurrently. They count for two of the ten courses required for the major, totaling eight points of credit.

**Senior Research Seminars BC3761-3762**

**POLS BC 3761x-BC3762y (Section 1) American Government and Politics**

Researching and writing of a senior essay on a topic selected by the student. 4 points per semester. Two semesters, taken sequentially.

**Prerequisites:** Senior standing. Admission by application through the Barnard department only. Limited enrollment. A student writes a senior essay in a subfield in which she has successfully completed an introductory course. It is strongly recommended that she has also successfully completed an advanced course in this subfield.

4 points

Human Rights

Courses listed in this section are cross-listed with Human Rights Studies. For the Barnard Political Science major and minor, they count as elective credit only.

To obtain additional information on this program, please contact Professor J.Paul Martin, Executive Director of the Center for the Study of Human Rights, at jmartin@barnard.edu, and visit the web sites: http://www.barnard.edu/catalog/depts/hrsb.php, http://www.barnard.edu/humright/about.htm and http://www.columbia.edu/cu/humanrights/.

Lecture Course

POLS W 3001y Introduction to Human Rights

Evolution of the theory and content of human rights; the ideology and impact of human rights movements; national and international human rights law and institutions; their application with attention to universality within states, including the U.S., and internationally. (Also listed as HRTS V 3001.)

General Education Requirement: Social Analysis (SOC). General Education Requirement: Reason and Value (REA).

- A. Nathan, T. Putnam
3 points

Seminar

POLS BC 3601x or y International Law and the United Nations in Practice

Examines the development of international law and the United Nations, their evolution in the Twentieth Century, and their role in world affairs today. Concepts and principles are illustrated through their application to contemporary human rights and humanitarian challenges, and with respect to other threats to international peace and security.

Prerequisites: POLS V1601 "International Politics" or HRTS/POLS W3001 "Introduction to Human Rights." Limited to 20 students. Admission by permission from Dr. J.Paul Martin, Executive Director of the Center for the Study of Human Rights, e-mail: jmartin@barnard.edu. This single-semester seminar does not satisfy either the colloquium or senior essay requirement for Barnard Political Science majors. However, it does count toward the ten-course major and five-course minor requirements. Not offered in 2008-2009.

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleavelist.html

Psychology is the study of behavior and experience, from love to aggression, from the first babbling of infants to intellectual creativity, from sexuality to the physiology of taste. Faculty members in Psychology have a wide range of interests, including social and cognitive development, memory, language, animal learning, social stereotyping, the self-concept, the resolution of conflict, and behavior neuroscience.

Common to all areas of psychology is a concern with adequate and appropriate method. The student will encounter many perspectives on psychological evidence and technique through lecture, laboratory, field courses, and other offerings.

Opportunities are available for supervised research, teaching, and field experience. Individual Projects and the Senior Research Seminar involve participation in research with a faculty member. The Toddler Center and a course in Field Work in Psychological Services provide first-hand contact with the study of psychology. The Department also sponsors a Psychology Club.

Psychology as a major concentration is good preparation for many careers. Many students enter graduate school in psychology, neuroscience, education, and professional schools, including medical, law, and business schools. There is no set sequence for a given career goal, but the Department recommends a balance between courses that are directly preparatory and those that establish a broad intellectual foundation.

Science requirement: Students desiring to fulfill the science requirement through Psychology are encouraged to take their lab courses in their early years at Barnard, because seniors do not receive priority in lab placements. To ensure exposure to different methods in psychology, the two lab courses must be drawn from different groups. See the description of lab groups under Requirements.

Students should request Department permission for lab courses by entering the lottery in April and November for the following semester. Information about Department permission is available in Room 415A Milbank.

A laboratory fee of $30 is charged for each laboratory course: BC 1105, BC 1108, BC 1113, BC 1117, BC 1123, BC 1127 and BC 1136.

Students interested in the Neuroscience and Behavior major should consult the Neuroscience and Behavior section of the course catalogue.

Printable Version

Requirements for the Major

The student majoring in Psychology is exposed to the diversity of the discipline through the required core courses and the selection of appropriate electives.

Eight courses in Psychology (of which two must be lab courses) and three courses in related disciplines are
required for the major. Six of the eight required Psychology courses must be taken at Barnard College.*

Students must take:

PSYC BC 1001  
*Introduction to Psychology* (prerequisite for further psychology courses)
PSYC BC 1101  
*Statistics* (preferably in the sophomore year)

Students must take one course from each group, of which two must be laboratory courses:

Group A

PSYC BC 1105 or 1107  
*Psychology of Learning*
PSYC BC 1113 or 1115  
*Cognitive Psychology*

Group B

PSYC BC 1108 or 1110  
* Perception*
PSYC BC 1117 or 1119  
*Systems and Behavioral Neuroscience*

Group C

PSYC BC 1123 or 1125  
*Psychology of Personality*
PSYC BC 1136 or 1138  
*Social Psychology*
PSYC BC 1127 or 1129  
*Developmental Psychology*

Three additional elective courses are required. Students may take more than one course in each group.

Students who have passed either the Advanced Placement exam in psychology with a score of 4 or 5, or the International Baccalaureate exam with a score of 5 or higher are exempt from PSYC BC 1001. They will need an extra elective to achieve the eight psychology courses required for the major (or the five courses required for the minor).

Economics minors and double-majors can satisfy the requirement with ECON BC 2411. Students that declared their major in psychology prior to the 2008-2009 academic year may satisfy the major statistics requirement with STAT W1111 or W1211 in lieu of PSYC BC 1101. Those who take an outside course cannot also receive credit for PSYC BC 1101. They will also need an extra psychology elective to achieve the eight psychology courses required for the major (or the five courses required for the minor). Students should consult with the Department Representative before enrolling in any other statistics course, as it may not be accepted towards the major or minor.

The eight required psychology courses must be taken for a letter grade. Students must earn a grade of C- or better. A maximum of two of the following courses may count toward the major (or minor): BC 3465, BC 3466, BC 3591, BC 3592, and BC 3599.

The three required courses in related disciplines should be distributed in this manner: one-year course sequence in a science, both semesters accompanied by a three-hour laboratory section (astronomy, biology, chemistry, environmental science, geology, or physics); and one course from the cognate disciplines (anthropology, computer science, economics, linguistics, philosophy, or sociology). A student may fulfill the outside lab science requirement if she receives a 4 or 5 on the AP exam in biology, chemistry, environmental science, or physics and completes one semester of lab in the same field. These courses in related disciplines may be taken for a letter grade or P/D/F. Students must earn a grade of C- or better, or a P.

Students cannot receive credit for courses taken elsewhere overlapping substantially with courses taken at Barnard. They should consult with the Department regarding Columbia offerings that overlap and should request Departmental approval for any course taken at an unaffiliated institution.

**Senior Requirement**

Included among the eight courses required for the major is a Senior Requirement.

Students fulfill the Senior Requirement by completing one of the following courses during their senior year. The course may be taken during the junior year with prior approval by the major advisor and the Departmental Representative of a written petition outlining rationale for early completion.

(a) BC 3599, Individual Projects (3 or 4 points);
(b) BC 3591x, 3592y Senior Research Seminar; or
(c) any 3000-level BC psychology seminar approved by a Psychology Adviser.

Majors may elect to fulfill their Senior Requirement with a Columbia Psychology Department Seminar or Supervised
Individual Research. Those who elect this option may complete the major with five of the eight required courses at Barnard.

When in doubt, the student should consult with her major adviser, whom she should select when she decides to major in Psychology. The student should select the appropriate adviser by consulting with the Departmental Representative.

REQUIREMENTS FOR THE MINOR

Five courses are required for the minor, including Psychology BC 1001, BC 1101, and one laboratory course chosen from the groups listed for the major. Two additional electives, excluding Psychology BC 3465–BC 3466, BC 3591–BC 3592, and BC 3599, are required. These electives may be selected from the Psychology Department course offerings. Three of the five psychology courses must be taken at Barnard. Exemptions and substitutions are as noted above for the major.

*Students who complete an approved Columbia psychology seminar or independent study in their senior year may count this course as one of their six required Barnard courses (see Senior Requirement).

Introductory Courses

PSYC BC 100fx and y Introduction to Psychology

Introduction to the chief facts, principles, and problems of human and animal behavior, through systematic study of a text, lectures, exercises, reading in special fields, and brief participation in a current investigation. (An alternative to participation can be arranged at the student's request.)

Prerequisites: This course is prerequisite for all other psychology courses. Enrollment is limited to 45 students per section. 3 points

PSYC BC 1099x and y Science and Scientists

Weekly meetings with researchers to discuss the nature of scientific inquiry in psychology, and intellectual, professional, and personal issues in the work of scientists.
Prerequisites: BC1001 or permission of the instructor. Recommended for first- and second-year students.
1 point

Core Courses

PSYC BC 1101x and y Statistics

Introduction to statistics and its applications to psychological research. Basic theory, conceptual underpinnings, and common statistics. Recitation devoted to discussion of weekly problem assignments.
Prerequisites: BC1001 and departmental permission. Enrollment limited to 36 students per section. Economics minors and double-majors can satisfy the requirement with ECON BC 2411. Students that declared their major in psychology prior to the 2008-2009 academic year may satisfy the statistics requirement with STAT W1111 or W1211 in lieu of PSYC BC1101. Those who take an outside course cannot also receive credit for PSYC BC 1101. They will also need an extra psychology elective to achieve the eight psychology courses required for the major (or the five courses required for the minor). Students should consult with the Department Representative before enrolling in any other statistics course, as it may not be accepted towards the major or minor. Corequisites: Recitation: Section001: TR 11:00 - 1:00, Section002: M 5:00 - 7:00 or 7:00 - 9:00 Recitation Section Required. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

PSYC BC 1105x Psychology of Learning

Basic methods, results, and theory in the study of how experience affects behavior. The roles of early exposure, habituation, sensitization, conditioning, imitation, and memory in the acquisition and performance of behavior are studied. Laboratory consists of experiments analyzing learning and memory in rats and humans.
Prerequisites: BC1001 and departmental permission. Enrollment limited to 72 students. Laboratory fee: $30. Corequisites: Lab Section: RF 1:00 - 4:00, F 9:00 - 12:00 Lab Required.

PSYC BC 1117y Systems and Behavioral Neuroscience

Introduction to the physiological bases of behavior: development, organization and function of the nervous system; neurochemistry, neurophysiology and synaptic transmission. Topics include: the neural bases of sensory systems; homeostasis; sexual behavior; biological rhythms; emotionality and stress; learning and memory; and psychopathology. The laboratory portion of this course uses rats as experimental subjects and involves brain dissections. 
Prerequisites: BC1001 and departmental permission. Enrollment limited to 60 students. Laboratory fee: $30. Lab Required. 4.5 points

#### PSYC BC 2151y Organizational Psychology

Introduction to behavior of individuals and small groups in work organizations. Recent theory and research emphasizing both content and research methodology. Motivation and performance, attitudes and job satisfaction, power, influence, authority, leadership, cooperation and conflict, decision making, and communications.

*Prerequisites*: BC1001. Enrollment limited to 45 students.

3 points

#### PSYC BC 2154y Hormones and Reproductive Behavior

Biological basis of parental and sexual behavior from a comparative perspective. Complex relations among genetic, hormonal, environmental, and experiential factors in mediating sexual, parental, emotional, and feeding behavior. Aspects of biology and physiology necessary to understand those behavioral processes are covered in class and are not prerequisites.

*Prerequisites*: BC1001 or BIOL BC1101, BC1102. Enrollment limited to 45 students.

3 points
PSYC BC 2156y Introduction to Clinical Psychology

Survey of the historical roots and conceptual models in clinical psychology, aimed at becoming familiar with professional issues in the field, and comparing assessment techniques and therapeutic approaches for their utility, efficacy, and soundness. 
Prerequisites: Both BC1001 and BC2141, as well as one of the following: Personality, Human Motivation, or Developmental Psychology. Enrollment limited to 35 students.
3 points

PSYC BC 2158y Human Motivation

Outlines major theoretical questions and research approaches in human motivation. In particular, it focuses on empirical investigations of motivation in social contexts, emphasizing goal formation, goal conflict, the self, and the influence of unconscious processes. Motivation for competence, control autonomy, achievement, altruism, and intimacy will also be covered.
Prerequisites: BC1001. Enrollment limited to 20 students.
4 points

PSYC BC 2163x Human Learning and Memory

Survey of contemporary theories and empirical research on human memory. Topics will include sensory, short term and long term memory, levels of processing, organization, forgetting, and encoding specificity. Special topics include eyewitness testimony, amnesia, implicit memory, and false memory.
Prerequisites: BC1001 and at least one psychology lab course. Enrollment limited to 20 students.
3 points

Upper-Level Courses

PSYC BC 3152y Psychological Aspects of Human Sexuality

Survey and critical evaluation of research investigating psychological, biological, and social factors in human sexual behavior. Topics will include sexuality throughout the life span, sexual dysfunction, and cultural constructions of sexuality.
Prerequisites: BC1001 and two other psychology courses and permission of the instructor. Enrollment limited to 30 students.
Preference given to seniors.
3 points

PSYC BC 3153x Psychology and Women

Examines how female experience is and has been understood by psychologists. Through an understanding of gender as a social construction and issues raised by the intersections of gender, sexuality, class, and race, the course will analyze assumptions about what causes us to be gendered and about how being gendered affects behavior.
Prerequisites: Junior or Senior standing and at least two psychology courses. Permission of the instructor required for
majors other than Psychology or Women's Studies. Enrollment limited to 20 students.
4 points

PSYC BC 3155y Psychology and Law

Survey of the research of psychology as it relates to the legal process. Among the topics covered are eyewitness identifications, jury decision making, repressed memory, child witnesses, and capital punishment. Each of these problems will be considered from both a theoretical and an applied perspective.
Prerequisites: BC1001, one other psychology course, and permission of the instructor. Enrollment limited to 20 students.

PSYC BC 3164y Perception and Language

Psychological investigations of spoken communication from listener's perspective. Topics include perception and sounds of speech and the apprehension of meaning from words and utterances; the perceptual basis for rhyme and rhythm in speech; and the natural history of vocal communication.
Prerequisites: BC1105, BC1108, BC1117, BC1127, BC1130, or equivalent. Enrollment limited to 20 students. Not Offered In 2008-2009.
4 points

PSYC BC 3155y The Social Self

Review of the classic and contemporary empirical research pertaining to the self, with an emphasis on the self as a socially-based construct. Focus on the social basis of identity, self-concept, and self-regulation.
Prerequisites: BC1001 and one other Psychology course. Enrollment limited to 20 students. Not offered in 2008-2009.
4 points

PSYC BC 3166y Social Conflict

Survey of the literature on development of social conflict, the motivations and cognitions of individuals in conflict, and the procedures available for resolving conflict. Particular emphasis will be placed on the psychology of fairness and its implications for conflict resolution.
Prerequisites: BC1001 and one additional Psychology course. Enrollment limited to 20 students. Not offered in 2008-2009
General Education Requirement: Social Analysis (SOC). General Education Requirement: Reason and Value (REA).
4 points

PSYC BC 3170y Introduction to Psychoanalysis

Introduces the major contributors to contemporary psychoanalysis. Changes in theory and technique will be traced through Freud, Ego Psychology, The Kleinian, Interpersonal and British Object Relations Schools, Contemporary Freudians, Self Psychology, and contemporary Relational theorists.
Prerequisites: Introduction to Clinical Psychology, PSYC BC2156. Enrollment limited to 20 students.
4 points

PSYC BC 3177x Psychology of Drug Use and Abuse
Examines the biological, psychological, and social factors that lead to drug use and abuse. A biopsychosocial model will be used to examine the behavioral effects of prescription, "over the counter," and "street" drugs. Treatments, therapies, and theories of addictive behaviors will be explored.

**Prerequisites:** BC1001. Enrollment limited to 30 students.

**PSYC BC 3180y Neurodevelopmental Processes and Cognitive/Behavioral Disorders**

Explores the evolution of disorders affecting children due to some impairment in the brain or nervous system. Constitutional vulnerabilities demonstrate that nervous system injury varies as a function of neurodevelopmental stage. Disorders to be studied include those impacting language, hearing, vision, movement, mood and emotion, and learning.

**Prerequisites:** BC1117/BC1119, BC3177, BC3380, or BIOL BC3362. Enrollment limited to 30 students.

**PSYC BC 3368y The Psychology of Creativity/The Creative Process**

Consideration of classic psychodynamic (the unconscious/incubation), Psychometric (testing/training), and Personality (train/motivation) models of creativity. Application of contemporary Process (cognitive/problem-solving) models to art, literature, and independently selected areas of expertise. Process models are involving constraint selection within well-established domains are emphasized.

**PSYC BC 3369x Language Development**

Examines the acquisition of a first language by children, from babbling and first words to complex sentence structure and wider communicative competence. Signed and spoken languages, cross-linguistic variation and universalities, language genesis and change, and acquisition by atypical populations will be discussed.

**Prerequisites:** BC1001, one Psychology laboratory course, one of the following: PSYC W2240, BC1127, BC1129, or LIN BC V1101, and permission of the instructor. Enrollment limited to 15 students. Not offered in 2008-2009.

**PSYC BC 3376x and y Infant Development**

Analysis of human development during the fetal period and early infancy. Review of effects of environmental factors on perinatal perceptual, cognitive, sensory-motor, and neurobehavioral capacities, with emphasis on critical conditions involved in both normal and abnormal brain development. Other topics include acute and long term effects of toxic exposures (stress, smoking, and alcohol) during pregnancy, and interaction of genes and the environment in shaping the developing brain of
"high-risk" infants, including premature infants and those at risk for Sudden Infant Death Syndrome.
Prerequisites: BC1001 and BC1127 or BC1129. Enrollment limited to 15 students.

PSYC BC 3379x Psychology of Stereotyping and Prejudice

Review of current literature from experimental social psychology pertaining to stereotyping and prejudice. Topics include: functions and costs of stereotyping, the formation and maintenance of stereotypes, and stereotype change. Recent research concerning the role of cognitive processes in intergroup perception will be emphasized.

4 points

PSYC BC 3380x Fundamentals of Neuropsychology

Exposition of research and theory in neuroscience with an emphasis on the use of neural imaging techniques (EEG, evoked potentials, MEG, PET, fMRI) for exploring sensation, perception, and cognition in the healthy, intact brain.
Prerequisites: BC1001 and permission of the instructor. Enrollment limited to 20 students.

PSYC BC 3383x Neuropharmacology and Behavior

Basic principles of the study of drugs that influence the neural systems and induce changes in behavior. Molecular, biochemical and behavioral characterization of psychotropic drugs: stimulants, sedative-hypnotics, anxiolytics, alcohol, hallucinogens, and opiates. Etiology and treatment of psychological and neurological disorders.
Prerequisites: One of the following: PSYC BC1117, PSYC BC1119, BIOL BC3280 and permission of the instructor. Enrollment limited to 20 students.
PSYC BC 3387y Topics in Neuroethics

Recent advancements in neuroscience raise profound ethical questions. Neuroethics integrates neuroscience, philosophy, and ethics in an attempt to address these issues. Reviews current debated topics relevant to the brain, cognition, and behavior. Biomedical and philosophical principles will be applied allowing students to develop skill in ethical analysis.

Prerequisites: BC1001 and one of the following: Neurobiology, Behavioral Neuroscience, Fundamentals of Neuropsychology. Enrollment limited to 20 students. General Education Requirement: Reason and Value (REA).

PSYC BC 3388y Impression and Language

Examines the concept of imitation in behavior through research on animals, human development, and adult language use. Class meetings focus on discussion of reading material to develop a theory of the cognitive mechanisms of imitation that apply to language change in spoken communication.

Prerequisites: BC1001 and one Psychology Lab course. Enrollment limited to 20 students.

PSYC G 4232y Production and Perception of Language

Review of classic and current research on spoken communication. Peripheral transduction, auditory and phonetic analysis, word recognition, phrase formation, formal and informal speech, idiolect, and infant and nonhuman listeners.

Prerequisites: PSYC W2240, BC2160, or BC3164, or permission of the instructor. Not offered 2008-2009.

Research and Field Work Courses

PSYC BC 3465x-BC3466y Field Work and Research Seminar: The Barnard Toddler Center

The Barnard Toddler Center provides the focus for field work and research in applied developmental psychology, an amalgam of developmental, educational, and clinical psychology. Students assist one morning a week at the Center, make individual class presentations, carry out team research projects, and participate in a two-hour weekly seminar which integrates theory, research, and practice.

Prerequisites: BC1127 or BC1129 and permission of the instructor. Permission should be requested in the Spring of the year preceding registration. Enrollment limited to 16 students. This is a two-semester course only.

PSYC BC 3473x Field Work Seminar in Psychological Services and Counseling

Supervised field work (minimum of 7 hours per week) applying psychological principles to work and treatment in clinical, educational, medical, and other institutional settings. Seminar discussions of theoretical approaches to clinical problems and case materials.

Prerequisites: Three psychology courses and permission of the instructor required during program planning the previous
Spring. Enrollment limited to 12 students; seniors are given priority.

PSYC BC 3591x-BC3592y Senior Research Seminar

Discussion and conferences on a research project culminate in a written and oral senior thesis. Each project must be supervised by a scientist working at Barnard or at another local institution. Successful completion of the seminar substitutes for the major examination.

Prerequisites: BC1101, a minimum of five other completed psychology courses, and permission of the instructor. This is a year-long course. Open to senior psychology majors who submit a research proposal which has been approved by the course instructor and the project supervisor.

When major social theorists trained their eye on religion a century or so ago, there was often the sense that it was
a dying-or at least decaying-species. Yet the years from then until now seem less to confirm this view than to
refute it. Religious institutions, rituals, ideas, and communities remain a vital aspect of human culture and global
politics. They are more pressingly in need of being understood now than ever.

The Departments of Religion at Barnard and Columbia marshal an array of academic approaches to the study of
religion, representing the depth and diversity of the world's religious traditions, past and present. The category of
religion-along with key related terms like belief, spirituality, mystical experience, and ritual-is historically and
culturally contingent; many of our courses interrogate these terms and the conditions of their construction. Yet we
are committed to engaging "religion," which persists so strongly in common usage and public debate, and is so
hard to capture in any related domain or theoretical system.

Morningside Heights provides unique resources for the study of religion. The University's specialized programs
and centers, especially its regional institutes, create a context for exploring in depth the linguistic, literary, political,
and cultural milieus that bear on particular religious traditions. The new Center for the Study of Science and
Religion enriches curricular offerings in that field. Barnard's Center for Research on Women often focuses on
issues of ethics and policy where questions of religion and gender are paramount, and Barnard Religion faculty
are particularly active in the area. Barnard and Columbia offer intensive language training in the languages of the
major religious traditions of the world: Arabic, Chinese, Greek, Hebrew, Japanese, Latin, Persian, Sanskrit and
other Indic languages, and Tibetan, among others. The Jewish Theological Seminary of America and Union
Theological Seminary, with their world-renowned libraries, are our neighbors. And the city as a whole provides
one of the world's best laboratories for the study of religion.

Our program tries to help students discover these resources and use them well. Many courses fulfill the College's
general education requirements.

REQUIREMENTS FOR THE MAJOR

The department's strengths in comparative study, textual and social analysis, philosophy, theory, and cultural
history allow students to balance close study in one area with a broad investigation of the field we name "religion."
Working closely with an advisor in the department, majors construct a cluster of five courses that relate to one
another in a coherent fashion (#1 below) and support the senior thesis. To complement this depth, they select four
courses that lend breadth to their studies in religion (#2). Students considering Religion as a major should contact
the chair or a member of the department in their sophomore year to begin planning their programs.
The Religion major requires twelve courses, as follows:

1) **Major cluster**: five intermediate or advanced courses, including one seminar. As many as two of these courses may come from other departments, and individually supervised research (V 3901-02: Guided Readings) may also be included. This cluster of courses may be organized around a particular tradition or geographic area: Hinduism, Islam, religion in America, etc. Alternatively, students may design clusters that focus on a set of related subjects and concerns, such as religion in New York; religion in theory and practice; religion and culture; religious texts and histories; religion, women, gender; or religion, race, nation, ethnicity. Yet these are only exemplary. Students are urged to design their own clusters, supplementing departmental listings with religion-related courses posted on the Barnard Religion Department's website as "Religion Related courses" and on the Columbia Religion Department's website as "Related Courses." Several sample majors are posted on the Barnard Religion Department's website.

2) **Breadth**: four Religion courses—either lecture or seminar—that lend geographical, historical, and/or disciplinary range to a student’s program.

3) One semester of the Juniors' Colloquium (V 3799), engaging major theoretical issues in the field.

4) The two-semester Senior Research Seminar (BC 3997-98), which must be taken in sequence, beginning in autumn and continuing through the spring, and which structures the experience of preparing a senior thesis. Students work together in this seminar to develop, critique, and accomplish their research projects, submitting a formal proposal and partial draft in the fall and completing the research and writing in the spring.

The department encourages study abroad, particularly in summers or in one semester of the junior year, and is eager to help facilitate internships and funded research. These possibilities often contribute very meaningfully to the senior essay project.

**MINORS AND COMBINED MAJORS**

A Religion minor comprises five courses, one of which must be a seminar. Students intending to minor in Religion should contact the department chair. Combined majors are offered with the programs in Human Rights and in Jewish Studies.

**RELI V 3501x or y Hebrew Bible**

Introduction to the literature of ancient Israel against the background of the ancient Near East.

- A. Segal

**General Education Requirement: Reason and Value (REA).**

3 points

**RELI V 3508x or y Judaism During the Time of Jesus**

Introduction to the Hellenistic period of Jewish history, with emphasis on sectarian movements and the emergence of rabbinic Judaism and Christianity as the two dominant religions of the West.

**General Education Requirement: Historical Studies (HIS).**

3 points

**RELI V 3520x or y Peschat and Derash in the Jewish Tradition**

History of rabbinic interpretation throughout the ages, distinguishing between Biblical exegesis and Talmudic exegesis with some reference to both Dead Sea Scrolls and early Christian Biblical expositions.

3 points

**RELI V 3525x or y Law and Lore (Halakha and Aggadah) in the Jewish Tradition**

Examines the differences between Halakha (the legal portion of the Talmud) and Aggadah (the more legal portion) with respect to both content and form. Special emphasis on selections from the Talmud and Midrash that reflect the intrinsic nature of these two basic genres of rabbinic literature.

3 points

**RELI V 3530x or y Jewish Ethics**

Major philosophical issues concerning the nature of Jewish ethics.

3 points

**RELI V 3544x or y Jewish Family law**

Jewish marriage and inheritance law. A survey of the legal obligations an individual owes, and the privileges he or she receives from being a member of a family.

3 points

**RELI V 3555x or y Development of the Jewish Holidays**

The sources and historical development of Jewish holidays. An attempt to trace historically how the holidays took on their present form and, when feasible, to emphasize the different modes of observances among different groups.

3 points

**RELI V 3560x or y Jewish Liturgy**

Survey of Jewish liturgy from the Bible to modern times, with occasional forays into Dead Sea prayer. Philosophy and theology for prayer considered, and when possible, the social message is emphasized.

3 points

**RELI V 3570x or y Women and Judaism: Folklore or Religion?**

Examines the relationship between Jewish women and religion that is both theirs and not theirs. Explores matters of law, ritual, practice, communal status, (re)reading of ancient texts, lived experiences.

**General Education Requirement: Reason and Value (REA).**

3 points

**RELI V 3571x or y Issues in Modern Jewish Thought**

Critical exploration of the consequences of the encounter between Judaism and modernity.

3 points

**RELI V 3602x or y Religion and American Culture I**

Survey of American religion from the Civil War to the present, with the emphasis on the ways religion has shaped American history, culture, identity.

**General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Historical Studies (HIS).**
3 points

RELI V 3603x or y Religion and American Culture II

Survey of American religion from the Civil War to the present, with an emphasis on the ways religion has shaped American history, culture, and identity.

3 points

RELI V 3610x or y Religion and American Film

Exploration of relationships between religion and popular film with particular attention to the way religious narratives and symbols in film uphold and critique norms of race, class and gender in the formation of American societal institutions (political structures, economy, family and community organization).

3 points

RELI V 3650x or y Religion and the Civil Rights Movement

Examination of the role of religion in the drive for civil rights during the 1950s and 1960s. The course will look at the role of activists, churches, clergy, sermons, and music in forging the consensus in favor of civil rights.

General Education Requirement: Historical Studies (HIS).

RELI V 3651x or y Evangelicalism

Survey of evangelicism, "America's folk religion," in all of its various forms, including the holiness movement, fundamentalism, pentecostalism, the charismatic movement, neo-evangelicalism, the sanctified tradition, and various ethnic expressions. The course will examine the origins of evangelicism, its theology, and the cultural and political involvement of American evangelicals.

General Education Requirement: Social Analysis (SOC).

3 points

RELI V 3720x or y Religion and Its Critics: 18th- and 19th-Century Religious Thought

Critics and defenders of religious belief and practice. Readings include Hume, Mendelssohn, Kant, Schleiermacher, Feuerbach, Marx, Kierkegaard, and Nietzsche.

General Education Requirement: Reason and Value (REA).

3 points

RELI V 3730x or y Philosophy of Religion

Introduction to classical and contemporary issues, including those raised by the comparative study of religion.

3 points

RELI V 3760x or y Animal Rights: Ethical and Religious Foundations

Critical study of the treatment of animals in modern moral philosophy and in Jewish and Christian thought in order to show that no theory of ethics in either domain can be complete or fully coherent unless the question of animal rights is confronted and satisfactorily resolved.

General Education Requirement: Reason and Value (REA).

3 points

RELI V 3798x or y Gift and Religion

Examines theories of gift and exchange, the sacralization of economic relationships and the economic rationalization of sacred relationships. Part I focused on classic works on "the gift" in traditional societies. Part II includes several perspectives on relationships of giving and taking in contemporary society. - W. Adamek

Prerequisites: Sophomore standing or permission of instructor; preference to Religion majors. General Education Requirement: Social Analysis (SOC).

RELI V 3810x or y Millennium: Apocalypse and Utopia
A study of apocalyptic thinking and practice in the western religious tradition, with focus on American apocalyptic religious movements and their relation to contemporary cultural productions, as well as notions of history and politics.
3 points

RELI V 3840x or y Graeco-Roman Religion
Survey of the religions of Rome and the Hellenistic East from the late 4th century B.C.E. to the early 4th century C.E. Topics will include myth and ritual, religion and the state, and mystery religions, among others.
3 points

RELI V 3850x or y Life After Death
Study of Western ideas of afterlife, concentrating on ancient literature. Readings will include Gilgamesh and other ancient Near Eastern literature, the Bible, The Odyssey, Plato’s Phaedo, Apuleius’s The Golden Ass.
General Education Requirement: Cultures in Comparison (CUL).
3 points

RELI V 3860x or y Sociology of Religion
Gives students tools and concepts with which to understand the social organization of religion in society. We will focus on classical emerging themes in the field, and analyze case studies that relate to them.
3 points

RELI V 3901x-V3902y Guided Reading and Research
Independent study in the field of religion.

RELI W 4010y Chan/Zen Buddhism
Historical introduction to Chan/Zen Buddhism, follows the historical development of Chan/Zen, with selections from the Chan classics, some of the high and low points of Japanese Zen, and examples of contemporary Zen writings.
Prerequisites: Suggested preparation: An introduction to Buddhism by Peter Harvey (1990).
4 points

RELI W 4011y The Lotus Sutra in East Asian Buddhism
The course examines some central Mahayana Buddhist beliefs and practices through an in-depth study of the Lotus Sutra. Schools (Tiantai/Tendai, Nichiren) and culic practices such as sutra-chanting, meditation, confessional rites, and Guanyin worship based on the scripture. East Asian art and literature inspired by it.
- D. Moerman
General Education Requirement: Cultures in Comparison (CUL).
4 points

RELI W 4030x or y Tibetan Philosophy
Examination of topics in the religious philosophy of Tibet.
4 points

RELI W 4060x or y Nonduality in Indo-Tibetan Thought
4 points

RELI W 4110x or y Asceticism and the Rise of Christianity
Explores the paradox of renunciation and power in early Christianity. Traces the changing understanding of renunciation from the 1st to the 5th centuries C.E., and the changing languages by which Christians signaled their allegiance to otherworldly ideal despite increasing involvement in the secular realm.
4 points

RELI W 4120x or y Issues of Gender in Ancient and Medieval Christianity
Exploration of the function of gender in the construction of religious identity across Christianity's formative centuries. Consideration of the different function for male and female religious identity of factors such as the body and its appetites, power and renunciation, and authority and inspiration.
4 points

RELI W 4160y Gnosis
Examines the religious and social worlds of ancient Mediterranean gnosis alongside its modern remnants and appropriations. Special attention is paid to scholarly reconstructions of ancient "gnosticism" and to theoretical problems associated with the categories of orthodoxy and heresy in Christian history. Strong emphasis on reading primary sources in translation.
Prerequisites: Previous work in biblical studies or early Christianity preferred; permission of instructor. Limited to 20 students.
4 points

RELI W 4170x or y History of Christianity: Popes and the Papacy in the Middle Ages
4 points

RELI W 4203y Krishna
The study of a single deity in the Hindu pantheon as illuminated in art, music, dance, drama, theological treatises, patterns of ritual, and texts both classic and modern. Special attention to Krishna's consort Radha, to Krishna's reception in the West, and to his portrayal on Indian television.
4 points

RELI W 4215x or y Hinduism Here
Historical, theological, social and ritual dimensions of "lived Hinduism" in the greater New York area. Sites selected for in-depth study include worshipping communities, retreat centers, and national organizations with significant local influence. Significant fieldwork component.
General Education Requirement: Cultures in Comparison (CUL).
4 points

RELI W 4321x or y Islam in the 20th Century

Investigates the debate around the "origins" of Arab nationalism and various strands of modernist/reformist thought in the contemporary Islamic world - with particular emphasis on developments in Egypt and Iran.

Prerequisites: Permission of instructor (undergrad majors, concentrators, and grad students in religion given priority).

General Education Requirement: Historical Studies (HIS).

4 points

RELI W 4330x or y Seminar on Classical Sufi Texts

Close study of pivotal texts from the classical periods of Islamic mysticism, including works by Hallaj, Attar, Rumi, Ibn Arabi, and others (all texts in English translation).

4 points

RELW 4401y Mountains and Sacred Space in Japan

This course explores the role that mountains have played in Japanese cosmology, particularly in religion and folklore. We will examine various aspects of mountain veneration such as mountains as portals to the world of the dead, as the embodiment of the universe, as ascetic training ground, as mandated space, as restricted ground, and as space transformed by history.

- D. Moerman

4 points

RELI W 4403x or y Bodies and Spirits in East Asia

Focuses on the role of early conceptions of both the body and demonology in the development of Chinese and Japanese religious traditions. By focusing on the development of ritual responses within these traditions to disease and spirits the course will highlight the degree to which contemporaneous understanding of the body informed religious discourse across East Asia.

Prerequisites: Permission of instructor (undergrad majors, concentrators, and grad students in religion given priority).

General Education Requirement: Cultures in Comparison (CUL).

RELW 4501 Psalms Through the Commentary of the Baal Shem Tov

Close reading of selected psalms along with the commentary attributed to the Ba'al Shem Tov, one of the founders of Hasidism. Offers an opportunity to gain experience in close reading of major Jewish texts in the original language (Hebrew). Provides students simultaneous exposure to a major biblical book, Psalms, which has a long and rich reception history, both textually and spiritually, as well as to a significant text of Hasidic thought. The two texts and their historical/discursive framings will be read complementarily or against one another. Additional readings will give supplementary perspectives, raising questions that include the production history of the Book of Psalms, comparative mythology, the liturgical and ritual use of psalms historically, and mystical readings of the Book of Psalms. Through the combination of perspectives we will learn about the variety of the interpretive approaches to a canonical texts such as the Book of Psalms: the dense web of meanings and uses given to one biblical text over the course of Jewish history; the methods and goals of Hasidic exegesis of the Bible.

- J. Schorsch

4 points

RELI W 4502y Jewish Rites of Passage

Undertakes an interdisciplinary exploration of historical and contemporary Jewish rites of passage and life-cycles events, focusing on the interplay between ritual and gender, sexuality and power. Our examination of the tensions between tradition and modernity will encompass traditional passage, wedding ceremonies and more modern rituals.

- I. Koren

Prerequisites: Sophomore standing.

4 points

RELI W 4505x or y The Beginnings of Jewish Mysticism

A study of biblical and Hellenistic foundations for Western mysticism - scriptural visions of God, apocalyptic literature, Graeco-Roman magic, and the merkabah mystical movement in Judaism.
4 points

RELI W 4606x or y Jewish Martyrdom

Utilizes major episodes of Jewish martyrdom as a basis for discussion of some of the key problems in the study of martyrdom. Among the questions it will raise: How have major scholars analyzed the origins of a martyrdom ideal in late antiquity? What questions do social scientists raise concerning the phenomenology of martyrdom, and how have these questions been addressed with respect to Jewish martyrdom? How do ancient and medieval traditions of martyrdom, despite their drastic tendency to draw strict boundaries, betray the influence of other (even hostile) traditions? And how do traditions of martyrdom undergo mutation in response to new historical and cultural realities?
Prerequisites: Permission of instructor; Sophomore standing. Enrollment limited to 20.
4 points

RELI W 4510x or y The Thought of Maimonides

Close examination of Maimonides' major ideas, with emphasis on the relationship between law and philosophy, biblical interpretation, the nature of God; creation and providence; human nature; ethics and law; and human perfection.
General Education Requirement: Reason and Value (REA).
3 points

RELI W 4610x or y Science, Nature, and Religion in 20th Century America

Examination of the relationship between scientific and religious ideas, with particular reference to American culture in the twentieth century. Explores the impact of such events as the Scopes trial and the popular faith in science and technology of the religious attitudes and beliefs of 20th-century Americans.
General Education Requirement: Reason and Value (REA).
4 points

RELI W 4620x or y Religious Worlds of New York

Exploration of religious diversity in New York City with emphasis on the current historical moment. Meetings will focus on the impact of immigrant and migrant cultures on New York's religious landscape and on texts that explore the experiences and histories of religious communities in New York. Students conduct supervised research on and observation of a particular religious site or community.
4 points

RELI W 4630x or y African-American Religion

Explores a range of topics in African-American Religion, which may include the African background and the transmission of African cultures, religion under slavery, independent black churches, religion and race relations, and modern theological movements. In Spring 2008, the course will focus on the religious lives of African immigrants to the US, emphasizing field and documentary methods.
4 points

RELI W 4640x or y Religion in the American Public Sphere

Introduction to questions surrounding the relationships between religion and the public sphere in the United States. Approaches topics of civil religion, church-state relations, religious pluralism in the public sphere, and the role of congregations in local communities using sociological theories and methods.
4 points

RELI W 4650x or y Religion and Region in North America

Examination of some of the regional variations of religions in North America, with an emphasis on the interaction of religious communities with their surrounding cultures.
Prerequisites: RELI V3502 or V3503.
4 points

RELI W 4660x or y Religious History of New York

Survey of religious life in New York City, from the English conquest of 1684 through changes to the immigration laws in 1965.
General Education Requirement: Historical Studies (HIS).
4 points

RELI W 4670x or y Native American Religions

Examines the varieties of Native American religions and spirituality, from contact to the present, including a look at the effects of European religions on Native American traditions.
Prerequisites: Permission of the instructor; Limited to 20 students.
4 points
RELI W 4710x or y Kant and Kierkegaard

Examines the relationship between morality and religious faith in the work of Immanuel Kant and Soren Kierkegaard. Examines Kant's claim that religious thought and practice arise out of the moral life, and Kierkegaard's distinction between morality and religious faith. 

Recitation Section Required. 

4 points

RELI W 4720x or y Religion and Pragmatism

RELI W 4722y Nothing, God, Freedom

Focuses on three interrelated issues that lie at the heart of various religious, literary and artistic traditions. The approach will introduce students to rigorous cross-cultural and multi-disciplinary analysis. The aim of the inquiry will be to explore the similarities and differences of contrasting considerations of the problems of nothing, God and freedom in different religious traditions as well as alternative modes of interpretation and expression.

- M. Taylor

Prerequisites: Students in Religion and Philosophy will be given preference.

4 points

RELI W 4730x or y Exodus and Politics: Religious Narrative as a Source of Revolution

Examination of the story of the Israelite exodus from Egypt, as it has influenced modern forms of political and social revolution, with emphasis on political philosopher Michael Walzer. Examination of the variety of contexts this story has been used in: construction of early American identity, African-American religious experience, Latin American liberation ideology, Palestinian nationalism, and religious feminism.

General Education Requirement: Cultures in Comparison (CUL).

4 points

RELI W 4732x or y Job and Ecclesiastes

Examines Pascal's claim that to the extent that the Bible can be said to have a philosophy, it is contained in the Books of Job and Ecclesiastes. Examines this claim critically by reading these Biblical books against the history of their philosophical interpretation. Among the authors to be considered will be Gregory the Great, Aquinas, Maimonides, Calvin, Hobbes, Kant, Kierkegaard, Jung, Barth, and Rene Girard.

Prerequisites: Permission of instructor. Graduate students, undergraduate majors and minors given priority.

4 points

RELI W 4734y Religious Concepts: Conversion

This course will examine critically the concept of 'conversion' as it appears in Western thought through an examination of religious, philosophical, and political texts.

4 points

RELI W 4800x or y The Science-Religion Encounter in Contemporary Context

Focuses on differing models for understanding the relationship between religion and science, with emphasis on how the models fare in light of contemporary thinking about science, philosophy, and religion.

Prerequisites: Permission of instructor.

4 points

RELI W 4801x or y World Religions: Idea and Enactment
Historical and contemporary investigation of the concept of "world religions"—its origin, production, and entailments. Topics include the Chicago World's Parliament of Religions (1893); the choice and numbering of the "great religions;" several major comparativists; and the life of "world religions" in museums, textbooks, encyclopedia, and departmental curricula today. 

Prerequisites: Permission of the instructor; some prior work in religion. General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Reason and Value (REA).

4 points

RELI W 4803 Religion versus the Academy

The proper aims of education in relation to those of religion have long been a matter of public debate, but in recent years the intensity and terms of that debate have changed significantly. The impact of the David Project's "Columbia Unbecoming" on Columbia's Department of Middle East and Asian Languages and Cultures and then on the university as a whole is a case in point. Meanwhile, Stanley Fish argues that it is inappropriate for religion to be studied in departments of Religious Studies, given what Fish perceives to be their necessary relation to faith communities and the particular way in which they pursue truth claims. This course examines such tensions, focusing on case studies from two major democracies: India and the United States. - J. Hawley

Prerequisites: Sophomore Standing. At least one course in Religion. Limited to 18 students. General Education Requirement: Reason and Value (REA).

4 points

RELI W 4810x or y Mysticism

Introduction to the comparative study of mysticism. Primary texts read against the backdrop of various theories of the nature of mysticism, addressing issues such as relationship of mysticism and tradition and the function of gender in descriptions of mystical experiences.

4 points

RELI W 4811x or y Mystical and Dimensions of Islam and Judaism

Explores mystical dimensions that have evolved in Judaism and Islam in a comparative perspective with the aim of pointing to similarities and differences between the two major religions of Abraham. Topics include: mystical experience and the possibility of union in a theistic tradition and the sanctity of scriptural language and the limits of speech.

Prerequisites: Instructor's permission (undergrad majors, concentrators and grad students in Religion given priority). General Education Requirement: Cultures in Comparison (CUL).

4 points

RELI W 4824x or y Gender and Religion

Examination of the categories and intersections of gender and religion in understanding of religious origins, personal identities, religious experience, agency, body images and disciplines, sexuality, race relations, cultural appropriations, and power structures.

4 points

RELI W 4825x or y Religion, Gender and Violence

Investigates relations among religion, gender, and violence in the world today. Focuses on specific traditions with emphasis on historical change, variation, and differences in geopolitical location within each tradition, as well as among them at given historical moments.

General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Reason and Value (REA).

As part of the College's mission to prepare scientists, policy-makers, and an educated citizenry for the moral challenges presented by future scientific advances, Barnard offers a unique collection of courses focusing on issues at the frequently volatile intersection point where science, public policy, and societal concerns collide. These courses are interdisciplinary in nature, team-taught by Barnard faculty from a variety of departments, and held in seminar format with limited enrollments, typically juniors and seniors. Recent topics concern ecological vs. financial imperatives in developing Third-World biodiversity, manipulation of the human genome, privacy issues and ethical dilemmas arising from genetic testing, misguided eugenics programs and race science, the Manhattan Project, as well as the Cold War build-up of nuclear arsenals in the United States and former Soviet Union.

SCPP BC 3334y Science, State Power & Ethics

A comparative study of science in the service of the State in the U.S., the former Soviet Union, Fascist Italy, and Nazi Germany during pivotal periods through the first half of the 20th century. Topics to be covered include the political and moral consequences of policies based upon advances in the natural sciences making possible the development of TNT, nerve gas, uranium fission and hydrogen fusion atomic bombs. Considers the tensions involved in balancing scientific imperatives, patriotic commitment to the nation-state, and universal moral principles—tensions faced by Robert Oppenheimer, Andrei Sakharov, Niels Bohr and Werner Heisenberg. Selected readings include: Michael Frayn's play Copenhagen, Hitler's Uranium Club by Jeremy Bernstein, Brecht's Galileo, John McPhee's The Curve of Binding Energy, Richard Rhodes' The Making of the Atomic Bomb.

- T. Halpin-Healy (Physics), R. Pious (Political Science)

Prerequisites: INSTRUCTOR'S PERMISSION REQUIRED; Enrollment limited to 12 students. General Education Requirement: Social Analysis (SOC). General Education Requirement: Reason and Value (REA).

SCPP BC 3335y Environmental Literature, Ethics & Action

Prerequisites: One year of college science. Enrollment limited to 16 students. General Education Requirement: Reason and Value (REA).

4 points

SCPP BC 3340y Exhibitions: Engaging Public Understanding

Museum exhibitions educate the public, inform discourse, and shape opinion. Students work with curators and exhibition designers on conceptualization and research, design and preparation, writing interpretative material, and developing media and ancillary programming. Students engage in the communication of learning goals through both the exhibition's content and its physical manifestation.

Corequisites: Enrollment limited to 10 students. Co- or Prerequisites: 1 semester of any of these courses: EESC 2100 Earth's Environmental Systems: Climate or EESC 2300 Life; BIOL BC 2002 Physiology, Ecology, and Evolutionary Biology; PHYS BC1753 Life in the University; Any Art course including AHIS 1001 Intro to Art History.

The Slavic Department at Barnard offers instruction in five Slavic languages and literatures, with special emphasis on Russian. The department insists upon a strong foundation in language study, because this best prepares students for future graduate study in the literature, anthropology, sociology, history, economics, or political science of the region, as well as for careers in government, business, journalism, or international law.

The department offers a major and minor program in Russian Language and Literature, Slavic and East European Literature and Culture, Russian Regional Studies, and Slavic and East European Regional Studies, and for this purpose provides an extensive array of courses designed to help the student obtain reasonable fluency in the spoken and written language and a reading ability adequate for interpreting texts of some difficulty in a variety of disciplines. While offering a range of courses designed to give the student a strong general background in Russian and Slavic literature, film, culture, and intellectual history, the department encourages students to supplement their knowledge by taking courses devoted to Russia, the former Soviet Union, and Eastern Europe offered in other disciplines as well. The department co-sponsors and facilitates student participation in region related extra curricular activities held at the Harriman Institute and the Columbia Slavic Department and also encourages students to take advantage of the rich cultural resources available in New York City.

Entering students should see Professor Frank Miller (708 Hamilton, 854-3941) for a placement examination; a sufficiently high grade will automatically fulfill the language requirement; other students will be placed accordingly. Native speakers of Russian or any Slavic language should consult with the department chair. The Department is a member of "Dobro Slovo" (The National Slavic Honor Society) and is pleased to induct its qualifying students into the society.

REQUIREMENTS FOR THE MAJOR

There are four majors available to students in the department. Prospective students are encouraged to consult with a member of the faculty as early as possible in order to determine the major track and selection of courses that will best serve her background and interests.

I. Russian Language and Literature:

1. Completion of four years of Russian (V 1101-1102, V 1201-1202, V 3331-3332, and V 3443-3444 or the equivalent). Native speakers of Russian who place out of these courses must substitute at least two of the following courses: V 3430 Russian for Heritage Speakers, W 3010 Masterpieces of 19th-Century Russian Literature, or W 3340 Masterpieces of 20th-Century Russian Literature.
2. Six courses in Russian literature to include V 3333-3334 Introduction to Russian Literature I and II, V 3220
Literature and Empire: The Reign of the Russian Novel, V 3221 Literary Avant-garde and Revolution: The Century of Russian Modernism, and at least one further course with required reading in Russian. Other Russian Literature courses may be substituted upon consultation with adviser. With permission of adviser one course on Russia offered in a department other than Slavic may be substituted.

- V 3505 Senior Seminar.

II. Slavic and East European Literature and Culture:

- Completion of the third-year course (or the equivalent) in Czech, Polish, Serbo-Croatian, or Ukrainian language.
- Six courses in literature, theatre or film of the region, potentially including independent study courses.
- Two courses in related fields (history, art history, music, etc.) to include at least one course in the history of the region.
- Two semesters of senior seminar or the equivalent leading to the completion of a senior thesis.

Note: A student in this major must design her program in close consultation with her advisor in order to insure intellectual, disciplinary, and regional coherence.

III. Russian Regional Studies:

- Completion of the four years of Russian (see Russian Language and Literature Major above)
- Two courses in Russian or Soviet literature (in translation or in Russian)
- Two courses in Russian history
- One course on Russia or the Soviet Union in any discipline (history, art history, geography, sociology, economics, literature, political science, etc.)
- One course in Soviet/post-Soviet politics
- Two semesters of a senior research seminar or the equivalent in independent study with research to be conducted predominantly in Russian language sources.

Note: In consultation with her advisor, a student may elect to take one or more courses devoted to a region other than Russia that is located on the territory of the former Soviet Union.

IV. Slavic and East European Regional Studies Major-Czech, Polish,

Serbo-Croatian, Ukrainian

Identical to the above, but requires the completion of three years of language study and courses taken in the relevant region.

REQUIREMENTS FOR THE MINOR IN RUSSIAN

A total of five courses beyond the second year of Russian are required for the minor in Russian Language and Literature.

Printable Version
## Russian Language

**RUSS V 1101x-V1102y First-Year Russian, I and II**

Grammar, reading, composition, and conversation.  
Prerequisites: Required: V1501-V1502. Homework includes listening to tapes available in the language laboratory. No credit is given for V1101 unless V1102 is satisfactorily completed. Enrollment limited. Students must sign up in the Columbia Slavic Department (HAM 708) prior to first class and register concurrently for the grammar lecture V1501-V1502.  
Departmental permission is required.

RUSS V 3339y Masterpieces of Russian Literature: 18th Century

A close study, in the original, of representative works by Pushkin, Lermontov, Gogol, Turgenev, Goncharov, Tolstoy, Dostoevsky, Leskov, and Chekhov.
Prerequisites: Native or near-native knowledge of Russian and permission of the instructor.
3 points
RUSS V 3340y Masterpieces of Russian Literature: 20th Century

A close study, in the original, of representative works by Bunin, Tsvetaeva, Mayakovsky, Babel, Pasternak, Bulgakov, Nabokov, Mandelstam, Anna Akhmatova, Solzhenitsyn, Brodsky, and Pelevin.
Prerequisites: Native or near-native knowledge of Russian and permission of the instructor. General Education Requirement: Literature (LIT). Not offered in 2008-2009.
3 points

RUSS V 3481y Pushkin

A close study, in the original, of the major works. Class discussion conducted in English.
Prerequisites: Three years of college Russian and permission of the instructor. Not offered in 2008-2009.
3 points

RUSS V 3482x or y Gogol

A close study, in the original, of the major works. Class discussion conducted in English.
Prerequisites: Three years of college Russian and permission of the instructor. Not offered in 2008-2009.
3 points

RUSS V 3484y Dostoevsky

A close study, in the original, of the major works. Class discussion conducted in English.
Prerequisites: Three years of college Russian and permission of the instructor. Not offered in 2008-2009.
3 points

RUSS V 3485x Russian Poetry of the 19th and 20th Centuries

A close study, in the original, of selected texts from five representative lyric poets, Tютчев, Фет, Блок, Тэцветаева, and Бродский. Attention given to metrics, formal analysis of style and structure, and the literary and philosophical contexts. [Class discussion in English.]
Prerequisites: Three years of college Russian and permission of the instructor. Not offered in 2008-2009.
3 points

RUSS V 3466y Chekhov

A close study, in the original, of the major works. Class discussion conducted in English.
Prerequisites: Three years of college Russian and permission of the instructor. Not offered in 2008-2009.
3 points

RUSS V 3467y Twentieth-Century Prose Writers

A close study, in the original, of the representative Soviet writers, including Babel, Ol’shansky, Zamyatin, and Andrei Bitov. Class discussion conducted in English.
Prerequisites: Three years of college Russian and permission of the instructor. Not offered in 2008-2009.
3 points

RUSS V 3468x or y Russian Plays

A close study, in the original, of several representative Russian plays, with emphasis on problems of translation, literary technique, and dramatic presentation. Class discussion conducted in English.
Prerequisites: Three years of college Russian and permission of the instructor. Not offered in 2008-2009.
3 points

RUSS V 3470x Re-Reading Nabokov

Examines with Nabokovian scrutiny-and with special emphasis on bilingualism, translation, and untranslatability-some of the writer's major works in their Russian and English versions, including his double take on Lolita.
3 points

RUSS V 3595x or y Senior Seminar

Class reports culminating in a critical paper.
Prerequisites: Senior major or permission of the instructor.
4 points
RUSS V 3997x and y Supervised Individual Research

Supervised research culminating in a critical paper.
Prerequisites: Open to senior majors, and permission of the instructor.
2-4 points.

HSSL W 3224y Cities and Civilizations: An Introduction to Eurasian Studies

An introduction to Eurasian study (as successor to Russian/East European and Soviet studies) through an examination of the history and culture of major centers of urban settlement. Eurasia focuses attention on the multiethnicity, religious pluralism, hybrid identities, and regional diversity of a set of communities inhabiting the lands between East Asia and West and Central Europe: they include, but are not limited to the state formations known as Kyivan Rus' and the Polish-Lithuanian Commonwealth, Muscovy, the Russian Empire, the Soviet Union, as well as the Habsburg and Ottoman empires. The East European and Eurasian cities will be compared with one another and with contemporary cities outside the geopolitical boundaries that are the primary focus of the course. History and culture will be approached through lectures and readings, including primary historical texts, works of imaginative literature and art (including film, music, painting, architecture), scholarly
articles.

RUSS W 4010x or y Russian Women in Literature and Culture

Exploration of the changing image of woman in Russia from the beginnings of Russian history to the present as reflected in literary texts, historical documents, art, and film. Special attention to the Soviet and post-Soviet periods and to the question of the relevance of Western Feminist theory to Russia.

3 points

RUSS W 4014x Introduction to Russian Poetry of the Nineteenth and Twentieth Centuries

An introduction to Russian poetry. Through the study of selected texts of major poets, of the nineteenth and twentieth centuries, primarily: Pushkin, Lermontov, Pavlova, Tchaikovsky, Blok, Mandel'shtam, Akhmatova, Tsvetaeva, and Brodsky. Classes devoted to the output of a single poet will be interspersed with classes that draw together the poems of different poets in order to show the reflexivity of the Russian poetic canon. Classes will be organized according to the types of poems or to shared themes and will teach the basics of versification, poetic language (sound, tropes), and poetic forms.

Prerequisites: Classes in English; poetry read in Russian. Not offered in 2008-2009.

3 points

RUSS W 4015x Russian Drama: Pushkin to Chekhov

Readings of selected 19th-century texts. Some attention to theatrical background. Parallel reading lists in translation and in the original.

Prerequisites: Students who wish to receive credit towards a departmental major or concentration are required to read in the original Russian. Not offered in 2008-2009.

3 points

RUSS W 4016x or y Twentieth-Century Drama and Theatre

3 points

RUSS W 4020x Formalism-Structuralism-Poetics-Semiotics of Culture: East-European Literary Theory, 1910-1990

3 points

CLSS W 4030x or y Russian & Yiddish Prose: How To Do Things With Literature

Prerequisites: Knowledge of Russian or Yiddish not required; readings available in the original for students with requisite language proficiency. General Education Requirement: Literature (LIT). Not offered in 2008-2009.

3 points
RUSS W 4033x or y The Making of Socialist Realism
3 points

RUSS W 4034x or y Literature, Politics, and Tradition After Socialist Realism
Major writers and trends in Russian literature from the death of Stalin to the present. Emphasis on the rethinking of the role of literature in society and on formal experimentation engendered by relaxation of political controls over literature.
Prerequisites: A knowledge of Russian is not required. Not offered in 2008-2009.
3 points

CLRS G 4160y Sexuality in Russian/Soviet Cinema
Explores the representation of sexuality in Russian/Soviet cinema from pre-Revolutionary silent melodramas to post-Soviet naturalism. We will concentrate on those aspects of this representation that make Russian/Soviet cinema's treatment of sexuality aesthetically and psychologically unique and will examine the extent to which Western film theory is applicable to this multifarious phenomenon.
3 points

CLSS W 4431x Theatricality and Spectacle in Russian Culture
Survey of Russian Cultural History from the late 17th century to the present day, focused on the problems of Theater and Performance, their place in the system of power and in the structure of everyday life. Alongside with the history of Russian Theater, various manifestations of theatricality, from the 18th century Court Festivals to the Moscow Olympiad of 1960, will be studied. Readings will include milestones of Russian Drama (plays by Pushkin, Gogol, Ostrovsky, Chekhov, Bulgakov), theater manifestos by Stanislavski, Meierhold, Evreinov, as well as selected issues in contemporary cultural, architectural and visual theory (works by R. Barthes, M. Carlson, A. Vidler, M. Fried). All readings will be in English.
Prerequisites: Course open for both graduate and qualified undergraduate students.
3 points

RUSS G 6039y Literature, Politics, & Tradition After Stalin
The major writers and trends in Russian literature from the death of Stalin to the present. Emphasis on the rethinking of the role of literature in society and on formal experimentation engendered by relaxation of political controls over literature.
Prerequisites: Open to advanced undergraduates with permission of the instructor. A knowledge of Russian is not required.
3 points

RUSS G 8110x The Discourse of Self in Russia and the West
The evolution of self-narrative in Russian literature, including both fiction and non-fiction, in comparison with canonical Western texts. Emphasis on the aesthetic and ethical tensions inherent in the project of self-narration, the ways in which major Russian and Western authors addressed these problems, and parallels between personal and national self-definition.

Slavic Literature and Culture in Translation

CLSS V 3223x or y Postwar East-European Prose
Consideration of narrative strategies for coping with the East European condition from World War II through the period of Soviet hegemony to the present. Works by Tadeusz, Borowski, Czeslaw Milosz, Tadeusz Konwicki, Christa Wolf, Konrad Gysrgy, Haraszi Miklos, Nada’s Peter, Danilo Ki-s, Milorad Pavčic, Milan Kundera, Josef Skvorecký, Tereza Boučková, and others.
3 points

CLSS W 4025y Literature and Ideology: Balkan Modernism
Survey of the 20th-century literature of Greece, Bulgaria, Macedonia, Serbia and Montenegro, Bosnia, Albania, and Romania (in translation), with a focus on the role of literature in modern Balkan politics. Explores “the Balkans”—the cultural entity, the political phenomenon, the ideological construct—from the vantage point of the best modernist and postmodernist texts created in the region. Readings include poetry by Constantine Cavafy, novels by Ivo Andric and Ismail Kadare, short stories by Danilo Kiš, read in conjunction with his fathers by choice, Jorge Luis Borges and Bruno Schultz, and films by two of Europe's most acclaimed directors of 1990's, Emir Kusturica and Theo Angelopoulos.
3 points

CLSS W 4033x The History, Literature, and Film of Dissent in East-Central Europe
Interdisciplinary investigation of the cultural and political phenomenon of Eastern European dissent of the 1970s and 1980s, which culminated in the collapse of communism in the region. -Team taught
3 points

Professors: Debra C. Minkoff (Chair), Jonathan Rieder
Assistant Professors: Elizabeth Bernstein (Departmental Representative), Peter Levin

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleavelist.html

Sociology is a diverse academic discipline that draws its strength, and coherence, from a collective commitment to
developing and testing theoretical principles about social life with empirical evidence. This commitment to
systematic empirical research, across a range of methodological approaches, represents the strength of the
discipline and the potential for a distinctive undergraduate experience for Sociology majors at Barnard. These
approaches include varieties of quantitative data collection and analysis, participant observation, intensive
interviewing, historical-archival research, and discourse analysis. The Department provides students with
expertise in three areas: (1) a common foundation in the discipline's core theories and methodologies to analyze
social life; (2) exposure to a range of substantive questions that motivate sociological research; and (3) direct
research experience both within the classroom and under faculty supervision in the Senior Thesis Seminar. All
students taking courses in Sociology at Barnard can expect to learn about crucial links between theory and
empirical evidence for public policy, political and social debate, and civic engagement more broadly defined.

Sociology majors will develop critical analytic and research skills and they can take with them into their
professional careers, whether they continue on to graduate study in sociology or choose to enter such fields as
business, education, law, nonprofit enterprise or public policy.

Printable Version

Sociology
332 Milbank Hall
854-3577
www.barnard.edu/sociology

REQUIREMENTS FOR THE MAJOR

The major prepares students for graduate work in sociology as well as in other disciplines; for professional
schools (law, business, social work, journalism, urban planning); and for all occupations requiring general
knowledge of society and social interaction as well as basic skills of social research.

A minimum of 10 courses is required for the major, including:

SOCI BC 1003  Introduction to Sociology
SOCI BC 3082  Junior Colloquium—Sociological Theory
SOCI BC 3211  Quantitative Methods (not later than the junior year)
SOCI BC 3087–BC 3088  Individual Projects for Seniors

and at least five other courses selected in consultation with the major adviser. Sociology BC 3211 should be taken
no later than the junior year.

There is no major examination. To graduate, a student must complete, to the satisfaction of her instructor in BC
3087–BC 3088, a thesis involving some form of original sociological research and analysis.

REQUIREMENTS FOR THE MINOR

Five courses are required for the minor in Sociology, including SOCI BC 1003 and four courses to be selected in
consultation with the Sociology adviser.

**SOCI V 3115x Feminist Theory**

Analysis of the theoretical assumptions and political implications of liberal, radical, Marxist, and socialist variants of first- and second-wave feminist theory, including recent works in psychoanalytic and postmodern feminism. Also considers the implications of such feminist arguments for debates within contemporary and classical sociological theory.  
**Prerequisites:** Permission of the instructor. Enrollment limited. Introductory course in Sociology. Not offered in 2008-2009.  
**4 points**

**SOCI V 3200x Social Inequalities: Gender, Class and Race**
Critical role of gender, class, and race in social life, and their relationship to inequality, community, and culture. Focuses on reactions to and perceptions of difference in the spheres of family, work, sexuality, and politics.

3 points

**SOCI BC 3204y Social Theory and Cultural Diversity**

Examines issues, conflicts and ideas regarding cultural diversity, in particular the 'culture wars', the politics of identity/recognition, and the ideal of multiculturalism, using tools of classical and contemporary social theory. Case material will be drawn from the Western hemisphere. Selected topics include: multiculturalism and the politics of identity/recognition; the headscarf debate; orientalism; sexuality and culture; 'excitable speech'; and the 'culture wars'.

3 points

**SOCI V 3206x Race, Culture, and Identity in the Contemporary United States**

Impact of race on culture and identity, with emphasis on black-white relations: Is there a "great divide"? affirmative action, individualism and communalism; imagery of blacks and whites in art and entertainment; Afro-Caribbean/African-American differences; ethnicity and "white" culture; white backlash and racism; integration and black nationalism; the ambiguities of "crossover" culture; new immigration.

4 points

**SOCI V 3208x and y (Section 001) Unity and Division in the Contemporary United States: A Sociological View**

Conflict and unity in the U.S: the tensions of individualism and communalism; the schism between blue and red states; culture war; the careers of racism and anti-Semitism; identity politics and fragmentation; immigration and second generation identities; the changing status of whiteness and blackness; cultural borrowing and crossover culture.

- J. Rieder

*Prerequisites: Introductory course in Sociology. Sophomore standing. General Education Requirement: Social Analysis (SOC).*

**SOCI V 3220y Masculinity: A Sociological View**

Examines the cultural, political, and institutional forces that govern masculinity. Focuses on various meanings of "being a man" and the effects these different types of masculinity have on both men and women. Explores some of the variation among men and relationships between men and women.

*Prerequisites: One introductory course in Sociology is suggested. General Education Requirement: Social Analysis (SOC). Not offered in 2008-2009.*

3 points

**SOCI V 3227x The Sociology of U.S. Economic Life**

Examines the social forces that shape market behavior: ideologies of liberalism and conservativism; the culture of commodities and consumption; income, class, and quality of life; the immigrant economy; life in financial institutions; the impact of the global economy.
SOCI V 3235x or y Social Movements

Introduction to theory and research on national social movements, with emphasis on how political, organizational, and cultural factors shape when and how people collectively mobilize for social change. Focus is on contemporary American activism, including the civil rights movement, the new Left student movement, the feminist movement, gay/lesbian activism, and more recent transnational social movements.

- D. Minkoff

SOCI V 3270x Sociology of Mass Media and Popular Culture

Contemporary forms of mass media and genres of popular culture, including print and broadcast journalism, television, movies, popular literature, fashion, and music. Issues include the rise of mass society; the role of organizations and institutional environments in shaping the production of mass culture; the role of mass culture in producing and reproducing basic social categories, like racial and gender stereotypes; how the media shapes politics.

General Education Requirement: Social Analysis (SOC). Not offered in 2008-2009. 3 points

SOCI W 3302x Sociology of Gender

Examination of factors in gender identity that are both universal (across time, culture, setting) and specific to a social context. Social construction of gender roles in different settings, including family, work, and politics. Attention to the role of social policies in reinforcing norms or facilitating change.

Prerequisites: One introductory course in Sociology suggested. General Education Requirement: Social Analysis (SOC). Not offered in 2008-2009. 3 points

SOCI V 3318x or y The Sociology of Sexuality

Social, cultural and organizational aspects of sex in the contemporary United States, stressing the plural in sexualities: sexual revolution and post-Victorian ideologies; the context of gender and inequality; social movements and sexual identity; the variety of sexual meanings and communities; the impact of AIDS.

- E. Bernstein

Prerequisites: Introductory course in Sociology is suggested. General Education Requirement: Reason and Value (REA). Not offered in 2008-2009. 3 points
SOCIO 3324x or y Poverty, Inequality, and Policy: A Sociological Perspective

Examination of poverty, the "underclass," and inequality in the United States. Part 1: The moral premises, social theories, and political interests shaping current debates about the poor. Part 2: A more concrete analysis of the lives of the poor and the causes of family breakdown, the drug economy, welfare, employment, and homelessness.

- J. Olivera
Prerequisites: Introductory course in Sociology is suggested.

SOCIO 3901x or y The Sociology of Culture

Drawing examples from popular music, religion, politics, race, and gender, explores the interpretation, production, and reception of cultural texts and meanings. Topics include aesthetic distinction and taste communities, ideology, power, and resistance; the structure and functions of subcultures; popular culture and high culture; and ethnography and interpretation.

- J. Rieder
Prerequisites: SOCIO BC1003 or equivalent social science course and permission of the instructor. Enrollment limited to 15 students. General Education Requirement: Cultures in Comparison (CUL).

SOCIO 3902x or y Institutional Analysis in Organizations

Introduction to an institutional perspective on organizations, moving between theoretical discussion of institutions and organizations and empirical research. Coverage of the rise of quantification; how comparative political cultures implement industrial policy; how institutional knowledge affects the environment; and how the Civil Rights movement contended with the American political environment.

Prerequisites: Junior or Senior standing; preference to majors. Not offered in 2008-2009.

4 points

SOCIO BC 3903y Work and Culture

Sociological approaches to understanding work and culture. Theoretical underpinnings of workplace interactions, with attention to ethnographies of work across a range of organizations. Examines changes in work due to technological advances and globalization. Special emphasis on gender.

Prerequisites: Preference for Barnard Leadership Initiative participants, Juniors and Seniors. Permission of the instructor.

SOCIO BC 3905x Funding Social Change: A Research Practicum

Examination of debates on social movement and philanthropy combined with independent data collection on foundations and grant recipients. Topics include: the role of foundations in the US; resource mobilization and social movements; consequences of public interest, and new conservative movements.

4 points

SOCIO B 3906x Conservatism

Considering different traditions of conservative social and political thought, examines the history of conservative thinking and the conservative movement in the 20th century. Focus on historical evolution in the U.S., and concludes with an extended look at the rise of 'neoliberalism'. Selected topics include: the intellectual roots of modern conservatism; conservatism and feminism; black conservatives; neoconservatism and the future of conservatism in America.

Prerequisites: SOCIO BC1003 or SOCIO V3100 or permission of the instructor. Not offered in 2008-2009.

4 points

SOCIO BC 3907x Communities and Social Change
Examines how social transformations have altered the ways in which people go about creating, losing, and recreating community. The primary focus is on how changes in the economy, the state, immigration, racial dynamics, and class inequality inhibit and promote the maintenance of communities in contemporary American society.

- J. Olvera

**Prerequisites:** SOCI BC1003, Sophomore Standing. Enrollment limited to 20 students.

**4 points**

**SOCI BC 3908y Transnational Social Movements**

Examines transnational anti-globalization protest which emerged to fight against free trade, the World Bank and the IMF beginning in the 1990s. Drawing on recent examples of transnational contention, familiarizes students with the current set of debates surrounding contemporary forms of transnational activism and sheds light on its broader historical context.

**Prerequisites:** SOCI BC3235 or SOCI W3480 or permission of the instructor. Not offered in 2009-2009.

**4 points**

**SOCI BC 3909y Ethnic Conflict and Unrest**

Post-1965 immigration in the U.S. has prompted conflicts between new immigrant groups and established racial and ethnic groups. This seminar explores ethnic conflict and unrest that takes place in the streets, workplace, and everyday social life. Focus is on sociological theories that explain the tensions associated with the arrival of new immigrants.

- J. Olvera

**Prerequisites:** Sophomore Standing, SOCI BC1003 or permission of the instructor. Enrollment limited to 20 students.

**SOCI BC 3910x or y Research Seminar in Sociology**

Substantial participation in an ongoing faculty-led Sociological research project. Movement between substantive discussion of theory and methodological study of a specific topic. Coverage of how to frame a research project, using qualitative and quantitative tools to carry out analysis, and how to write up research in conjunction with a substantive literature and topic. Examples include: where prices for Art come from and funding social change.

**Prerequisites:** SOCI BC1003 or equivalent, permission of the instructor. Not offered in 2008-2009.

Major and Minor in Spanish and Latin American Cultures
Majors and minors in this department will provide students with a solid literacy in the cultures of the Hispanic world. Literacy at the level of language instruction entails the students' ability to express themselves fluently in Spanish, both orally and in writing. Literacy at the cultural level entails an intellectual grasp of Spanish and Spanish-American cultural and artistic products and the knowledge of the historical and methodological contexts in which to situate them. Students must consult with the major advisor to carefully plan their program upon major declaration. With advisor approval, courses taken abroad or at another institution can apply toward the major/minor. The Department of Spanish and Latin American Cultures addresses the Barnard senior research requirement through the writing of a substantial paper in a topic-based senior seminar; there is the possibility of further research development for some students. The Spanish and Latin American Cultures majors have been designed in conjunction with the Columbia Department of Spanish and Portuguese. Hence, Barnard students may, always in consultation with the major advisor, move freely between the departments of both institutions in search of the courses that best fit their interests and schedules.

MAJOR IN SPANISH AND LATIN AMERICAN CULTURES

NOTE: With advisor approval, courses in both the Department of Spanish and Latin American Cultures and the Columbia Department of Spanish and Portuguese numbered 3000 and above will count toward the majors or minors—with the exception of intensive Portuguese and Catalan language courses, which may be counted as electives "outside" the Departments, as explained below.

Required Introductory courses:
SPAN W3300 - Advanced Spanish Language
SPAN W3330 Introduction to Hispanic Cultures
SPAN W3349 Hispanic Cultures I
SPAN W3350 Hispanic Cultures II

Eleven courses (minimum 33 points): SPAN 3300, 3330, 3349, 3350, six elective courses and a Senior Seminar (3990, 3991, 3992 or 3993). A minimum of three electives must be chosen from the Departments' 3000- or 4000-level* offerings. Up to three electives may be taken outside the Departments, provided they address Hispanic topics. Coursework completed in other departments requires the approval of the major advisor; students should therefore not wait until their senior year to find out whether courses they have taken will apply to the major. All students should seek chronological and geographic breadth in their coursework, enrolling in diverse classes on both Latin American and Iberian topics, something that is essential for those planning future graduate work in Hispanic Studies. Such students should consult especially closely with their advisor to plan their program. Students are also encouraged to study at least a year in another language, enrolling in intensive courses
whenever possible. (Language courses, including Portuguese and Catalan, may count as outside electives, but language courses in the Departments must be intensive to satisfy this requirement: PORT 1120, 1220 and 1320 and CATL 1120 and 1220.)

*4000-level courses, offered only at Columbia, are joint graduate-undergraduate courses.

**Minor in Spanish and Latin American Cultures.** Six courses (minimum 18 points): SPAN 3300, SPAN 3330, SPAN 3349 or 3350, and three other courses at 3000-level or above to be chosen in consultation with the major advisor.

**Major in Spanish and Latin American Cultures with Specialization.** For students wishing to pursue a more rigorously interdisciplinary program in the Social Sciences or the Humanities, the Department offers a major that integrates courses in Spanish and Latin American Cultures/Spanish and Portuguese with courses in another department or program chosen carefully by the student.

Fourteen courses (minimum 42 points): SPAN 3300, 3330, 3349, 3350, nine elective courses, and a Senior Seminar (3990, 3991, 3992 or 3993). Coursework will include a minimum of three 3000- or 4000-level courses within the Departments but beyond the four required foundation courses, and six courses in another field of specialization, three of which should be closely related to Hispanic Studies. Students who wish to complete this rigorous interdisciplinary major will choose a specialization. Possible fields and programs include Anthropology, Africana Studies, Art History, Economics, Film, Gender Studies, History, Latino Studies, Latin American Studies, Music, Political Science, Sociology, and Urban Studies. Students should work closely with their major advisor to plan their program of study; it will be their responsibility to seek advising regarding coursework in their external specialization from appropriate sources (for example, from other departments’ Chairs). Electives outside the two departments (Spanish and Latin American Cultures/Spanish and Portuguese) should include basic methodological or foundation courses in the chosen field or program. In special cases and with advisor approval, students may complete some coursework in another, closely related field. In exceptional cases and again with advisor approval, students may take a Senior Seminar in their field of specialization as a seventh course outside of the Departments if they have completed enough basic courses in that field to manage the demands of an advanced seminar. In such cases, the major advisor must receive written communication from the seminar instructor indicating approval of a student's membership in the course; the seminar project must be on a Hispanic topic; and a copy of the project must be turned in to the major advisor for the student's file upon completion of the course. Students who complete the seminar in another department may also count it as the third elective course on a Hispanic topic outside of the two departments, in which case they may take a fourth 3000- or 4000-level course in Spanish and Latin American Cultures/Spanish and Portuguese.

**Senior Research Project.** In the fall of their senior year, students must enroll in a senior seminar in which they will undertake the research and writing of a substantial paper in the field. Some students may wish, with departmental approval, to further develop their research in the spring through an independent study project with a willing faculty member. For that project, they may expand their work in the senior seminar or undertake a new assignment in consultation with the faculty member. The Independent Study (BC3099) may be counted as one of the courses that fulfills the major.

### Bridge Courses

**SPAN W 3300x or y Advanced Language through Content: Hispanic Cultures in the Age of Globalization**

Content-based advanced study of selected aspects of grammar and vocabulary, aimed at increasing proficiency in speaking, listening comprehension, and reading comprehension, with a special emphasis on writing. A look at the changes and challenges.
in Latin America and Spain brought about by the circulation of cultures, people, ideas and images in an increasingly "global" world. Topics may include migration, narcotráfico, gender and sexuality, language plurality, the environment and the use of new technologies.

- J. Crapotta

Prerequisites: Completion of the language requirement. Corequisites: This course should be taken simultaneously with, or followed by, W3330. Both are prerequisites for all other courses in the Spanish major. IMPORTANT: This course replaces the former W3300 and BC3004. If you have taken those courses, do not enroll for W3300. Although section topics vary, you may only take 3300 ONCE.

SPAN W 3300x or y Advanced Language through Content: Reading and Interpreting Narrative

Content-based advanced study of selected aspects of grammar and vocabulary, aimed at increasing proficiency in speaking, listening, comprehension and reading, with a special emphasis on writing.

In conjunction with the work on language skills, a guide to the practices of close reading and textual interpretation, illustrated with modern and contemporary Hispanic texts.

- W. Rios-Font

Prerequisites: Prerequisites: Completion of the language requirement. "L" course; enrollment limited to 15 students.

IMPORTANT: This course replaces the former W3200 and EC3004. If you have taken those courses, do not enroll for W3300. Although section topics vary, you may only take 3300 ONCE. Corequisites: This course should be taken simultaneously with, or followed by, W3330. Both are prerequisites for all other courses in the Spanish major.

SPAN W 3300x or y (Section 1) Advanced Language through Content: Cultura - An Online Cross-Cultural Dialogue

Content-based advanced study of selected aspects of grammar and vocabulary, aimed at increasing proficiency in speaking, listening comprehension, and reading comprehension, with a special emphasis on writing. Topic varies according to instructor.

An online cross-cultural exchange with students from León, Spain, focusing on an exploration and comparison of the values, attitudes and assumptions of Spanish and US societies. Students communicate through forums, read cultural materials and discuss and analyze their findings.

- J. Suárez García, J. Crapotta.

Prerequisites: Completion of the language requirement. "L" course; enrollment limited to 15 students. IMPORTANT: This course replaces the former W3200 and BC3004. If you have taken those courses, do not enroll for W3300. Although section topics vary, you may only take 3300 ONCE. Corequisites: This course should be taken simultaneously with, or followed by, W3300.

SPAN W 3300x or y (Section 10) Advanced Language through Content: Translating Cultures - Advanced Spanish for Native Speakers

Content-based advanced study of selected aspects of grammar and vocabulary, aimed at increasing proficiency in speaking, listening comprehension, and reading comprehension, with a special emphasis on writing. Topic varies according to instructor.

Through special attention to translation theory and practice in the context of an examination of the issue of multiculturalism in New York, the course aims to increase critical skills, awareness of formal/informal registers, and command of academic writing structures among native speakers with varying degrees of previous language instruction.

Prerequisites: Completion of the language requirement or the equivalent. Enrollment limited to 15 students. IMPORTANT: This course replaces the former W3200 and BC3004. If you have taken those courses, do not enroll for W3300. Although section topics vary, you may only take 3300 ONCE. Corequisites: This course should be taken simultaneously with, or followed by, SPAN W3300.

SPAN W 3330x or y Introduction to the Study of Hispanic Cultures

Information and skills needed to interpret a wide variety of cultural objects produced in Spain and Spanish America: literary, filmic, artistic, architectural, urban, etc. Focus on interpretation as an activity and as the principal operation though which culturally sited meaning is created and analyzed. Among the categories and topics discussed will be history, national and popular cultures, literature (high/low), cultural institutions, migration, and globalization. This course also continues work on speaking, listening, and reading comprehension, with a special emphasis on writing, begun in W3300.

Prerequisites: Enrollment limited to 15. Sophomore standing or permission of instructor. Corequisites: This course follows W3300 in the bridge course sequence; but may, with instructor/advisor permission, be taken concurrently. General Education Requirement: Cultures in Comparison (CUL).

**Literature and Culture Courses**

**SPAN BC 3099x or y Independent Study**

This course enables students to pursue subjects not covered by courses currently taught. To arrange this course, a student must present a member of the faculty with a program of study and obtain an Independent Study form. This form (and the program-of-study) must be approved by both the sponsoring faculty member and the chair of the department. The form must then be submitted to the Committee on Programs and Academic Standing for final approval. No faculty member of any rank may direct more than one BC3099 in any given semester.

*Prerequisites:* Spanish W3300, W3330, W3349, and W3350. Other upper-level courses as determined by instructor.

3 points

**SPAN BC 3110x or y An Introduction to Spanish Theatre**

Analyses of the varied forms and forms of theatre in representative Spanish plays of the 17th through the 20th centuries: *la comedia*, *la entremés*, Romantic drama, *el esperpento*, surrealistic theatre, absurdist comedy, and political satire. Authors include Cervantes, Lope de Vega, Zorrilla, Vaile-Iñin, Lorca, Arrabal, and Rubal.

3 points

**SPAN BC 3112x or y Love and Eroticism in Contemporary Latin American Literature**

Introduction to the artistic manifestations of love and eroticism and their relationship to social attitudes. Works by Gabriela Mistral, Vicente Huidobro, Neruda, Paz, Borges, Isabel Allende, Vargas Llosa, and Garcia Marquez.

*Prerequisites:* "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). Not offered in 2008-2009.

3 points

**SPAN BC 3117x or y Literature of the Southern Cone: The Dialects of Fantasy and Reality**

Examination of the literature of the Southern Cone: Argentina, Uruguay, Paraguay, and Chile; the tension between fantastic literature and literary realism. Readings include Borges, Casares, Ccampa, Ondetti, Donoso, and Rod Bastos.

*Prerequisites:* "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). General Education Requirement: Literature (LIT).

3 points
SPAN BC 3119x or y Literature of the Andes: Revolution and Identity

The region of the Andes (Colombia, Ecuador, Bolivia, Peru, and Chile) has produced great poets - Mistral, Neruda, and Vallejo - as well as extraordinary novelists, Donoso and Vargas Llosa. This course seeks to identify the essential traits of the region's literature and relate them to its tumultuous history.

- A. Mac Adam

Prerequisites: "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350).

3 points

SPAN BC 3120x or y Twentieth-Century Puerto Rican Literature

A study of Puerto Rican authors (Ferre, Sanchez, Pedreira, Julia de Burgos, Gonzalez, Marques) and their interpretation of socio-historical development in Puerto Rico. The relationship of these texts to historical writing (e.g., Quintero Rivera), and the revisionist trend in Puerto Rican historiography.

Prerequisites: "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). Not offered in 2008-2009.

3 points

SPAN BC 3122x or y Contemporary Latin American Short Fiction

Readings of short stories and novellas by established and emerging writers from Spanish America and Brazil. Defines the parameters of Latin American short fiction by exploring its various manifestations, fantastic literature, protest writing, satire, and realism. Among the authors to be studied will be: Machado de Assis, Borges, Garcia Marquez, Ana Lydia Vega, Clarice Lispector, Silvina Ocampo, and Jose Donoso.

Prerequisites: "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). Not offered in 2008-2009.

3 points

SPAN BC 3127x or y Don Quijote

Study of Cervantes' masterpiece, concentrating on the narrative models available to him and his own creation of the novel. Readings also include selected Novelas Ejemplares and critical studies.

Prerequisites: "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). Not offered in 2008-2009.

3 points

SPAN BC 3131x or y Memory and Violence: Film and Literature of Spanish Civil War

Contemporary Spanish films serve as a point of departure for the study of the Civil War and Franco periods as both historical fact and myth. Includes an analysis of its representation in memoirs and literary works and its significance in light of Spain's recent political transformation.

3 points

SPAN BC 3134x or y Marriage and Adultery in 19th-Century Spanish Fiction

Consideration of the conflicting interests of 19th-century society as represented through the themes of marriage and adultery: the desire for social stability vs. the potentially subversive drive for freedom and self-affirmation. The roles of women, class, culture, and religion emphasized in works by Galdos, Clarín, Caballero, and others.

Prerequisites: "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). Not offered in 2008-2009.

3 points

SPWS BC 3135x or y Reading for Difference: Lesbian and Gay Themes in Hispanic Literature and Film

Homosexual issues and images in major literary works and films of Spain and Latin America. Themes include the social construction of sexuality, political contexts, gay and lesbian self-representation, homosexual desire, closeting and disclosure, and defining gay poetics. Authors include Lorca, Arenas, Tusquets, Molloy, Peri Rossi, Puig, and Almodovar.

3 points

**SPAN BC 3141x or y La Novela del Boom, 1962 - 1970**

A close reading of the novels that place Spanish America in the mainstream of worldwide literary production during the sixties. Authors include: Fuentes, Cortazar, Cabrera Infante, Vargas Llosa, Puig, and Dorosso.

**Prerequisites:** "L" course; enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). Not offered in 2008-2009.

3 points

**SPAN BC 3142x or y Film-Literature Relations in Modern Latin American Narrative**

Intertextual relations between film and literature. Authors and film makers include: Gabriel Garcia Marquez, Laura Esquivel, Borges, Marfa Luisa Bombem, Vargas Llosa, and Fina Torres.

**Prerequisites:** "L" course; enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). General Education Requirement: Literature (LIT).

3 points

**SPAN BC 3143x or y Literature of the Spanish Caribbean**

A study of works from the Spanish-speaking islands of the Caribbean, Cuba, the Dominican Republic, and Puerto Rico, in order to unravel the cultural traits, historical patterns, and poilito-economic realities that these islands may or may not have in common.

**Prerequisites:** "L" course; enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). General Education Requirement: Literature (LIT).

**SPAN BC 3144x or y Daughters of La Malinche: Women and Culture in Mexico**

Explores the contribution of women towards the development of Mexican culture from pre-Hispanic times through the 20th century, with an emphasis on the latter. The works of such artists and writers as Frida Kahlo and Maria Izquierdo, Elena Garro, and Rosario Castellanos will be considered in light of their historical and political contexts.

**Prerequisites:** "L" course; enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). Not offered in 2008-2009.

3 points

**SPAN BC 3146x or y 20th-Century Women Writers of Colombia**

Works by such authors as Laura Restrepo, Alba Lucia Angel, Emilia Ayarza, Matilde Espinosa, and Maria Mercedes Carranza studied in the context of and in contrast to literary movements such as Magical Realism, Piedracismismo, and Nadaismo.

**Prerequisites:** "L" course; enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). General Education Requirement: Literature (LIT).

3 points

**SPAN BC 3148x or y ¿Contra Franco Vivamos mejor? Literature and Popular Culture of the Spanish Dictatorship (1936-75)**

An examination of the literature and culture produced in Spain during the dictatorship of Francisco Franco: the interaction between culture allowed and sponsored by the regime, and the voices of resistance against repression and censorship.

**Prerequisites:** "L" course; enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). Not offered in 2008-2009.

3 points

**SPAN BC 3151x or y Spanish Film: Cinematic Representation of Spain**

An examination of Spanish film in both theoretical and historical terms. Considers political and ideological changes through the 20th century and their repercussions in cinematic representation. Topics include: surrealism and Bunuel's legacy, representations of Franco and the civil war, censorship and self-censorship; gender, sexualities, and national identities; film, literature relations.

**Prerequisites:** "L" course; enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). General Education Requirement: The Visual and Performing Arts (ART). Not offered in 2008-2009.

3 points

**SPAN BC 3159x or y Angels and Seagulls: the Cultural Construction of Womanhood in Nineteenth Century Spain**
A reading of 19th-Century Spanish journalistic, medical, and legal texts, conduct manuals, and novels by both men and women, to assess how they come together in configuring new ideas of female identity and its social domains, as aristocratic rule is gradually being replaced by a new bourgeois order.

Prerequisites: "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). Not offered in 2008-2009.

3 points

SPAN BC 3442x or y The Bourgeois Imagination in Nineteenth-Century Spain

Through both literary and popular print culture, examination of the new class in 19th century Spain produced by economic industrialization and political liberalism and how it ensured its hegemony. Negotiates its foundational issues - power, money, law, city life, education, aesthetics, virtue, marriage, sexuality, and style.

- W. Rios-Font

Prerequisites: SPAN W3349, SPAN W3350, SPAN W3300, SPAN W3330 or permission of instructor. Enrollment limited to 15 students. General Education Requirement: Literature (LIT). Not offered in 2008-2009.

3 points

SPAN BC 3446x (Section 1) Novel and Nation in Nineteenth-Century Spain and Latin America

An examination of the scope and limits of the novel as a tool in the enterprise of constructing the modern nation in early 19th-Century Spain and Latin America. Selected texts exemplify the exploration of nascent national identities after the dissolution of the Spanish Empire, with emphasis on polemical struggles over the definition of "nation" and "novel" on both sides of the Atlantic.

- A. Wright

Prerequisites: "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). Not offered in 2008-2009.

3 points

SPAN BC 3447x or y Mysteries, Manuscripts, and Secret Societies: Twentieth Century Rewritings of the Nineteenth-Century Spanish Novel

A look at the recasting of Spain's nineteenth century and its novels through contemporary rewritings of the detective, historical fiction, and mystery-thriller genres. Recent works will be read alongside original nineteenth-century texts that they imitate and parody, to explore this trend's significance in the context of modern Spanish literature and culture.

- A. Wright

3 points

CPLS BC 3455x or y Empire and Technology in the Colonial World

An exploration of the scientific and technological practices through which the Spanish Empire established and legitimated itself during the sixteenth and seventeenth centuries. Chronicles and travel literature will show how knowledges such as cartography, metallurgy, and botany grounded technological expansion and its deployment of indigenous peoples and resources.

- O. Bentancor

Prerequisites: "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350).

3 points

SPAN BC 3510x or y (Section 1) Gender and Sexuality in Latin American Cultures

Examines constructions of gender and sexuality in Latin American cultures. Through a close analysis of critical, literary, and visual texts, we explore contemporary notions of gender and sexuality, the socio-cultural processes that have historically shaped these, and some theoretical frameworks through which they have been understood.

- M. Horn

Prerequisites: "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350).

3 points

SPAN BC 3555x or y The Films of Luis Buñuel and the Spanish Literary Tradition

A journey through the works of the renowned Spanish filmmaker Luis Bunuel and the literary movements from which he drew inspiration. We will establish a dialogue between his films and Spanish artistic trends such as surrealism, the picaresque, espertilito, and realism. Authors include Garcia Lorca, Valle Iclan, Perez Galdos. [In Spanish].

Prerequisites: "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language
3 points

SPAN BC 3671x or y Spanish Literature from 1975: The Postmodern Discourse
A close reading of some of the most significant works and trends of post-Franco Spain in the light of postmodern theories. Readings will include works by Martín-Gaite, Vázquez Montalbán, Montserrat Roig, Lourdes Ortiz, J.J. Millas, Ana Rosetti, Paloma Pedrero, Antonio Gala, Almudena Grandes. 
Prerequisites: "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350). General Education Requirement: Literature (LIT). Not offered in 2008-2009.
3 points

SPAN BC 3990x or y (Section 1) Senior Seminar for Majors: Transatlantic Documentary Film and Historical Memory
A broad topic-based seminar in the context of which seniors will write their senior research project. An examination of documentary film's contribution to the way in which Spain, Argentina, and Chile depict their recent past. Analysis of the visual and narrative composition of the documentaries in the light of relevant theories of representation, historical discourse, testimony, and trauma, in order to determine how democratic societies perceive their transitions from authoritarian rule.
- I. Estrada
Prerequisites: Course intended to be taken by all Spanish majors during the fall of their senior year. "L" course: enrollment limited to 15 students. Completion of language requirement, third-year language sequence (W3300; W3330), and introductory surveys (W3349, W3350).

Courses in English
Any literature course in the original language or in translation in the department of Spanish and Latin American Cultures fulfills the general education requirement, Literature. Be aware that not all courses automatically qualify. Eligible courses must clearly emphasize literary texts, methods, and theories.

CPLS BC 3142x (Section 1) The Spanish Civil War in Literature and the Visual Arts
The Spanish Civil War (1936-39), which culminated with the beginning of Francisco Franco's long dictatorship, foreshadowed the WWII European conflict. It generated unprecedented foreign involvement, as well texts and images by artists from both within and outside Spain—from film (documentary and fictional), through painting (Picasso), to narrative and nonfiction. General Education Requirement: Literature (LIT). Not offered in 2008-2009.
3 points

SPWS BC 3205x or y Hispanic Gay and Lesbian Representations in the Literatures of the Americas
Lesbian and gay images and issues in literary and theoretical writings of Latin American authors and of the United States. Hispanic and North American constructions of homosexual/heterosexual and male/female forms of erotic desire; the relationship of politics, sexuality, and race. Authors included Puig, Arenas, Peri Rossi, Anzaldua, and Moraga. May not be taken with SPWS BC 3135.
3 points

SPAN BC 3264x The Boom: The Spanish American Novel, 1962-70
The writing that catapulted Latin America into the mainstream of world culture: Fuentes, García Marquez, Manuel Puig, Julio Cortazar, Jose Donoso, and Mario Vargas Llosa.
- A. MacAdam
Prerequisites: For reading and writing in Spanish, satisfaction of language requirement and one SPA literature course. To receive major or Comparative Literature credit, readings and written work must be done in Spanish. May not be taken with SPAN BC3141. Requirements for Spanish majors: completion of language requirement, third-year language sequence (BC3004 or W3200; V3330), and introductory surveys (V3349, V3350). Not offered in 2008-2009.
3 points

SPAN W 3265y Latin American Literature in Translation
A study of contemporary Latin American narrative; its origine and apotheosis. Readings include Machado de Assis, Borges, Garcia Marquez, Puig, and others.
3 points

Barnard Catalogue 2008-2009
Statistics
1255 Amsterdam Ave.
851-2130
Room 1005
www.stat.columbia.edu

Officers of the University offering courses in Statistics:
Professors: David Madigan (Chair), Graciela Chichilnisky, Richard A. Davis, Victor H. de la Pena, Andrew Gelman, Ioannis Karatzas (Mathematics), David H. Krantz (Psychology), Shaw-Hwa Lo, Paul Meier (Emeritus), Daniel Rubinowitz, Zhiliang Ying
Associate Professors: Ji Meng Loh, Jan Vecer, Tian Zheng
Assistant Professors: Regina Dolgoarskinykh, Souvik Ghosh, Gerardo Hernandez-del-Valle, Michael Hogan, Martin A. Lindquist, Jingchen Liu, Liam Paninski, Bodhisattva Sen
Adjunct Professor: Demissie Alemayehu, Mark Brown, Michael Shnaidman
Barnard Departmental Representative: Ji Meng Loh, 851-2139, meng@stat.columbia.edu

The Statistics major builds on a foundation in probability and statistical theory to provide practical training in statistical methods, study design, applied probabilistic modeling, and data analysis. A degree in Statistics is preparation for careers where data analysis and study design are important - careers, for example, in finance and banking, insurance, biostatistics, marketing, drug development, econometrics, and opinion polling. Students contemplating graduate work in fields that rely on statistics, such as epidemiology, public-health, biostatistics, population genetics, economics, government, and psychology, find a Major or Concentration in Statistics a useful foundation and an important credential. Graduate courses in actuarial science and in statistical and stochastic methods for finance may be taken by permission; students interested in such courses should contact the Undergraduate Advisor for guidance.

REQUIREMENTS FOR THE MAJOR

All majors should consult the departmental representative regularly in planning their programs of study. The requirements listed below are special to the Department and must be read in conjunction with the general requirements for the bachelor's degree.

A total of 13 courses are required for the major, including:

Mathematics V 1101, V 1102 (Calculus I and II), and V 2010 (Linear Algebra), or their equivalents. (Students are advised to take at least one more semester of calculus.)

STAT W 1211, either STAT W 3105 or STAT W 4105, Statistics W 3107 or W 4107, W 4315, and W 4201. STAT W 1001 or W 1111, taken with a grade of A or A+ may be taken in lieu of STAT W 1211 with approval of the advisor. STAT W 4109 (6 points) may be taken in lieu of W 4105 and W 4107, with approval of the adviser.

COMS W 1003, W 1004 [preferred], W1007, or W1009 and four additional courses approved by the adviser from statistics, mathematics, computer science, or operations research, at least two of which must be statistics courses numbered above 4200.

REQUIREMENTS FOR THE MINOR

The minor in Statistics requires 18 points, including: STAT W 1211; either STAT W 3105 or W 4105; W 4107 or W 3107, W 4315; and STAT W 4201 or statistics course numbered above 4200; Math V 2010. In addition Math V 1101-V 1102 are required as prerequisites for the statistics courses. STAT W 4109 (6 points) may be taken in lieu...
of W 4105 and W 4107, with approval of the adviser.
See Mathematics Department for the Mathematics-Statistics Major.

STAT W 1001x and y Introduction to Statistical Reasoning
A friendly introduction to statistical concepts and reasoning with emphasis on developing statistical intuition rather than on mathematical rigor. Topics include design of experiments, descriptive statistics, correlation and regression, probability, chance variability, sampling, chance models, and tests of significance.
Prerequisites: Some high school algebra. General Education Requirement: Quantitative and Deductive Reasoning (QUA).
3 points

STAT W 1111x and y Introduction To Statistics (without calculus)
Designed for students in fields that emphasize quantitative methods. This course satisfies the statistics requirements of all majors except statistics, economics and engineering. Graphical and numerical summaries, probability, theory of sampling

1 of 8

11/14/2008 9:47 AM
Distributions, linear regression, confidence intervals and hypothesis testing are taught as aids to quantitative reasoning and data analysis. Practical experience with statistical software. Illustrations are taken from a variety of fields.

Data-collection/analysis project with emphasis on study designs is part of the coursework requirement.

**Prerequisites:** Intermediate high school algebra. **General Education Requirement:** Quantitative and Deductive Reasoning (QUA).

**STAT W 1211x & y Introduction To Statistics (with calculus)**

Designed for students who desire a strong grounding in statistical concepts with a greater degree of mathematical rigor than in STAT W1111. This course is required for students in the statistics, economics and engineering majors. Topics of STAT W1111 are covered in greater depth. Also covered is maximum likelihood estimation. Practical experience with statistical software. Illustrations are taken from a variety of fields.

**Prerequisites:** one semester of calculus. **General Education Requirement:** Quantitative and Deductive Reasoning (QUA).

STAT W 2110y Introduction to Applied Statistics

This course is an introduction to data analysis and model building. Instruction in statistical methods will be coupled with intensive practical experience with a statistical software package. Topics to be covered include: linear models; random effects models; nonparametric methods; and variance components methods. The course culminates with guest lectures illustrating the fundamental role of statistics in a variety of interdisciplinary research areas.

- Lindquist

STAT W 3106x Introduction To Probability

This course is an introduction to probability specially designed for sophomore and junior students. Emphasis is on conceptual understanding and problem solving. Students require slightly less mathematical background than required for W4105. A quick review of multivariate calculus is provided. This course satisfies the prerequisite for W3659/W4107. Topics covered include random variables, conditional probability, expectation, independence, Bayes' rule, important distributions, joint distributions, moment generating functions, central limit theorem, laws of large numbers and Markov's inequality.

Prerequisites: MATH V1101 and V1102 or the equivalent General Education Requirement: Quantitative and Deductive Reasoning (QUA).

STAT W 3107y Introduction to Statistical Inference

Useful distributions, law of large numbers and central limit theorem, point estimation, hypothesis testing, confidence intervals, maximum likelihood, likelihood ratio tests, nonparametric procedures, theory of least squares and analysis of variance.

Prerequisites: STAT W3105 or W4105, or the equivalent. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

**STAT W 4105x and y Probability**

This course can be taken as a single course for students requiring knowledge of probability or as a foundation for more advanced courses. It is open to both undergraduate and master students. This course satisfies the prerequisite for W3659 and W4107. Topics covered include combinatorics, conditional probability, random variables and common distributions, expectation, independence, Bayes' rule, joint distributions, conditional expectations, moment generating functions, central limit theorem, laws of large numbers, characteristic functions.

- E. Hammou

Prerequisites: MATH V1101 and V1102 or the equivalent, and STAT W1111 or W1211 Corequisites: MATH V1201 or the equivalent or permission of instructor. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

SIEO W 4150x and y Introduction To Probability and Statistics

A quick tour of the fundamentals of probability theory and statistical inference. Probabilistic models, random variables, useful distributions, expectations, laws of large numbers, central limit theorem. Statistical inference: point and confidence interval estimation, hypothesis tests, linear regression. Students seeking a more thorough introduction to probability and statistics should consider either STAT W3000 and W3659 or W4105 and W4107.

STAT W 4201x and y Advanced Data Analysis

This is a course on getting the most out of data. The emphasis will be on hands-on experience, involving case studies with real data and using common statistical packages. The course covers, at a very high level, exploratory data analysis, model formulation, goodness of fit testing, and other standard and non-standard statistical procedures, including linear regression, analysis of variance, nonlinear regression, generalized linear models, survival analysis, time series analysis, and modern regression methods. Students will be expected to propose a data set of their choice for use as case study material.

STAT W 4240x Data Mining

Data Mining is a dynamic and fast growing field at the interface of Statistics and Computer Science. The emergence of massive datasets containing millions or even billions of observations provides the primary impetus for the field. Such datasets arise, for instance, in large-scale retailing, telecommunications, astronomy, computational and statistical challenges.

This course will provide an overview of current research in data mining and will be suitable for graduate students from many disciplines. Specific topics covered include databases and data warehousing, exploratory data analysis and visualization, descriptive modeling, predictive modeling, pattern and rule discovery, text mining, Bayesian data mining, and causal inference.

- D. Madigan
Prerequisites: Basic computing proficiency as well as knowledge of elementary concepts in probability and statistics.

Advanced Courses

**STAT W 4835y Stochastic Processes for Finance**

This course covers theory of stochastic processes applied to finance. It covers concepts of Martingales, Markov chain models, Brownian motion, Stochastic Integration, Ito's formula as a theoretical foundation of processes used in financial modeling. It also introduces basic discrete and continuous time models of asset price evolutions in the context of the following problems in finance: portfolio optimization, option pricing, spot rate interest modeling.

http://www.barnard.edu/provost/facleavealist.html

The Barnard College Theatre major, a joint program with the Columbia College major in Drama and Theatre Arts, teaches students to create and interpret drama and theatre in the context of a liberal arts curriculum. Early in the major, students are given a foundation in theatre history and world theatre traditions as well as in performance and production. As students continue to move through the program, they acquire a comprehensive knowledge of dramatic literature, theatre history, and theories of the theatre, which they learn to integrate with their growing expertise in acting, directing, design, and playwriting. Committed to situating theatre within cultural and historical contexts, the program examines different traditions around the world and the ways in which they interact. Course offerings cover diverse traditions and forms of theatre, ranging from Shakespeare, dramatic theory, and commedia dell'arte to stage realism, expressionism, and the avant-garde, in lectures, seminars, acting labs, design studios, and performances at the Minor Latham Playhouse. The major culminates in an individually designed senior project, which approaches theatre performance by means of creative interpretation as well as literary, historical, and theoretical analysis. The senior project results in either a theatre production or a written thesis grounded in historical and scholarly research.

Plays participate in literary traditions, but they, along with other kinds of performances, are also part of social life. Theatre thus emerges as a site of cultural innovation, transmission, and contestation involving a variety of languages including verbal, scenic, musical, and physical. Fostering both creative and analytic thought, the theatre major is valuable not only to undergraduates who aim to pursue advanced degrees or careers in the field but also to those interested in the study of languages, literatures, and the arts. For this reason, students are encouraged to supplement their course work in drama and theatre with courses in other departments such as Anthropology, Architecture, Art History, Classics, Dance, Film, Literature, Music, and Philosophy.

REQUIREMENTS FOR THE MAJOR

Students intending to major in Theatre should consult with the department chair in their sophomore year or earlier to plan a program. Twelve courses and one senior thesis (in Performance or in History, Theory, Dramaturgy, and Criticism) are required as follows:

Dramatic literature and theatre history
Two courses in Theatre History: THTR V 3150 and 3151
One course in Drama, Theatre, and Theory: THTR V 3185 or ENTA W 3702
One course in Shakespeare
Two courses in Dramatic Literature. One course must be a seminar.

**Theatre Practice**
One course in World Theatre: THTR V 3000
One course in Theatre Design: THTR V 3133-3136, 3510, or 4001
One course in Acting: THTR V 3004 or 3005
One course in Directing: THTR V 3200 or 3201
Two courses that continue work in one of these areas: design, acting, directing, or playwriting. These choices should be made in consultation with the major adviser. Other courses may be substituted with the chair’s permission.

**Senior Thesis**
THTR V 3997 Senior Thesis: Performance (design, acting, directing, or playwriting)
or THTR V 3998 Senior Thesis: History, Theory, Dramaturgy, Criticism.

*Before doing their senior performance thesis, students are required to complete a minor crew assignment, usually in the first two years, and a major crew assignment, usually in the junior year during the Senior Thesis Festival.*

THTR V 2006x First-Year Scene Lab

Scenes from the classic and modern repertory, which are directed by advanced directing students, and performed and critiqued in a weekly workshop. Lab participants are expected to rehearse for two hours a week outside of class, and to participate in group discussions about the plays, playwrights, and performances.

- R. Guy, K. deCamp, R. Pietropinto

Prerequisites: Enrollment limited to First-Years. Audition required. General Education Requirement: The Visual and Performing Arts (ART).

THTR V 3004x-V3005y Acting Lab

This is an umbrella course whose offerings will change each year. Some are narrow, some broad; all are designed with four objectives in common:

a. To focus on a particular genre, playwright, or approach to live performance.

b. To combine theory and practice. Each class will have an ongoing balance of academic and on one's-feet work throughout the term. Homework assignments will include scene preparation, reading, research, and both individual and group projects.

c. To explore the social and political context of the work at hand.

d. To realize the integration required in all acting; ultimately, this is an acting course, and the end goal is what happens on stage.

The acting lab courses are intentionally non-sequential. Students come to the study of acting with widely varying talents and backgrounds. The mix of levels enriches the collaborative experience and offers greater flexibility for students. No more than six courses can be taken from the Acting Lab/Advanced Acting Lab offerings during a student's Barnard career. Auditions are required for all Acting Labs and will take place the first two evenings of each semester. Please check with the Theatre Department office for specific offerings and audition sign-up. Courses will rotate regularly and may include the following:

Acting Solo Performance Physical and vocal techniques for solo performance. Selection and performance of classic and modern texts, development of original material suitable to each student.

Acting Improvisation Students will develop skills for ensemble work through improvisation, transformation, storytelling, and scene creation.

Acting Commedia dell'arte A practical approach to the comedy of class conflict, both classic and modern, based primarily on the techniques and characters of commedia dell'arte.

Acting Puppets and Masks Focuses on an approach to acting that emphasizes physical awareness and communication through posture, gesture, and movement. Masks and puppets will be used for character exploration, scenario development, and chorus work. Includes coordination of text and movement with exploration of 20th Century Expressionist and Surrealist texts.

Acting Chinese Opera Training in the four performance skills of Chinese opera: song, speech, stylized movement/acting, and stage combat. Looks at Chinese opera in its historical context in order to understand the nature of the performance tradition.

Acting Shakespeare An exploration of character, language, and action through sonnets, monologues, and scenes.

Acting Social Comedy The presentation of scenes from a variety of plays spanning a three hundred year period, from Wycherly to Wilde, as a means of investigating developments in the use of comic language. Epigram, antithesis, set-up, punchline: has their use changed? Emphasis on performance, with a consideration of the historical, social and theatrical context.

Acting Naturalism An eclectic approach to naturalistic acting techniques; an examination of performance practice through scene study; emphasis will be placed on works by Williams, Miller, and others.

Acting Chekhov Scene study, improvisation, and character and monologue work. An examination of the artistic and social context of Chekhov's work, including the acting theories of Stanislavski and the politics of naturalism.

Acting Brecht Intensive scene work, along with theoretical reading, analysis, and discussion. In-depth work on three or more major plays, poetry, and selected short pieces. Practical applications of the "alienation effect" and other Brechtian ideas.
Acting the Avant-Garde Intensive monologue and scene work, along with theoretical reading and discussion, exploring the particular performance skills needed for experimental drama, beginning with Jarry, and including Beckett, Artaud, Ionesco, Genet, Stein, and others.

Acting The Song Song as it emerges from scene, and as an individual entity. Technique and lyrical analysis. Porter, Gershwijn, Berlin, Hammerstein, and others.

Acting in the Musical Scene An advanced scene-work technique class tailored to Musical Theatre performance. Classroom material will include composers such as Rodgers, Loesser, Sondheim, Coleman, Schmidt, Flaherty, and others. Previous instruction in voice and scene study is required.

Prerequisites: Enrollment in each section limited to 14 students. Audition Required. General Education Requirement: The Visual and Performing Arts (ART).

THTR V 3006x or y Advanced Acting Lab

Special problems of performance. In-class scene work, extensive outside research, rehearsals, and reading.

3 points

THTR V 3122x and y Rehearsal and Performance

Students take part in the full production of a play as actors, designers, or stage managers. Emphasizes the collaborative nature of production. Appropriate research and reading will be required in addition to artistic assignments.

- M. Banta, R. Bundy, K. Feely, S. Goldmark, R. Pietroplno

Prerequisites: A studio course, subject to the cap on studio credit. Can be taken more than once for credit, usually up to a maximum of 3 credits a semester. Will be graded. Students not wishing to take this course for credit may participate fully in departmental productions with the permission of the instructors.

1-3 points.
THTR V 3133y Costume Design
A studio course exploring designing costumes for the stage. Students become familiar with textual and character analysis, research, sketching and rendering, swatching and introductory costume history.

- S. Goldmark

ENTH BC 3139y Modern American Drama and Performance
Modern American drama in the context of theatrical exploration and cultural contestation. Playwrights include Glaspell, O'Neill, Odets, Johnson, Hurston, Hansberry, Williams, Hellman, Stein, Miller, and Fones.
Prerequisites: Enrollment limited to 16 students. Lab fee $60.
4 points

ENTH BC 3140y Women and Theatre
Exploration of the impact of women in theatre history—with special emphasis on American theatre history—including how dramatic texts and theatre practice have reflected the ever-changing roles of women in society. Playwrights include Glaspell, Crothers, Hellman, Finley, Hughes, and Smith.
Prerequisites: Enrollment limited to 16 students. General Education Requirement: Literature (LIT). General Education Requirement: The Visual and Performing Arts (ART).
4 points

THTR V 3143y Drama and Film
Study of formal and historical relations between two primary means of producing drama: theatre and film. Readings and viewings of work by Bergman, Brecht, Chaplin, Eisenstein, Fellini, Kurosawa, Marlowe, Moliere, Mnouchkine, Shakespeare, and Williams, among others.
- S. Garrett

THTR V 3150x Theatre History I
In this course we will undertake a dialectical approach to reading and thinking about the history of dramatic theatre in the west, interrogating the ways poetry inflects, and is inflected by, the material dynamics of performance. We will undertake careful study of the practices of performance, and of the sociocultural, economic, political, and aesthetic conditions animating representative plays of the Western tradition from the classical theatre through the early modern period. Specific attention will be given to classical Athens, medieval cycle drama, the professional theatre of early modern England, and the rival theatres of seventeenth-century France and Spain. Writing: 2-3 papers; Reading: 1-2 plays, critical and historical reading; Examination: possible
- W. Worthy
THTR V 3151y Theatre History II

Study of European and American theatre history from 1700 to the present. Approaches include those listed in BC 3150, as well as studying constructions of race and examining the relationships among theatrical theory, playwriting, and performance.

- S. Garrett

THTR V 3152y Theatre Studies: Performative Cultures of the Third Reich

Explores the cultivation of national and transnational performances as a significant force of National Socialism, at the same time as challenging the notion of "Nazi Theatre" as monolithic formation. The core of the course inquires into the dialectical analysis of artistic creations in diverse art genres, while working towards an understanding of the social dramaturgy of such events as staging the Führer and the racialized body of the privileged people. Nazism did not harbor ideologies without benefits for the allied nations. Thus, the dynamic performance of transnationalism among the "brothers in arms" will be included as well, in order to elucidate how works of art crossing into the Third Reich were reimagined, sometimes in ways challenging to the presumed values of the state stage.

- H. Worthen

THTR V 3168x Drama, Theatre, and Theory

Intensive immersion in fundamental principles and practices of world drama, theatre, and performance, past and present. Close readings of plays and other texts keyed to selected works of visual art, music, video, film, and digital media. Artists and authors covered include Plato, Aristotle, Zeami, Nietzsche, Stanislavski, Maeterlinck, Craig, Brecht, Artaud, Stein, Grotowski, Soyinka, cal. Assignments include presentations, performance projects, and critical writing.

- S. Garrett

Prerequisites: Enrollment limited to 16 students.

ENTH BC 3186y Modern Drama

In the "long twentieth century," the theory and practice of the theater engaged extraordinary and exciting change: from the box-set naturalism of Ibsen and Chekhov's haunted bourgeois to the deus ex machina of Beckett and Pinter; from the surreal dreamscapes of Strindberg and Pirandello and Genet to the postmodern nightmares of Muller and Kolts; and from the Marxist alienation of Brecht's theater to the political engagements of Peter Weiss, Peter Handke, Anna Deavere Smith, Brian Friel, or Caryl Churchill. In this course, we will develop an extensive reading of the work of a wide range of modern playwrights, consider their figuration of theatrical practice, and examine their dialectical engagement with important modes of modern theatrical, literary, and performance theory. Specific attention will be given to the relationship between modern realism and its representation of race, class, and gender, to the practice of Marxist aesthetics in the work of Brecht and his inheritors.

Although the focus on the course will be drama and theater 1880-1960, some attention will be given to more recent work.
THTR V 3200x History and Practice of Directing

Exploration of the questions and challenges that constitute the practice of directing, the relationship of the director to the actor, the playwright and/or dramaturg, the designers, and the producer; evolution of the role of the director and the pioneering work of the great directors of the twentieth century.

- D. Paulus
Prerequisites: Permission of the instructor.
3 points

THTR V 3201y Directing Lab

Approaches to staging a play, with an emphasis on physical, visual, and rhythmic techniques. Students will direct one short piece for public performance.

- R. Bundy
Prerequisites: Preference given to junior and senior Theatre majors. Enrollment limited to 14 students. Permission of the instructor. A production crew is required, prior to or concurrent with, for this course.
3 points

THTR V 3202x Advanced Directing

Students will work on a variety of plays from the world theatre repertory and direct scenes using members of the first-year lab. Directorial analysis, preparation, working with actors, and production planning.

- R. Guy
Prerequisites: Enrollment is open to senior Theatre majors, this course is required for a Directing Thesis. Also open to junior Theatre majors who do not intend to do a Directing Thesis senior year. Space permitting, senior non-majors will be admitted. Students must have taken either THTR BC3200 History and Practice of Directing or THTR BC3201 Directing Lab. Permission of the instructor.
4 points

THTR V 3250y Alternative Theatre Lab

Students create a new play through a collaborative process that may include interviews and conversations, written accounts and newspaper articles, improvisations and rehearsals. The play will tour to community venues that might not ordinarily house live theatre.

- S. Fogarty
Prerequisites: Enrollment limited to 12 students. General Education Requirement: The Visual and Performing Arts (ART).
4 points
**THTR V 3300y Playwriting Lab**

Students will create and workshop ten-minute and one-act plays. Class will culminate with readings of the one-act plays by guest actors. There will also be opportunities to see professional theatre around New York and discuss our common play-going experience.

- S. Oswald

**Prerequisites:** Permission of the instructor and writing sample required.

3 points

**THTR V 3510y Problems in Design**

Studio-based course explores the main elements of theatrical design: sets, costumes, lighting, and sound. Students examine these design elements as both individual and interrelated components of a production. A series of guest artists contribute to understanding the design process, collaboration, and making a design idea a reality on stage.

**Prerequisites:** Some design experience is helpful, though not required. Enrollment limited to 12 students.

4 points

**THTR V 3600x and y The Theatre Workshop**

Various topics presented by visiting theatre scholars, artists, and practitioners in a lecture/seminar/workshop series that will meet for at least four sessions during each semester. Topics, times, and visiting instructors will be announced by the department. Students must attend all classes to receive credit for the course.

**Prerequisites:** To be taken only for P/D/F. Departmental registration required. See www.barnard.edu/theatre for details.

1 point

**ENTA W 3702y Drama, Theatre, and Theory**

- K. Biers

4 points

**THTR V 3737y Modernism and Theatre**

Interdisciplinary study of major European and American theatrical trends since the mid-19th century through readings of drama, theory, and criticism; music listening; video viewings; study of visual art; and excursions to New York performances and museums.

- S. Garrett

**Prerequisites:** Enrollment limited to 16 students. General Education Requirement: Literature (LIT).

**THTR V 3750y The History Play**

Study of plays that treat historical themes. Investigates suggestive parallels between the disciplines of theatre and history that arise when artists adapt the story of the past for dramatic purposes. Plays by Aeschylus, Cervantes, Marlowe, Shakespeare, Brecht, Weiss, Churchill, Perks, and others.

4 points

**THTR V 3997x and y Senior Thesis: Performance**

Students will direct, design, or write a short play that will be produced (according to departmental guidelines) in the Senior Thesis Festival. Collaboration is expected and students will meet weekly with faculty and other seniors. A written proposal should be submitted in the Autumn term, and a final paper is required. Students wishing to do a thesis in acting will work with a faculty or guest director on suitable dramatic material for performance.

- R. Guy, S. Oswald

Prerequisites: Appropriate coursework and substantial production experience, including a major crew assignment in the junior year. Enrollment limited to senior Theatre majors. Combined and special majors may be considered under exceptional circumstances. Permission of the instructor required.

**THTR V 3999x and y Independent Study**

Students submit, before the semester begins, a detailed proposal for independent research to a faculty sponsor.

Prerequisites: Permission of the instructor and the chair required.

1-4 points.

**THTR V 4001y Visual Scenography**

Students examine the visual and aural vocabulary of dramatic texts and related opera and film adaptations. Readings and discussions focus on directors and playwrights including Vsevolod Meyerhold, Tadeusz Kantor, Robert Wilson, Georg Buchner, Frank Wedekind, and Gertrude Stein. Skill in expressing content through form is gained by weekly exercise in story board creation and the performance of original visual scripts.

Prerequisites: Permission of the Instructor. Enrollment limited to 15 students. Lab Fee $35. General Education Requirement: The Visual and Performing Arts (ART).

3 points

Assistant Professor of Political Science: Kimberly Johnson
Assistant Professor of Sociology: Suchir Venkatsh
Professor of Urban Planning and Public Policy: Elliot Sclar
Assistant Professor of Urban Studies: Greg Smithson
Dean of Academic Affairs, Columbia College: Kathryn Yatsakis

For a complete list of faculty on leave see:
http://www.barnard.edu/provost/facleavealist.html

The Urban Studies Program offers students the opportunity to learn about the complex institutions, problems, and achievements of city life. By integrating study from numerous academic departments in an interdisciplinary approach, enhanced by a year-long colloquium taken by all majors during the junior year, students develop a rich and nuanced understanding of modern cities.

854-4073
www.barnard.edu/urban

REQUIREMENTS FOR THE MAJOR

A major in Urban Studies can be taken only in conjunction with a specialization in one of the regular departments.

In order to major in Urban Studies, a student must fulfill the following requirements:

A. One course dealing primarily with urban subject matter from each of three of the following disciplines: Anthropology, Economics, History, Political Science, Sociology, Urban Studies.
B. One course dealing primarily with urban subject matter from one discipline other than those listed above (such as Architecture, Art History, English, Environmental Science, Religion, etc.).

Note: If you are specializing in one of the departments listed above, you can double-count one "A" or "B" requirement course for your specialization requirement (D below).

C. One course in Methods of Analysis (such as URBS V 3200).
D. Five or more courses in a specialization in one of the participating departments.
E. In the junior year, the two junior colloquia in Urban Studies:
   URBS V 3545x  Shaping the Modern City
   URBS V 3546y  Contemporary Urban Issues
F. In the senior year, a senior thesis written in conjunction with a two-semester research seminar, chosen from the following four options:

   1. Senior Research Seminar in the department of specialization
   2. Senior Seminar in Urban Studies: New York Field Research (V 3994x-3995y)
   3. Senior Seminar in Urban Studies: The Built Environment (V 3992x-3993y)
   4. Senior Seminar in Urban Studies: International Topics in Urban Studies (V3996x-3997y)

The list of specific courses that satisfy these requirements and of the departments that offer specializations for Urban Studies majors, is available outside of 407 Lehman and on the Program's website. Appropriate courses can be substituted with the approval of the Director.

There is no minor in Urban Studies.
Lectures

URBS V 3310x Science and Technology in Urban Environments

Examines the role of science and technology in urban settings, using examples from modern cities. Explores how technology shapes towns and cities, and how urban environments - including politics, economics, culture, and the natural environment - have influenced the development, acceptance, and application of technology. An essential part of the course work is participation in a community-based learning project, working with local non-profit organizations.

Prerequisites: Students must have declared their concentration/major.

URBS V 3420y Introduction to Urban Sociology

This course examines the diverse ways in which sociology has defined and studied cities, focusing on the people who live and work in the city, and the transformations U.S. cities are undergoing today. Sociological methods, including ethnography, survey
research, quantitative studies, and participant observation will provide perspectives on key urban questions such as street life, race, immigration, globalization, conflict, and redevelopment.

URBS V 3460y Race, Gender, and Urban Violence

From lynching to riots to police brutality, this course will examine shifting ideas about race and gender associated with urban violence. From an historical perspective, the course will consider the political and cultural contexts of urban violence, as well as the causes and effects. Areas of particular focus will include race riots, urban crime, policing, black political activism, mass media, consumer culture, and the myths and realities of interracial rape. - D. Melis

Quantitative Methods

URBS V 3200x or y Spatial Analysis: GIS Methods and Urban Case Studies

Introduction to spatial analysis using state-of-the-art GIS (Geographic Information Systems) mapping and analysis software to apply quantitative analytical methods to real-world urban issues. Will include basic coverage of applied statistics. Case studies will focus on subjects like environmental justice, voting patterns, transportation systems, segregation, public health, redevelopment trends, and socio-economic geography.

URBS V 3550x The Urban Planning Process: Land-Use Planning in the U.S.

Readings and discussion focusing on the basic processes of urban planning, from the creation of master plans to narrower planning topics including zoning boards, planning to alleviate housing shortages, use of property tax incentives, recent smart growth initiatives, and historic preservation rules.

Prerequisites: Sophomore standing and departmental approval. Enrollment limited to 16 students. Not offered in 2008-2009.

4 points

URBS V 3565x Urban Planning in Developing Countries: Problems and Prospects

Examination of cities in developing countries, with a focus on environment, employment, and housing. Four cases will be studied: Sao Paulo, Brazil; Johannesburg, South Africa; Bombay, India; and Shanghai, China. We will consider urbanization patterns and the attendant issues, the impact of global economic trends, and governmental and non-governmental responses.

- J. Powers

Prerequisites: Departmental permission required. Enrollment limited to 16 students. General Education Requirement: Cultures in Comparison (CUL).

URBS V 3810y Production, Consumption, and Control of Public Space

Study of streets, parks, benches, plazas, mass transit, and retail centers, to develop a critical assessment of the social production, planning, regulation, and uses of public space.

- G. Smithsimon
Prerequisites: Enrollment limited to 16 students, by application to the department. Must attend first class meeting, when instructor will finalize enrollment. General Education Requirement: Social Analysis (SOC). Not offered in 2008-2009. 4 points

URBS V 3820y Suburbs: Race, Class, Conflict

Half of the US, including 30 percent of African Americans, live in the suburbs. This seminar will consider the suburbs as diverse sites of race, class, and gender conflicts, with particular attention to the experiences of African American middle class suburbanites, as well as Asian and Latino immigrants, and the recent growth of suburban poverty. How are class-and race-based conflicts reshaped by the suburban landscape? How are ethnic cultural identities reformed by the suburban experience?

Women's Studies is an interdisciplinary department for students who wish to explore the basic questions raised by recent scholarship on gender and its relation to other systems of cultural/political difference: race, class, ethnicity, and sexual orientation. This scholarship covers a complex variety of theoretical and empirical studies both within traditional disciplines and in interdisciplinary frames. Such areas include gender theory (in the humanities, in the social sciences, and in the natural sciences, as well as frequent combinations of the three); and work in interdisciplinary areas such as Asia-Pacific cultural studies, critical race and ethnic studies, post-colonial studies, gender and health, and sexuality studies.

Early in their sophomore year, students interested in the major should consult the department to plan their major. Students also have the option of electing a joint or double major and have access to Columbia graduate courses, since some cover special areas not otherwise available at Barnard. A minor in Women's Studies is also offered.

Complementing the Women's Studies Department, the Barnard Center for Research on Women maintains an extensive and expanding resource collection on women's issues. The center also sponsors a variety of lectures and discussions that are invaluable to students interested in Women's Studies.

REQUIREMENTS FOR THE MAJOR

 Majors in the department are trained in interdisciplinary research skills and will focus their studies around a thematic or discipline-based concentration. The requirements for the major are the following 13 courses:

1. WMST V 3111 Feminist Texts I
2. WMST V 3112 Feminist Texts II
3-4. Two semesters of a junior-level course to be chosen from among:
   WMST V 3311 Colloquium in Feminist Theory
   WMST V 3312 Theorizing Women's Activism
   WMST V 3313 Colloquium on Feminist Inquiry
5-6. Two semesters of Senior Thesis Seminar, WMST V 3521-3522
7. One course in Women's History (from a list specified by the department)
8. One course with a focus on comparative studies of women and gender (from a list specified by the department)

Three thematic clusters are currently offered in the department: Gender and Representation; Gender, Science, and Health; Gender and Sexualities. Students can develop other thematic concentrations with the department's approval.

The thesis, Women's Studies V 3521-3522, provides an opportunity for senior majors to engage in original interdisciplinary research and to bring to bear the theoretical emphasis of feminist scholarship on a particular area of investigation. Further, in the senior seminar, majors have the opportunity to discuss methodological issues and problems in research in a directed and supportive environment.

Special projects using the city's resources may be developed into term papers or incorporated into the senior essay. An extensive project under the sponsorship of a faculty member may be offered for course credits as Women's Studies BC 3599 Independent Research.
REQUIREMENTS FOR THE COMBINED MAJOR

The requirements for the combined major are as follows:

1. WMST V 3111 Feminist Texts I
2. WMST V 3112 Feminist Texts II
3-4. Two semesters of a junior-level course to be chosen from among:
   WMST V 3311 Colloquium in Feminist Theory
   WMST V 3312 Theorizing Women's Activism
   WMST V 3313 Colloquium on Feminist Inquiry
5-7. Three other courses devoting at least half of their content to issues of gender, one of which should be in a distribution field other than that of the combining major.

Two semesters of Senior Thesis Seminar to be taken either through Women's Studies or the other department or program. The senior essay shall integrate the two fields of inquiry.

The requisite number of courses in the combining field, to be determined by the chair of the department or program.

REQUIREMENTS FOR THE MINOR

A minor in Women's Studies consists of the following five courses:

1. WMST V 3111 Feminist Texts I
2. WMST V 3112 Feminist Texts II
3. One of the three junior-level courses to be chosen from:
   WMST V 3311 Colloquium in Feminist Theory
   WMST V 3312 Theorizing Women's Activism
   WMST V 3313 Colloquium on Feminist Inquiry
4-5. Two other women's studies courses.

| WMST V 3111x and y Feminist Texts I
Readings of texts produced before the Second Wave of 20th century feminism. Explores some sources of that feminism and
some ways that women and men experienced gender as both theory and lived practice prior to development of a contemporary political language for articulating those experiences.

- N. Kampen

**Prerequisites:** Enrollment limited to 20 students.

**WMST BC 3121x Black Women in America**

Examines roles of black women in the U.S. as thinkers, activists and creators during the nineteenth and twentieth centuries. Focusing on the intellectual work, social activism and cultural expression of African American women, we examine how they lived their lives, resisted oppression and struggled to change society. We will also discuss theoretical frameworks (such as "double jeopardy," or "intersectionality") developed for the study of black women. The seminar will encourage students to pay particular attention to the diversity of black women and critical issues facing Black women today.

WMST V 3122x The Jewish Woman: Historical and Cultural Perspectives

Explores the international character of the Jewish people through the experiences of Jewish women in various historical periods and contexts. Identifies issues, past and present, of concern to Jewish women, articulated by contemporary Jewish feminists: perspectives of secularists, observant traditional women, heterosexuals, lesbians, feminists, and activists committed to diverse political ideologies.

- I. Kepfisz

3 points

AHWS BC 3123x or y Women and Art

Discussion of the methods necessary to analyze visual images of women in their historical, racial, and class contexts, and to understand the status of women as producers, patrons, and audiences of art and architecture.

- N. Kampen

3 points

WMST BC 3125y Pleasures and Power: An Introduction to Sexuality Studies

This interdisciplinary course explores the historical origins, social functions, and conceptual limitations of the notion of "sexuality" as a domain of human experience and a field of power relations.

- R. Young

WMST BC 3130y Discourses of Desire: Introduction to Gay and Lesbian Studies

Investigation of who or what constitutes the subject(s) of gay and lesbian studies. Themes include the historical, methodological, and epistemological crisis points of essentialism/constructionism; thinking sexuality cross-culturally; gender versus sexuality; the binaries of hetero/homo and male/female; trans discourses; community, identity, differences; personal life and the politics of liberation; the place of feminism in les/bi/gay studies.

- E. Glasberg

*Prerequisites: Enrollment limited to 20 students. Not offered in 2008-2009.*
4 points

WMST BC 3131y Women and Science

History and politics of women’s involvement with science. Women’s contributions to scientific discovery in various fields, accounts by women scientists, engineers, and physicians, issues of science education. Feminist critiques of biological research and the institution of science.

- L. Kay

4 points

WMST BC 3132y Gendered Controversies: Women’s Bodies and Global Conflicts

Investigates the significance of contemporary and historical issues of social, political, and cultural conflicts centered on women’s bodies. How do such conflicts constitute women, and what do they tell us about societies, cultures, and politics? - D. Ko

- D. Ko

WMST BC 3134y Unheard Voices: African Women’s Literature

Themes include the politics of the canon in Africa, the problems of language, post-colonial counterdiscourse, the African-American continuum, and Third World and Western feminism. Authors include Flora Nwapa, Buchi Emecheta, Nawal El Saadawi, Miriam Titi, Bessie Head, Alifa Rifaat, Molara Ogundipe-Leslie, Ama Ata Aidoo, Elua Sutherland, and Tess Onwueme.

- Y. Christiansé

*General Education Requirement: Cultures in Comparison (CUL). General Education Requirement: Literature (LIT).*
4 points
WMST BC 3136x Asian American Women

Explores selected texts written by Asian American women from diverse backgrounds, focusing on issues such as identity, gender, generation, race, class, religion, and language.

General Education Requirement: Social Analysis (SOC).

4 points

ENWS BC 3144x or y Minority Women Writers in the United States

Literature of 20th-century minority women writers in the United States, with particular emphasis on works by Asian, Black, Hispanic, and Native American women, the historical and cultural as well as the literary framework.

3 points

WMST V 3311x Colloquium in Feminist Theory

Explores the relationship between new feminist theory and feminist practice, both within the academy and in the realm of political organizing.

- R. Young

Prerequisites: Feminist Texts I or II and permission of instructor.

4 points

WMST V 3312y Theorizing Women's Activism: Gender and the Civil Rights Movement

In this interdisciplinary course, we examine the origins, dynamics, and consequences of the modern civil rights movement by foregrounding the roles of African American women. Attention to issues of gender, we explore how the southern-based struggles for racial equality and full citizenship in the U.S. worked both to dismantle entrenched systems of discrimination—segregation, disenfranchisement, and economic exploitation—and to challenge American society to live up to its professed democratic ideals.

- L. Collins

Prerequisites: Feminist Texts I or II or permission of instructor.

4 points

WMST BC 3509x The Sex of Science: Gender and Knowledge in Modern European History

Develops historical strategies for uncovering the significance of gender for the cultures and contents of Western science. We will consider how knowledge is produced by particular bodies in particular spaces and times.

4 points

WMST BC 3515y Women in Israel: An Introduction

Focuses primarily on the contemporary status and experiences of Jewish and non-Jewish women living in Israel, with sessions on: women and the law; Jewish minorities; Palestinian women; Jewish women and the military; violence against women; Israeli feminism; pre-State Israeli women and the Palestinian/Israeli conflict.

- I. Klefsisz

Prerequisites: Enrollment limited to 13 students. Sophomore standing. General Education Requirement: Cultures in
**WMST BC 3518x Studies in U.S. Imperialism**

Historical, comparative study of the cultural effects and social experiences of U.S. Imperialism, with attention to race, gender and sexuality in practices of political, economic, and cultural domination and struggle. Material includes studies of US Imperialism in the Philippines, Puerto Rico, Hawaii, Guam, and Cuba and US foreign involvements in the developing world since World War II.

- N. Tadjar

**WMST V 3521x Senior Seminar**

Individual research in Women’s Studies conducted in consultation with the instructor. The result of each research project is submitted in the form of the senior essay and presented to the seminar.

- N. Kampen

**Prerequisites:** Permission of instructor. Enrollment limited to senior majors.

**WMST V 3522y Senior Seminar II**

Individual research in Women’s Studies conducted in consultation with the instructor. The result of each research project is submitted in the form of the senior essay and presented to the seminar.

- T. Szell

**Prerequisites:** Permission of instructor. Enrollment limited to senior majors.

**WMST BC 3599x or y Independent Research**

3-4 points.

**WMST V 3813y Colloquium on Feminist Inquiry**

Survey of research methods from the social sciences and interpretive models from the humanities, inviting students to examine the tension between the production and interpretation of data. Students will receive first-hand experience practicing various research methods and interpretive strategies, while simultaneously considering larger questions of epistemology about how we know what we know.

- K. Gravdal

**Prerequisites:** Feminist Texts I or II and permission of instructor.

4 points
WMST BC 3902x or y Gender, Education, and Development

Examines the links between gender and education planning and policy, with a focus on educational policy initiatives for girls' education implemented by international organizations and local governments in developing countries. - M. Weisgrau
Prerequisites: Permission of instructor. General Education Requirement: Social Analysis (SOC). Not offered in 2008-2009. 4 points

WMST W 3915y Gender and Power in Global Perspective

Gender systems and their historical transformation in Africa, South Asia, East Asia, and the Middle East. Topics include colonialism, global economy, development, population and poverty, sexuality and sex work, comparative revolutions, and ethics of feminist politics.
4 points

WMST W 4300y (Section 05) Advanced Topics in Women's and Gender Studies: Gender and War

Theories of war: its cultural meanings, social history, motivations and effects, legal and ethical evaluation, political protest and resistance.
4 points

WMST W 4300x or y (Section 09) Advanced Topics in Women's and Gender Studies: Feminism and Science Studies

Examines the scientific institutions and their role in shaping the knowledge and practices of the sciences. It considers the impact of feminist theoretical and political concerns on science studies.
Prerequisites: Permission of instructor. Not offered in 2008-2009.
4 points

WMST W 4301x or y Advanced Topics in Women's and Gender Studies: The Search for Self - 20th Century U.S. Jewish Women Writers, Part I: 1900-1939

Covers significant pre-Holocaust texts (including Yiddish fiction in translation) by U.S. Ashkenazi women and analyzes the tensions between upholding Jewish identity and the necessity and/or inevitability of integration and assimilation. It also examines women's quests to realize their full potential in Jewish and non-Jewish communities on both sides of the Atlantic.
- I. Klepfisz
4 points

WMST W 4302x Advanced Topics in Women's and Gender Studies: The Search for Self - 20th Century U.S. Jewish Women Writers, Part II: 1939 - Present

Examines the memoirs and fiction by American Jewish Women writers from 1939 to the present, with a focus on the relationships between Jewish identity, post-Holocaust consciousness, gender, and class. Writers to be studied include Lucy Dawidowicz, Jo Sinclair, Tillie Olsen, Eva Hoffman, Grace Paley, Helen Epstein, Pearl Abraham, Judith Katz, and Elana Dykewomon.
4 points

WMST W 4303x Gender, Globalization, and Empire

Examines the role of gender in economic structures and social processes comprising globalization and in political practices of contemporary U.S. empire. This seminar focuses on the ways in which transformations in global political and economic structures over the last few decades including recent political developments in the U.S. have been shaped by gender, race, sexuality, religion and social movements.
- N. Tadiar
Prerequisites: Enrollment limited to 20 students.
4 points

WMST W 4304y Advanced Topics in Women's and Gender Studies: Gender and HIV/AIDS
An interdisciplinary exploration of feminist approaches to HIV/AIDS with emphasis on the nexus of science and social justice.

- R. Young
Prerequisites: Permission of instructor. Enrollment limited to 15 students.
4 points

WMSTR W 4308y Advanced Topics in Women's and Gender Studies: Sexuality and Science
Examines scientific research on human sexuality, from early sexology through contemporary studies of biology and sexual orientation, surveys of sexual behavior, and the development and testing of Viagra. How does such research incorporate, reflect, and reshape cultural ideas about sexuality? How is it useful, and for whom?
Not offered in 2009-2010.
4 points

WMSTR W 4309y Advanced Topics in Women's and Gender Studies: Sex, Gender and Transgender Queries
Sex, sexual identity, and the body are produced in and through time. "Trans" - as an identity, a set of practices, a question, a site, or as a verb of change and connection - is a relatively new term which this course will situate in theory, time, discipline, and through the study of representation.

- E. Glasberg

Academic policies and procedures are determined by the faculty and implemented by the Office of the Registrar. For complete information on academic policies and procedures, see the Registrar's Website.

Advanced Placement Credit

International Baccalaureate Credit

Registration

Examinations

Grading & Academic Honors
ACADEMIC POLICIES & PROCEDURES

Registration

Registration for New and Continuing Students
Instructions for registration are distributed to students and available online.

Students are expected to register online during the registration times published in the College Calendar. Permission to register may be refused to students who do not observe the deadline for registration. Those students who have permission to register late will be assessed additional fees, as posted at the Office of the Registrar.

Bills for tuition and fees are mailed before the beginning of the semester, and payment must be received by the deadline published in the College Calendar. In addition, any outstanding debts to the College or University, including library fines, must be paid before the student may register.

The final stage of the registration process is program filing, which must be completed by the deadline published in the College Calendar. If for some compelling reason a student must enroll in less than a full-time program, the written permission of her Class Dean in the Dean of Studies Office is required.

Registration for Resumed Education Students
Resumed Education students are those Barnard students who have been away from the College for five years or more and are returning to complete the A.B. degree requirements and those Barnard graduates who are returning to the College to take additional course work. Resumed Education students are subject to regular registration procedures and deadlines.

Enrollment in Columbia University Courses
Many courses offered in other divisions of the University are open to qualified Barnard students; those cross-listed in the Barnard Catalogue do not normally need special approval; no undergraduate courses listed in the Columbia College bulletin need special approval unless so indicated in the course description. Other courses not cross-listed in the Barnard Catalogue may require divisional or instructor's approval in addition to the approval of the student's academic adviser. Columbia University courses are entered on the Barnard program; specific instructions are distributed. The student is expected to have reviewed the course description and prerequisites before consulting an adviser, to determine for herself whether she is eligible to enroll.

Certain Columbia courses are limited in enrollment. Barnard students wishing to register in such courses must take part in the limited-enrollment procedures.

Permission is needed to take a course at Teachers College. Students should obtain an application from the Office of the Registrar, obtain course approval from Dean Blank, and return the completed form to the Office of the Registrar. TC courses require the payment of additional tuition at the Teachers College rate over and above Barnard tuition.

Program Filing
The list of courses for which the student is enrolled each semester is known as the student's program.

Each student is required to schedule and attend a program-planning meeting with her adviser before the end of each semester (see College Calendar) and to consider carefully and seriously her selection of courses for the following semester.

During the program-planning period, various departments post sign-up sheets for laboratory courses, sectioned courses, and limited-enrollment courses. A student who wishes to enroll in such a course or courses must enter her name on these sheets to ensure a place for the following semester. Each student files her program online through the Registrar's website by the stated deadline. The program is finalized only
upon receipt of her adviser's approval, also by the deadline.

There is **no refund** issued for courses dropped after the published deadline for program filing, or for fees attached to courses dropped after the deadline, and any part-time program filed after that date will be assessed full tuition.

**Note:** the deadline for submission of programs is separate from, and somewhat later than, the registration deadline (see College Calendar). Programs filed late will be assessed additional fees, which will be posted at the Office of the Registrar. A student who neglects to file a program is subject to academic probation.

**Adjustment of Fees and Refunds for Changing Program of Study**

If a student changes her program and the tuition called for is lower than the amount she has already paid, she will be refunded the excess only if the alteration of her program is made by September 12 (last day of program filing) in the autumn term and by January 30 in the spring term. If the new program calls for higher tuition, the student is responsible for paying the additional charges promptly.

**Schedule of Classes and Room Assignments**

Class times and room numbers are published in the online Directory of Classes, which is updated every night. Disabled students needing wheelchair-accessible classrooms should provide this information to the Registrar during program planning.

**Courses with Limited Enrollment**

Enrollment in certain Barnard and Columbia courses is strictly limited and students must follow specified procedures to secure places in these courses.

**Adding Courses**

Courses may not be added after the deadline for filing academic programs. Up to that deadline, the student may add courses online. Adding a course requires the online approval, or the signature on an Add form, of the student's adviser.

**Dropping Courses**

Courses may be dropped by submission of an Application to Drop a Course, available at the Office of the Registrar. The form requires the written approval of the student's adviser and must be returned to the Office of the Registrar before the deadline published in the College Calendar. Courses dropped by the deadline will not be recorded on the permanent transcript. If withdrawal from a course is approved after the deadline to drop and by the deadline to withdraw, the course will be recorded on the permanent transcript with the notation W (Withdrawal). Action on any course which ends prior to the above dates must be taken before the last class meeting. No adjustment of fees (including any laboratory fees) is made for any course dropped after the deadline for program filing. A student may not drop below 12 points without the approval of her class dean as well as her adviser.

**Attendance**

Students are expected to attend classes regularly. Frequent or prolonged absences from classes may cause a student to forfeit the right to complete coursework or to take final examinations.

**Policy on Religious Holidays**

It is the policy of Barnard College to respect its members' religious beliefs. In compliance with New York State law, each student who is absent from school because of her religious beliefs will be given an equivalent opportunity to register for classes or make up any examination, study, or work requirements that she may have missed because of such absence on any particular day or days. No student will be penalized for absence due to religious beliefs, and alternative means will be sought for satisfying the academic requirements involved.
Those responsible for scheduling of academic activities or essential services are expected to avoid conflict with religious holidays as much as possible. If a suitable arrangement cannot be worked out between the student and the instructor involved, they should consult the appropriate dean. If an additional appeal is needed, it may be taken to the Provost.

Credit for Summer Study

The granting of course credit for summer courses taken at other accredited institutions (including Columbia) is treated as transfer credit and is subject to some additional regulations. The maximum number of summer points that can be applied toward the degree for course credit is 16, subject to the approval of the Committee on Programs and Academic Standing. Although a student may not receive degree credit for summer courses exceeding this maximum, she may fulfill degree requirements with additional summer courses, subject to the approval of the Committee on Programs and Academic Standing, and in some cases, subject to satisfactory performance on a Barnard placement examination. The full regulations on credit for summer study are available at the Office of the Registrar and on the Registrar’s website on the Application for Approval of Summer Session Courses. The student may learn in advance whether the courses she wishes to take in summer school meet the approval of the Committee on Programs and Academic Standing by completing the form and submitting it to the Office of the Registrar well before the end of the spring term. Although the application may also be retroactive, the student places herself at risk of being denied degree credit if she fails to receive prior written approval from the Committee. The student is advised to consult the application for the full regulations, some of which are listed below:

1. No more than eight points may be counted for one five- or six-week summer session.
2. To be eligible for credit, a course normally must meet for at least five weeks and at least 35 hours.
3. Grades for courses taken in summer school must be letter grades of C– or higher; they are not included in the Barnard grade point average, but they will be included in the calculation for Latin honors. These courses and grades will, however, be considered by graduate or professional schools, which normally require the submission of an applicant’s transcripts from all the colleges attended.

A fee is charged by Barnard to transfer credits from the other institution. (Please refer to Financial Information.)

Length of Residence

Students are expected to be registered full-time (12 points minimum) for four years. Transfer students must complete at least 60 points and two years full-time in residence at Barnard to receive the degree (see below for additional information). Under certain conditions, it is possible for a senior to complete her work for the degree while registered in absentia, with the permission of the Senior Class Dean.

Classification of Students

Students are classified as follows:

**Matriculated**  Points completed
- First-Year  fewer than 24
- Sophomore  24–51
- Junior  52–85
- Senior  86 or more
- Unclassified  transfer students who have not yet been assigned credit

**Non-matriculated**

Other college degree candidates (visiting students)
- Barnard alumnae auditing courses
- Barnard alumnae taking courses for credit
- Any other student who is not a degree candidate

A degree candidate (i.e., a student who is matriculated) is expected to be enrolled for at least 12 points each
term and may not change her status to non-matriculated.

Filing of Diploma Information

The Diploma Information form, available online, is the student’s official notification to the Registrar that she expects to have completed all requirements for the degree and to receive the diploma on a particular graduation date. Degrees are granted in May, October, and February. Graduation ceremonies are held in February and May.

Withdrawal and Readmission

A student not subject to discipline for infraction of College rules may withdraw from the College during the semester by submitting a “Notice of Withdrawal” form to her Class Dean before the withdrawal deadline. A student who plans to withdraw following the completion of a term must also file the appropriate form in the Dean of Studies Office. A student should discuss withdrawal with her academic adviser and Class Dean in advance of submitting the form. Confirmation of the withdrawal, and procedures and conditions for readmission, will be sent to the student upon receipt of the form.

Students who wish to request readmission to the College must submit a letter to the Dean of Studies Office, with reasons for the request, by June I for an autumn term return and by November I for a spring term return.

Readmission of students who have withdrawn from (or been withdrawn by) the College for some non-academic reasons, e.g. health, will be considered by the Committee on Evaluation, composed of representatives from the Offices of Residence Life, Dean of Studies Office, Counseling Services, Disability Services, Health Services, and Student Development. A Health or Counseling Services evaluation and recommendation is usually required for Committee consideration.

The Evaluation Committee also meets regularly throughout the academic year to discuss issues concerning students who are experiencing difficulties in academic, residential, and extracurricular life at the College. The Committee identifies available support services both on- and off-campus in order to assist students encountering difficulties. Finally, as needed, it considers the advisability of a student’s withdrawal from the College for non-academic reasons. A description of the Committee and its procedures is available in the Dean of Studies Office.

Exceptions to College Regulations

Requests by students for exceptions to college regulations governing the awarding of academic credit and requirements for the degree may be addressed to the Faculty Committee on Programs and Academic Standing. Petition forms are available at the Office of the Registrar and should be returned there. Requests that bear the appropriate signatures and comments of advisers and instructors normally receive consideration within two weeks of their submission.

ACADEMIC POLICIES & PROCEDURES

Examinations

Language Placement Examinations
The foreign language requirement can be met by completing the required courses at Barnard (for individual languages see departmental curriculum statements), or by a College Entrance Examination Board (CEEB) score of 781 (700 or above in Hebrew), or, for transfer students, by having completed acceptable qualifying language courses.

Transfer Students
A transfer student who has a CEEB score is placed according to that score alone if she has had no previous college language courses. The determination is made according to the provisions of an established scale. A transfer student who has no CEEB score or previous college language courses must, if she wishes to continue with a particular language, take a placement test. Transfer students who are not required to take an examination are notified of language placement along with the evaluation of their transfer credit.

First-Year Students
First-year students are placed (or exempted) on the basis of their CEEB scores. Those with no scores who wish to continue languages studied in high school take placement examinations. The Class Dean advises all new first-year students on their language requirements.

Summer School Language Courses
Students, other than incoming transfer or first-year students, who take summer language courses and wish exemption or placement in their continuing language studies must take a language placement examination or secure departmental approval to receive degree credit and enter at a higher level.

A student who does not wish to continue with a language in which she has been placed may begin the study of a new language.

Information about Language Placement Examinations is available at the Office of the Registrar; the examination dates are published in the College Calendar. The examinations are evaluated and placement is made by the appropriate departments. Results are available at the Office of the Registrar.

Other Departmental Placement Examinations
Students may obtain exemption from or placement in certain courses by means of departmental placement examinations (for example, in the Mathematics and Physics departments). Information and applications for the examinations are available in departmental offices, and deadlines are particular to each department.

Make-Up Examinations During the Term
Instructors are not required to give make-up examinations to students absent from previously announced tests during the term. An instructor who is willing to give a make-up test may request a report of illness or acceptable evidence of other extenuating circumstances from the appropriate class dean in the Dean of Studies Office.

Final Examinations
No class meetings will be held on required reading days as set forth in the College Calendar. The dates for final examinations, given at the end of each term, are published in the College Calendar. Exact times and room numbers for individual examinations are sent to each student and instructor and posted on the website of the Office of the Registrar at least four weeks in advance of final examinations.

Barnard examinations are given under the Honor Code, which states that a student should not ask for, give, or receive help in examinations, nor should she use papers or books in a manner not authorized by the
instructor. She should not present work that is not entirely her own except in such a way as may be approved by the instructor. The Honor Code further implies that any student or member of the faculty who has first-hand knowledge of a violation of these rules has an obligation to report it to the Dean of Studies Office or Honor Board.

A student who wishes to leave the room before the end of the examination period will submit her blue books to the instructor. If a student becomes ill during the course of the examination, she must notify the instructor and go to the College Physician, Brooks Hall, Lower Level. If less than an hour has expired, a grade of DEF will be recorded on the transcript and she will take a deferred examination. If a student remains for more than one hour of a three-hour examination or more than 40 minutes of a two-hour examination, she will be graded on the work she has completed, with the uncompleted work scored as 0.

Deferred Final Examinations

Deferred final examinations, given in September and January (see College Calendar), are open only to those students who were absent from the regular examinations for reasons of illness or emergency and who have received authorization from their instructors and the Dean of Studies Office.

Requests for absence from final exams for reasons of health or other emergencies must be reported to the instructor and to the Dean of Studies Office in person or by telephone on the day of the examination.

Examinations missed in December are to be taken the following January or, in cases of prolonged illness, in September of the same year. Those missed in May are to be taken in September of the same year. If a student absents herself without a compelling and valid excuse from a final or deferred examination, she will receive a grade of zero for that examination.

Applications for deferred examinations are filed with the Office of the Registrar. A payment of a $10 handling fee for each examination must accompany the application.

Examinations for Students with Disabilities

Individual arrangements can be made for disabled students unable to take examinations in the usual manner. Disabled students are normally expected to take their exams with the rest of the class, with disability-related modifications as needed. Students with disabilities who require nonstandard administration should consult with their instructors and the Director for Disability Services about reasonable accommodations. Students should obtain copies of the Test Accommodations Form in Room 105 Hewitt and return them at the beginning of each semester.

ACADEMIC POLICIES & PROCEDURES

Grading & Academic Honors

Grading System

Academic standing and eligibility for graduation are determined by both the number of courses completed and the grades achieved. The system used at Barnard is as follows:

- A+, A, A-: Excellent
- B+, B, B-: Good
- C+, C: Satisfactory
- C-, D: Unsatisfactory but passing
- F: Failure
- P: Passed without a specific grade on student's election of P/D/F option
- P*: Passed in a course for which only a grade of P or F is allowed
- I: Incomplete
- X: Absence from final examination
- Y: For the first half of a two-semester course in which the grade for the second semester is the grade for the entire course
- W: Approved withdrawal after "drop" deadline
- UW: Withdrawal from a course without official notification to Registrar

Pass/Fail grades are recorded for all students in certain courses, e.g., physical education. Pass/Fail grades for individual students are subject to regulations described below.

In the computation of grade point averages, marks for courses are awarded on the following scale:

- A+ = 4.3
- A = 4.0
- A- = 3.7
- B+ = 3.3
- B = 3.0
- B- = 2.7
- C+ = 2.3
- C = 2.0
- C- = 1.7
- D = 1.0
- F = 0

In order to be recommended for the degree, a student must maintain a cumulative average of 2.0 (C) for 122 (121 for transfer students) or more points completed with passing grades. At the end of each term all records are examined. Normally only those students who have completed 12 points with cumulative averages of 2.0 or above are permitted to remain in college. Students whose work falls below the cumulative average of 2.0 may be permitted to continue at Barnard with probationary conditions at the discretion of the Committee on Programs and Academic Standing.

Courses in which the student receives the grade of D may not be counted toward the major requirement or the minor option. Required courses graded D that must be retaken for a higher grade to satisfy requirements for the major or minor will not receive degree credit when repeated. Both enrollments and grades appear on the transcript.

Grade Reports

Grades are available to students online. Following graduation, a cumulative grade report of all the student's work at Barnard is sent to her home address. The cumulative grade report is an unofficial transcript for which there is no charge. A student may request that her grade reports be sent to her parent(s) or guardian by filing a permission card with the Registrar. Parents who have established their daughter's status as a dependent may receive transcripts of her grades without her consent by writing to the Registrar and enclosing "evidence that the parents declare the student as a dependent on their most recent Federal Income Tax Form" (FERPA). If the student wishes additional transcripts, a charge of $3 per copy will apply.
Pass/D/Fail Option

A student may elect the Pass/D/Fail option by submitting a Request for Pass/D/Fail online, via eBear, before the absolutely firm deadline published in the College Calendar. Under the Pass/D/Fail option the student is held responsible for fulfilling all course requirements. A grade of D or F is not converted. The complete rules and instructions are available on eBear and on the Registrar's Office website.

Some courses record Pass/Fail grades for all students enrolled, e.g., ENGL BC 3191. Of the 122 points required for the degree, a maximum of 23 points of course work may receive a grade of Pass, whether elected or mandated (e.g., ENGL BC 3191). The P/D/F option cannot be elected for First-Year English or any course designated to count toward the major or the minor. (For students required to complete 120 points, the maximum is 21 points; for students required to complete 121 points, the maximum is 22.)

No limitation is placed on the number of Pass grades that may be recorded in a single term, except those rules that apply to Dean's List, to eligibility for financial aid, and to the overall 23-point maximum.

Grades of P are not included in the grade point average. Grades of D or F, whether or not received under the Pass/D/Fail option, are computed. If the total number of points excluded from calculation in the grade point average exceeds 34, a sliding scale requiring higher qualifying averages is used to determine eligibility for general honors at graduation. (Like courses graded Pass, points credited for AP, baccalaureates, transfer work, and summer courses are not calculated in the Barnard grade point average.)

The request for a course to be graded under the Pass/D/Fail option is irreversible. No request will be honored after the deadline. No request filed before the deadline can be reversed after the deadline. Subsequent change to a letter grade will not be allowed, and the option may not be elected retroactively. Information on the grade assigned to a course taken Pass/D/Fail will not be released to the student.

Incompletes

A student may, for compelling reasons, request from her instructor an Incomplete by means of written approval on forms available at the Office of the Registrar. The deadline for filing the Application for Incomplete is the last day of the reading period. However, in a course without a final examination, the deadline is the day before the final paper is due if that date precedes the last day of the reading period.

There are two Incomplete options. The “Early Incomplete” option requires submission of unfinished work to the Registrar soon after the end of the term by the date designated in the College Calendar and results in the removal of the “I” notation from the transcript. The second option extends the deadline to the first day of classes for the next Autumn term, but the “I” notation remains on the permanent transcript and is joined by the final letter grade. The full regulations that apply to Incompletes are listed on the Application for Incomplete form available at the Office of the Registrar. A student must have the permission of her instructor to qualify for an Incomplete, and she is required to use the form, which is a written guarantee of the terms set forth in it by the instructor.

Transcripts

Transcripts are ordered by written request to the transcript assistant in the Office of the Registrar. An official Transcript Request Form is available at the office of the Registrar or may be downloaded from the Registrar's website, but the request may also be made by letter, provided that the letter includes the following: student's name (and her name at Barnard, if different) and Social Security number or Barnard identification number, dates of attendance at Barnard, number of copies desired, specifications as to whether the transcript should or should not be delayed until the latest semester's grades have been entered, name(s) and address(es) to which the transcript is to be sent, the student's full signature, and a $3 check or money order for each transcript ordered. Official copies of transcripts (those bearing the seal of the College) can be sent only to academic institutions, business organizations, and government offices. Unofficial copies of transcripts may be sent to the student. All copies of transcripts, official and unofficial, are sent only at the written request of the student, and are subject to the $3 fee. There is no charge, however, for a transcript sent to a division of the University. Transcripts can be sent by FedEx or Priority Mail for an additional fee. Barnard can not send copies of transcripts from other schools; they must be requested directly from the
institutions attended.

Dean's List
The Dean's List, which includes the names of students who deserve special mention for scholarship, is compiled at the end of each academic year. The designation appears on the online transcript. To be eligible, a student must be enrolled at Barnard for both terms and complete at least 12 letter-graded points each term with a minimum grade point average of 3.4 for the academic year. (P-graded points are excluded.) Her grade point average will be based on all her letter grades in the A to F range.

College Honors
The Faculty awards honors to students who complete work for the degree with distinction (cum laude), with high distinction (magna cum laude), and with highest distinction (summa cum laude). Students whose records include study at other institutions (transfer, summer school, study leave) will be eligible for Latin honors if both the overall and the Barnard grade point average meet the designated requirements. If the total number of points for courses graded P and P*, and for transfer grades that do not have Barnard equivalents, exceeds 34 of the 122 points for the degree, the qualifying averages are computed on a sliding scale.

The values determining Latin Honors will change each year. For 2008-2009:
A student with a final cumulative grade point average matching or exceeding the cutoff average for the top 7% of graduates of the last three years will be awarded the degree summa cum laude.

A student with a final cumulative grade point average matching or exceeding the cutoff average for the top 14% of graduates (and below the cutoff average for the top 7% of graduates) of the last three years will be awarded the degree magna cum laude.

A student with a final cumulative grade point average matching or exceeding the cutoff average for the top 25% of graduates (and below the cutoff average for the top 14% of graduates) of the last three years will be awarded the degree cum laude.

The averages for these three groups of graduates in the three academic years 2005-2006 through 2007-2008 were, in descending order, 3.89, 3.76, and 3.58. Accordingly, these minimum values govern the awarding of the corresponding honors in 2008-2009.

Departmental honors are awarded for distinguished work in the major to no more than 20% of graduates, as nominated by their major departments.

Phi Beta Kappa
The Barnard section of the Columbia University chapter of Phi Beta Kappa was founded in 1901. Election to the national honor society is a recognition of scholarship, and Barnard students of exceptionally high standing are eligible. Junior election will require a minimum of 86 completed points, and senior election, 102. Students do not apply for membership; they are elected by Barnard faculty members who are themselves members of Phi Beta Kappa.

Eligibility for Student Government Offices
To be a candidate for election to a student government office, a student must be in good academic standing and free of disciplinary action for at least one year.

Eligibility for Intercollegiate Athletics
Any student at Barnard College, Columbia College, the Fu Foundation School of Engineering and Applied Science, or the School of General Studies who is pursuing the undergraduate program or a combined program toward a first degree is eligible for inter-collegiate athletics, provided that certain conditions are met. To be eligible for athletic activities, a student must be a candidate for a bachelor's degree;
• be registered for at least 12 points of credit per semester;
• be in satisfactory academic standing;
• have passed by the beginning of the academic year 24 points if in the second year, 52 points if in the third year, or 86 points if in the fourth year;
• have attended the University for not more than eight terms;
• not have completed the requirements for a bachelor's degree.

An eligibility form must be filed with the Department of Intercollegiate Athletics, which consults with the Registrar to determine eligibility.

*back to top
ACADEMIC ADVISING

Academic advising is coordinated by the Dean of Studies Office (105 Milbank), which oversees the assignment of an adviser to each entering student. Although responsibility for the fulfillment of degree requirements rests with the student, her academic adviser is prepared to help her match her program of courses to her individual goals and priorities, to acquaint her with the academic resources available at the College and the University, and to respond to her questions about the curriculum and academic policies and procedures. Also available for assistance are her Class Dean, the staff of the Dean of Studies Office, and the members of the Barnard Faculty.

Class Deans and Advisers

Prior to her matriculation, each entering first-year student will receive A Guide to Your First Semester at Barnard from the First-Year Class Dean. The student selects courses for the autumn term and submits the completed on-line program form to the Class Dean who, insofar as possible, schedules classes accordingly. Class schedules and registration materials are distributed when students arrive on campus in September.

Assistance in planning courses of study is given to first-year students and sophomores by their academic advisers with whom students are expected to schedule appointments for individual advising throughout the year. Group meetings with department chairs and other professors are arranged each semester to facilitate the selection of majors.

By the end of the second semester of her sophomore year, each student chooses her major field in consultation with the Sophomore Class Dean, her adviser, the academic department, and the Dean of Career Development. From then on, her major adviser guides advanced study for the undergraduate degree and is the principal source of information on preparation for graduate school. Also available to her for general academic guidance are the Junior and Senior Class Deans.

Students are responsible for completing all degree requirements and are aided in doing so by the degree audit program on the Barnard website. A Senior Class handbook describes College policy on honors, application procedures for graduate or professional study, and deadlines for major examinations, GRE, LSAT, MCAT, and fellowship applications. The Senior Class Dean and the Coordinator for Commencement oversee the planning for commencement with the help of class officers and the Commencement Committee.

Transfer Students

Incoming transfer students are assisted by the transfer advisers in planning their courses of study and selecting majors. Group meetings are scheduled in the summer and during Orientation, and individual appointments may be arranged throughout the academic year. Transfer students who enter with junior class standing are guided by both transfer and major advisers during their first Barnard semester. For more about Transfer Students click here.

International Students

The designated deans within the Dean of Studies Office are available to meet with international students regarding issues that arise from their international student status. Group meetings are scheduled during Orientation and throughout the year to give international students the opportunity to become familiar with one another, the College, and life in the United States. The International Student Handbook is also available in the Dean of Studies Office. For more about International Students click here.

Visiting Students

Students who enroll for classes at Barnard as visitors who will graduate from another college must have approval from the degree-granting school for coursework to be completed at Barnard. Program filing and registration are guided by designated transfer advisers. For more about Visiting Students click here.

Study Leaves

Students who wish to study abroad for credit toward the Barnard degree are urged to discuss their plans and
to apply for approval from the Dean for Study Abroad Advising in the Dean of Studies Office early in the year prior to the period of enrollment at the other institution. Information is available on the web and in 105 Milbank.

Program Planning for Students Interested in Health Professions

The basic premedical and predental requirements are two semesters of introductory biology (BIOL BC 1500 and BC 1502) and two semesters of biology laboratory (BIOL BC 1501 and BC 1503) two semesters of general chemistry and one semester of laboratory (CHEM BC 2001, BC 3232); two semesters of organic chemistry and one semester of organic laboratory (CHEM BC 3230, BC 3231, BC 3328); two semesters of physics with accompanying laboratory (PHYS BC 2001, 2002 [calculus I and II are pre- or corequisites] or V 1201, V 1202, V 1291, and V 1292 [calculus I prerequisite]. Two semesters of English (fulfilled by First-Year Seminar and First-Year English); and one year of college-level mathematics. Highly recommended courses, required by some schools, are two terms of calculus, one term or of biochemistry (CHEM BC 3282), and one term of genetics (BIOL BC 2100).

Students should become familiar with the most recent edition of Medical School Admissions Requirements, an annual publication of the Association of American Medical Colleges.

Pursuing a major in the sciences is not necessary for premedical students, provided they include the aforementioned required courses in their programs. The science requirements should be completed in the year prior to the year of desired entry, at which time students are advised to take the Medical College Admissions Test (MCAT) which is offered approximately 20 times per application cycle.

All students who are interested in the health professions should consult Dean Bournextian or Dean Starks-Allen in the Dean of Studies Office as soon as possible. Applications for the standardized tests and other relevant materials are available in 105 Milbank.

Program Planning for Law School Applicants

There are no specific course requirements for entry to law school, and there is no specifically recommended major. Students are encouraged to develop strong skills in writing and in speaking with precision and to take programs that require demanding critical analysis and effective study habits. Information about law schools and the application process can be found in the Official Guide to U.S. Law Schools, an annual publication of the Law School Admission Council and the American Bar Association, and Barnard’s The Prelaw Handbook. Copies of the Handbook are available in the Dean of Studies Office, 105 Milbank, which also maintains a library of current law school catalogues and other relevant information.

Students are encouraged to consult Dean Kuan Tsu or Dean Starks-Allen in the junior year or earlier. The LSAT should be taken in June or October of the year prior to expected entry to law school; the June test is recommended because it allows for better planning. Information booklets for the LSAT and for the Law School Data Assembly Service (a required transcript analysis procedure) arrive in March each year and can be picked up in 105 Milbank anytime thereafter.

Program Planning for Students Interested in Other Professions

Curricular planning should be made with an eye to some of the specific requirements in other fields. Familiarity with professional school catalogues in these areas is recommended. Information and printed literature about business, social work, and psychology is available in the Dean of Studies Office.

Graduate School Advising

Students interested in advanced study in the liberal arts and sciences or the performing arts may consult faculty members in appropriate departments and Senior Class Dean Aaron Schneider. A student who plans to apply to graduate school during her senior year or possibly in the future should establish a file with Ms. El-Attar, the assistant for graduate school recommendations in the Dean of Studies Office.

Recommendations

Students may establish recommendation files for employment in Career Development and for graduate and
professional study with Ms. El-Attar and Ms. Hercules, the recommendations assistants in the Dean of Studies Office. For procedures and policy, the appropriate office should be consulted.

Honors

The following awards, administered according to the provisions of their respective donors, were established to honor students who have shown exceptional distinction in their studies. Students do not apply for these awards; rather, recipients are selected by appropriate Faculty departments and committees.

FELLOWSHIPS

Alpha Zeta Club Graduate Scholarship (1936)
For graduating seniors who show promise of distinction or to outstanding recent Barnard graduates who are candidates for higher degrees.

Associate Alumnae of Barnard College Graduate Fellowship (1963)
For a graduating senior or graduate who shows exceptional promise in her chosen field of work. Information and applications may be obtained in the Alumnae Office.

Anne Davidson Fellowship (1971)
For graduating seniors who will pursue graduate study in conservation at a university of approved standing.

George Welwood Murray Graduate Fellowship (1930)
For graduating seniors who show promise of distinction in the humanities and/or the social sciences and who will pursue graduate study at a university or college of approved standing.

Josephine Paddock Fellowship (1976)
For graduating seniors who show promise of distinction in such fields of graduate study in art as the faculty shall determine. Holders are to pursue studies, preferably abroad, at a college or university of approved standing.

Grace Potter Rice Fellowship (1935)
For graduating seniors who show promise of distinction in the natural sciences or mathematics and who will pursue graduate study at a university or college of approved standing.

GENERAL

Estelle M. Allison Prize (1937)
For excellence in literature.

Mary E. Allison Prize (1937)
For general excellence in scholarship.

Annette Kar Baxter Memorial Fund Prize (1984)
For juniors who have distinguished themselves in the study of some aspect of women's experience.

Frank Gilbert Bryson Prize (1931)
For a senior who, in the opinion of the class, has given conspicuous evidence of unselfishness and who has made the greatest contribution to Barnard during the college years.

Eleanor Thomas Elliott Prizes (1973)
Two prizes to juniors chosen by the Honors Committee from among the five most outstanding students in the class based upon overall academic record, integrity, and good citizenship in the College.

Katherine Reeve Girard Prize (1964)
For a student whose interests are in the international aspects of a major.

Ann Barrow Hamilton Memorial Prize in Journalism (1978)
For a graduating senior who will pursue a career in journalism.

Alena Wels Hirschorn Prize (1986)
For a senior majoring in economics, with preference for a student who has a strong interest in English literature and/or in pursuing a career in journalism.
Lucyle Hook Travel Grants (1987)
To promising individuals with enriching, eclectic projects who demonstrate originality and self-direction.

Jo Green Iwabe Prize (1986)
To a student with a disability, for active participation in the academic and extracurricular life of the College.

Ethel Stone LeFrak Prize (1986)
For excellence in a field of the arts.

Schwimmer Prize (1986)
For an outstanding graduating senior in the humanities.

Bernice G. Segal Summer Research Internships (1986)
One or more internships for supervised research in the sciences during the summer.

Marian Churchill White Prize (1975)
For an outstanding sophomore who has participated actively in student affairs.

PREMEDICAL
Helen R. Downes Prize (1964)
For graduating seniors who show promise of distinction in medicine or the medical sciences.

Ida and John Kauderer Prize (1973)
For premedical students majoring in chemistry.

Barbara Ann Liskin Memorial Prize (1995)
For a premedical student committed to women’s issues and to a humanistic approach to patient care.

Lucy Moses Award (1975)
For a premedical student likely to provide service to the medically underserved.

Gertrude Bunger Zufall Award (1987)
For a premedical student entering her senior year.

BY ACADEMIC AREA

AMERICAN STUDIES
John Demos Prize in American Studies (1995)
Awarded to a senior major for excellence in American Studies.

ARCHITECTURE
Marcia Mead Design Award (1983)
For architectural design.

ART HISTORY
Nancy Hoffman Prize (1983)
For students who plan to enter museum or gallery work or art conservatorship.

Virginia B. Wright Art History Prize (1989)
For promising seniors majoring in art history.

ASIAN-MIDDLE EASTERN CULTURES
Taraknath Das Foundation Prize (Columbia University)
To a student of Barnard College, Columbia College, or the School of General Studies, for excellence in Asian and Middle Eastern Studies.

BIOLOGICAL SCIENCES
Edna Henry Bennett Memorial Grants (1927)
For summer study at a biological research station.

Hermann Botanical Prize (1892)
For an undergraduate student proficient in biology.
Herbert Maule Richards Grants (1933)
For botanical or general biological research.

Donald and Nancy Ritchie Grants (1979)
For biological study or research.

Spiera Family Prize (1986)
For promise of excellence by a student majoring in biological sciences.

Constance Von Wahl Prize (1915)
For advanced work in biology.

CHEMISTRY
American Chemical Society's Division of Analytical Chemistry Award
For outstanding work in analytical chemistry.

American Chemical Society's Division of Polymer Chemistry Award
For outstanding work in organic chemistry.

American Institute of Chemists, New York Chapter Prize
For an outstanding student of chemistry.

CRC Press First-Year Chemistry Achievement Award
For outstanding achievement in first-year chemistry.

Marie Reimer Scholarship Fund Prize (1953)
Awarded at the end of the junior year to an outstanding major in chemistry.

ECONOMICS
Alena Wels Hirschorn Prizes (1986)
To a junior and a senior for the best essay on a subject of domestic or international economics.

Beth Niemi Memorial Prize (1981)
For an outstanding senior majoring in economics.

Katharine E. Provost Memorial Prize (1949)
For superior work by an undergraduate major in economics.

Sylvia Kopald Selekman Prize (1960)
For the first-year student who is doing the best work in introductory economics.

EDUCATION
Susan Riemer Sacks Prize
For the Barnard student teacher who has made the most noteworthy contribution to secondary school classrooms.

Stephanie Kossoff Prize (1972)
For the student who has made the most noteworthy contribution or meaningful endeavor in childhood education.

ENGLISH
Academy of American Poets Prize (Columbia University)
For the best poem or group of poems by a student.

Lenore Marshall Barnard Prizes (1975)
For both poetry and prose of distinction.

Saint Agatha-Muriel Bowden Memorial Prize (1971)
For superior proficiency in the study of Chaucer and medieval literature.

Bunner Award (Columbia University)
To the candidate for a Columbia degree who shall present the best essay on any topic dealing with American literature.

Doris E. Fleischman Prize (1992)
For the Barnard student judged to have written the best short piece, fiction or nonfiction.
W. Cabell Greet Prize (1974)
For excellence in English.

William Haller Prize (1987)
For excellence in the study of English literature.

Amy Loveman Memorial Prize (1956)
For the best original poem by an undergraduate.

Sidney Miner Poetry Prize (1962)
For the senior major who has shown distinction in the reading, writing, and study of poetry.

Peter S. Prescott Prize for Prose Writing (1992)
For a work of prose fiction which gives the greatest evidence of creative imagination and sustained ability.

Helen Prince Memorial Prize (1921)
For excellence in dramatic composition.

Helene Searcy Puls Prize (1984)
For the best poem in an annual student competition.

Stains-Berle Memorial Prize in
Anglo-Saxon (1968)
For excellence in Anglo-Saxon language and literature.

Howard M. Teichmann Writing Prize (1986)
To a graduating senior for a written work or body of work that is distinguished in its originality and excellent in its execution.

Van Rensselaer Prize (Columbia University)
To the candidate for a Columbia degree who is the author of the best example of English lyric verse.

George Edward Woodberry Prize (Columbia University)
To an undergraduate student of the University for the best original poem.

ENVIRONMENTAL SCIENCE
Lillian Berle Dare Prize (1974)
For the most proficient Barnard senior who will continue to study in geography or a related field.

Henry Sharp Prize (1970)
For an outstanding student majoring in environmental science.

FRENCH
Helen Marie Carlson French Prize (1965)
For the best composition in fourth-term French.

Isabelle de Wyzewska Prize (1972)
For the best composition in the French course Major French Texts.

Frederic G. Hoffherr French Prize (1961)
To a student in intermediate French for excellence in oral French.

Eleanor Keller Prizes (1968)
For juniors in French literature and seniors in French culture.

Rosemary Thomas Prize in French (1966)
For evidence of a special sensitivity and awareness in the study of French poetic literature.

GERMAN
Dean Prize in German (1952)
For the senior who has throughout college done the best work in German language and literature.

German Scholarship Fund Prize (1950)
Awarded at the end of the junior year to an outstanding major in German.
Louise Stabenau Prize in German (1988)
Awarded to a junior or senior major for excellence in oral German.

GREEK AND LATIN
John Day Memorial Prize (1986)
For a high-ranking sophomore in the field of Greek and Latin.

Earle Prize in Classics (Columbia University)
For excellence in sight translation of passages of Greek and Latin.

Benjamin F. Romaine Prize (Columbia University)
For proficiency in Greek language and literature.

Jean Willard Tatlock Memorial Prize (1917)
For the undergraduate student most proficient in Latin.

HISTORY
Eugene H. Byrne History Prize (1960)
For superior work by a history major.

Ellen Davis Goldwater History Prize (1982)
For superior work by a history major.

ITALIAN
Bettina Buonocore Salvo Prize (1966)
For a student of Italian.

Speranza Italian Prize (1911)
For excellence in Italian.

MATHEMATICS
Margaret Kenney Jensen Prize (1973)
To first-year students, sophomores, and juniors for excellence in mathematics.

Kohn Mathematical Prize (1892)
To a senior for excellence in mathematics.

MUSIC
Robert Emmett Dolan Prize (Columbia University)
To a student in any division of the University for instruction on a chosen musical instrument.

Ethel Stone LeFrak Prize (1986)
For a graduating senior whose creative writing in music shows promise of distinction.

PHILOSOPHY
William Pepperell Montague Prize (1949)
For promise of distinction in the field of philosophy.

Gertrude Braun Rich Prize (1986)
For promise of excellence by a student majoring in philosophy.

PHYSICAL EDUCATION
Margaret Holland Bowl (1974)
For excellence in leadership and participation in Barnard intramurals and recreation.

Marion R. Philips Scholar-Athlete Award (1981)
To the senior female winner of a varsity letter who has achieved the highest cumulative academic average and who has participated on a Columbia University team for at least two years.

Tina Steck Award (1980)
For the most outstanding member of the Swimming and Diving Team.

PHYSICS
Henry A. Boorse Prize (1974)
To a graduating Barnard senior, preferably a major in the department, whose record in physics shows
promise of distinction in a scientific career.

**POLITICAL SCIENCE**

**James Gordon Bennett Prize (Columbia University)**
For the best essay on some subject of contemporary interest in the domestic or foreign policy of the United States.

**Phoebe Morrison Memorial Prize (1969)**
For a political science major planning to attend law school.

**Political Science Quarterly Prize (2000)**
To a Barnard political science major for excellence in analytical writing on public or international affairs in a paper that has been presented in a colloquium.

**Caroline Phelps Stokes Prize (Columbia University)**
For the best essay on any topic approved by the Stokes Prize Committee, which has been presented in course or seminar work.

**PSYCHOLOGY**

**Hollingworth Prize (2000)**
For an outstanding research project in psychology.

**Ida Markewich Lawrence Prize (1982)**
For the best paper in psychology, preferably child psychology, by a major.

**Millennial Psychology Prize (2000)**
For a student who plans to continue her scientific or professional training in psychology or a related discipline.

**RELIGION**

**Samuel Dornfield Prize (1979)**
To a Barnard student whose work in Old Testament or Ancient Near Eastern Studies reflects special sensitivity and academic excellence.

**Caroline Gallup Reed Prize (1916)**
For outstanding work either in the field of the origin of Christianity and early church history or in the general field of the history and theory of religion.

**SPANISH**

**John Bornemann Prize in Spanish (1976)**
For superior performance in the first- or second-year language courses.

**Carolina Marcial-Dorado Fund (1953)**
For a student from Spain, or to a Spanish major continuing graduate studies in the United States or abroad, or to a student who is majoring in Spanish.

**Eugene Raskin Prize**
For the best essay in fourth-term Spanish.

**Clara Schifrin Memorial Spanish Prize (1998)**
For an outstanding student of Spanish and Latin American Cultures in courses above the level of Spanish 1204.

**Spanish Prize (1959)**
For a Spanish major who has done the most distinguished work in Spanish language and literature.

**Ucelay Recitation Prize**
For the best recitation of a poem or dramatic passage in Spanish.

**Susan Huntington Vernon Prize (Seven Colleges)**
For the best original essay written in Spanish by a senior whose native language is not Spanish.

**THEATRE**

**Kenneth Janes Prize in Theatre (1987)**
For a Barnard junior or senior who has contributed notably to the theatre program of the Minor Latham Playhouse.
WOMEN'S STUDIES

Bessie Ehrlich Memorial Prize (1980)
For an oral history project concerning a female relative of a preceding generation, in conjunction with the Women's Studies Department.

Jane S. Gould Prize (1982)
For an outstanding senior essay by a Women's Studies major.

*back to top*
STUDENT LIFE & SERVICES

Barnard students soon discover that their classmates are among the principal resources of their undergraduate years. Cosmopolitan in nature, the student population includes residents of nearly every state and some 32 foreign countries as well as those who live within commuting distance. Diversity is one of the few generalizations that can be made safely about Barnard students; a mingling of economic, regional, ethnic, and cultural groups is evident in campus life. Over 90 percent of the students live in College housing and participate in the educational programs, cultural events, and social activities of their residence halls.

Campus Organizations

Resident Life

STUDENT LIFE & SERVICES

Campus Organizations

Student Government and Campus Organizations

Student participation in the governance of the College and in shaping student life on campus is a time-honored tradition at Barnard. College committees, on which students, faculty, and administrators serve, recommend policy and procedural changes in such areas as curriculum, housing, and college activities. Students are the majority members on Honor Board and Judicial Council. Two students serve as representatives to the Board of Trustees.

All Barnard students are members of the Student Government Association, which elects a representative government and sponsors extracurricular activities and special events reflecting the range of cultural, political, pre-professional, and academic interests of the student body. These groups, more than 80 in all, include theater and vocal music groups, ethnic organizations, language clubs, community service groups, and yearbook staff. The student newspaper, Barnard Bulletin, is published weekly. Students with a variety of talents collaborate to produce Autumn and Spring Festivals featuring concerts, theater and dance performances, art exhibitions, and social events.

Cooperation among Barnard and Columbia groups is common. The majority of clubs and organizations have both Barnard and Columbia student members. Religious organizations and activities with headquarters on the Columbia University campus at Earl Hall encompass nearly every faith and are open to all Barnard students. Urban New York, a joint Barnard-Columbia program, offers unusual opportunities for students, faculty, and staff to experience together the cultural, political, and social life of the city.

Sports and Athletics

The Columbia University/Barnard College Athletic Consortium (Division I of the NCAA) sponsors 15 women's varsity teams, including archery, basketball, crew, cross country, fencing, field hockey, golf, lacrosse, soccer, softball, swimming and diving, tennis, indoor and outdoor track and field, and volleyball. The Athletic Consortium is just one of three in the nation and the only one on a Division I level. Students at Barnard College along with women enrolled at the undergraduate divisions of Columbia University have the opportunity to compete on all university-wide teams. Scheduled competition includes the Ivy League, the metropolitan area, the Eastern region, and national tournaments. Individuals and teams have the opportunity to advance to regional and national competition within the ECAC and NCAA.

For students interested in less competitive programs, the Physical Education Department offers an extensive program of intramurals and recreation. The program features badminton, basketball, floor hockey, indoor soccer, volleyball, open gym time, recreational swimming, sports clubs, open weight room hours, and special events.

Barnard facilities include a swimming pool, the LeFrak Gymnasium, locker rooms, running track, fencing, dance and wellness studios, and a weight room in Barnard Hall, as well as access to tennis courts just one block away in Riverside Park. Barnard students have access to all recreational and athletic facilities of the University as well. The Dodge Fitness Center at Columbia includes the Leiven Gymnasium, with a seating capacity of 3,499; the eight-lane Uris Swimming Center; 17 squash and handball courts; a well-equipped training room; and locker rooms and sauna. Women's intercollegiate and club teams also use outdoor facilities at Baker Field, a 26-acre complex at the northern tip of Manhattan that includes 20,000-seat Wien Stadium with a new synthetic surface, an eight-lane, all-weather NCAA-regulation running track, and practice fields. There are seven composition tennis courts with a tennis clubhouse, a soccer stadium, a softball field, facilities for crew, and a spacious field house.

Honor Code

The Honor Code, instituted at Barnard in 1912, governs all aspects of academic life and is enforced by an Honor Board that has a membership of students and faculty members, advised by the Dean of Studies Office. The Judicial Council of undergraduates, faculty, and administrators recommends disciplinary action for non-academic offenses and acts on appeals of academic disciplinary sanctions determined by the Honor Board.
Board. A more complete explanation of the system may be found in the Student Handbook.

Each student who registers at Barnard agrees to maintain the Honor Code, which states: *We, the students of Barnard College, resolve to uphold the honor of the College by refraining from every form of dishonesty in our academic life. We consider it dishonest to ask for, give, or receive help in examinations or quizzes, or to use any papers or books not authorized by the instructor, or to present oral or written work that is not entirely our own, except in such a way as may be approved by the instructor. We consider it dishonest to remove without authorization, alter, or deface library and other academic materials. We pledge to do all that is in our power to create a spirit of honesty and honor for its own sake.*

Library regulations and independent study courses are also governed by the code. Policies and regulations concerning student conduct are recommended by student, faculty, and administrative committees to the appropriate administrators, the President, and the Board of Trustees. Hearing and appeal procedures are also outlined in the Student Handbook.

Enrollment in the College, award of academic credit, and conferral of the degree are subject to disciplinary powers vested by the Barnard Board of Trustees in appropriate officers of instruction, administration, and in College committees.

Barnard Catalogue 2008-2009
STUDENT LIFE & SERVICES

Residential Life

Barnard maintains a diversified residence program. Residence options include traditional residence halls, a variety of suite arrangements, and apartments in College-owned residential buildings on or adjacent to the campus. In a cooperative exchange with Columbia College and the School of Engineering and Applied Sciences, a limited number of Barnard and Columbia juniors and seniors participate in a housing exchange program. In addition, some students live in independent housing they secure in the campus vicinity. The College offers all incoming first-year students the opportunity to elect to live in campus housing. On average, the residential rate among first-year students is 98%, while the average residency rate among upper-class students is 90%.

Facilities

All Barnard College owned or operated residence halls are completely smoke-free. Under the leadership of the Director of Residential Life & Housing, the College provides substantial supervision of student life. This includes associate directors, graduate staff and undergraduate student assistants, 24-hour desk attendant coverage, and regular security guard patrols.

Brooks, Hewitt, Reid, and Sulzberger Halls, or the "Quad," at the south end of the campus, are operated as a single complex with space for about 920 students. This residential complex provides community amenities, including computer rooms and the Student Store. The first eight floors of Sulzberger Hall, Reid, and Brooks house first-year students, who are assigned to double, triple, and quad rooms. There are also wheelchair-accessible rooms located in the Quad. The "Tower," floors nine through 16 of Sulzberger Hall, houses seniors in suites with lounges and kitchenettes.

"616" West 116th Street, an apartment-style residence directly across the street from the Quad, provides housing for 200 students in suites of single and double rooms. Each suite has a kitchen and bath.

"600" and "620" West 116th Street are College-owned buildings comprising a majority of student apartments of one to five single or double rooms with kitchen and bath and some apartments for community residents.

Elliott Hall, adjacent to the west side of campus, houses 96 students. Rooms are on common corridors in suites with shared baths, kitchenettes, and lounges.

Pimpton Hall, a suite-style residence hall on Amsterdam Avenue and West 121st Street, a short walk from the main campus, but adjacent to Columbia and Teachers College, provides housing for 280 students in suites of five single rooms. Each suite has a kitchen and bath.

601 West 110th Street has housing for approximately 165 Barnard students (mostly sophomores and juniors) who live in suites and seniors who live in studios. This option provides independent living with an active residential life program.

The newest member of our residential family is Cathedral Gardens. This building is located at 110th St. and Manhattan Ave. This community is the perfect location for mature students who are looking for a tranquil retreat from hectic campus life. It is also well-suited for groups of students with shared interests in community engagement and off-campus work experience and internships. Building residents will find lovely views overlooking Morningside Park or the Morningside Heights neighborhood. CG offers a community lounge, laundry facilities and a 24-hour security desk. Within each apartment, students will enjoy beautiful hard wood floors, new furniture and fixtures, as well as a dishwasher and full refrigerator in every kitchen. The spaces range from four to six-person apartments containing mostly single rooms and some doubles.

Eligibility

Eligibility criteria have been established in order to assign available space on an equitable basis. These regulations may be changed as needed at the discretion of the College, but insofar as possible, the following criteria will determine eligibility:

- A student must be registered for a full academic program. Exceptions may be made upon review of appeals submitted to the Dean of Studies Office and the Director of Residential Life & Housing.

Assignments

Returning upper-class resident students select their rooms on the basis of a lottery number system and room
selection process. Incoming first-year students, readmitted upper-class students, and transfer students are assigned rooms by the Office of Residential Life and Housing.

Requirements
The rules and regulations regarding payments and refunds, and the use and occupancy of rooms are in the "Terms and Conditions of Student Residence in Barnard College Housing," which is given to students selecting College housing and which must be agreed to before they may accept an assignment. This document may be reviewed via the Residential Life & Housing webpage.

Board
The College offers all students meal plans, which include points that may be used in the recently renovated Hewitt cafeteria and in the Java City Cafe. Meal plans (not points) may also be used at Columbia’s John Jay cafeteria for some meals. All first-year students and all residents of the Quad (Brooks, Hewitt, Reid, and Sulzberger Halls) are required to be on a meal plan for the full academic year. Upper-class residents of Sulzberger Tower are not required to be on a meal plan.

Married Students
A married student, as a rule, will not be allowed to remain in College housing with her significant other. They will be subject to financial obligations which pertain to any student who withdraws from the residence halls or from the College during the term.

Financial Aid for Room and Board
All students who live on campus will have their financial aid based on the resident student budget. A student who receives aid from the College based upon the resident budget must live in College housing billed by Barnard. It is the student’s responsibility to notify the Office of Financial Aid when she decides not to reside on campus. Students who decide to live off-campus or commute from home will have their financial aid based on the commuter student budget. No resident student ever receives more financial aid for room and board than the average amount required to cover the costs of living and eating in College residences. This average is based on the cost of a multiple room and the maximum standard meal plan with unlimited meals per term. A student who chooses to reside in a single room must cover the difference between the cost of a single and double room from her own resources.

Resident Assistants
As part of the student support network, students in each residence hall are designated as Resident Assistants to be a campus resource for resident students, to provide referrals to other services, and to aid in residential programming.

Barnard Catalogue 2008-2009
STUDENT LIFE & SERVICES

Information Services

Wollman Library

The Barnard Library occupies the first three floors of Adele Lehman Hall; the Archives is located on the tunnel level. The Library's collection includes both print and nonprint resources that are intended to serve the curricular needs of the undergraduate students at Barnard. The Library’s Media Services department includes a growing collection of video and audio material in all formats and provides equipment for its use. The Library also provides access to a wide variety of indexes and texts in electronic format. The Library has an especially strong collection in women's studies, including an expanding collection of self-published Zines, that is supplemented by research materials in the Barnard Center for Research on Women.

Special collections in the Library include the Barnard Archives, a collection of official and student publications, letters, photographs and other material that documents Barnard's history from its founding in 1889 to the present; the personal library of Nobel Prize winning Chilean poet Gabriela Mistral; the Overbury Collection of 3,300 books and manuscripts by and about American women authors, and a number of rare books.

During the academic year the Library is open seven days a week providing a full range of services. The Reference Department offers an on-going instructional program, including in-class lectures and individual consultations, designed to help each student develop her library and research skills.

In addition to standard print research materials, the Library provides access to many electronic information sources. CLIO is a computerized catalog containing holdings of the entire Columbia University Library system, including Barnard. Students can also search a wide variety of periodical indexes online, an increasing number of full-text news and research databases, and all of the resources of the World Wide Web.

Barnard students have access to all Columbia University libraries, with more than 9 million volumes, as well as to the libraries of Teachers College, Jewish Theological Seminary and Union Theological Seminary. In addition, students may use the many libraries and collections in the metropolitan area, either through public access or special referral.

Academic Technologies — Student Computing

Academic Technologies provides computing resources and services to all Barnard students through the Residential Computing program and in five student computer centers on campus. Residential Computing assists students with computer installations, network connections and basic software applications. Laptop support is provided in the computer labs during scheduled hours. The main computer lab, located in 112 Lehman Hall, houses PCs, Macintoshes, printers and scanners. Full-time staff and student technicians are available in this lab to help with questions, problems and general computing support. Students may also contact the Help Desk by phone, email or in person for computing assistance. Four smaller labs, open 24 hours a day, 7 days a week during the academic year, are located in the Sulzberger, Plimpton, and 616 W. 116th Street residence halls. All computers in the labs provide access to AT-supported software applications and to the internet.

Management Information and Network Services (MINS)

The Department of Management Information & Network Services (MINS) is responsible for managing all aspects of College-wide computer network and software system platforms. These systems encompass e-mail, the World Wide Web and other internet services, database applications, administrative systems, and network infrastructure. The MINS department maintains and ensures the constant availability of Internet access, wireless and network connectivity and computing services for Barnard College students, faculty, and staff. MINS also works in conjunction with other college departments to implement administrative applications such as online student services and course registration, and online systems for faculty, accounting, finance and human resources.

Barnard Center for Research on Women
The Barnard Center for Research on Women promotes a dialogue between feminist scholarship and activism, and serves a community composed of faculty, students, staff, alumnae, community activists, artists, and scholars. Founded in 1971 to deepen Barnard’s longtime commitment to women’s equality, the Center has, in recent years, dedicated itself to examining how today’s women’s movements speak to and further those of the past, as well as the ways in which feminist struggles are inextricably linked to other movements for racial, economic, and social justice around the globe.

The Center accomplishes these goals by offering public lectures and conferences on a wide range of feminist issues and by publishing its tri-annual web journal, “The Scholar and Feminist Online.” These efforts fortify the Center’s role of fostering inquiry and advancing knowledge about women and keeping feminist issues at the forefront of college life. They also link Barnard to a diverse range of activist organizations and community groups throughout the city, a listing of which is available in the online BCRW Directory of Women’s and Social Justice Organizations.

Nowhere is this network more visible than in the Center’s lively, provocative and engaging programming. Hosting nearly a dozen ongoing series, the Center provides a public forum for intelligent and relevant discussions of women in Judaism, the future of feminism, the politics of women’s imprisonment, and feminist responses to today’s most controversial issues. Bringing together renowned scholars, artists, and community organizers, the nationally recognized annual “The Scholar and the Feminist” conference, now in its 33rd year, has, in recent years, explored the changing face of activism across generations, international feminist movements, and feminist responses to race and poverty.

Located in Room 101 Barnard Hall, the Center’s reading room and Resource Collection, which includes over 120 feminist periodicals, are open to members of the Barnard community and the general public. The Center also houses hundreds of rare, difficult-to-find feminist materials dating back to the early Second Wave of American Women’s Movements. This public archive of fliers, reports, newsletters, pamphlets, and conference programs provides an exciting glimpse into one of the most vibrant moments in the history of activism. In From the Collection, each semester student research assistants curate an online exhibition of the most interesting documents, organizing them around a theme of enduring importance.

STUDENT LIFE & SERVICES

Other Student Services

Career Development

Career Development helps students and alumnae explore, define, and implement career plans. To provide this service the Office has developed programs enabling Barnard women to gain work experience and to become informed about different career opportunities. Both students and alumnae are seen for individual career counseling, and panels and group workshops are given on careers and related concerns. A newsletter informs students about career programs, workshops, internships, entrepreneurship, community service, and special opportunities. The office collaborates with faculty on the Barnard Leadership Initiative and the NYC Civic Engagement Program. Programs to develop financial fluency and professional skills are offered throughout the academic year and during the Winter Break.

The Career Development website, has interactive capability, describes all programs, provides fact sheets, lists internships and jobs, and enables students to register their career interests and sign up for workshops online.

The Career Development Internship Program provides semester and summer offerings useful for students to clarify their vocational interests through valuable and often professional-level experience. Cultivating an entrepreneurial mindset is supported through the Trust Entrepreneurial Internship Program which provides internship funding, workshops on building entrepreneurial skills, and a business plan competition.

To aid students and alumnae in exploring career areas, the office also maintains an Alumnae Network Database that lists graduates who are available to discuss their fields, and a library of vocational and graduate school materials. Workshops on specific concerns, such as resume writing and interviewing skills, are conducted when the College is in session. Students and alumnae may establish permanent recommendation files in the office for future employment.

Career Development, which is open twelve months a year, has contacts with many potential employers. Students use part-time and temporary job listings for both on- and off-campus jobs, and the Federal Work Study Program is also administered by this office. Full-time jobs may be viewed on the Internet; access for off-campus viewing is by password obtained through the office. Seniors are interviewed on campus by corporate and large non-profit organizations offering entry-level professional opportunities through the Programs for Senior Year. An annual not-for-profit career fair is held each spring to connect students with many employers and internship sponsors in that sector. Business suits for interviews and professional meetings can be borrowed from the office’s Suitable Suits Program.

The office advises three student-run enterprises—the Barnard Babysitting Agency, the Barnard Bartending and Party Help Agency, and the Barnard Store. These agencies provide excellent managerial experience and create jobs for many students.

Students may establish recommendation files for employment in the Career Development and for graduate and professional study with the recommendations assistants in the Dean of Studies Office. For procedures and policy, the appropriate office should be consulted.

Disability Services

In 1978, Barnard established a program to provide services for students with disabilities which enhance their educational, pre-professional, and personal development. The Disability Services (ODS) serves students with mobility, visual, and hearing impairments, as well as students with invisible disabilities, such as learning disabilities and ADD/ADHD, chronic medical conditions, psychiatric disabilities, and substance abuse/recovery. ODS works with other administrators and members of the faculty to assist students with disabilities in participating in college activities, securing financial aid, scheduling classes and examinations, and planning careers. Mobility aides, readers, notetakers, and other volunteer/paid aides are available through the ODS Accommodative Aide Program. Publications include the ODS manual, "Forms/Policies/TipSheets" (updated annually), and several services brochures: “What ODS Can Do For You,” “Assisting Students with Temporary Disabilities,” “A Parent Guide to ODS,” “A Brief Overview of Adaptive Technology” and "What We've Learned: Thoughts on Disability from Graduating Seniors to Entering Students". The
504/ADA Access Committee works to reduce architectural, programmatic, and attitudinal barriers at the College; the Barnard Alumnae Involved with Disabilities Network (BAID) provides students with access to disabled alumnae in a broad range of careers and serves as an information clearinghouse on disability-related support in graduate and professional schools.

The buildings on the contiguous campus interconnect and are wheelchair accessible. Maps of the campus showing special features and access routes are available at ODS, as are access maps for both Columbia University and Teachers College. ODS maintains a comprehensive webpage, which includes a monthly newsletter, notices of programs and events, and a special link to university access updates.

**Student Health Services**

The Student Health Service, nationally accredited by the Accreditation Association for Ambulatory Health Care, provides primary care and specialist referrals for all registered Barnard students. It offers a wide range of general services, with a particular emphasis on the developmental needs of college-aged women. Entering students must submit a health history and physical forms, and proof of immunization as required by New York State Health Laws.

**STAFF:** The clinical staff consists of full-time and part-time physicians, nurse practitioners, nurses, a nutritionist and a health educator. The Health Service collaborates with major New York medical teaching centers to provide advanced clinical training in college health to Adolescent Medicine Fellows.

**AFTER-HOURS CARE:** At all times when the college is in session there is a Clinician-on-Call nights and weekends for after-hours urgent medical advice. The Health Service closes during winter, spring, and summer breaks. During these breaks, Barnard students may use the Columbia University Health Service, for urgent care only, for a $60 per-visit reimbursable fee.

**FEES:** There is no per-visit charge at the Health Service and the number of visits is unlimited. Fees are charged for medications from the on-site dispensary.

**HEALTH INSURANCE:** This is activated only when students are referred to off-campus specialists. All registered Barnard students are automatically covered by the mandatory Basic Accident and Sickness Plan benefits of the Barnard College student insurance plan, underwritten by the United Healthcare Insurance Company (any existing family insurance plans are used as primary insurance, with coordination of benefits from the student insurance.) In addition, optional supplemental insurance is available at a low cost and is strongly encouraged for those students not also covered by primary family insurance benefits or who belong to an HMO outside New York City. Details of the student insurance plan are mailed to all students annually.

For additional information about services provided and the Student Insurance Plan, students are encouraged to visit the Health Service website, or to pick up a copy of the "Student Health Service and Student Insurance Handbook" from the Health Service.

**Counseling Services**

The Rosemary Furman Counseling Center provides free short-term individual counseling, group counseling, medication evaluations, referral services, and crisis intervention services for all registered Barnard students. Psychologists, psychiatrists, and social workers, along with advanced trainees in these fields, staff the center. Counselors meet with students to address personal concerns that may be large or small, and adhere to a strict confidentiality policy. Counseling staff are on call for evening and weekend emergencies when the College is in session, and also during winter and spring break. Finally, the Counseling staff provides consultation and outreach services to the Barnard community, including programs, workshops, and other events.

**Alcohol and Substance Awareness Program**

The Alcohol and Substance Awareness Program (ASAP) works with the Barnard community to provide drug and alcohol education, prevention, and intervention on campus. Its purpose is to promote the healthy development of students and to encourage students to explore their options and ultimately make choices that are positive for them as individuals.

ASAP offers individual and group counseling ASAP also offers outreach and educational programs on related
topics, including: consequences of alcohol use, Barnard norms, women and alcohol, alcohol and relationships, alcohol and stress, abstinence, drug use, safe spring break and media literacy. All ASAP services are confidential and free of charge.

Well-Woman

Well-Woman promotes the health and wellness of Barnard students through peer education, educational programming, individual health behavior consultation, campus-wide health campaigns, community outreach and advocacy. We are a resource for students to learn about their physical, sexual, mental, and spiritual health, and we work to support women's individual self-care and the health of the community. We also educate students about how to find and use health resources at Barnard and in the community.

Well-Woman peer educators are student volunteers who are trained to present workshops and campus events on sexual health, nutrition, fitness, body image, sexually transmitted infections, contraception, stress management, healthy relationships and communication (and more), in residence halls, to clubs and organizations, and to teens in the surrounding community. Peer educators present education sessions to students having their first-ever GYN exam, and are available to answer student questions during evening office hours.

The Barnard Columbia Rape Crisis / Anti-Violence Support Center (RC/AVSC)

The Barnard Columbia Rape Crisis / Anti-Violence Support Center (RC/AVSC) is a joint program of Barnard College and Columbia University’s Sexual Violence Prevention and Response Program (SVPRP), a department of CU Health Services. The RC/AVSC is staffed by a licensed psychologist, graduate and undergraduate volunteers, a professional Program Coordinator, and professional advisors from Columbia University and Barnard College.

Programs offered by the RC/AVSC include: peer-counseling and advocacy for survivors and co-survivors, referrals for a variety of on or off-campus services, and workshops which aim to educate students, administrators, and faculty about the dynamics and effects of sexual and relationship violence.

College Activities

The College Activities Office engages each student in advising, programming, and community development using a student-centered approach. The office creates programs, guides students in their own program development, and promotes active and involved citizenship through inter-cultural education and identity and leadership development. College Activities has a ticket booth which offers discounted tickets to Broadway shows, sporting events, movies, and more. There are mini-courses that anyone within the community can take as well as other activities throughout the year.

Multicultural Affairs

Multicultural Affairs is committed to fostering diversity and dialogue at Barnard. The office works closely with the President, trustees, faculty, administrators, and students to cultivate an inclusive and representative campus community. Click here for more information on the Office of Multicultural Affairs.

Commuter Services

The College Activities Office supports the cultural, educational, and social programs designed to enrich commuter life. The Skip Stop Commuter Student Organization sponsors events and services for all commuter students. Brooks 102 is home to the Commuter Lounge and the office for Skip Stop. Additionally, the Office of Residential Life provides information on off-campus living.

Student Records and Information

The Family Educational Rights and Privacy Act of 1974 (the Buckley Amendment/FERPA) stipulates that students may have access to their official files and that no transcripts may be issued without their written request. A further explanation may be found in the College Calendar and Student Handbook.
Also in accordance with the Buckley Amendment, Barnard has the right to make public, at its discretion and without prior authorization from the student, the following information: name, class; home or college address and telephone number; e-mail address; major field; date and place of birth; dates of attendance at Barnard; participation in officially recognized activities and sports; weight and height of members of athletic teams; degrees; honors and awards received; and previous school most recently attended. The law also gives students the right to place limitations on the release of this information. A student who wishes to do so must file a special form with the Registrar, 107 Milbank, each year by September 15. In practice, the College does not indiscriminately release information about individual students.

Security

The Barnard Public Safety Department is located just opposite the Main Gate at 117th Street and Broadway, in Barnard Hall, Room 104. It is open 24 hours a day, seven days a week, including holidays. Security guards are College employees who are unarmed and do not have law enforcement status. They are, however, authorized to detain and apprehend suspects and to maintain order on campus grounds.

The safety and well being of students, faculty, staff, and guests have always been of paramount importance at Barnard. Located on Morningside Heights in Manhattan, we are a community within our neighboring communities: Columbia University and New York City. Separate from them in some ways, but very much a part of them, we have many mutual interests, including that of crime prevention. For more information please visit the Barnard Public Safety website.

Crime Statistics

In compliance with New York State Education Law Article 129-A, crime statistics for the Barnard College campus for the last three calendar years are filed annually with the United States Department of Education and are available for review on their website and on the Barnard College website. In addition, the Advisory Committee on Campus Security will provide, upon request, all campus crime statistics as reported to the United States Department of Education. Requests can be made by contacting the Director of Safety and Security at 654-3362.

Faculty of Barnard College
Name and Endowed Professorships and Directorships
Faculty Emeriti

Faculty of Barnard College

Debora Spar, 2008, President of Barnard College and Dean in the University and Professor of Political Science and Economics
  B.A., Georgetown University; Ph.D., Harvard University
Elizabeth S. Boylan, 1995, Provost and Dean of the Faculty, Professor of Biological Sciences
  A.B., Wellesley College; Ph.D., Cornell University
Nadia Abu El-Haj, 2002, Associate Professor of Anthropology
  B.A., Bryn Mawr College; Ph.D., Duke University
Bashir Abu-Manneh, 2004, Assistant Professor of English
  B.A., University of Haifa, Israel; M.A., University of Warwick, U.K.; Ph.D., University of Oxford, U.K.
Wendi L. Adamek, 2000, Assistant Professor of Religion
  B.A., Ph.D., Stanford University
Jacob Alexander, 2005, Lecturer in Chemistry
  B.S., Tennessee Technological University; M.S., Ph.D., Syracuse University
Gail Archer, 1988, Senior Lecturer in Music and Director of the Barnard-Columbia Chorus
  B.A., Montclair State College; M.A., University of Hartford; M.M., Mannes College of Music; D.M.A., Manhattan School of Music
Severine Autesserre, 2007, Assistant Professor of Political Science
  B.A., Sorbonne University; M.A., Sciences-Po, France; M.A., Columbia University; Ph.D., New York University
Randall Balmer, 1991, Professor of Religion
  B.A., Trinity College; M.A., Trinity Divinity; M.A., Ph.D., Princeton University
Peter D. Balsam, 1975, Samuel R. Milbank Chair for Health and Society and Professor of Psychology
  B.A., SUNY, Stony Brook; M.A., Ph.D., North Carolina University
James G. Basker, 1987, Richard Gilder Professor of Literary History and Professor of English
  A.B., Harvard University; M.A., Cambridge University; D. Phil., Oxford University
Christopher Baswell, 2008, Ann Whitney Olin Professor in English
  B.A., Oberlin College; M.A., Ph.D., Yale University
Elizabeth P. Bauer, 2008, Assistant Professor of Biological Sciences
  A.B., Amherst College; Ph.D., New York University
Kadambari Baxi, 2005, Associate Professor of Professional Practice in Architecture
  B.A, Center of Environmental Planning and Technology; M.S., Pratt Institute; Masters of Professional Studies, Tisch
School of the Arts, New York University
David Allen Bayer, 1987–88; 1990, Professor of Mathematics
  B.A., Swarthmore College; Ph.D., Harvard University
Stephanie Beardman, Jan. 2002, Assistant Professor of Philosophy
  B.A., Vassar College, Ph.D., Rutgers University
Lee Anne Bell, 2002, The Barbara Silver Horowitz Director of Education and Adjunct Professor of Education
Orlando Bentancor, 2008, Assistant Professor of Spanish and Latin American Cultures
  B.A., Universidad de la Republica; M.A., Louisiana State University; Ph.D., University of Michigan, Ann Arbor
Sheri Berman, 2005, Associate Professor of Political Science
  B.A., Yale University; M.A., Ph.D., Harvard University
Elizabeth Bernstein, Jan. 2002, Assistant Professor of Sociology
  B.A., M.A., Ph.D., University of California, Berkeley
Matthew R. Birck, 2005, Assistant Professor of Chemistry
  B.S., Rose-Hulman Institute of Technology; Ph.D., University of Michigan
Peter M. Bower, 1986, Senior Lecturer in Environmental Science  
B.S., Yale University; M.A., Queens College; M.P.H., Ph.D., Columbia University

Anne Boyman, 1979, Senior Lecturer in French  
B.A., M.A., Ph.D., Toronto University

Ronald D. Briggs, 2008, Assistant Professor of Spanish and Latin American Cultures  
B.A., University of the South (Sewanee); M.A., Middlebury College, Ph.D. New York University

Constance Brown, 1980, Lecturer in English and Registrar  
A.B., Barnard College; M.A., Ph.D., Columbia University

André C. Burgstaller, 1977, Professor of Economics  
Licence, University of Geneva; M.A., Toronto University; Ph.D., Columbia University

Hilary S. Callahan, 1999, Associate Professor of Biological Sciences  
B.A., Yale University; Ph.D., University of Wisconsin

Taylor Carman, 1994, Professor of Philosophy  
B.A., University of Wyoming; Ph.D., Stanford University

Mark C. Carnes, 1982, Professor of History  
B.A., Harvard University; M.A., Ph.D., Columbia University

Elizabeth A. Castelli, 1995, Professor of Religion  
A.B., Brown; M.A., Ph.D., Claremont Graduate School

Collina Charles, Lecturer in Classics  
B.A., St. John's College; M.A., Ph.D., Boston University

Sally Chapman, 1975, Professor of Chemistry  
A.B., Smith College; Ph.D., Yale University

Tavieus Cheatham, 2001, Senior Associate in Physical Education and Director of the Intramural and Recreation Program  
B.A., Goucher College; M.S., Brooklyn College

Pamela Beth Cobrin, 2002, Senior Lecturer in English, Director of the Writing Program  
B.A., University Of Delaware; M.A., Brooklyn College; Ph.D., New York University

Mary Cochran, 2003, Professor of Professional Practice in Dance  
B.A., State University of New York; M.F.A., University of Wisconsin-Milwaukee

Deborah Coen, 2006, Assistant Professor of History  
A.B., Harvard University; M.Phil, Univ of Cambridge; Ph.D., Harvard University

Mariana Colacelli, 2005, Assistant Professor of Economics  
A.B., Universidad Nacional de Tucuman, Argentina; Ph.D., Harvard University

Peter Tracey Connor, 1991, Associate Professor of French  
B.A., Trinity College, University of Dublin; M.A., Ph.D., University of California, Berkeley

Alexander A. Cooley, 2001, Associate Professor of Political Science  
B.A., Swarthmore College; M.A., M.Phil., Ph.D., Columbia University

James Crapotta, 1975, Senior Lecturer in Spanish  
B.A., Queens College, CUNY; M.A., Ph.D., Harvard University

Dennis G. Dalton, 1969, Professor of Political Science  
A.B., Rutgers University; M.A., University of Chicago; Ph.D., Columbia University

Flora S. Davidson, 1973, Professor of Political Science and Urban Studies  
A.B., Barnard College; M. Phil., Ph.D., Columbia University

Webke Denecke, 2006, Assistant Professor of Asian and Middle Eastern Cultures  
B.A., M.A., George August University, Germany; Ph.D., Harvard University

Patricia D. Denison, 1990, Senior Lecturer in English  
B.A., University of Maryland; Ph.D., University of Virginia

Diane K. Dittrick, 1993, Senior Associate in Environmental Science  
B.A., Georgian Court College; M.A., Teachers College, Columbia University

Celina Deutsch, 1985, Associate Professor of Religion  
B.A., Trinity College (Washington D.C.); M.A., Ph.D., St. Michael's College, University of Toronto

Alan D. Dye, 1995, Associate Professor of Economics  
B.A., Texas Tech; M.A., University of Cincinnati; Ph.D., University of Illinois

Margaret R. Elberg, 1988, Senior Lecturer in English  
B.A., Radcliffe College; M.A., Ph.D., Harvard University

Elizabeth Esch, 2007, Assistant Professor of History and American Studies  
B.A., University of Michigan; M.A., Ph.D., New York University

Sharon Everson, 1981, Senior Associate in Physical Education
B.S., Brooklyn College; M.Ed., Temple University

Karen Fairbanks, 1996, Ann Whitney Olin Professor of Professional Practice in Architecture and Chair of Architecture

Program

B.S., University of Michigan, Ann Arbor; M. Arch., Columbia University

Helene Peet Foley, 1979, Professor of Classics

B.A., Swarthmore College; M.A.T., M.A., Yale University; Ph.D., Harvard University

Donlin Foreman, 1996, Associate Professor of Professional Practice in Dance

Bugisi/Foreman Dance Company

Severin Fowles, 2006, Assistant Professor of Anthropology

B.A., Dartmouth College; Ph.D., University of Michigan

William Alan Gabbay, 1992, Ann Whitney Olin Professor of Philosophy

B.S., Ph.D., Queen's University of Belfast

Lynn Garafola, 2003, Professor of Dance

A.B., Barnard College; M.Phil, Ph. D., City Univ. of New York

Shawn-Marie Garrett, 1999, Assistant Professor of Theatre

B.A., Duke University; M.F.A., Yale School of Drama

Serge Gavronsky, 1960, Professor of French

A.B., M.A., Ph.D., Columbia University

Abosede George, 2007, Assistant Professor of History and Africana Studies

B.A., Rutgers College, M.A., Ph.D., Stanford University

Katie Giasner, 1998, Senior Associate in Dance

B.A., Columbia University

John I. Glendinning, 1996, Associate Professor of Biological Sciences

B.A., Hampshire College; Ph.D., University of Florida

Kalama Glover, 2001, Assistant Professor of French

B.A., Harvard University; D.E.A., Université de Paris IV, la Sorbonne; M.A., M.Phil., Ph.D., Columbia

Sandra Goldmark, Lecturer in Theatre

B.A., Harvard University; M.F.A., Yale School of Drama

Jessica Goldstein, 2004, Lecturer in Biological Sciences

B.A., Macalester College; Ph.D., Washington Univ.

Lisa Gordis, 1993, Professor of English

B.A., Harvard University; M.A., Ph.D., UCLA

Mary Gordon, 1988, Millicent C. McIntosh Professor in English and Writing

B.A., Barnard College; M.A., Syracuse University

Erk Grimm, 1994, Associate Professor of German

M.A., University of Waterloo; Ph.D., Queen's University

Achsa Guibbory, 2004, Professor of English

B.A., Indiana University; M.A., Ph.D., UCLA

Ayten Gündoğdu, 2008, Assistant Professor of Political Science

B.A., M.A., Bogazici University; Ph.D., University of Minnesota, Twin Cities

Owen D. Gutfriend, 2000, Associate Professor of History and Urban Studies

B.A., Vassar College; M.A., Ph.D., Columbia University

Kim Hall, 2006, Lucyle Hock Chair and Professor of English, Director of Africana Studies

B.A., Hood College; Ph.D., University of Pennsylvania

Timothy Halpin-Healy, 1989, Ann Whitney Olin Professor of Physics

A.B., Princeton University; Ph.D., Harvard University

Ross Hamilton, 1996, Associate Professor of English

B.A., Queen's University; M.A., M.Phil., Ph.D., Yale University

Saskia Hamilton, 2003, Associate Professor of English

B.A., Kenyon College; M.A., New York University

Sharon Harrison, 1997, Associate Professor of Economics

B.S., Tufts University; Ph.D., Northwestern University

John Stratton Hawley, 1988, Ann Whitney Olin Professor of Religion

A.B., Amherst College; M.Div., Union Theological Seminary; Ph.D., Harvard University

Paul Hertz, 1979, Professor of Biological Sciences

B.S., Stanford University; Ph.D., Harvard University

Larry Heuer, 1990, Ann Whitney Olin Professor of Psychology
B.A., University of Minnesota; M.S., Ph.D., University of Wisconsin, Madison
Anne Higonnet, Jan. 2003, Professor of Art History
B.A., Harvard College; Ph. D., Yale Univ.
Toby B. Holtz, 1970, Senior Lecturer in Chemistry
A.B., Barnard College; MAT, Harvard University; Ed.D., Teachers College, Columbia University
Elizabeth W. Hutchinson, Jan., 2001, Assistant Professor of Art History
B.A., Yale University; Ph.D., Stanford University
Maire Janus, 1968, Professor of English
A.B., Vassar College; Ph.D., Harvard University
Olympia T. Jeebjean, 1969, Senior Associate in Chemistry
B.A., M.S., American University of Beirut
Kimberley S. Johnson, Jan., 2000, Assistant Professor of Political Science
B.A., M.A., M.Phil., Ph.D., Columbia University
Isabelle Jouanneau-Fertig, 1987, Senior Associate in French
B.A., M.A., Université de Paris
Natalie B. Kampen, 1988, Barbara Novak '50 Professor of Art History and Professor of Women's Studies
B.A., M.A., Pennsylvania; Ph.D., Brown University
Mara Kashper, 1989, Senior Associate in Russian
M.A., Leningrad State
Jennie A. Kassanoff, 1994, Associate Professor of English
A.B., Harvard University; M.Litt., Jesus College, Oxford University; Ph.D., Princeton University
Laura E. Kay, 1991, Professor of Physics
B.A., Stanford University; M.S., Ph.D., University of California
Joel B. Kaye, 1992, Professor of History
B.A., University of Wisconsin; M.A., University of Massachusetts; Ph.D., University of Pennsylvania
Tatiana Keis, 1967, Reserve Librarian
A.B., M.L.S., Columbia University
Tovah P. Klein, 1995, Adjunct Associate Professor of Psychology and Director of the Toddler Center
B.A., University of Michigan; M.A., Ph.D., Duke University
Dorothy Y. Ko, 2001, Professor of History
B.A., M.A., Ph.D., Stanford University
Paul Kockelman, 2003, Assistant Professor of Anthropology
B.A., Univ. of California, Santa Cruz; Univ. of Chicago; Ph.D., University of Michigan
Brian Larkin, 1998, Associate Professor of Anthropology
B.A., Birmingham University; M.A., M.Phil., Ph.D., New York University
Janna Levin, January 2004, Associate Professor of Physics and Astronomy
B.A., Barnard College; Ph.D., Massachusetts Institute of Technology
Peter Levin, January 2004, Assistant Professor of Sociology
B.A., Wesleyan University; M.A., University of Southern California; Ph.D., Northwestern University
Xiaobo Lu, 1994, Professor of Political Science
B.A., Sichuan Institute of Foreign Languages, China; M.A., Institute of Foreign Affair Beijing; Ph.D., University of California, Berkeley
Alfred Mac Adam, 1983, Professor of Spanish
B.A., Rutgers College; M.A., Ph.D., Princeton University
John Stedman Magyar, 2007, Assistant Professor of Chemistry
A.B., Dartmouth College; M.S., Ph.D., Northwestern University
Brian J. Mailloux, Jan., 2006, Assistant Professor of Environmental Science
B.A., Johns Hopkins University; M.S., Univ of Minnesota; Ph.D., Princeton University
Katrin Makkai, 2001, Assistant Professor of Philosophy
B.A., McGill U; Ph.D., Harvard University
Kristin Mammen, 2003, Assistant Professor of Economics
B.A., Columbia University; M.A., Ph.D., Princeton University
Kimberly J. Marten, 1997, Professor of Political Science
A.B., Radcliffe College; Ph.D., Stanford University
Laura Mascou, 1992, Senior Associate in Physical Education
B.A., Brandeis University; M.A., Teachers College, Columbia University; MBA, Simmons School of Management
Maria S. Rivera Maulucci, 2004, Assistant Professor of Education
B.S., Barnard College; M.S., Yale University
Robert A. McCaughey, 1969, Professor of History and the Janet H. Robb Chair in the Social Sciences
A.B., University of Rochester; M.A., University of North Carolina; Ph.D., Harvard University
Rachel McDermott, 1984, Associate Professor of Asian and Middle Eastern Cultures
A.B., University of Pennsylvania; M.Div., Harvard Divinity School; A.M., Ph.D., Harvard
Dusa McDuff, Helen Lyttle Kimmel '42 Chair and Professor of Mathematics
B.S., University of Edinburgh; Ph.D., University of Cambridge
Wendy McKenna, 1980, Adjunct Associate Professor of Psychology
B.A., Antioch; Ph.D., CUNY
Perry G. Mehring, 1987, Professor of Economics
B.A., Harvard University; M.Sc., London School of Economics; Ph.D., Harvard University
Dina C. Merrer, 2001, Assistant Professor of Chemistry
B.A., Smith College; Ph.D., Rutgers University
Nara Milanich, 2004, Assistant Professor of History
B.A., Brown University; M.A., Ph.D., Yale University
John Miller, 2003, Associate Professor of Professional Practice in Art History
BFA, Rhode Island School of Design; MFA, California Institute of the Arts
Monica L. Miller, 2001, Assistant Professor of English
B.A., Dartmouth College; Ph.D., Harvard University
Kristina Milnor, 1998, Associate Professor of Classics
B.A., Wesleyan University; Ph.D., University of Michigan
Debra C. Minkoff, 2005, Professor of Sociology
B.A., Brandeis University; M.A., Ph.D., Harvard University
Lorraine C. Minnite, Jan. 2000, Assistant Professor of Political Science
B.A., Boston; M.A., M.Phil., Ph.D., CUNY
Nelson J. Moe, 2000, Associate Professor of Italian
B.A., Wesleyan; Ph.D., Johns Hopkins
David Moerman, 1998, Associate Professor of Asian and Middle Eastern Cultures
A.B., Columbia University; Ph.D., Stanford University
Brian R. Morton, 1995, Professor of Biological Sciences
B.S., University of Toronto; Ph.D., University of California, Riverside
Irene Motyl-Mudrzyczk, 1998, Senior Associate in German
B.A., M.A., University of California, Santa Barbara
Patricio Keith Moxey, 1988, Professor of Art History
B.A., University of Edinburgh; M.A., Ph.D., University of Chicago
Jose C. Moya, 2005, Professor of History
B.A. Kean University; M.A., Ph.D., Rutgers University
Rashmi Mukherjee, 1997, Professor of Physics
B.S., Presidency College, University of Calcutta; M.A., M.Phil., Ph.D., Columbia
Laith Munasinghe, 1997, Associate Professor of Economics
B.A., Princeton University, B.A., Cambridge University; M.A., M. Phil., Ph.D., Columbia University
Catharine T. Nepomnyashchy, 1987, Ann Whitney Olin Professor of Slavic
B.A., M.A., Brown University; M.Phil., Ph.D., Columbia University
Frederick Neuhouser, 2003, Viola Manderfeld Professorship of German Language and Literature and Professor of Philosophy
B.A., Wabash College, M.A., Ph.D., Columbia University
Walter D. Neumann, Jan. 2000, Professor of Mathematics
B.S., M.A., University of Adelaide; Ph.D., University of Bonn, Germany
Daniela Noé, 1989, Senior Associate in Italian
A.B., M.A., NYU; Ph.D., University of Bologna, Italy
Lisa Northrop, 2004, Associate in Physical Education
B.A, Barnard College; M.A., Teacher's College, Columbia University
Brian O'Keefe, 2005, Lecturer in French
B.A., Cambridge University; M.A., Ph.D., Columbia University
George G. Padilla, 2000, Senior Associate in Physical Education
B.S., Pennsylvania State University, M.S., West Chester University of Pennsylvania
Stephanie L. Pfirman, 1993, Professor of Environmental Science and the Alena Wels Hirschorn '58 and Martin Hirschorn
Professor of Environmental and Applied Sciences  
B.A., Colgate; Ph.D., Massachusetts Institute of Technology  
Richard M. Pious, 1973, Adolph S. and Effie Ochs Chair in History and American Studies and Professor of Political Science  
B.A., Colby College; Ph.D., Columbia University  
Peter G. Platt, 1994, Professor of English  
B.A., Yale University; M.A., Middlebury College; D.Phil., Oxford  
Cary H. Plotkin, Senior Lecturer in English  
B.A., Yale University; M.A., Ph.D., Columbia University  
Laurie J. Postlewaite, 1997, Senior Lecturer in French  
B.A., Southern Methodist, M.A., Ph.D., NYU  
Anne Lake Prescott, 1959–62; 1963, Helen Goodhart Altschul Professor of English  
A.B., Barnard College; M.A., Ph.D., Columbia University  
Eshkol Rafaeli, 2003, Assistant Professor of Psychology  
B.A. Hebrew University, Israel; M.S., Ph.D., Northwestern University  
Anupama Rao, 2001, Assistant Professor of History  
B.A., University of Chicago; Ph.D., University of Michigan  
Meenakshi S. Rao, 1991, Senior Lecturer in Chemistry  
B.S., M.S., Bangalore University, India; M.Phil., Ph.D., CUNY  
Agueda Pizarro Rayo, 1981, Senior Lecturer in Spanish  
A.B., Barnard College; M.A., Ph.D., Columbia University  
Randall Reback, 2003, Assistant Professor of Economics  
B.A., M.A., Stanford University  
Sanjay Reddy, 2000, Assistant Professor of Economics  
B.A., M.A., Ph.D., Harvard University; M.Phil., University of Cambridge  
Robert Remez, 1989, Professor of Psychology  
B.A., Brandeis University; Ph.D., University of Connecticut  
Jonathan M. Reynolds, 2007, Associate Professor of Art History  
A.B., Harvard College; A.M., Ph.D., Stanford University  
Jonathan Rieder, 1990, Professor of Sociology  
B.A., Harvard University; Ph.D., Yale University  
Wadda C. Ríos-Font, 2005, Professor of Spanish and Latin American Cultures  
B.A., The Johns Hopkins University; M.A., Ph.D., Harvard University  
Christian M. Rojas, 1997, Associate Professor of Chemistry  
B.A., University of Virginia; Ph.D., Indiana University  
Russell D. Romeo, 2007, Assistant Professor of Psychology and Neuroscience and Behavior  
B.A., Edinboro University; M.S. Villanova University; Ph.D., Michigan State University  
Luci Rosalia, 2000, Senior Associate in Physical Education  
B.A., SUNY, Stony Brook, M.S., Smith College  
Rosalind Rosenberg, 1984, Professor of History  
B.A., Ph.D., Stanford University  
Stiliana N. Savin, 2004, Lecturer in Physics and Astronomy  
B.S., Sofia State University, Bulgaria; M.A., Ph.D., Temple University  
Elizabeth H. Schmidt, 2005, Lecturer in English  
B.A., Wesleyan University; M.Phil., Ph.D., New York University  
Aaron Schneider, 1985, Lecturer in English and Associate Dean of Studies  
B.A., Brandeis University; M.A., M. Phil., Ph.D., Columbia University  
Paul Scoleri, 2003, Assistant Professor of Dance  
A.B., Columbia University; M.A., Ph.D., New York University  
Alan F. Segal, 1980, Professor of Religion and Ingeborg Rennert Professor in Judaic Studies  
B.A., Amherst College; M.A., Brandeis University; B.A.H.L., HUC-JIR; M.A., M.Phil., Ph.D., Yale University  
Ann Senghas, 1999, Associate Professor of Psychology  
B.A., Smith College; Ph.D., Massachusetts Institute of Technology  
Rajiv Sethi, 1995, Ann Whitney Olin Professor of Economics  
B.S., University of Southampton; Ph.D., New School for Social Research  
Lesley A. Sharp, 1994, Professor of Anthropology  
B.A., Brandeis University; M.A., Ph.D., University of California, Berkeley
William Sharpe, 1984, Professor of English
  B.A., Columbia University; M.A., Oxford University; Ph.D., Columbia University
Kristen A. Shepard, Jan. 2003, Assistant Professor of Biological Sciences
  B.A., University of Pennsylvania; Ph.D., University of California, Berkeley
Rae Silver, 1976, Helene L. and Mark N. Kaplan Professor of the Natural and Physical Sciences and
  Professor of Psychology
  B.A., McGill University; M.A., CUNY; Ph.D., Rutgers University
Herbert Sloan, 1986, Ann Whitney Olin Professor of History
  B.A., Stanford University; J.D., University of Michigan; M.Phil., Ph.D., Columbia University
David Smiley, 2004, Assistant Professor of Architecture and Urban Studies
  B.A., Vassar College; M.A., M.S., Columbia University; Ph.D., Princeton University
Joan Snitzer, 1986, Senior Lecturer in Art History
  B.A., Pratt Institute; M.F.A., Hunter College
Lisa K. Son, 2002, Assistant Professor of Psychology
  B.A., University of Pennsylvania; M.A., Ph.D., Columbia University
Rebecca J. Stanton, 2003, Assistant Professor of Russian
  B.A., M.A., M.Phil., Ph.D., Columbia University
Sandra Stingle, 1967, Adjunct Assistant Professor of Psychology
  A.B., Barnard College; Ph.D., Columbia University
Steven John Strossner, 1992, Professor of Psychology
  B.A., Hope College; Ph.D., University of California, Santa Barbara
  B.S., M.A., Ph.D., University of Heidelberg
Jesus Suarez-Garcia, 2002, Associate in Spanish and Latin American Cultures
  B.A., University of Leon, Spain
Timea Szell, 1979, Senior Lecturer in English
  A.B., Barnard College; M.A., Columbia University; Ph.D., SUNY, Stony Brook
Neferti Xina M. Tadiar, 2006, Professor of Women's Studies
  B.A., University of Philippines; M.A., University of Minnesota; Ph.D., Duke University
Colleen Thomas, 2007, Assistant Professor of Professional Practice in Dance
  B.A., SUNY Empire State College & SUNY Purchase; M.F.A., University of Wisconsin, Milwaukee
Dylan P. Thurston, 2005, Assistant Professor of Mathematics
  A.B., Harvard University; Ph.D., University of California, Berkeley
Lisa S. Tiersten, 1993, Associate Professor of History
  B.A., University of Massachusetts; M.A., M.Phil., Ph.D., Yale University
Amy Trompeter, 1996, Senior Lecturer in Theatre
  B.A., University of California, Berkeley; M.S., Bank Street College
Mary Ellen Tucker, 1970, Director of Academic Technologies
  A.B., Barnard College; M.L.S., Columbia University
Deborah Valenze, 1989, Professor of History
  B.A., Harvard College; Ph.D., Brandeis University
Margaret Vandenburg, 1998, Senior Lecturer in English
  B.A., University of Idaho; M.A., M.Phil., Ph.D., Columbia University
Matthew R. Wallenfang, 2005, Assistant Professor of Biological Sciences
  B.S., University of Dayton; Ph.D., Johns Hopkins University
Caroline Weber, 2005, Associate Professor of French
  A.B., Harvard University; M.A., M.Phil., Ph.D., Yale University
David F. Weiman, 2001, Alena Wels Hirschorn '58 Chair and Professor of Economics
  B.A., Brown University; M.A., Yale; Ph.D., Stanford University
Carl Wennerlind, 2001, Assistant Professor of History
  B.A., University of South Florida; Ph.D., University of Texas at Austin
Paige West, 2001, Associate Professor of Anthropology
  B.A., Wofford College; M.A., The University of Georgia; M.Phil., Ph.D., Rutgers University
Barbara A. Woike, 1995, Associate Professor of Psychology
  B.A., Cleveland State University; M.A., Ph.D., Michigan State University
Nancy Worman, 1996, Associate Professor of Classics
  A.B., Barnard College; M.A., Ph.D., Princeton University
Guobin Yang, 2005, Associate Professor of Asian and Middle Eastern Cultures
B.A., Louyang Foreign Languages Institute; M.A., University of North Carolina; M.A., Ph.D., Beijing Foreign Studies University; Ph.D., New York University
Rebecca Young, 2004, Assistant Professor of Women's Studies
B.A., Bryn Mawr College; M.A., Ph.D., Columbia University
Javier Perez Zapatero, 2007, Associate in the Department of Spanish and Latin American Cultures
B.A., M.A., University of Granada, Spain

Named and Endowed Professorships and Directorships

Richard Gilder Professor of Literary History
James G. Basker, Professor of English
Helen Goodhart Altschul Professor
Anne Lake Prescott, Professor of English
Alena Wels Hirschorn '58 Chair in Economics
David F. Weiman, Professor of Economics
Alena Wels Hirschorn '58 and Martin Hirschorn Professor of Environmental and Applied Sciences
Stephanie Pfriman, Professor of Environmental Science
Lucyle Hook Chair in English
Kim Hall, Professor of English
Barbara Silver Horowitz Director of Education
Lee Ann Bell, Director of Education
Helen Lytle Kimmel '42 Chair in Mathematics
Dusa McDuff, Professor of Mathematics
Helene L. and Mark N. Kaplan Professor of the Natural and Physical Sciences
Rae Silver, Professor of Psychology
Viola Manderfeld Professorship of German Language and Literature
Frederick Neuhauser, Professor of Philosophy
Millicent C. McIntosh Professor of English and Writing
Mary Gordon, Professor of English
Samuel R. Milbank Chair for Health and Society
Peter Balsam, Professor of Psychology
Barbara Novak '50 Professor of Art History
Natalie B. Kampen, Professor of Art History and Women's Studies
Adolph S. and Effie Ochs Chair in History and American Studies
