Hello, faculty,

This month the Grant Opportunities Newsletter features the American Association for the Advancement of Science, especially the IF/THEN Ambassadors program. We dip into Columbia’s New Faculty Guide to Competing for Research Funding for the Sage Advice column. It’s a 157 page tome, so “dip” is an overstatement.

As usual, we include recent News, followed by profiles of opportunities coming up in the month of July. Reminders for deadlines over the next six months can be found beginning on page eleven, grouped by discipline.

For deadlines throughout the year, see the Grants Calendar and Fellowships Calendar, perpetually in progress, on the Barnard website at External Grant Opportunities. You can download it as an excel document and sort, search, and filter to your heart’s content.

Be on the lookout for next year’s internal grants deadlines on the Internal Grants page of the Barnard website. If you have colleagues abroad whom you would like to bring to Barnard under the Weiss Fellowships for Visiting International Scholars Program, please see information here.

For assistance in finding grants for an upcoming project or to begin an application process, please contact Kari Steeves or any one of us in Institutional Funding and Sponsored Research. As always, feel free to send us comments, requests, or suggestions here.

The AAAS seeks to "advance science, engineering, and innovation throughout the world for the benefit of all people." Their goals, as stated by the AAAS board, are to

- Enhance communication among scientists, engineers, and the public;
- Promote and defend the integrity of science and its use;
- Strengthen support for the science and technology enterprise;
- Provide a voice for science on societal issues;
- Promote the responsible use of science in public policy;
- Strengthen and diversify the science and technology workforce;
- Foster education in science and technology for everyone;
- Increase public engagement with science and technology; and
- Advance international cooperation in science.

Think “science for public consumption,” which, when you’re at the lab bench or seeking research funding, may seem basic, distant, or even extraneous. To bring it into sharper focus, the Association has established a number of educational centers and programs, including the Center of Science, Policy, and Society; the Center for Scientific Collaboration and Community Engagements; the Center for Science Diplomacy the Science and Human Rights Coalition; and the Scientific Responsibility, Human Rights, and Law Program.

The AAAS sponsors a number of awards, among them AAAS Mentor Awards, the AAAS Award for Science Diplomacy, and the AAAS Kavli Science Journalism Awards. The Early Career Award for Public Engagement with Science was established in 2010 and “recognizes early-career scientists and engineers who demonstrate excellence in their contribution to public engagement with science activities.”

Among their fellowships are the Science and Technology Policy Fellowships, which “provide opportunities to outstanding scientists and engineers to learn first-hand about policymaking while contributing their knowledge and analytical skills to the federal policymaking process. Fellows serve yearlong assignments in the executive, legislative and judicial branches of the federal government in Washington. Each year, the program adds to a growing corps over 3,000 strong of policy-savvy leaders working across academia, government, nonprofits, and industry to serve the nation and the world.”

Applications for both of these opportunities are due in late summer and early fall.

This year, the AAAS teamed up with IF/THEN to create the AAAS IF/THEN Ambassadors program to support “women in science, technology, engineering and mathematics by empowering current innovators and inspiring the next generation of pioneers.” The program “brings together 100 women from a variety of science, technology, engineering, and mathematics careers to serve as high-profile role models for middle school girls. STEM professionals use their skills in many fields – including sports, fashion, gaming, manufacturing, entertainment, and music. The AAAS IF/THEN Ambassadors program highlights women in STEM who are contributing in all these fields and more, showing girls the different career pathways they can pursue and how STEM impacts their lives every day.” Applications are open online.
Sage Advice for Competitive Proposals

Columbia’s New Faculty Guide—an Overview

Given Barnard’s partnership with Columbia and that faculty are jointly tenured, some of you might find it useful to peruse the Columbia University New Faculty Guide to Competing for Research Funding, written and licensed by Mike Cronan and Lucy Deckard. At 157 pages, that is no small feat. Nevertheless, it offers some good advice and explanations about grant seeking for both new and established faculty. Here’s a drastically abridged overview of what you can find in the Guide:

The first section deals with The Big Picture—developing an overarching plan for funding your research. That can range from determining what topics you want to explore over the next five years; understanding what part research plays in tenure; finding mentors and collaborators; identifying likely funders, and more. Barnard’s Sponsored Research Office can help get you started on the latter. You should also know that you can cull potential funding opportunities from website and databases such as grants.gov and subscription services like PIVOT (Columbia has an institutional account—instructions are here). One piece of advice Cronan and Deckard give in The Big Picture I want to repeat: “Plan to be declined (more often than you’ll be funded), and learn from your reviews.” Since every proposal takes time, whether or not it’s funded in the end, be sure to build multiple attempts into your plans.

Cronan and Deckard drill down into logistics for nearly 85 pages in Finding Funding, Planning & Developing Your Proposal, and Writing the Proposal. This treasure trove of detail covers, among other things:

- Federal funding agencies
- Differences in funder types for “scholarly research” versus for the “technical disciplines”
- A table of the big-name foundations that fund academic research and in what area (they list 18.)
- Creative approaches to finding support, such as seeking out community partnerships, reviewing funder lists from institutes or affinity groups in your field (or even PBS), and remaining alert to funder credits in journal articles
- The difference between unsolicited proposals and investigator initiated ones
- When to contact Program Officers (Keep in touch! says the NSF)
- “Scheduling Proposal Production”—actual dates not included, sadly, but pages 90-94 offer several ways to graph out your timeline
- The basic components of a proposal, so that even if the Request for Proposal (rfp) doesn’t outline them, you cover what reviewers expect
- How to avoid generic language to write a compelling introduction or abstract
- “Vision, Goals, Objectives, Rationale, and Outcomes”—what these terms or their alternatives mean, how to organize them, and how they support one another
- The potential pitfalls of “Spare Parts” or repurposing other writing in ways that produce a disjointed, poorly organized, and even irrelevant proposal
- How to write by committee on collaborative grants
- Graphics
- Avoiding plagiarism!
- How to interpret reviews when your proposal is not funded.

The last 50 pages are all Appendix, including “Confessions of a Grumpy Reviewer.” Now, that’s got to pique your curiosity, no? To read said confessions and much more, check out the guide here. You will have to log on with your Columbia password to view it.
Dear Colleague Letter: Research Opportunities in Europe for NSF CAREER Awardees
April 29, 2019
BACKGROUND
To further scientific and technological cooperation between the United States and the European Community, the National Science Foundation and the European Research Council signed an Implementing Arrangement on July 13, 2012 to enable U.S.-based scientists and engineers with NSF-funded CAREER awards and Postdoctoral Research Fellowships to pursue research collaboration with European colleagues supported through EU-funded European Research Council (ERC) grants. Connecting researchers with complementary strengths and shared interests promotes scientific progress in solving some of the world's most vexing problems. This international research opportunity is mutually beneficial to the U.S. participants and their hosts through cooperative activities during research visits and establishing international research partnerships to enrich future research activities in the U.S. and Europe. Under the Arrangement, the ERC Executive Agency (ERCEA) identifies ERC-funded research groups who wish to host CAREER awardees for research visits of up to one year within their ERC funding. The 2018 Dear Colleague Letter for this opportunity noted that 2018 would be the final year in its current form. NSF is extending the current opportunity for one additional year. NSF intends to announce a new, related opportunity in FY 2020.

OPPORTUNITY
This letter invites current CAREER awardees to apply for research visits to any identified, appropriate European research group. Further, the letter gives instructions on how to apply and other relevant policies and requirements.

prevention research at CDC for first time in more than 20 years.”
Also from the press release:
“Department of Health and Human Services (HHS) – The bill includes a total of $99.0 billion for HHS, an increase of $8.5 billion above the 2019 enacted level and $20.9 billion above the President’s budget request.
National Institutes of Health (NIH) – The bill provides a total of $41.1 billion for NIH, an increase of $2 billion above the 2019 enacted level and $6.9 billion above the President’s budget request.”  

“Shake up at NIH” from Science Magazine, May 2, 2019

“Able to pursue open-ended research without relentless grant deadlines, some scientists who work directly for the National Institutes of Health joke that NIH stands for "nerds in heaven." But the main NIH campus in Bethesda, Maryland, and its other intramural research sites are also known as stodgy places where the scientific management, mostly white men, tends to stay in place for decades. Now, NIH is aiming to shake up its intramural program, the largest collection of biomedical researchers in the world, by imposing term limits on midlevel leadership positions. Starting next year, the 272 lab and branch chiefs who oversee NIH's intramural research will be limited to 12-year terms. The policy, now being refined by the directors of NIH's 23 institutes with in-house science programs, means up to half of the chiefs will turn over in the next 5 years, says Michael Gottesman, NIH's deputy director for intramural research. "We see this as an opportunity for diversity in the leadership at NIH, especially gender and ethnic diversity," says Hannah Valantine, NIH's chief officer for scientific workforce diversity.” See here for the full article.

Grant Opportunities

GENERAL

New York Public Library
Martin Duberman Visiting Fellowship
Deadline: June 30, 2019
"The Martin Duberman Visiting Scholar program at The New York Public Library fosters excellence in LGBT studies by providing funds for scholars to do research in the Library’s preeminent LGBT historical collections. The fellowship is open to both academic faculty and independent scholars who have made a significant contribution to the field. The awardee will be expected to spend a minimum of three months researching at the Library and at other archives relevant to their topic in the New York City area, to give a public talk on their work, and to write a short piece about their project for the Library’s website."

CLAGS: Center for LGBTQ Studies
Scholar in Residence Fellowship
Deadline: July 1, 2019
"The Scholars-in-Residence Program is designed to (1) encourage research and writing on the history, literature and culture of the of the LGBTQ community or other projects relating to the LGBTQ experience, broadly conceived; (2) to promote and facilitate interaction among the participants including fellows funded by other sources; (3) to facilitate the dissemination of the researcher’s findings through lectures via CLAGS’s ongoing Events Series. Applicants must indicate in their proposal how these resources will specifically benefit their project." "The CLAGS Scholar-in-Residence will be allowed to spend up to six months in residence. Beyond a CLAGS affiliation, Fellows will receive office space, access to libraries and electronic databases, as well as opportunities to meet and work with leading LGBTQ scholars in New York City."

National Science Foundation
Science of Learning
Deadline: July 10, 2019
"The Science of Learning program supports potentially transformative basic research to advance the science of learning. The goals of the SL Program are to develop basic theoretical insights and fundamental knowledge about learning principles, processes and constraints. Projects that are integrative and/or interdisciplinary may be especially valuable in moving basic understanding of learning forward but research with a single discipline or methodology is also appropriate if it addresses basic scientific questions in learning. The possibility of developing connections between proposed research and specific scientific, technological, educational, and workforce challenges will be considered as valuable broader impacts, but are not necessarily central to the intellectual merit of proposed research. The program will support research addressing learning in a wide range of domains at one or more levels of analysis including: molecular/cellular mechanisms; brain systems; cognitive affective, and behavioral processes; and social/cultural influences. The program supports a variety of methods including: experiments, field studies, surveys, secondary-data analyses, and modeling." <<more>>

Library of Congress
Kluge Center Fellowship
Deadline: July 15, 2019
"The John W. Kluge Center at the Library of Congress invites qualified scholars to conduct research at the Kluge Center using the Library of Congress collections and resources for a period of four to eleven months.... The Kluge Center especially encourages humanistic and social science research that makes use of the Library's large and varied collections. Interdisciplinary, cross-cultural, or multi-lingual research is particularly welcome. Among the collections available to researchers are the world's largest law library and outstanding multi-lingual collections of books and periodicals. Deep special collections of manuscripts, maps, music, films, recorded sound, prints and photographs are also available."

Leakey Foundation
Research Grants
Deadline: July 15, 2019
"The Leakey Foundation exclusively funds research related specifically to human origins. Priority of funding is commonly given to exploratory phases of promising new research projects that meet the stated purpose of the Foundation. Eligibility: Advanced doctoral students (advanced to candidacy – all but dissertation) and established scientists are eligible for Leakey Foundation Research Grants. There are no citizenship restrictions; however, all applications must be in English." <<more>>

Arts and Humanities
Pare Lorentz Documentary Fund
Deadline: July 1, 2019
"The Pare Lorentz Documentary Fund supports full-length documentary films that reflect the spirit
and nature of Pare Lorentz's work, exhibiting objective research, artful storytelling, strong visual style, high production values, artistic writing, and outstanding music composition, as well as skillful direction, camerawork and editing."

**National Endowment of the Arts**

**Grants for Organizations: Art Works**

**Deadline:** July 11, 2019

*Note: Institutions may submit only one application to the Art Works program, except in the Media Arts category, which allows for a second application.*

"We fund projects only. Projects may consist of one or more specific events or activities. Projects do not have to be new. Excellent existing projects can be just as competitive as new activities. Projects do not need to be big either; we welcome small projects that can make a difference in their community or field.... These grants support artistically excellent projects that celebrate our creativity and cultural heritage, invite mutual respect for differing beliefs and values, and enrich humanity. Matching grants generally range from $10,000 to $100,000. A minimum cost share/match equal to the grant amount is required."

"Applicants may apply in this Art Works category for media arts projects that support creation, exhibition, education, and distribution of historic and contemporary artworks in all genres and forms that use electronic media, film and technology (analog & digital; old and new) as an artistic medium or a medium to broaden arts appreciation and awareness (of any discipline). All genres are welcome to apply; all phases of project support are eligible." Projects eligible for July deadline include creation, education, and resources for artistic and professional development."

**Art Omi**

**Translation Lab**

**Deadline:** July 15, 2019

"Art Omi has five distinct residency programs. Through a competitive jury process, residents are chosen.... Abundant, catered meals and comfortable, beautiful lodgings are provided in a scenic location in Columbia County, New York. Art Omi is two hours north of New York City by train."

"In early November, Art Omi: Writers hosts an annual Translation Lab, in which four English language translators are invited to work alongside the writers whose work they translate. The focused residency provides an integral stage of refinement, allowing translators to dialogue with the writers about text-specific questions. The Translation Lab emphasizes translation as a means towards cultural exchange. The residency is a rare and unique opportunity for writers and their translators to work together, considering that most writers never meet their translators in person. All text-based projects -- fiction, nonfiction, theater, film, poetry, etc. -- are eligible." Travel, room and board are fully funded.

**Social Sciences**

**The Society for Ethnomusicology**

**Judith McCulloh Public Sector Award**

**Deadline:** July 1, 2019

“Purpose: To recognize the valuable impact of many types of ethnomusicalogical work that benefits the broader public and typically engages organizations outside academic institutions. The award is given biennially to one of the following: 1) an individual or organization carrying out a major public-sector project that has attained significant recognition; or 2) an individual or organization whose ongoing work contributes significantly to public understandings of ethnomusicology. Candidates may apply on their own or be nominated by a member of SEM. Applicants/nominees may or may not be members of SEM.”

**EDUCATION**

Spencer Foundation
Small Research Grant
Deadline: July 1, 2019
"The Foundation is intended, by Spencer’s direction, to investigate ways in which education, broadly conceived, can be improved around the world. From the first, the Foundation has been dedicated to the belief that research is necessary to the improvement in education. The Foundation is thus committed to supporting high-quality investigation of education through its research programs and to strengthening and renewing the educational research community through its fellowship and training programs and related activities" Small Research Grants "support smaller scale or pilot research projects that have budgets of $50,000 or less. Proposals are encouraged from scholars across a variety of disciplines in an effort to fund field-initiated education research."

William T. Grant Foundation
Scholars Program
Deadline: July 2, 2019
"The William T. Grant Scholars Program supports career development for promising early-career researchers. The program funds five-year research and mentoring plans that significantly expand junior researchers’ expertise in new disciplines, methods, and content areas. We recognize that early-career researchers are rarely given incentives or support to take such risks, so this award includes a mentoring component, as well as an emphasis on community and collaboration.... We fund research that increases understanding in one of our two focus areas: programs, policies, and practices that reduce inequality in youth outcomes, and strategies to improve the use of research evidence in ways that benefit youth. We seek research that builds stronger theory and empirical evidence in these two areas. We intend for the research we support to inform change. While we do not expect that any one study will create that change, the research should contribute to a body of useful knowledge to improve the lives of young people." "This career development program supports promising early-career researchers with interests in reducing inequality or understanding the use of research evidence."

**LANGUAGE & AREA STUDIES**

American Institute of Indian Studies Fellowships
Deadline: July 1, 2019
"Senior Research Fellowships are available to scholars with a PhD or its equivalent. These grants are designed to enable scholars who specialize in South Asia to pursue further research in India and to establish formal affiliation with an Indian institution. Short-term awards are available for up to four months. Long-term awards are available for six to nine months. A limited number of humanists will be granted fellowships paid in dollars funded by the National Endowment for the Humanities. Senior Scholarly/Professional Development Fellowships are available both to established scholars who have not previously specialized in Indian studies and to established professionals who have not previously worked or studied in India. Senior Scholarly/Professional Development Fellows are formally affiliated with an Indian institution. Awards may be granted for periods of six to nine months. Senior Performing and Creative Arts Fellowships are available to accomplished practitioners of the performing arts of India and creative artists who demonstrate that study in India would enhance their skills, develop their capabilities to teach or perform in the U.S., enhance American involvement with India’s artistic traditions or strengthen their links with peers in India."

**STEM**

(Science, Technology, Engineering, and Mathematics)

American Psychological Foundation/Society for General Psychology Mary Whiton Calkins Grant
Deadline: May 31, 2019
"The APF/Society for General Psychology Mary Whiton Calkins grant encourages research that fits into the broad category of general psychology with..."
a particular interest in research that combines multiple subfields within the discipline or addresses overarching themes. The strongest proposals will align with one or more of Div. 1’s (Society for General Psychology) goals and will support faculty members who seek to promote coherence among psychology’s subfields. The grant will support faculty who teach at primarily undergraduate serving institutions and who identify undergraduate education as their primary focus.”

National Speleological Society
International Exploration Grants
Deadline: July 1, 2019

“National Speleological Society International Exploration Grants foster and encourage the work of NSS cavers in cave exploration, survey, photography and research projects around the world. Grants are given in support of group equipment for expeditions outside of the United States and its territories. Grants have varied between $200 and $1500 in past ten years and have supported caving on 6 continents by dozens of US cavers. Projects have included work in Mexico, Cuba, the Dominican Republic, Egypt, Borneo, Chile, Nepal, China, and many more countries. As few as three and as many as twelve grants have been given in a single year. Overall since 2008 more than $55,000 has been granted for nearly 70 expeditions in 25 countries.”

Ray C. Anderson
NextGen Committee Grant
Deadline: July 12, 2019

“The NextGen Committee will primarily judge proposals on their potential to help reverse global warming. The committee will secondarily consider the collateral social and environmental benefits of the project. Examples of projects could include: 1. Reduction of CO2e 2. Climate Communication and Education 3. Corporate engagement to advance climate goals 4. Other compelling proposals that help to reverse global warming in ways not mentioned above will also be considered.”

National Science Foundation
Social Psychology
Deadline: July 15, 2019

“The Social Psychology Program at NSF supports basic research on human social behavior, including cultural differences and development over the life span. Among the many research topics supported are: attitude formation and change, social cognition, personality processes, interpersonal relations and group processes, the self, emotion, social comparison and social influence, and the psychophysiological and neurophysiological bases of social behavior.”

American Psychological Association
APA Travel Grants for US Psychologists to Attend International Conferences
Deadline: July 15, 2019

“This award will cover or partially cover conference registration fees at international conferences held outside the United States and Canada for U.S.-based psychologists. APA and APAGS members are eligible to apply. A conference presentation is not required, although preference will be given according to the following criteria. 1. Significant contribution to the conference program (e.g., first author, symposium chair, roundtable moderator). 2. Have not attended an international conference in the past two years. 3. Early career or graduate student psychologist.”

National Science Foundation
Developmental Science
Deadline: July 15, 2019

“DS supports research that addresses developmental processes within the domains of cognitive, social, emotional, and motor development across the lifespan by working with any appropriate populations for the topics of interest including infants, children, adolescents, adults, and non-human animals. The program also supports research investigating factors that affect developmental change including family, peers, school, community, culture, media, physical, genetic, and epigenetic influences. Additional priorities
include research that: incorporates multidisciplinary, multi-method, microgenetic, and longitudinal approaches; develops new methods, models, and theories for studying development; includes participants from a range of ethnicities, socioeconomic backgrounds, and cultures; and integrates different processes (e.g., memory, emotion, perception, cognition), levels of analysis (e.g., behavioral, social, neural), and time scales."

National Science Foundation
Linguistics
Deadline: July 15
“The Linguistics Program supports basic science in the domain of human language, encompassing investigations of the grammatical properties of individual human languages, and of natural language in general. Research areas include syntax, semantics, morphology, phonetics, and phonology. The program encourages projects that are interdisciplinary in methodological or theoretical perspective, and that address questions that cross disciplinary boundaries, such as (but not limited to): What are the psychological processes involved in the production, perception, and comprehension of language? What are the computational properties of language and/or the language processor that make fluent production, incremental comprehension or rapid learning possible? How do the acoustic and physiological properties of speech inform our theories of natural language and/or language processing? What role does human neurobiology play in shaping the various grammatical properties of language? How does language develop in children? What social and cultural factors underlie language variation and change?”

American Physical Society APS Fellows
Deadline: July 16, 2019
“The criterion for election is exceptional contributions to the physics enterprise; e.g., outstanding physics research, important applications of physics, leadership in or service to physics, or significant contributions to physics education. Fellowship is a distinct honor signifying recognition by one’s professional peers.”

National Science Foundation
Faculty Career Development Program (CAREER), BIO, CISE, EHR
Deadline: July 17, 18, 19, 2019
“17th: BIO, CISE, EHR.
18th: ENG.
19th: GEO, MPS, SBE
CAREER: The Faculty Early Career Development (CAREER) Program is a Foundation-wide activity that offers the National Science Foundation's most prestigious awards in support of early-career faculty who have the potential to serve as academic role models in research and education and to lead advances in the mission of their department or organization. Activities pursued by early-career faculty should build a firm foundation for a lifetime of leadership in integrating education and research. NSF encourages submission of CAREER proposals from early-career faculty at all CAREER-eligible organizations and especially encourages women, members of underrepresented minority groups, and persons with disabilities to apply.”

American Association for the Advancement of Science and IF/THEN
AAAS-IF/THEN Ambassadors
Deadline: July 21, 2019
"The AAAS IF/THEN Ambassadors program brings together 100 women from a variety of science, technology, engineering, and mathematics careers to serve as high-profile role models for middle school girls. STEM professionals use their skills in many fields – including sports, fashion, gaming, manufacturing, entertainment, and music. The AAAS IF/THEN Ambassadors program highlights women in STEM who are contributing in all these fields and more, showing girls the different career pathways they can pursue and how STEM impacts their lives every day.”

National Science Foundation
Biological Anthropology
Deadline: July 22, 2019
"The Biological Anthropology Program supports
basic research in areas related to human evolution and contemporary human biological variation. Research areas supported by the program include, but are not limited to, human genetic variation, human and nonhuman primate ecology and adaptability, human osteology and bone biology, human and nonhuman primate paleontology, functional anatomy, and primate socioecology. Grants supported in these areas are united by an underlying evolutionary framework, and often by a consideration of adaptation as a central theoretical theme. Proposals may also have a biocultural or bioarchaeological orientation. The program frequently serves as a bridge within NSF between the social and behavioral sciences and the natural and physical sciences, and proposals commonly are jointly reviewed and funded with other programs."

International Association of Sound and Audiovisual Archives
Research Grants
**Deadline: Rolling**
"IASA regularly offers financial awards to encourage and support research and publication within the field of audiovisual archiving and preservation.... IASA will support a research project only if there is evidence that the results are within the scope of IASA's purposes. This includes, but is not limited to the care of, access to, and long term preservation of sound and audiovisual heritage including the development of best professional standards and practice for sound and audiovisual heritage."
